Saint Paul College reserves the right to change without notice any of the materials (information, requirements, regulations) published in this catalog. This catalog is not a contract.

Please refer to the College Web site, Course Schedule and campus postings for detailed information regarding hours of operation. Hours are subject to change.
In these tough economic times, you need a plan and a path to your future!

Let Saint Paul College be your #1 resource for a plan and a pathway to a bright future. Use this catalog to explore the many career opportunities available to you at Saint Paul College or visit our Web site at www.saintpaul.edu.

- Not sure what you want to do? Visit our Career Center to compare your aptitudes with your interests and determine a career field best for you.
- Wondering how to pay for College? See the helpful staff in our Power of YOU Office or our Financial Aid Office to see if you qualify for a scholarship, grant or student loan.
- Not sure if your credits will transfer? Stop by our Transfer Center. They will take a look at any classes you might have taken before and tell you what university you can transfer to when you have finished your program here.
- Don’t have time for all-day orientations and registration sessions? Visit us once, learn how and then you can do it all online after that! Even our student orientations are online! Plus you can start and finish several of our degree programs completely online!
- Don’t have a high speed computer at home? We have all kinds of computer labs and a wireless campus so you can do your homework here.
- Any more questions? Contact Enrollment Services and our friendly, helpful staff will be glad help you.

I am excited about all of the changes Saint Paul College has experienced and the new things we can offer you this year. New facilities, new programs, and more! Use this catalog as a resource to explore the many opportunities we have available for you. Learn even more about Saint Paul College by visiting our Web site at: www.saintpaul.edu.

We look forward to working with you! Best wishes for success with your college plans and your personal goals. Remember . . . when you start here, you can go anywhere!

Donovan Schwichtenberg, Ph.D.

Vision
Saint Paul College—A Community & Technical College will be a leader in providing comprehensive life-long learning by utilizing and providing innovative and quality-focused strategies and services.

Mission
The mission of Saint Paul College is to provide: Education for Employment… Education for Life!
Saint Paul College offers comprehensive learning opportunities in both career and transfer education to enhance personal knowledge and advance economic opportunity for the benefit of a diverse population of constituents which includes students, business/industry/labor and the community.

Strategic Goals
Comprehensive Learning Organization
Saint Paul College is committed to excellence in teaching and learning and offers a wide spectrum of learning opportunities in career and transfer education to meet learner needs.

Organizational Innovation and Development
Saint Paul College strives to ensure the successful future of the College through creative thinking and the implementation of quality principles to more efficiently and effectively utilize resources and improve learning and operations.

A Service-Centered Environment for Access and Opportunity
Saint Paul College is dedicated to an integrated service philosophy that focuses on learner needs.

Organizational & Community Partnerships
Saint Paul College is committed to apply systems to improve learning, communication and productivity.
Saint Paul College—A Community & Technical College reserves the right to change without notice any information published in this catalog. This catalog is not a contract. The College makes every effort to provide the courses, programs and services outlined in this catalog. However, academic calendars and the delivery of services are subject to modification. The name of the organization is Saint Paul College—A Community & Technical College, hereinafter referred to interchangeably as “the College” in policy and procedure statements.

Saint Paul College—A Community & Technical College is committed to a policy of nondiscrimination in employment and education opportunity. No person shall be discriminated against in the terms and conditions of employment, personnel practices, or access to and participation in, programs, services, and activities with regard to race, sex, color, creed, religion, age, national origin, disability, marital status, status with regard to public assistance, sexual orientation, or membership or activity in a local commission as defined by law.

Harassment of an individual or group on the basis of race, sex, color, creed, religion, age, national origin, disability, marital status, status with regard to public assistance, sexual orientation, or membership or activity in a local commission has no place in a learning or work environment and is prohibited. Sexual violence has no place in a learning or work environment. Further, Saint Paul College shall work to eliminate violence in all its forms. Physical contact by designated College staff members may be appropriate if necessary to avoid physical harm to persons or property.

Saint Paul College is committed to fostering an environment without discrimination and harassment. The College has a complaint process to review complaints of discrimination, harassment and sexual violence. Inquiries regarding compliance to Federal and State Laws and Statutes may be addressed to Thomas Matos, the Dean of Student Development and Services, who can be reached at 651.846.1362.

Refer to the Saint Paul College Student Handbook for important information that each student should read to assure success at the College.

Available in Alternate Format

This document is available in alternative formats to individuals with disabilities by calling 1.800.227.6029, 651.846.1547(V) / 651.846.1548(TTY) or email DisabilityServices@saintpaul.edu. Relay service is available for deaf and hard of hearing by calling 800.627.3529.

For assistance with alternative format catalog or other disability service needs, contact Shai Wise, Director of Disability Services Office at 651.846.1547(V) or 651.846.1548(TTY).
General Information

Accreditation
Saint Paul College—A Community & Technical College is accredited by The Higher Learning Commission of the North Central Association of Colleges and Schools. The College also holds program-specific accreditation by: The American Culinary Foundation Accrediting Commission, The Committee on Accreditation for Respiratory Care and the Commission on Accreditation of Allied Health Education Programs, the National Accrediting Agency for Clinical Laboratory Sciences, the Federal Aviation Administration and the National League for Nursing Accrediting Commission. The Practical Nursing Program is approved by the Minnesota Board of Nursing. The Automotive Service Technician Program has National Automotive Technician Education Foundation (NATEF) Certification. Business programs are accredited by the Association of Collegiate Business Schools and Programs (ACBSP).

Saint Paul College meets established standards and is approved for the instruction of veterans, orphans of war veterans, state and federal rehabilitation students and members of the workforce needing training or retraining. Saint Paul College meets the definition of an institution of higher education and students are entitled to participate in federal financial assistance programs.

Minnesota State Colleges and Universities
Saint Paul College is one of the 32 two-year and four-year colleges and universities in the Minnesota State Colleges and Universities system. The colleges in the system provide a wide array of opportunities for life-long education in academic and technical fields, ranging from short-term certificate programs to masters degrees. Approximately 29,000 students graduate from Minnesota State Colleges and Universities each year. Refer to the System Web site www.mnscu.edu for further information.

Alliances and Memberships
Students, Alumni & the Employer Connection
Saint Paul College offers undergraduate programs of two years or fewer to a widely diverse student population. Students are welcome regardless of their background, experience, or previous educational endeavors. The common goal of all students, however, is their desire for Education for Employment...Education for Life!

Alumni Relations
The College is establishing a unique Alumni Association to complement the educational process. All Saint Paul College graduates are encouraged to join. Call 651.846.1469 for further information.

Alliances with Business and Industry
Saint Paul College’s greatest asset is its success in providing employment opportunity for graduates. This is due to its partnerships with the businesses, industries and trade unions with whom we collaborate. Saint Paul College relies on these major stakeholders to:

1. Hire our graduates;
2. Serve on our Advisory Committees to ensure relevant and current curriculum content and instruction; and
3. Provide quality assurance and identity within the community.

The College’s relationships with businesses, industries, trade unions and alumni have remained strong to help ensure that the tradition of quality will be continuously enhanced through information, involvement and improvement.

Graduate follow-up is conducted each year. Program placement statistics remain consistently high and are available for each program at Saint Paul College.

Job Placement
The Career and Placement Center provides assistance to students and graduates in their search for part-time and full-time employment. This assistance is a life-long service to students and graduates of Saint Paul College.

Assistance includes:

- Posting of part-time and full-time job openings from employers who contact the College regularly
- Posting of job openings received from the Minnesota WorkForce Center
- Internet access to additional job opportunities nationwide
- Direct electronic mailing of job leads to graduates
- Cover letter and resume development
- Coordination of on-campus interviews with employers

The Career and Placement Center conducts an annual follow-up of Saint Paul College graduates to determine the job status of the most recent program graduates. This information may be obtained from the Job Placement/Employment Office or from the College Web site at www.saintpaul.edu/resources/careers/. For further information on the Career and Placement Center, please contact the Director of Career and Placement at 651.846.1384.
PEPNet Midwest Postsecondary Education Programs Network

The U.S. Department of Education, Office of Special Education and Rehabilitative Services, Office of Special Education Programs, established the Midwest Center, PEPNet-Midwest, at Saint Paul College - A Community & Technical College under a five-year agreement in October of 2006. The purpose of PEPNet is to improve transition services and educational access for students who are deaf or hard of hearing including those with co-occurring disabilities, thus enhancing educational opportunities for individuals following thirteen Midwestern states: Iowa, Illinois, Indiana, Kansas, Minnesota, Michigan, Missouri, Nebraska, North Dakota, Ohio, Oklahoma, South Dakota, and Wisconsin. A Coordinating Council of Model Programs addresses the outreach activities and dissemination through contracted outreach sites that are assigned by geographic area and population densities. Four sites, the University of Wisconsin – Milwaukee, Milwaukee, Wisconsin, Rockford Center for Sight and Hearing, Rockford, Illinois, Tulsa Community College, Tulsa, Oklahoma, and Saint Paul College, in St. Paul, Minnesota all provide the direct contacts with each State in the Midwest Region.

PEPNet-Midwest and its outreach sites provide technical assistance and dissemination information to secondary and postsecondary institutions in order to improve existing services, and to establish new services for students who are deaf. The center works primarily at an institutional level to increase the capacity of colleges, universities, and other postsecondary institutions to attract and serve deaf students. To achieve these tasks, PEPNet-Midwest utilizes interdisciplinary networks of personnel through the Midwest region and the PEPNet consortium, with an expertise in the use of technology, including web-based applications in postsecondary training efforts and service provision to students. PEPNet-Midwest plans to continue its ongoing activities, while planning greater outreach to three groups: professionals and students at a secondary level, culturally diverse deaf students, and deaf consumers with multiple disabilities.

For more information about PEPNet-Midwest, or to be placed on the mailing list, contact 651.846.1337 V/TTY, 651.221.1339 FAX. Please visit our Web site at www.pepnet.org.

Customized Training & Continuing Education (CTAC)

Putting People on the Cutting Edge

In the fast-paced business economy of today and tomorrow, the need to improve quality standards, increase service standards and respond to rapidly changing technologies and markets becomes critical. The answer is Customized Training & Continuing Education, a Division of Saint Paul College, which meets customer needs for: employee assessment, training, design and delivery of training and training products/services at the place of business and conferences/workshops/seminars.

Your One Source for Training

Saint Paul College provides Minnesota employers with customized training and tools to educate, retrain, or update their employees for today's ever-changing business world. Today Customized Training & Continuing Education works with hundreds of companies in the Twin Cities. Training is provided in a wide variety of areas, including Information Technology, manufacturing/technology, leadership/organizational skills and total quality management programs.

Training is provided in the format that works best with the client and their employees, for example:

- **Web-Based Training** features over 100 Courses.
- **Seminars** provide information to participants on important, timely topics.
- **Workshops** are designed to include intense activities to influence employee application of new behaviors, attitudes, or skills.
- **Courses** are aimed at increasing skills or specific knowledge relating to employment and are held over a period of time. Time is allowed for practice, lab work, or independent study.

Whatever the format, you can be assured of thorough, professional training that will effectively bring bottom-line results to your company. “In the end, competitive advantage is not in the technology, but in the people who invent and use it.”—ASTD Report on Technical Training in America, how much and who receives it.

Training Programs:

- AutoCAD
- Leadership 2000
- Lean/Flexible Manufacturing
- Lean Healthcare
- Supervisory & Management Training
- Quality Initiative Training
- Consulting Services Organizational Needs and Individual Skills Assessment

Location

Customized Training & Continuing Education is located at 317 Marshall Avenue, just west of the Saint Paul College Main Campus. Any CTAC class can be offered at your work site or custom tailored to meet your employee's need. Call 651.846.1800 for more information.
Enrollment Services

Admissions Process
Saint Paul College welcomes applications for admission to the College. Admission to college majors is based on assessment results and potential to succeed in a program. Admission to many individual courses is open; however, admission to some courses is based on meeting course prerequisites and program admission requirements.

Admission to a Major Program
Students are accepted into a major program for the purpose of obtaining a specific degree, diploma, or certificate. Students may change their major program by meeting the prescribed admission requirements for the desired program.

Application Procedure
If you have not applied to or enrolled at Saint Paul College in the past, follow this application procedure:

2. Your bill will reflect a one time non-refundable $20 application fee within 48 hours of your application submission. To pay this fee make checks payable to Saint Paul College.
3. Complete the Assessment in reading, writing, and math or complete the English as a Second Language (ESL) Assessment if you are a non-native speaker of English. Call 651.846.1555 for more information. Scores must be turned in to the Office of Enrollment Services. If you have taken the ACT or SAT exam in the last 5 years and scored 24 or higher on the related ACT individual subscore or 550 on the SAT individual subscore, you may not have to take part or all of the placement exam. Please bring a copy of your ACT or SAT scores to the Transfer Center (Room 1365) for further review.
4. Request high school transcripts and/or GED scores, as well as official transcripts, from all secondary and post-secondary institutions attended be sent to Saint Paul College.
5. If you have previously applied, enrolled, or requested information from Saint Paul College please contact the Office of Enrollment Services so your records can be updated.

Some major programs require additional assessment. Applicants will be notified if their program requires additional assessment.

Assessment requirements may be waived based on previous college experience as validated by college transcripts and as determined by the Director of Enrollment Services.

Intake Assessment
Saint Paul College and the Minnesota State Colleges and Universities system require assessment of basic academic skills. The College uses the Accuplacer assessment tool.

The assessment for English native language speakers covers reading comprehension, sentence skills and mathematical computation. The assessment for students whose native language is not English take the English as a Second Language (ESL) assessment. This assessment covers the understanding of English grammar structures and listening comprehension. Students may be assessed in additional subjects for admission to selected programs or placement into certain courses.

These assessments are available on a walk-in basis in the Assessment Center in Room 3115 and usually take from 1 1/2 to 2 1/2 hours to complete. ESL assessment scores determine ESL course placement. In some cases, assessment results may indicate that the student may benefit from developmental coursework in reading, writing, grammar and/or math prior to entering a major program.

Please call 651.846.1555 for additional information about the assessment process.

The assessment requirement may be waived depending on previous college experience and/or college coursework. Contact the Transfer Center to have previous college transcripts reviewed for an assessment waiver.

Application Procedure for Transfer Students
Students seeking admission to Saint Paul College based on previous college coursework should contact the Transfer Center at transfer.center@saintpaul.edu or 651.846.1739.

Students seeking a degree, diploma, or certificate, who have previously attended accredited institutions, must have all official transcripts sent directly from the previous colleges to the Saint Paul College Records Office. If a transcript is hand-carried by the student, it is to be delivered in a sealed envelope. Student copies and faxed transcripts are not considered official but can be used for admission purposes.

Re-Admission
Students who have interrupted attendance at Saint Paul College must contact the Office of Enrollment Services to apply for re-admission. To have assessment tests waived based on coursework completed at another institution, contact the Transfer Center at 651.846.1739.

Undeclared Students
A student who has not applied for admission to a major program may register for up to 8 credits. Some classes may be limited to students admitted to a specific major or may have course prerequisites. Undeclared Students are not assigned a faculty advisor and do not qualify for financial aid or veterans’ educational benefits.
General Information

If at a later date the student decides to pursue a degree, diploma, or certificate, the credits earned as an ‘Undeclared’ Student may apply toward a program.

Change of Major
Students who have been admitted to Saint Paul College in a specific major program and want to change that program need to complete the Change of Major Form at the Office of Enrollment Services. Mid-semester major program changes are not permitted. The change of major program will be effective for the next semester.

Credit for Prior Learning
Saint Paul College offers adult students with sufficient work, non-college credit and/or life experiences the opportunity to document competencies relevant to specific course offerings at the College for prior learning credit. Credits earned from prior learning must be applicable to the student’s program of study at Saint Paul College and are evaluated for credit by qualified faculty members. Credit for Prior Learning is not available if a CLEP exam exists for that course. Note: Credits earned through Credit for Prior Learning may not transfer to other colleges.

Post-Secondary Enrollment Options Program (PSEO)
The PSEO program enables Minnesota high school juniors and seniors to take college classes for high school and college credit. The purpose of the program is to promote rigorous academic pursuits and provide a wider variety of options than may be available in high school. Students may attend either part-time or fulltime. Tuition, fees and textbooks are provided at no cost. For more information about the PSEO Program, please contact the Office of Enrollment Services at 651.846.1555.

Tech Prep
Tech Prep affords high school students an opportunity to receive college credit in many subjects. Tech Prep programs effectively blend academic and technical education in a challenging and purposeful course of study that can lead to employment and credit toward further education. Since the workplace has changed significantly enough to require some training after high school, but not necessarily a full four-year degree, tech prep programs offer viable new options for high school students who want to connect learning with life.

Tech Prep credit is awarded for high school classes in Business, Child Development, Culinary Arts, Carpentry, Automotive Service and many other subjects. Many programs are articulated between Saint Paul Public Schools and Saint Paul College. Consult a high school counselor for more information concerning Tech Prep.

Transfer of Credits from Other Institutions
Saint Paul College will review requests for transfer credit from individuals who completed coursework at other accredited post-secondary institutions. The number of credits transferred to Saint Paul College is dependent upon the specific requirements of each program or degree offered at Saint Paul College. Transfer credits will appear on the Saint Paul College transcript and can be used to satisfy the program graduation requirements but will not be used to calculate the grade point average.

Students interested in receiving transfer credit must submit official transcripts to the Student Records Office. Upon admission to the college, transcripts will automatically be reviewed to determine transferable credits. Each credit to be considered for transfer must be supported by an official transcript from the originating institution and must be approved by a transfer specialist and/or the student’s Faculty Advisor prior to the awarding of credit. Students who change programs should request a re-evaluation of their transcript credit.

Treatment of Grades
Grades earned prior to transfer are evaluated according to the following standards:

All college courses in which a student has received a grade of A, B, C, or D shall be considered for transfer evaluation. P grades shall be accepted as earned credit. Students retain the right to appeal the acceptance of credits.

Comparability
Courses approved for transfer must be comparable in nature, content and level and match at least 75% of the content and goals of the course syllabus for which the student is seeking equivalent credit.

Time Limit for Courses
General education courses shall have no transfer time limit. Additionally, technical courses applying toward an Associate of Arts degree shall have no transfer time limit.

To ensure students graduate with up-to-date skills, technical credits are valid for five years or have a five-year “lifespan.” This includes transfer technical credits which are used for specific technical program requirements. Technical courses that are beyond the five-year limit may be accepted, based on currency, relevancy and the student’s current work experience.
Degree Residency
A student shall earn a minimum of 20 credits for all associate degrees at the College. The residency requirement shall be reduced to 12 credits for students transferring with at least 12 college-level credits from another Minnesota State Colleges and Universities institution or the University of Minnesota. One-third of the credits required for a diploma, certificate, or the Minnesota Transfer Curriculum (MnTC) must be earned at the College.

Equivalency
The number of transfer credits granted per course shall not exceed the number granted by the originating institution. All quarter credits will be converted to semester credits.

Additional Types of Transfer Credit

AP—Advanced Placement Exams (for High School Students)
Advanced Placement gives high school students an opportunity to take college-level courses in various subject areas. A score of 3 is the minimum for credit awarded. Grades of 3, 4 or 5 qualify students for credit and/or placement into advanced courses at Saint Paul College. Credit can be given for a specific college course if a test covers substantially similar material. If the test material does not match an existing course, students will be given elective credits.

CLEP—College Level Examination Program
Saint Paul College will consider CLEP exam credits for students who want to test out of general education courses and selected business courses. A maximum of 30 credits may be applied toward an associate degree. No letter grades will be recorded on the transcript. Credit will be awarded based on the American Council on Education (ACE) recommendations. Credit will not be given which repeats completed coursework.

Note: Colleges establish their own policies for accepting CLEP credit. Students should consult their transfer college’s CLEP policy to determine whether CLEP credits will transfer and/or how they will be accepted. Consult the College Board Web site (www.collegeboard.org) for testing locations, fees and exam information.

Note: CLEP exams have changed and there are no longer General Exams as distinguished from Subject Exams. Computer-based CLEP exams administered prior to July 1, 2001 have the same score scale and credit granting score as its paper-based counterpart. All CLEP computer-based testing (CBT) exams administered after July 1, 2001 have a uniform ACE recommended credit granting score of 50 for all subjects.

Credit for Life Work/Work Experience (Prior Learning)
Prior Learning (Competency-Based Education) allows students to present nontraditional learning as competencies to be evaluated for credit by qualified faculty members towards their educational program. These competencies must be the equivalent of what would have been achieved through college coursework. At Saint Paul College, Credit for Prior Learning offers, on a limited basis, students with sufficient work, non-college credit and/or life learning experiences, the opportunity to document competencies and theory learning relevant to specific courses offered at the College. Credits earned from prior learning must be applicable to the student’s program of study. The Credit for Prior Learning option may be available for a limited number of courses. Students interested in pursuing the option of earning credit for prior learning must discuss this option with the assigned Faculty Advisor and the Prior Learning Coordinator.

IB—International Baccalaureate for (High School Students)
The International Baccalaureate (IB) program is an internationally recognized program through which high school students complete a comprehensive curriculum of rigorous study and demonstrate performance on IB examinations. Students may present a full IB diploma or a certificate recognizing specific higher level or standard level test scores. Credit is awarded for the IB Diploma; credit may be awarded for subsidiary level exams at the higher level with a score of 5 or higher.

International Transcripts
Saint Paul College does not evaluate international transcripts. Students who have completed courses in another country must have their transcripts evaluated by a third-party evaluation service. Colleges and universities differ in how they accept these courses. For more information contact the Transfer Center.

Military
Credit for Army training may be obtained by submitting an Army/American Council on Education Registry System transcript from the Army directly to the college or university. ACE (American Council on Education) translates military courses and occupations into academic credit and provides guidelines to interpret and recommend credit for formal service-school courses, demonstrated proficiency in military occupations and college-level tests. Service members must have separated or retired by 1981.

Credit for Sailor and Marine training may be obtained by submitting a Sailor/Marine American Council on Education Registry Transcript (SMART). Service members must have separated or retired from active duty on or after October 1, 1999.
Credit for Air Force training may be obtained by submitting a request to the Community College of the Air Force or going to the nearest Air Force base education office.

Service members with credits/training for the Army pre-1981 and Sailors/Marines pre-1999 must request a DD295 and submit it for college credit award review.

Saint Paul College uses A Guide to the Evaluation of Educational Experiences in the Armed Services as a guide to award credit for military learning.

DANTES—Defense Activity for Non-Traditional Education Support

The DANTES program supports the voluntary educational program for active military personnel and members of the National Guard and Reserves. The DANTES Subject Standardized Tests (DSSTs), however, are now available for use by civilians at universities and colleges throughout the country. The DSSTs are a series of examinations in various college and technical subjects. The DSST program allows students the opportunity to demonstrate college-level learning acquired outside the classroom. All tests carry ACE (American Council on Education) credit recommendations. Saint Paul College will honor the ACE recommendation and accept courses applicable to a program or course of study.

SOC—Service Members Opportunity Colleges

Recognizing the problems faced by military students whose jobs require frequent moves, SOC member schools make it easier to obtain college degrees by the following:

- Limiting the amount of coursework students must take at a single college to no more than 25% of degree requirements;
- Designing transfer practices to minimize loss of credit and avoid duplication of course work;
- Awarding credit for military experience; and
- Awarding credit for tests such as CLEP, RCEP and DSST national testing programs.

Colleges and universities that participate in the network degree programs for the Army, Navy and Marine Corps agree to:

- Guarantee to accept each other’s courses in transfer within curriculum areas such as management, computer studies, interdisciplinary studies and others.
- Award credit for military service schools and occupational experience.

Developmental Coursework

Developmental coursework has assisted thousands of students in getting started in College programs. The goal of developmental coursework is for students to acquire the necessary knowledge and skills that will help them succeed in programs.

Developmental coursework is delivered via traditional classes or as computer-based instruction where the students work independently in the Learning Center under the supervision of faculty and support staff.

Intensive English Program (English as a Second Language)

The purpose of English-as-a-Second-Language (ESL) coursework is to assist limited-English speakers from different ethnic and cultural backgrounds to learn English and increase their chances of success at Saint Paul College. The faculty of this area can communicate with several different language groups. This program offers a variety of support services and specially tailored classes to meet the unique needs of ESL students.

Immunization Requirements

Minnesota Law (M.S. 135A. 14) requires that all students born after 1956 and enrolled in a postsecondary educational institution be immunized against measles, rubella, mumps and diphtheria, and tetanus after 12 months of age and within 10 years of first registration, allowing for certain specified exemptions. Students must submit a statement indicating the month and year of each immunization at the first registration for classes or no later than 45 days after the start of their first term. Students born in 1956 or before are not required to provide this information. Students who graduated from a Minnesota high school in 1997 or later are also exempt.

The Immunization Record form is designed to provide the College with the information required by law and will be available for review by the Minnesota Department of Health.

Students enrolled in Health programs are required to obtain additional immunizations in accordance with clinical site policy. For more information regarding immunization requirements and resources available to meet those requirements, contact Enrollment Services.

Background Checks Policy

Designated Health and Child Development Careers program students are affected by the following:

Minnesota Statutes require that the Department of Human Services (DHS) conduct background studies on individuals providing direct contact services to people receiving services from facilities and agencies licensed by DHS and the Minnesota Department of Health (MDH). Direct contact is defined as providing face-to-face care, training, supervision, counseling, consultation, or medication assistance to people receiving services from the agency or facility.

An individual who is disqualified from having direct contact with persons served by the program as a result of the background study and whose disqualification
Registration

The Saint Paul College Course Schedule and Web site contain a listing of classes that are available each academic term and are available approximately six weeks before the beginning of each term. The Course Schedule lists the courses, number of credits, class times, instructors’ names, room numbers and prerequisites, whenever possible. Registration dates and guidelines are included with the schedules.

Returning students in a declared major have registration priority. Students are encouraged to work with a Faculty Advisor when planning their classes. Students who have questions, or who need help in making career decisions, should make an appointment with the Director of the Career and Placement Center.

Class sizes are limited. Closed class lists are posted on the Saint Paul College web site.

Registration for classes takes place each semester and summer term. Information on how and when to register is provided to new students when they are accepted for admission. Information is posted on the Web site for returning students. Not all courses listed in the College Catalog are offered every term.

A Registration Schedule is published for each term and indicates assigned dates and times for registration. New students can register for classes following orientation sessions. Returning students register after consulting with their Faculty Advisor and according to the following procedures:

Registration Process for New and Returning Students

1. Select courses, noting course ID numbers.
2. Login to your student account and register online.
3. Pay tuition at the Tuition Office or online with a credit card and print a fee paid statement. Tuition/fees will be deferred for students who have applied for financial aid and received an official award letter. The award letter should be processed by the tuition/fee due date prior to each semester.
4. Purchase books and supplies and attend classes. If purchasing books and supplies with agency funding, a book voucher can only be used the first five days of the fall and spring semesters and the first two days of summer term.

HELPFUL HINT
Pay for books with your own money and buy them prior to the start of class either at the bookstore or online at www.saintpaulcollegebookstore.com. This will help to avoid the long lines at the Bookstore in the first week of the semester.

Adding, Dropping, or Withdrawing

All students, including those receiving financial aid, will be assessed tuition and fees for the term based on the number of credits for which they are registered on the 5th day of the term.

Students may add courses at any time during the published “add” period for each term. Students who drop a course through the 5th day of a term, may receive a tuition refund (pro-rated for summer term). All refunds are mailed and take approximately two weeks to process from the date received.

Students may withdraw from classes to receive a “W” grade from the 6th day of the term through the posted date of withdrawal for the term. For courses that do not run the entire term, withdrawal is permitted before 75% of the class session is over. Students must withdraw from courses online. No refund is permitted after the 5th day. Courses from which a student officially withdraws will be assigned the letter grade “W” (withdraw). Refer to the current Course Schedule for details.

Students who do not plan to attend class during the first week of classes (or do not plan to log on for the first day of an online class) need to make arrangements for all absences in advance with their instructor. Students who miss class the first week without making prior arrangements with their instructor may be deregistered from class. During add/drop periods this may result in others signing up for the available space in the class.
Satisfactory Academic Progress Guidelines

Saint Paul College has a Satisfactory Academic Progress policy which requires degree seeking students upon registering for 6 or more credits to maintain a cumulative grade point average of at least 2.0 and a completion rate of at least 67% of the cumulative credits attempted with earned grades of A, B, C, D, F, W or P. If these requirements are not met, students will be put on academic probation.

Probation

Students placed on Grade Point Average (GPA) probation will have a registration hold placed on their academic record which will prevent them from registering in future terms. Students must contact a Retention Coordinator to have the hold released.

Students placed on GPA probation with a GPA of below 2.0 are required to enroll in and successfully complete CSCR 1402 and CSCR 1401 in the next term for which they register. Students who do not register for, withdraw from, or do not successfully complete CSCR 1402 and CSCR 1401 may be indefinitely suspended from the College.

Students placed on GPA probation prior to the Spring 2007 term who have had a lapse in enrollment must enroll in a college success workshop designed for students on academic probation. Students who do not successfully complete the college success workshop may be suspended indefinitely.

Students placed on progress probation or students continuing on probation will have a registration hold placed on their record that can only be removed once the student has completed the following:

1. Scheduled a time to meet with a Retention Coordinator
2. Completed and signed a Probation Agreement form.

In order for students to be removed from probationary status they must achieve a cumulative 2.0 GPA and/or a 67% completion rate in their cumulative attempted credits. Students can remain on continuing probation as they attempt to raise their cumulative grade point averages and/or cumulative completion rate with approval from a Retention Specialist. However, a student must achieve a cumulative grade point average of 2.0 to graduate from Saint Paul College.

Academic Suspension

Students who fail to meet satisfactory academic progress standards in their probationary period by not earning a term GPA of at least 2.0 and/or at least a 67% term completion rate will be suspended for a minimum of two consecutive major semesters.

Appealing Academic Suspension

Appealing due to catastrophic extenuating circumstances. Students who believe they failed to achieve satisfactory academic progress due to catastrophic extenuating circumstances may file an appeal to their suspension prior to taking the required two major terms off. However, students must be able to provide documentation supporting their claim of catastrophic extenuating circumstances interfering with their ability to be successful in school.

Appealing for reinstatement after serving the required two terms. Students who have served their suspension period must appeal for reinstatement by writing a letter stating the changes that have occurred that will allow them to be successful in school along with submitting the required suspension appeal paperwork.

Readmission after a Suspension Period. Students whose Suspension Appeals are approved must develop an academic plan with a Retention Coordinator. They must enroll only for the classes approved on their academic reinstatement course plan, which will include CSCR 1402 and CSCR 1401. Changes to the schedule must be approved by the Dean, or Associate Dean, of Student Development and Services. Students who do not register for, withdraw from or do not successfully complete, CSCR 1402 and CSCR 1401 may be suspended indefinitely.

Students with approved petitions will remain on probation. However, if the student fails to meet satisfactory academic progress standards during the term the petition is granted, they will be suspended indefinitely.

Academic Forgiveness Policy

The Academic Forgiveness policy is available only to students whose coursework was taken at Saint Paul College (formerly St. Paul Technical College). The policy is a one-time opportunity. The student cannot have been enrolled at Saint Paul College for a minimum of two calendar years (24 months) and the student must have a cumulative GPA of less than 2.0. The coursework forgiven will remain on the student’s transcript; however, the credits and the grades will not be carried forward into the student’s cumulative grade point average. The student will be permitted to pick and choose courses within the semester to be forgiven. Only D’s and F’s can be forgiven. If more than one term is forgiven, they must be consecutive terms. A maximum of two terms may be forgiven. In order to meet eligibility requirements for Academic Forgiveness, the student must have completed a minimum of 12 credits in residence at Saint Paul College with at least a 2.0 GPA after returning from the minimum 2-year absence. The student must apply for Academic Forgiveness within one calendar year after completing the 12 semester credits with at least a 2.0 GPA. Work completed at another institution cannot be used to satisfy this requirement.
Student Records
Saint Paul College Student Records Office is the official recorder of the students’ academic records.

Student Transcripts
Requests for Saint Paul College transcripts and other related records, must be processed through the Student Records Office. All financial obligations to Saint Paul College must be met before transcripts can be released.

An official transcript is issued, for a fee, upon written request or through online submission and is sent to a third party, such as another institution or employer, within three business days. The transcript will serve as the official record of student effort while enrolled at the College. There is an additional fee for next day service, if requested.

Tuition and Fees

Tuition Rates
The Board of Trustees for Minnesota State Colleges and Universities establishes tuition rates annually. Tuition rates are established on a per-credit basis for all credit course offerings and are subject to change. The Course Schedule lists tuition and fee rates for the term.

Student Fees
All students registered for credit courses are assessed a Student Senate fee. The per-credit fee is assessed for students beginning with the first credit. The fee is also assessed during the summer term. The Minnesota State College Student Association also assesses a per-credit fee each term. All fees are subject to change.

Technology Fee
A technology fee is charged as allowed by the Minnesota State Colleges and Universities. The technology fee is used to pay for instructional equipment and materials such as computers and software, audio-visual equipment, library technology and support staff.

Tuition Payment
Tuition and fees are due by the posted date or the student may be dropped from their classes. To retain classes, the Tuition Office must either have full payment, a completed Facts Payment Plan application, or received a Financial Aid Award Letter, a certified student loan, a scholarship or a third party authorization. Refer to the Saint Paul College—Tuition & Fees Payment Options handout at the Tuition Office for more information.

Students who are qualified senior citizens (over 62) may be able to attend classes at a reduced tuition rate. Refer to the current Course Schedule for details. Registration is allowed at this rate beginning with the second class session on a space-available basis.

Non-Payment of Tuition
Students who have not paid their tuition by the posted due date may lose their place in each registered class.

Refer to the current Course Schedule for further details.

Tuition/Fee Deferments
Tuition/fees will be deferred for students who have applied for financial aid, have a complete file and have received an official award letter from the Financial Aid Office indicating aid eligibility. Students should allow a minimum of 4–6 weeks for financial aid processing. The award letter must be processed by the tuition/fee due date prior to each semester.

Note: Students who have applied for financial aid but have not received an award letter by the tuition due date, should contact the Tuition Office for payment arrangements until an award letter is received.

Refunds for Total Withdrawal from College
Students who withdraw or drop from all courses must give formal notification to the College by withdrawing or dropping online from all classes to be eligible for a tuition refund according to the schedule below. Failure to attend class does not constitute withdrawal.

Withdrawal Period—
Fall & Spring Terms
Prior to the 1st day of the term . . . . . . . . . . . . . . 100%
1st through 5th class day of the term . . . . . . . . . . 100%
6th through 10th class day of the term . . . . . . 75%
11th through 15th class day of the term . . . . . . 50%
16th through 20th class day of the term . . . . . . . . . . 25%
After the 20th class day of the term . . . . . . . . . . . . . . 0%

Withdrawal Period—
Summer/Other Terms
(At least 3 weeks but less than 10 weeks in length)
Prior to the 1st day of the term . . . . . . . . . . . . . . 100%
1st through 5th class day of the term . . . . . . . . . . 100%
6th through 10th class day of the term . . . . . . 50%
After the 10th class day of the term . . . . . . . . . . . . . . 0%

Refunds for Change of Credit Load
Schedule changes (ADD/DROP) will be handled through the Office of Enrollment Services through the 5th day of the term. No tuition refund will be made, nor will fees be reduced by dropping part of the credits, after the 5th day of the term.

Refunds for Summer Session Classes
The above refund schedules are pro-rated for summer session. Consult the Office of Enrollment Services for details on summer refunds.
Refund Time Frame
Refunds for tuition payments made by cash or check will be via check only and mailed to the student. Credit card payments will be refunded to the same credit card that was used when the tuition was paid. A minimum of one week is required to process cash and credit card refunds. A minimum of two weeks is required to process refunds for tuition and fees paid by check.

Waivers
Saint Paul College may waive amounts due to the College for the following reasons: employee benefits provided by bargaining agreement, death of a student, medical reasons, college error, employment related condition, significant personal circumstances, student leader stipends, course conditions, natural disasters or other situations beyond the control of the College. The College cannot waive the MSCSA student association fee. Contact the Student Records Office to request a Tuition Waiver Form if you feel you are entitled to a waiver.

Financial Aid

General Information
Financial aid is money that is available to help students finance the cost of their education. Financial aid comes in the form of grants (money that the student does not have to pay back), loans (money that the student must pay back) and college work-study (money the student earns through employment). Eligibility is determined from the results of the Free Application for Federal Student Aid (FAFSA).

The student and his or her family have the primary responsibility to pay for the student’s education. Financial aid is intended to supplement the difference between the cost of education and the expected family contribution. Several programs are available to help students meet their educational expenses. The Financial Aid Office will calculate financial aid eligibility after receiving FAFSA results and all required documents.

The student must declare a major and be admitted to a program at Saint Paul College that leads toward a degree, diploma, or eligible certificate to be qualified to receive financial aid. For additional information, contact the Financial Aid Office at 651.846.1386.

Financial Aid Definitions
- FAFSA—The FAFSA is the Free Application for Federal Student Aid. This is the form that allows the student to apply for all types of financial aid: grants, loans, or college work-study.
- What is the Cost of Education? The cost of education includes tuition, fees, and an allowance for room and board, books, supplies, transportation and personal expenses.
- What is Expected Family Contribution? An amount, determined by a formula called Federal Methodology, that indicates how much of the student and his or her family’s resources should be available to help pay for school. The Expected Family Contribution (EFC) is used in determining the student’s eligibility for federal and state financial aid. If a student has unusual expenses that may affect his or her ability to pay for school, the student should notify the Financial Aid Director.
- What is Financial Need? Financial need is the difference between the cost of education and the expected family contribution calculated by the federal processing center.
- Full-Time Enrollment: 12 credits or more per semester.
- Three-Quarter-Time Enrollment: 9–11 credits per semester.
- Half-Time Enrollment: 6–8 credits per semester.
- Less Than Half-Time Enrollment: 5 credits or fewer per semester.

Types of Financial Aid
The following types of financial aid are available at Saint Paul College:

Grants
Grants are gift aid, which the student does not have to pay back. Students who have completed a bachelor’s degree, or the equivalent from another college, are not eligible for grants.

Federal Pell Grant
Students may apply for the Federal Pell Grant by completing the FAFSA. Pell Grants vary from $890 per year up to the federally legislated maximum. Pell Grant recipients must be enrolled in an eligible program.
Federal Supplemental Education Opportunity Grant (SEOG)
This program is designed for students who have exceptional financial need. Funds are limited and eligibility is determined by the Financial Aid Office.

Academic Competitiveness Grant, ACG
This is a grant for students who graduated from high school after January 1, 2006 for a first year grant or after January 1, 2005 for a second year grant. In addition, student must be Pell Grant eligible, enrolled in a one year program and have completed a rigorous high school program as determined by the applicable state and recognized by the Secretary of Education. Go to www.fafsa.ed.gov for more information regarding eligibility and the application process.

Minnesota State Grant
This is a grant for Minnesota residents. Awards are similar to the Pell Grant. Students apply by completing the FAFSA. Minnesota State grant eligibility requires the FAFSA be received within the first 30 days after the term begins.

Minnesota Child Care Grant
This grant is for students who are Minnesota residents, have children 12 and under (14 and under, if handicapped), have financial need and have child care expenses. Recipients must not be receiving Minnesota Family Investment Program (MFIP) assistance. Students who have received an award letter may request an application from the Financial Aid Office.

Minnesota Achieve Scholarship
The Minnesota Achieve Scholarship provides financial assistance to Minnesota resident students who complete a qualifying secondary school program and are attending a Minnesota institution. Students must graduate from high school after January 1, 2008; be a student from a family with an adjusted gross income of less than $75,000 for the previous tax year and apply no later than 30 days after the term starts.

Work-Study Programs
- Federal Work-Study
- State Work-Study

These programs employ students on campus. Pay is established by the College. These programs provide work for up to 20 hours per week. Total work-study earnings cannot exceed the cost of attendance. Students must be registered for at least 6 credits to qualify for work-study.

Loans
Loans are financial aid that must be paid back. The student must complete online Entry Loan Counseling and be registered for 6 credits. Need based and non-need based loans are available.

Federal Stafford Loan
Whether or not students qualify for a grant, they can get help to meet their educational expenses by borrowing money from the Stafford Student Loan Program or one of several available loan programs. Depending upon eligibility, first year students may borrow up to $3,500 per academic year, and second year students, up to $4,500.

Federal Plus Loan Program (PLUS)
The Plus Loan Program for undergraduate students can be used by parents of dependent students who are in need of additional funds to meet the cost of education. The program allows parents to borrow up to the cost of attendance minus other aid.

Supplemental Loan for Students (SELF)
The SELF program is a long-term, low interest educational loan provided by the State of Minnesota. The SELF loan is for students who cannot obtain the financial aid they need from the existing need-based aid programs. The Minnesota Office of Higher Education (MOHE) is the only lender in the program. The amount a student may borrow depends on other loans the student may already have and is limited by state regulations. The student must have a credit-worthy cosigner in order to apply for the SELF loan.

Other Sources of Financial Assistance
Several government and private agencies provide financial assistance to eligible students. Contact the local office of the following agencies for consideration.

- Division of Rehabilitation Services (DRS/DVR) www.deed.state.mn.us/rehab
- Minnesota Indian Scholarship Program www.ohe.state.mn.us
- Veteran Benefits (VA) www.vba.va.gov
- Minnesota Department of Veterans’ Affairs www.mymilitary.education.org
- Minnesota Educational Assistance for War Orphans www.ohe.state.mn.us
- Minnesota Migrant Council (MMC)
- Services for the Blind (SSB) www.mnsssb.org

How to Apply for Financial Aid

1. Apply for admission to Saint Paul College. Students must declare a major and be enrolled in a program leading to a degree, diploma or eligible certificate to qualify for financial aid. Awards vary based on enrollment level (full-time or part-time). Financial aid will be based on the number of enrolled credits at the end of the drop/add deadline.

2. Fill out the Free Application for Federal Student Aid (FAFSA). It is recommended you apply electronically through the U.S. Department of Education’s Web site at www.fafsa.ed.gov. Complete the FAFSA Pre-Application Worksheet available on the web site before applying electronically. Enter the Saint Paul College school code, 005533, so the Financial Aid Office will receive an electronic copy of the results. An Institutional Student Information Record, (ISIR) should arrive in 2 weeks.

3. If other post-secondary schools have been attended prior to attending Saint Paul College, request an official academic transcript be sent to the Student Records Office for credit evaluation. This is a requirement for Minnesota State Grant eligibility.

4. Once the Financial Aid Office receives the ISIR electronically from the Student Federal Aid Program, the student’s application will be reviewed for accuracy and completeness. It is important that any requests for additional information be responded to immediately. When the file is complete, financial aid eligibility will be calculated and an email will be sent indicating the Award Letter, accessible at the College’s Web site through the student’s account.

5. Carefully read the award letter that provides information regarding financial aid eligibility. The award letter explains procedures for receiving financial aid and/or applying for other financial assistance, such as student loans, child care grants and work-study employment on campus. For more information, call 651.846.1386 or visit the Financial Aid Office.

Financial Aid Policies and Procedures

Financial Aid Verification
Saint Paul College verifies data information of students selected by the Central Processing System (CPS) or selected by Saint Paul College. Students selected for Verification will be notified by mail of the required documentation to complete the verification process. All students are required to complete a Verification Worksheet and appropriate income information.

Students should submit all required documentation within 45 days of the date on the letter. The financial aid process will not continue until the required documentation is received. Not submitting the requested documentation within 45 days, without explanation, may result in loss of eligibility for the current academic year.

Once all required documentation has been received, students should allow a minimum 14 business days for the verification process to be completed. If the FAFSA data is correct, the Financial Aid process will continue toward a complete and accurate file, at which time the student’s Financial Aid will be packaged resulting in an Award Letter that can be viewed online at www.saintpaul.edu under the student’s account. Any FAFSA discrepancies found as a result of the verification process will be corrected by the Financial Aid Office and electronically submitted to the central processor.

Any cases of suspected fraud, misreported information, or altered documentation to fraudulently obtain federal funds will be discussed with Saint Paul College administration and referred to the Office of Inspector General of the Department of Education via Minnesota State Colleges and Universities.

Withdrawals
If you withdraw from Saint Paul College by the drop/add deadline, you will not receive financial aid funds because there will be no class registration. If you withdraw from attendance at Saint Paul College for any reason after the drop/add deadline, you will be placed on financial aid probation the following academic term. After completing the next semester with the appropriate grade point average (GPA) and credit hour progression, you will be removed from probation. If you fail to maintain a satisfactory GPA and credit progression, you will be suspended from financial aid.
Withdrawals and Effect on Financial Aid

Students who receive financial aid and withdraw from all classes are subject to a federal Return of Title IV Funds policy. The policy states that if you withdraw up through 60% of the semester, a proportional amount of financial aid either received or that was applied to your student account must be refunded to the federal government.

Example: If a student receiving a Pell Grant of $2000 drops out after 50% of the semester, 50% of the Pell received, approximately $1000, must be returned to the federal government by the student and/or institution (minus 50% of the student's calculated share for Pell and SEOG).

Any institution refund calculated within the first four weeks of school will be applied to the student’s account to reduce the student’s share of the Return of Title IV Funds.

Funds returned to the federal government are used to reduce the federal program amount for which funds were disbursed. Funds are returned in the following order:

- Unsubsidized Federal Stafford Loan
- Subsidized Federal Stafford Loan
- Federal PLUS Loan
- Federal Pell Grant
- Academic Competitiveness Grant
- Federal SEOG Grant
- Other assistance under Title IV for which a Return of Funds is required.

After the institution’s share of any required refund to Title IV programs has been refunded, a proportional share of any remaining refunds (not to exceed the amount of the MNCHE program payment the student initially received for the term), must be returned to the State.

Program Transfers

If you transfer from one program to another, you will be considered for continued financial aid eligibility. However, all grades and coursework will be assessed in determining satisfactory academic progress.

Consortium Agreements/Enrollment at Other Schools

If you are taking classes required for your program at Saint Paul College at another college, you must complete a consortium agreement if you would like those courses included in financial aid eligibility. Consortium Agreement forms may be obtained at the Financial Aid Office. They must be completed and submitted with an attached registration form from the host school, to the Financial Aid Office by the drop/add deadline. If a consortium agreement is not submitted, financial aid will not reflect courses taken at the host school.

Tuition and Fee Deferments

Tuition and fees will be deferred provided the following have been met by the posted tuition deadline for the term.

1. Student has received an Award Letter with financial aid eligibility equal to or greater than the tuition/fee charge. (Loan only eligibility requires a submitted Promissory Note.)

   OR

2. An electronic Institutional Students Information Record (ISIR) is received resulting from submission of a FAFSA.

Any tuition/fee balance not covered by Financial Aid is the Student’s payment responsibility.

Satisfactory Academic Progress Standards for Financial Aid Recipients

Federal regulations require that a college develop a standard of satisfactory academic progress. This satisfactory academic progress standard must have both a qualitative standard (grade point average) and a quantitative standard (course completion). If the student fails to meet either of these two standards, they will first be given a probationary term. If the student fails to meet either of the satisfactory academic progress standards during the probationary term, they will be suspended from financial aid. Students who have been suspended from financial aid due to these standards will be reinstated for Financial aid after they have met the satisfactory academic standards or by successfully appealing the loss of aid. Appeal procedures for the loss of financial aid may be obtained from the Financial Aid Office, or online at the Financial Aid section of www.saintpaul.edu.

Students bear primary responsibility for their own academic progress and for seeking assistance when experiencing academic difficulty. Students are encouraged to keep a file of their grades and transcripts.

Qualitative Standard

Students are required to maintain a minimum 2.0 cumulative GPA for all coursework including withdrawals, incompletes and non-credit courses. Transfer credits do not effect the student's GPA.

Quantitative Standard

Students are required to complete a minimum of 67% of the cumulative credits attempted based on their enrollment status. All credits attempted will be calculated into the completion percentage. This includes courses that are designated with a withdrawal, incomplete, non-credit courses and courses that have been repeated. Transfer credits do not effect cumulative completion rate.
Maximum Timeframe
All students are expected to complete their program within an acceptable period of time. Financial aid recipients meeting Satisfactory Academic Progress requirements may receive aid until they complete their program or until they have attempted 150% of the required coursework in their current program/declared major. All credits attempted at Saint Paul College count toward the maximum timeframe. This includes withdrawals, incompletes, non-credit courses, and courses that have been repeated. Credits taken under a previous major and transfer credits will count toward maximum time frame provided they fulfill requirements of the current program/declared major.

Implementation
Academic progress is evaluated at the end of each semester or term. A student who fails to meet cumulative progress requirements will be placed on financial aid probation or suspension. Academic progress will be monitored as follows:

1. Satisfactory Academic progress monitoring begins with the first credit. Upon six (6) credits of enrollment, all students with registered credits during a term will be evaluated at the end of the term.
2. Any student who fails to meet cumulative GPA and completion rate satisfactory academic progress requirements for one term will be placed on probation for the subsequent term and will be notified by mail. Financial aid may be received during a probation status.
3. A student on probation who earns a 2.5 term GPA and/or 100% term completion rate, but fails to meet cumulative satisfactory academic progress requirements for a consecutive term will remain at a probation status and therefore eligible for financial aid.
4. A student on probation who fails to meet the term standards identified in #3 above, and does not meet the required cumulative standards will be suspended from financial aid and notified by mail.
5. Upon evaluation, if Saint Paul College determines that it is not possible for a student to meet the minimum cumulative standards at the completion of a degree/diploma or certificate for their declared major, the student will be suspended from financial aid and will be notified by mail.
6. A student who has exceeded the maximum time frame will be placed on suspension from financial aid and notified by mail.

Suspension for Extraordinary Circumstances
Saint Paul College may immediately suspend a student in certain circumstances, such as:

1. A student who was previously suspended and whose academic performance falls below acceptable levels during a subsequent term
2. A student who demonstrates an attendance pattern that abuses the receipt of financial aid
3. A student who is on financial aid suspension at another school.

Financial Aid Appeals Procedure
A student who fails to make satisfactory academic progress and is suspended from financial aid, has the right to appeal based on unusual or extenuating circumstances which may include, but shall not be limited to, death in the family, injury or illness.

Appeal Process
Appeals must be submitted in writing on the Appeals Form available online in the Financial Aid section at www.saintpaul.edu or in the Financial Aid Office. The appeal must include a thorough explanation of the circumstances that affected academic progress. If applicable, the appeal must include supporting documentation beyond the written explanation. Appeals must be submitted to the Financial Aid Office to be evaluated for an approval or denial. A written decision on the appeal will be provided to the student.

If the appeal is approved, the student may receive financial aid for the next term. Provided a 2.5 GPA and a 100% completion rate is achieved for the succeeding term, the student will remain on probation. If these requirements are not met for the term, or the student does not meet the cumulative progress standards, the student will go to a suspension status for the next term of enrollment for financial aid eligibility. Denied appeals may be resubmitted for consideration by an Appeal Committee which will result in a final determination.

Reinstatement
Students who are placed on suspension for financial aid but are allowed to register after staying out for one term will be reinstated for financial aid after achieving a cumulative 2.0 GPA and 67% completion rate, or after receiving an approved appeal.

Treatment of Grades
Please see the Academic Standards section of the school catalog.

Academic Amnesty/Forgiveness
Students who are on Financial Aid Suspension who request Academic Forgiveness for previous enrollment due to an extenuating circumstance must follow the appeal process.
Audited and Test Out Courses
Courses taken by Audit or Test Out are not eligible for Financial Aid.

Consortium Credits
Credits for which financial aid is disbursed under a consortium agreement will be recorded as consortium agreement credits and will be included in the calculation of Satisfactory Academic Progress for financial aid.

College Readiness and ESL Courses
College Readiness and ESL courses will be included in the cumulative GPA and completion rate. ESL courses and up to 30 credits of College Readiness coursework will be excluded from the 150% maximum time frame calculation.

Repeated Courses
Courses may be repeated for financial aid eligibility for “F” grades only, or if program requirements require a higher grade. The cumulative GPA will use the highest grade achieved. Courses repeated a third time require registration permission from the Academic Dean. The cumulative completion rate includes all repeated courses.

Transfer Credits
Credits taken at previous schools accepted for current program requirements will be included in the 150% maximum time frame.

Withdrawals
All coursework designated with a withdrawal is calculated in the cumulative completion rate and maximum timeframe.

Education Tax Credits
The Taxpayer Relief Act (TRA) of 1997 provides for two tax credits that students may be eligible to claim: the Hope Scholarship Tax Credit and the Life-Long Learning Tax Credit. The Hope Scholarship Tax Credit is a tax credit and not a scholarship. If you do not pay federal income tax, this credit will not apply to you. The credit applies to students enrolled at least half-time for at least one term during the calendar year. The credit applies only to citizens or permanent residents of the United States. The credit applies only to tuition and academic fees paid for by the taxpayer (not by grant or third party sponsor). If your grant or other payment will pay for books or other living costs and you pay for tuition and academic fees yourself, you may claim the credit; however, you must report the grant or other payment as income.

Many details surround the Hope Scholarship Tax Credit and the Life-Long Learning Tax Credit. Saint Paul College does not provide Income Tax Counseling. We recommend that you consult with a tax professional to see if you qualify. Information on the Hope Scholarship Tax Credit is available in the Tuition Office. Tax Credit brochures are available in the Financial Aid Office.

Student Services

Office of Enrollment Services
Enrollment Services provides prospective and current students with up-to-date information on program options and guide sheets that help guide students through the application and registration processes. The office also processes requests for those students who want to change their major program, as well as applications for admission to the various selective programs offered at the College. Students may also use the computers in Enrollment Services to print copies of their term schedules and their bills. For assistance, call 651.846.1555.

Transfer Center
The Transfer Center staff works with students transferring to Saint Paul College as well as those planning to transfer on to a 4-year college or university, including students enrolled in the College’s Associate in Arts degree. The Transfer Center also serves as a resource center for students investigating transfer opportunities, articulation agreements, and other college and university application and admission requirements. Transfer guide sheets are located in the Transfer Center. The Center is located in Room 1365. Advising is available for students interested in transferring to a Bachelor degree program. The Transfer Center also hosts a variety of visits to Saint Paul College by admissions representatives from many regional colleges and universities. For transfer assistance call 651.846.1739 or visit our Web site at www.saintpaul.edu/academics/transfer.

Academic Advising
Program Faculty Advisors assist students with program planning and course selection. They provide detailed information about programs, employment opportunities and transfer options. Students are strongly encouraged to meet with their Faculty Advisor prior to registering each term.

Counseling
A personal counselor is available to assist students with short-term counseling related to educational, social, personal, developmental and life career planning goals. The on staff counselor also provides crisis intervention services, career counseling, mediation, referrals to community agencies, and consultations when needed. The Counseling Center is located in Room 1339 and the counselor is available on an appointment or emergency walk-in basis. For assistance, call 651.846.1383.
Office of Student Retention

The Office of Student Retention works with students facing academic difficulty, including students who are on academic probation. This Office monitors the Early Alert Referral System (EARS) and advises students in the College Readiness Program (CRP). The Office of Student Retention is located in the Office of Enrollment Services, Room 1300.

Support Services for ESL Students

In addition to general services at the College, English-as-a-Second-Language (ESL) students have access to services that meet their specialized needs. An ESL assessment for students whose native language is not English is available to assist in appropriate course placement. The College also offers a wide range of courses to assist ESL students in building English skills in reading, writing, speaking and listening. These courses may be available prior to or during enrollment in the major program. ESL students also have access to the Language Lab where they can receive additional assistance from ESL faculty in building their English skills.

For more information on services available to ESL students, please contact the Office of Enrollment Services at 651.846.1555.

Veterans Educational Benefits

Saint Paul College is approved for the instruction of veterans and orphans of war veterans who have training needs and who are entitled to participate in federal financial assistance programs. A College representative is available to assist veterans with application to the College and eligibility for veterans' benefits. For more information, please contact the Registrar, 651.846.1372.

Disability Services

Saint Paul College is committed to providing equal access to educational opportunities for all students, including those with disabilities. The Director of Disabilities Services, Shai Wise, provides direct assistance such as information, referral, advocacy, support, and academic accommodations for students. Accommodations are made on an individualized and flexible basis. Students with disabilities are responsible for seeking assistance and providing acceptable documentation of their disability prior to receiving accommodations.

The Director of Disability Services, Shai Wise, assists in the transition of students with disabilities to Saint Paul College programs. The Director of Disability Services is responsible for identification, referral, advocacy, accommodation and inter-agency coordination. The Director of Disability Services, Shai Wise is located in Enrollment Services, in Room 1302, and can be reached at 651.846.1547.

Reasonable Accommodation Policy

Disability Services fosters programmatic and environmental access to students with disabilities so that they can achieve their educational goals. The Office also serves as a resource on disability issues to the College and the community.

Procedures for Obtaining Services

All students who wish to receive assistance through Disability Services must meet with the Director and provide acceptable documentation of their disability prior to receiving services. Available services will be explained and those deemed appropriate will be provided upon the student’s request.

Eligibility and Documentation

Any person who has a documented disability, permanent or temporary, who is a student or prospective student at Saint Paul College, and who is qualified for educational programs is eligible for services.

Saint Paul College requires students with disabilities to submit documentation of their disability prior to receiving academic accommodations. The College requires that documentation:

- Clearly state the specific diagnosed disability or disabilities
- Describe the tests performed in making the diagnosis
- Describe the functional limitations resulting from the disability or disabilities
- Be current (less than 3 years old)
- Describe the specific accommodation(s) requested
- Adequately support each of the requested accommodations
- Be typed or printed on official letterhead and be signed by an evaluator qualified to make the diagnosis, including information about license or certification and area of specialization.

Any documentation that fails to meet any of these criteria may not be sufficient to receive accommodations. Individualized Education Programs (IEPs) are not sufficient documentation to receive accommodations at the higher education level. Students whose documentation is insufficient are invited to resubmit additional documentation at any time. Saint Paul College is not responsible for providing accommodations to students who have not submitted adequate documentation. Documents provided to the College will not be returned.
Rights of Students with Disabilities
All students at Saint Paul College have the right to be treated with dignity and respect by all staff and employees at the College. Students with disabilities have the right to:

- Have information regarding their disability and services they receive kept confidential and disclosed only on a need-to-know basis
- High quality services and assistance in accordance with Saint Paul College policies and procedures
- Evaluate the services they receive and bring to the attention of the Director of Disability Services, Shai Wise, any concerns or problems related to the delivery of services
- Appeal any denied requests for services. All denials will be documented and kept on file by the Disability Services Office.

Students with disabilities should begin working with the Disability Services Office as soon as possible to allow time to put accommodations in place.

Available Services/Accommodations
Saint Paul College offers the following services to students to remove environmental and programmatic barriers related to a disability:

- Advocacy
- Support and counseling
- Information and referrals
- Early registration

Physical Access Accommodations
- Assistive listening devices
- Academic accommodations
- Sign language interpreters
- Assistive computer software
- Notetakers
- Test proctoring/accommodations such as extra time, quiet room, tests on tape
- Written materials made available on tape or in other alternative formats
- Adaptive equipment
- Recorders and scribes
- Transition services
- Assistance with course selection and program advising
- Other services as deemed appropriate by staff

Sign Language Interpreters and Notetakers for Deaf Students
Sign Language Interpreters assist deaf and hard-of-hearing students with classroom communication, as well as communication with students, faculty and staff. Many College events are interpreted/transliterated for deaf students/staff. Notetakers are often necessary during class lectures so deaf and hard-of-hearing students can concentrate fully on the interpreter. Some deaf and hard-of-hearing individuals do not know or use American Sign Language. They may depend entirely on lip reading to communicate. Oral interpreters and notetakers may provide necessary communication when instructors are not facing them. FM aids are available for those hard-of-hearing individuals who wish to use assistive listening devices/equipment during lectures or group discussions.

Contact Disability Services
Any questions should be directed to Shai Wise, Director of Disability Services, 651.846.1547/1548 TTY. The Office of Disability Services (Room 1302) is located in the Office of Enrollment Services Room 1300. If a student is having difficulty with any requested accommodation, please contact the Disability Services Office in a timely manner for assistance.

Section 504 of the Rehabilitation Act of 1973 and Americans with Disabilities Act of 1990
Persons with disabilities have the right to equal opportunity for education as prescribed by law. Disability Services is responsible for creating a barrier-free environment while empowering students to grow towards independence and self-assertion.

Career Resources and Classes
Saint Paul College offers a variety of career resources to assist individuals in deciding on a career that matches their interests, skills and goals.

Career Counseling
Assistance with career exploration and career decision-making is available through the Career and Placement Center. One-to-one assistance is available by appointment. Call the Career and Placement Center at 651.846.1384 to schedule an appointment.

Career Classes
College Success Strategies and Career Resources (CSCR 1405) and Choosing Your Career Path (CSCR 1403) are credit career and college success courses offered each semester. These courses are for students who want to gain knowledge of career resources and the career planning process. These courses also provide career assessments, career resource information and planning strategies that will assist in developing an individualized career plan.
Career Workshops

Career workshops provide individuals with a jumpstart on their career planning and decision-making process by offering career assessment and career resource information in a shorter format than the career classes. Workshops are offered to small groups throughout the year.

Computerized Career Resources

Students can explore interests and career options by using a computerized career planning tool, the Minnesota Career Information System (MCIS). MCIS has up-to-date information on careers that match student interests. For each step of the career planning process MCIS will help with answers to questions related to career, education and job outlook. MCIS will assist a student to decide on a career, find an educational program, select a transfer college and locate financial aid. MCIS is available online through the College. For access information, call 651.846.1317.

ISEEK is another Internet-based career information system that can assist in career planning. For more information on ISEEK, visit the Web site at www.iseek.org.

Vocational Evaluation

Vocational evaluation is available to secondary and post-secondary students with disabilities. Evaluation provides assistance in career planning through assessment of interests, aptitudes and abilities. Please call 651.846.1317.

Additional Services

Child Care

Child care services are offered to students enrolled at Saint Paul College, which sponsors on-campus child care in partnership with the Children’s Home Society & Family Services (CHSFS). The Center has separate areas that provide appropriate care to three age groups: infants, toddlers and preschoolers.

Interested students may enroll their children on a schedule that accommodates their college class schedule. Student parents are encouraged to visit with their children during class breaks. For information on Center costs and available financial aid, call 651.846.1581. The Center is open year round. Operating hours are Monday through Friday from 6:30am to 4:30pm, except College holidays.

Cafeteria

Food service is available in the City View Café Monday through Friday. Breakfast, lunch and dinner are served daily. Snacks are available throughout the day. Refer to the College Web site (www.saintpaul.edu) for the cafeteria schedule. The Café is closed during holiday breaks, semester breaks and when school is not in session.

Student Lounges

City View Commons is available to students to dine, study, or just meet friends. Lounge areas are also located in the College’s skyway and on the fourth floor.

Parking Registration and Fees

All Saint Paul College students are required to have a registered parking permit. Students with handicapped certificates or state-issued handicapped plates are also required to display a Saint Paul College permit. Registration is considered complete when the permit is properly affixed to the registered vehicle. The fees paid for permits do not reserve nor guarantee a parking space. Refer to the last page of this catalog or the Student Handbook for complete information on the College’s Parking Policy.

Campus Security

Evening escort services are available for students. The Campus Security phone number is 651.846.1322. Security staff normally patrol the campus between the hours of 7:00am and 10:30pm. The Campus Security and Crime Report is published annually. Copies of this report are available from the Information Center. Refer to the Student Handbook for complete information on Campus Security and the Crime Report.

Bus Transportation

Students who live in the Saint Paul-Minneapolis metro area can access the College using Metropolitan Transit Commission (MTC) bus service. MTC bus passes are available for purchase at the Bookstore. Free MTC bus schedules are also available in the Bookstore. For additional information, call the MTC Information Center at 612.373.3333 or www.metrotransit.org.

Health Services

Saint Paul College provides first-aid kits with procedures distributed to all instructors. Information about additional health resources is available from the Dean of the Health and Service Program. Please follow the procedures below regarding your health:

- You should take an active role in your own wellness and health.
- You should wear appropriate medical alert tags (e.g., diabetic or seizure IDs) to assist emergency personnel in assessing an illness or injury more quickly.
- Notify a staff member immediately if you have a question about a medical condition or injury. If you are unable to find a staff member, call Security at 651.846.1322.
Health Insurance

All students are strongly encouraged to have health insurance as they are responsible for the costs of personal health care, including injuries at the College or Clinical site. Students who do not have medical coverage may purchase an insurance plan for students. This insurance plan is made available through the Minnesota State Colleges and Universities state insurance plan. This insurance coverage is available to all students, with an option for dependent coverage. Students may purchase the plan for a term or for the year. Brochures are available at the Office of Enrollment Services, Room 1300.

International students enrolled with a student visa are required to purchase a health insurance plan through the College.

Housing

Saint Paul College does not provide residence hall facilities for its students. Students can obtain information about available housing from area newspapers and other community publications. The College assumes no responsibility for housing information or housing referrals that appear in those publications.

Lockers

Lockers at the College can be rented for $20.00 per academic year. Only Saint Paul College locks may be used and lockers must be cleaned out by the end of the Spring semester. Students who are interested in renting a locker should stop by the Tuition Office window for more information.

Lost and Found

Lost and found items may be turned in to the Administration Offices front desk. Due to the volume of items found, unclaimed items will be discarded or donated to charity the first business day of each month. Lost or stolen items are not the responsibility of Saint Paul College. To inquire about a lost article, stop by the Administration Office or call 651.846.1357.

Student Identification Cards

Students must obtain a College identification (ID) card with a receipt of tuition payment and a valid driver’s license or state identification. The ID card is required for many school activities and services and allows students to check out library materials. ID service location and hours are posted on monitors throughout the school.

Student E-mail Accounts

All students have access to a free College email account through the Student Portal System when they first enroll at the College. E-mail is the official communication mode for the College.

Saint Paul College Foundation

The Foundation was established in 1986 by a group of individuals concerned about the welfare of today’s students. The Foundation’s mission is to obtain and distribute resources necessary to support students, faculty, programs and Saint Paul College’s vision. The purpose of the Foundation is to solicit private contributions from the community as a means to increase the number of available resources for the College and its populations. The intent of the Foundation is to build partnerships with community leaders and residents to strengthen Saint Paul College.

By generating external funding for Saint Paul College, the Foundation will provide more opportunities for students through scholarships, endowments, advanced technology equipment and additional training machinery. The Foundation will do everything possible to reduce financial obligations for students in pursuit of learning.

For more information, please visit our Web site at www.saintpaul.edu/foundation or contact the Foundation Director at 651.846.1469.

Student Life

Student Government

Many students each year are proud to contribute their time and energy to Saint Paul College Student Senate. The Student Senate is the official student governing body, which includes the following officers: President, Vice President, Treasurer and Historian. A Parliamentarian and Secretary are appointed by the President.

Recreational events and other functions are planned by the Senate. Students who volunteer for a number of projects and activities are joining in a tradition of student involvement at Saint Paul College.
Student Organizations

The Student Senate also includes the following Student Clubs and Organizations:

- Autobody Club
- Bi-Cultural Enrichment Club
- Respiratory Care Club
- Phi Theta Kappa
- Science Club
- Somali Student Organization
- Student Ambassadors
- Asian Student Association
- Photo Club
- Speech and Theatre Club
- Watch Club
- SkillsUSA

Each of these associations offers various activities and presentations throughout the school year to the entire student body.

Minnesota Precision Manufacturing Association (MPMA)

This organization is an affiliate of the National Tooling and Machining Association and is open to students of trades that are involved in the working of metals and is the first of its kind in the nation. Their primary focus is to provide for and strengthen the ties between the students of the metal working trades and their potential employers, almost all of whom are members of the MPMA. This includes Precision Machining, Tool Die and Moldmaking, Sheet Metal Fabrication, Design Technologies, Automation and Welding. Activities include mentoring, internships, training seminars, tours and guest lecturers that will provide an avenue for increased student participation in the activities and functions of the Student Senate.

SkillsUSA

This organization is established for students in technical, trade, health and service programs. Students participate in a variety of social, community service and educational activities. One of the main events of the school year is the SkillsUSA Championships. Saint Paul College students have represented the College in local, state, national and international competition. Students compete in a wide range of areas, from cake decorating to cosmetology to sheet metal.

Alumni Relations

The College is establishing a unique Alumni Association to complement the educational process. All Saint Paul College graduates are encouraged to join. Call 651.846.1469 for further information.

Academic Resource Centers

Academic Support Center

The Academic Support Center provides free peer tutoring in many subjects each term. Tutoring is available in math, writing, science, as well as other subjects. Peer tutors are academically successful students who help those who want assistance. The Academic Support Center trains the peer tutors, matches tutors with students and monitors the tutoring process.

Library

Mission

The Saint Paul College Library mission is to support and enhance the educational mission of the College. The Library provides essential educational support to the local campus community as well as to the larger library and information communities, by providing access to local, global and diverse information resources. The Library facilitates appropriate use of new and expanding technologies as well as print resources, which are responsive to current academic and technical coursework.

Services

A collection of more than 29,000 books, 158 periodicals and 730 videos and films includes subject areas such as liberal arts and sciences, business, computer careers, health, services, technical and trade. Smaller collections of CD-ROMs and audiobooks are available. Materials for career development, personal growth and recreation are also available. Departmental centers house approximately 5,000 additional books and resources.

The Library offers Internet services and Internet subscriptions to resources such as Newsbank and SIRS Researcher. Student e-mail is also accessible. The Library is integrated into the MNPALS consortium. The Library catalog is accessible on MNPALS. Access to over 100 other MNPALS libraries, including all Minnesota State Colleges & Universities campuses, some private colleges and all state agencies, as well as many public library systems is available through interlibrary loan. Magazine articles are available in index, abstract and/or full text formats for more than 2,500 periodicals retrospectively for five years. Access to Lumina, the University of Minnesota Information System, is available via MNPALS. Patron initiated interlibrary loan service via MNPALS/Minitex is an added MNPALS feature. The Library is also part of the MnLINK library system, providing statewide library and database access.
Library staff are committed to fulfilling the Library mission through ongoing service and education. Library staff encourage full access to library information resources and services. Lifelong learning, critical thinking skills and on-going information literacy are emphasized. Educational guidance is provided for both print and multimedia information resources. Ongoing individual and classroom instruction is provided upon request. The Library is also committed to be an informational resource and educational support to faculty and staff.

Additional Library Services
The Library was renovated during the years 2000 and 2002. This has enhanced current and future student information and research needs in an attractive and inviting environment. The newly renovated Library offers both an open computer lab and a computer classroom. An expanded circulation area is offered, as is an expanded group study area. A lounge reading area is a new amenity. Shelving space has also been increased to accommodate an ever-increasing book collection.

Library Location
The Library is located on the main floor of the Saint Paul College Campus, in the East Wing across from the Financial Aid office.

Hours and Additional Services
Library hours are 7:00am to 8:00pm Monday through Thursday and 7:00am to 4:00pm Friday. Hours are subject to change. A copy machine is available for student use. The Student ID Card also serves as the library card, which allows for full access to MNPALS, including interlibrary loan.

Instructional Technology Center (ITC)
The Instructional Technology Center (ITC) provides computer labs to students at several locations on campus. Computer labs provide students with access to technology-enhanced learning in math and reading basic skills, software used in courses and the latest in business, multimedia and Internet programming technologies. Computer labs are located on the third floor in Rooms 3225 and 3215. Students must abide by the Computer Usage Policy while utilizing any computers on campus. Refer to the Student Handbook for a copy of the policy. Computer labs are available six days a week (while classes are in session)—Monday through Thursday, 7:30am to 10:00pm, Friday 7:30am to 4:00pm and Saturday 7:30am to 2:00pm.

Learning Center
The Learning Center is available to students to assist them in the development or upgrading of their basic reading, grammar and math skills. Utilizing computer-based courseware, students are able to work on basic skills development at their own pace under the supervision of faculty and center staff. Computer tutorials are also available in science and other subjects. The Learning Center is located in Room 3125 and the hours of availability (when classes are in session) are as follows: Monday through Thursday 7:30am to 10:00pm, Friday 7:30am to 4:00pm and Saturday 7:30am to 2:00pm.

Distance Learning
Saint Paul College is committed to providing learning opportunities to students that are free of place or time restrictions. By utilizing the latest technology, the College delivers courses at places and times that are convenient to the student. Courses delivered via Interactive Television (ITV), satellite connections or the Internet allow students and faculty to communicate regardless of the distance between them. Technology and its application allow the expansion of learning access to educational opportunities which may not be otherwise possible. Additional information may be found online at www.saintpaul.edu.

Bookstore Information
Textbooks and a wide range of school and personal supplies can be purchased from the Bookstore. It is located on the first floor near the main entrance. Please check the College Web site and campus postings for Bookstore hours or call 651.846.1422.

Textbook Costs:
To estimate textbook expenses in advance, please use the Saint Paul College Bookstore Web site, www.saintpaulcollegebookstore.com. The student’s course schedule will have the information needed to find out more about required textbooks online. Term, Subject (same as Department for the Web site), Course Number and Section Number are needed for textbook inquiry. The listed costs are current estimates.

Textbook Orders/Reservations:
Students may also order or reserve their textbooks online at the following Web site: www.saintpaulcollegebookstore.com. For Web orders and reservations, a credit card is required. The Bookstore accepts Visa, MasterCard or Discover. If students wish to pay by cash, personal check, or book voucher, they may reserve their textbooks online and pick them up at the Bookstore.
Textbook Refunds and Buy-Back Policy:
Full refunds for most textbooks are given within ten school days of purchase, providing there is proof of purchase (receipt) and the textbook is in new condition. Textbooks returned prior to the tenth day that are not in new condition will be refunded at current used book pricing. After the tenth day, students will be encouraged to sell their books at the Textbook Buy-Back. See the Web site for additional refund information. In an effort to keep textbook costs down, the Bookstore attempts to stock used books whenever possible. In addition, the Bookstore schedules a Textbook Buy-Back at the end of each semester, where students may resell their textbooks for cash.

Rights and Responsibilities

Academic Integrity Policy
Saint Paul College fosters the highest standards of academic integrity and the highest regard for truth and honesty. The attempt by students to present as their own any work not actually performed by them; collusion, fabrication and cheating on examinations, papers and other course-related work; stealing, duplicating or selling examinations; substituting for others in class discussions or examinations; producing other students’ papers or projects; or knowingly furnishing false or misleading academic information on official College records, are considered violations of academic integrity and destructive to the central mission of the College.

Students who violate academic integrity shall, after due process, be subject to College sanctions that may include failure on assignments and examinations, failure in courses and suspension or expulsion. Established academic integrity policies, procedures and sanctions are communicated in classes and publications, such as the online Student Handbook.

Directory Information/Data Privacy
Saint Paul College, in compliance with the Federal Educational Rights and Privacy Act (FERPA) and the Minnesota Data Protection Act, affords students certain rights with respect to their education records. Students can inspect and view their records within 45 days of the date the Registrar receives a written request for access. Students may ask the College to amend a record by writing to the Registrar and clearly identifying what part of the record is inaccurate. Records will not be released to a third party without permission from the student except to those officials or agencies with specific legal authorization. The following information has been designated as directory information and, as such, is available to the general public: student name; major program of study; dates of attendance; degrees, diplomas, certificates and awards received; full-time or part-time status; and participation in recognized activities. To prevent release of this information outside the College, the student should contact the Student Records Office to sign the Non-Disclosure Form.

E-mail addresses are viewed by Saint Paul College as valid addresses for the institutional purpose of distributing student related information, updates, important dates, payment reminders, enrollment dates, etc.

NOTICE: If you are currently enrolled in or receiving services from one college or university within the Minnesota State Colleges and Universities system, your academic records from that institution are available to officials of other schools within the system while you are in attendance. If you seek or intend to enroll at another institution within the system, your academic records from other institutions are also accessible to officials at the school where you are seeking or intend to enroll. Disclosures of your records to other schools under other circumstances may require your prior written consent.

You have the right to request a copy of records that have been disclosed. You also have the right to request a hearing to correct any inaccurate, incomplete, or misleading information in those disclosed records. For further information about your rights, please contact the Registrar at the college or university that supplied the records.

Code of Student Conduct
Saint Paul College, as a part of Minnesota State College and Universities, operates under the Board of Trustees and recognizes that your rights as a student must be respected.

You are expected to be familiar with the Code of Student Conduct. Your rights and responsibilities as a student and the expectations of the College are described in the Code of Student Conduct. Refer to the online Student Handbook for a copy of the Code of Student Conduct.

You are responsible for conducting yourself in a manner that does not interfere with the educational process. Behavior that is threatening to the safety or welfare of yourself or others, or that is harassing or discriminatory in nature, will be reviewed promptly by the College and appropriate action will be taken. The Code of Student Conduct does not replace nor reduce the requirements of civil or criminal laws.

The College has established a Code of Student Conduct that details procedures for the administration of Student Conduct proceedings. You shall be afforded appropriate due process in the adjudication of any charge(s) of violations of the Code of Student Conduct. Students found guilty of violations may be subject to sanctions, including suspension or expulsion.
Allegation of discrimination or harassment shall be adjudicated under separate procedures in accordance with Saint Paul College policies on those issues.

Complaints and Grievances
Saint Paul College has a Student Complaint and Grievance procedure. Both procedures are outlined in the Student Handbook, which is available online at www.saintpaul.edu. If students feel that any of their rights have been violated, they should follow the process as outlined in the Student Handbook.

Discrimination and Harassment Policy
Saint Paul College is committed to providing students with an educational environment free from discrimination and harassment.

No person shall be discriminated against in the terms and conditions of employment, personnel practices, or access to and participation in, programs, services and activities with regard to race, sex, color, creed, religion, age, national origin, disability, marital status, status with regard to public assistance, sexual orientation, or membership or activity in a local commission as defined by law, or inclusion in any other group or class against which discrimination is prohibited.

It shall be a violation of this policy for any student, instructor, administrator or other college personnel to harass a student, instructor, administrator or other College personnel through conduct or communication of a sexual nature or regarding religion and race as defined by this policy. (For purposes of this policy, College personnel includes College employees, agents, volunteers, contractors or persons subject to the supervision and control of the College.)

It shall be a violation of this policy for any student, instructor, administrator or other personnel of the College to inflict, threaten to inflict, or attempt to inflict racial, disability, or sexual violence upon any student, faculty member, administrator or other college personnel.

The College will act to investigate all complaints, either formal or informal, verbal or written, in violation of this policy.

Refer to the Student Handbook for additional information on the Discrimination and Harassment Policy.

Drug and Alcohol Policy
Saint Paul College has a policy regarding alcohol and other drug use, including unlawful drug use or abuse in the workplace, in accordance with the Drug Free Workplace Act of 1988 (Public Law 100-690, Title V, Subtitle D) and Drug Free Schools and Communities Act Amendments of 1989 (Public Law 101-226). A copy of the Drug and Alcohol Free Campus information is available in the online Student Handbook.

The College forbids the unlawful possession, use or distribution of alcohol and drugs on the College premises, or in conjunction with any College-sponsored activity or event. The College will impose sanctions on students who violate this policy. This prohibition of possession or consumption of alcoholic beverages on campus applies regardless of age.

Smoking and Tobacco Policy
Smoking and the use of tobacco products are only permitted in designated areas on the College campus.

College Communication via E-mail
E-mail is the official means of communication at Saint Paul College. All students enrolled at the College must initiate their Saint Paul college email address and check their College email on a regular basis. Students are responsible for reading and responding, when called for, to all announcements, requests and other College communications sent via Saint Paul college email. New students will have the opportunity to initiate their College email following orientation and prior to registration.

Academic Standards

Grade Point Average
A college-level cumulative grade point average of 2.0 (C) is required to graduate with a degree, diploma, certificate or completion of the Minnesota Transfer Curriculum.

Grade Point Average Computation
For each grade students earn in a course, they will be assigned honor points.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Honor Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4</td>
</tr>
<tr>
<td>B</td>
<td>3</td>
</tr>
<tr>
<td>C</td>
<td>2</td>
</tr>
<tr>
<td>D</td>
<td>1</td>
</tr>
<tr>
<td>F</td>
<td>0</td>
</tr>
<tr>
<td>I</td>
<td>0</td>
</tr>
<tr>
<td>P = Pass</td>
<td>0</td>
</tr>
<tr>
<td>AU = Audit</td>
<td>0</td>
</tr>
<tr>
<td>W = Withdraw</td>
<td>0</td>
</tr>
</tbody>
</table>
The student’s GPA is obtained from these honor points by calculating the total number of points (honor points per credit times the credits for each course) and dividing that total by the total course credits. An example follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit</th>
<th>Grade</th>
<th>Honor Pts</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 1740</td>
<td>4</td>
<td>B</td>
<td>12</td>
</tr>
<tr>
<td>PSYC 1710</td>
<td>4</td>
<td>A</td>
<td>16</td>
</tr>
<tr>
<td>BTEC 1410</td>
<td>3</td>
<td>F</td>
<td>0</td>
</tr>
<tr>
<td>BTEC 1418</td>
<td>3</td>
<td>C</td>
<td>6</td>

\]

**Incomplete Grades**

Illness or other unforeseen emergencies that prevent students from completing course requirements within the allotted time should be communicated to the instructor as soon as possible. The student may be granted an extension after filling out an Incomplete Grade Request Form which must be signed by both the instructor and the student.

If a student has received an extension period to complete work of a course, they will be temporarily assigned the grade of incomplete “I”. If the student does not complete the course requirements within the extension period, the incomplete status will be turned into a grade of “F”. Fall Semester is considered the next term for incomplete grades approved for Spring Semester or Summer Term for students who have not completed their program of study. The extension period starts at the end of the current semester and may not exceed eight weeks. For students who are completing their program of study in the Spring Semester, incomplete grades must be submitted by June 1st.

If a student receives financial aid, extension periods are limited to eight weeks. A grade must be assigned within that time so that the student’s grade point average can be calculated to determine future eligibility for aid.

**Course Audits**

Students may audit a course on a space-available basis. To audit a course, students must:

1. Register for the class under audit status and pay the required tuition.
2. Obtain instructor approval during the first class session.
3. Provide the Student Records Office with a signed statement from the instructor and the student.

Courses taken on audit status do not count toward requirements for degrees, diplomas, or certificates. In addition, audited courses do not qualify for financial aid or for veterans’ benefits.

**Repeated Courses**

Students may repeat a course for the purpose of achieving a higher grade or to review course material. Credits will be counted only once as “earned credits.” Transfer credits will be removed for any repeated course at Saint Paul College. If both the original and the repeated grade are taken at Saint Paul College, both will appear on the student’s transcript. The highest grade will be used to compute the grade point average (GPA). Credit by Exam and independent studies are not acceptable means of making up a failed course. If a student wants to repeat a course a third time, permission from the appropriate Academic Dean is required.

Veterans’ benefits will not be paid for repeated courses.
Maximum Credit Load

To register for 24 or more credits in a semester, or more than 9 credits in summer session, a student must obtain authorization from the Director of Enrollment Services.

Guidelines to exceed the limit are as follows: If the student has compiled at least a 2.75 GPA at the College and has accumulated 20 credits; if a student transfers in with a 3.0 GPA and an accumulation of 20 credits; or if there are other documented circumstances that justify the exception.

Credit by Examination/Test-Outs for Technical Credit

Registered students who are able to demonstrate achievement in the content of a college-level course may be eligible to receive credit toward a degree. The College offers Credit by Examination for students in technical (non-general education) programs for a course provided that no CLEP exam exists. For testing out of general education courses and selected business courses, students may take the CLEP exam (see CLEP Policy).

Credit by Exam is determined on a case-by-case basis in selected areas and is at the instructor’s discretion. The non-refundable fee for Credit by Exam is one-half of that course’s tuition charge. A maximum of 12 credits may be earned at the College through Credit by Exam. Credits earned by examination do not count toward the Saint Paul College residency requirements. Credit is given only for courses included in Saint Paul College curriculum.

Note: Successful Credit by Exam will apply to the Saint Paul College program in which the student is enrolled. Other colleges have their own policies for Credit by Exam and may not accept Saint Paul College Credit by Exam in transfer.

If a student passes the exam, an entry will be made on the transcript with CBE (Credit by Exam) listed with the course title. Students may test only once for each course. No credit by examination will be granted when a student has earned a grade in a more advanced course in the discipline.

Credits received through Credit by Exam are not eligible for financial aid.

Applicants for Credit by Exam must contact the Records Office to start the process. Credit by Exam must be completed prior to the 5th day of a course in which a student is currently enrolled. Students awarded credit by exam are responsible for dropping the corresponding course within the drop/add period. Credits received through Credit by Exam are not eligible for financial aid or veterans’ benefits.

Conversion

The conversion of quarter hours to semester hours is 0.67 for each quarter hour.

Graduation

To be eligible to graduate from Saint Paul College, students must:

- earn the total required credits and courses listed within the program plan;
- earn a cumulative GPA of 2.0 in 1000 level courses or above;
- complete the Graduation Application in the Student Records Office; and
- fulfill all financial obligations to the College.

A graduation ceremony is held in May for students completing their programs during the academic year. Degrees/diplomas/certificates are conferred by the President to the graduates of Saint Paul College—A Community & Technical College under the authority of the Minnesota State Colleges and Universities Board of Trustees.

Degree Residency

A student shall earn a minimum of 20 credits for all associate degrees at Saint Paul College. The residency requirement shall be reduced to 12 college-level credits for students transferring with at least 12 college-level credits from another Minnesota State Colleges and Universities institution or the University of Minnesota. One third of the credits required for a diploma, certificate, or the Minnesota Transfer Curriculum (MnTC) must be earned at the College.

Time Limits for Graduation Requirements

Students entering Saint Paul College will have five years in which to complete their work under the terms of the catalog in effect at the time of their first enrollment. Students must have been in attendance during the catalog year selected. Students taking more than five years to complete their graduation requirements may follow any catalog in effect during the five-year period preceding their date of graduation.

Students must declare which catalog year requirements they will follow on the Graduation Application. Students who have a break in their attendance for one year or longer are encouraged to review educational plans upon re-enrolling at the college.

To ensure students graduate with up-to-date skills, technical credits are valid for five years or have a five year “lifespan.” This includes transfer technical credits which are used for specific technical program requirements. Technical courses that are beyond the five-year limit may be accepted, depending upon currency, relevancy and the student’s current work experience.
Appeals for Exceptions to College Policy

Students who have questions or want to request an exception to College policy will be handled through an appeals process.

Students must submit a letter of formal request stating the exact nature of the requested appeal. Letters should include appropriate documentation. Letters should be submitted to the Student Records Office.

Educational Degree Programs

Liberal Arts and Sciences

Associate in Arts Degree

The Associate in Arts (AA) degree is the newest degree offering at Saint Paul College. The Associate in Arts degree is awarded for successful completion of a program of 64 semester credits in liberal arts and sciences and is designed to constitute the first two years of a baccalaureate degree. The AA is a liberal arts degree intended primarily for students who plan to transfer to another college or university to complete a bachelor’s degree. No specific major is listed in conjunction with the degree; however, students may choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four-year college or university. An AA degree must include the entire Minnesota Transfer Curriculum (40 semester credits), which, pursuant to Minnesota statute, must transfer to any institution in the Minnesota State Colleges and Universities system or the University of Minnesota. Students are to develop an educational plan in consultation with a Saint Paul College Transfer Specialist to assure that degree requirements are fulfilled since requirements may vary depending upon the major and transfer college.

Program Outcomes

- Knowledge of the important concepts and principles of the natural sciences, mathematics, history, social and behavioral sciences, arts, and humanities.
- Skills necessary for life roles, including skills in thinking, communication and methods of inquiry and applications of knowledge.
- Critical examination of and an appreciation for diverse people, cultures and life roles.

General Requirements

- At least 64 earned college-level credits (40 MnTC credits and 24 additional MnTC and/or pre-major elective credits)
- A grade of “C” or better in ENGL 1711
- Cumulative GPA of 2.0
- MnTC GPA of 2.0
- Meet Saint Paul College residency requirement of 20 credits. This requirement shall be reduced to 12 credits for students transferring with at least 12 college-level credits from another Minnesota State Colleges and Universities institution or the University of Minnesota.

Total Credits Required for the AA Degree

- Minnesota Transfer Curriculum (MnTC) 40 credits
- Additional MnTC and/or pre-major elective courses 24 credits
- Total Requirements 64 credits

MnTC Distribution Requirements for the AA Degree

The minimum Minnesota Transfer Curriculum (MnTC) distribution requirements for the AA degree are listed below. (Refer to the MnTC Course List)

MnTC Goal 1: Communication 9 credits
- ENGL 1711 Composition 1 4 credits
- ENGL 1712 Composition 2 2 credits
- Select one of the following:
  - SPCH 1700 Introduction to Speech Communications 3 credits
  - SPCH 1710 Fundamentals of Public Speaking 3 credits
  - SPCH 1720 Interpersonal Communication 3 credits
  - SPCH 1730 Intercultural Communication 3 credits
  - SPCH 1750 Small Group Communication 3 credits

MnTC Goal 2: Critical Thinking

Fulfilled when 10 goal areas (40 credits) are completed

MnTC Goal 3: Natural Sciences 7 credits
- Minimum of two courses from two different disciplines, one of which must be a lab course.

MnTC Goal 4: Mathematical/Logical Reasoning 3 credits
- Minimum of one course. (Courses must be numbered between 1700-1799 or 2700-2799)

MnTC Goal 5: History and the Social and Behavioral Sciences 9 credits
- Minimum of three courses from three different disciplines.

MnTC Goal 6: Humanities and Fine Arts 9 credits
- Minimum of three courses from three different disciplines.
MnTC Goal 7: Human Diversity
One eligible course.

MnTC Goal 8: Global Perspective
One eligible course.

MnTC Goal 9: Ethic and Civil Responsibility
One eligible course.

MnTC Goal 10: People and the Environment
One eligible course.

Note: Refer to the MnTC Course List. Some courses may be applied to more than one goal area. If you meet the MnTC goal requirements with fewer than 40 semester credits, select additional MnTC courses to complete the minimum requirement of 40 semester credits.

Associate in Science Degree

The Associate in Science (AS) degree is awarded for successful completion of a program of 60–64 semester credits in a designated field or area which transfers to a baccalaureate major in a related scientific or technical field. The AS degree provides a balance of liberal arts education and career-oriented classes. The AS degree prepares students for direct employment; however, articulation agreements must exist between the institution awarding the Associate in Science degree and an institution awarding a related baccalaureate degree. An Associate in Science degree shall include a minimum of 30 semester credits in general education as described in the MnTC distribution requirements for the AS degree.

Transfer Note: While the AS degree has more limited transferability than the AA degree, specific transfer articulation agreements exist with designated four-year colleges and universities for each AS degree. Minnesota Transfer Curriculum courses within the AS degree transfer to institutions in the Minnesota State Colleges and Universities system and other colleges. Please see a Transfer Specialist and refer to the Transfer Articulation Agreements Table for specific information.

AS Degree Programs

Biomedical Engineering Technology NEW!
Business Management
Chemical Technology NEW!
Child Development Careers
Child Development Careers with ASL
Computer Graphics and Visualization
Computer Network Engineering Specialist
Computer Programming
Computer Science
Human Resource Specialist
Land Surveying Technology
Management Information Systems

General Requirements for the AS degree:

- 60–64 earned college-level credits (a minimum of 30 credits from MnTC courses)
- Cumulative GPA of 2.0
- Meet Saint Paul College residency requirement: 20 credits. The requirement shall be reduced to 12 credits for students transferring with at least 12 college-level credits from another Minnesota State Colleges and Universities institution or the University of Minnesota. For specific course requirements, see the individual program descriptions, located in Enrollment Services and the Transfer Center, or speak with your Faculty Advisor.

MnTC Distribution Requirements for the AS Degree

The minimum Minnesota Transfer Curriculum (MnTC) distribution requirements for the AS degree are listed below. Credit and course requirements are specific for each program. Refer to the curriculum requirements listed in the Programs of Study for each AS degree program.

Note: Specific course recommendations or requirements for some AS degree programs may apply.

AS Degree General Education Requirements* 30 Credits

Students are required to complete ENGL 1711 and a Speech course from Goal 1 (7 credits) 7

Select a minimum of 13 additional credits from Goals 1–10 of the Minnesota Transfer Curriculum 13

| Students must select courses from at least six (6) Goal Areas of the Minnesota Transfer Curriculum. |

* Refer to the Minnesota Transfer Curriculum Course List for specific course options

Associate in Applied Science Degree

The Associate in Applied Science degree (AAS) is awarded for successful completion of a program of 60–72 semester credits and is intended for students who desire immediate employment upon graduation. At
Saint Paul College, the AAS program shall include a minimum of 20 semester credits of liberal arts and sciences courses as described in the MnTC distribution requirements for the AAS degree.

**Transfer Note:** The AAS degree is not intended to transfer to an upper-division college; however, some articulation agreements exist with designated four-year colleges and universities for several of the AAS degree programs. Minnesota Transfer Curriculum courses within the AAS degree transfer to institutions in the Minnesota State Colleges and Universities system and other colleges. Please see a Transfer Specialist for specific information and refer to the Transfer Articulation Agreements Table.

### AAS Programs
- Accounting
- Auto Body Repair
- Automotive Service Technician
- Business Administration
- Business Information Technology
- Business Logistics Management
- Child Development Careers
- Clinical Massage Therapy
- Computer Network Engineering
- Computer Programming
- Construction Supervisor
- Cosmetology
- Culinary Arts
- Energy Process Technology
- Engineering Technology
- Esthetician
- Health Information Technology
- Hospitality and Entertainment Management
- Human Resources
- International Trade Specialist
- Marketing and Entrepreneurship
- Medical Office Professional
- Medical Laboratory Technician
- Metaverse Application Design
- Metaverse Application Development
- Personal Trainer
- Practical Nursing
- Respiratory Therapist/Respiratory Care Practitioner
- Sign Language Interpreter/Transliterator
- Visualization Technology

### General Requirements for the AAS Degree:
- 60–72 earned college-level credits (a minimum of 20 credits from MnTC courses)
- Cumulative GPA of 2.0 or higher
- Meet Saint Paul College residency requirement of 20 credits. The requirement shall be reduced to 12 credits for students transferring with at least 12 college-level credits from another Minnesota State Colleges and Universities institution or the University of Minnesota. For specific course requirements, see the individual program descriptions, the Office of Enrollment Services staff or your Faculty Advisor.

### MnTC Distribution Requirements for the AAS Degree
The minimum Minnesota Transfer Curriculum (MnTC) distribution requirements for the AAS degree are listed below. Credit and course requirements are specific for each program. Refer to the curriculum requirements listed in the Programs of Study section for each AAS degree program.

### AAS Degree General Education Requirements*

* Refer to the Minnesota Transfer Curriculum Course List for specific course options.

**NOTE:** The number of credits required for the AA and AAS programs are subject to change due to recent legislation that may limit the number of credits for these programs to 60 credits.
Diploma Programs

Diplomas are awarded for successful completion of 30–72 semester college-level credits and are intended for students who desire entry-level employment skills or career advancement. Students in diploma programs are required to complete technical courses as well as general education courses.

Certificate Programs

Certificates are awarded for successful completion of 9–30 semester college-level credits. Certificates are awarded for successful completion of a program intended to provide students with entry-level employment skills or to enhance a student’s technical skills.

Internships

Some major program areas require an internship. For other areas, an internship is optional. When students are ready to complete this phase of their training, they should consult with their faculty advisor to set up and coordinate the internship.

While completing the internship, the student remains registered at Saint Paul College. Students are not excused from tuition payment and must continue to meet course requirements for all courses in which they are enrolled.

Saint Paul Joint Apprenticeship

Saint Paul College has worked with the building trades for many years. In cooperation with Advisory and Joint Apprenticeship committees, Saint Paul College works to give trade apprentices the most up-to-date education and training available in the United States.

Most applicants are accepted into an apprenticeship program by either a) working in the occupation, b) being referred by an employer, or c) having completed a pre-apprenticeship training program. To enroll in one of the trade programs, please contact the Office of Enrollment Services for the next available opening date and application. Entrance exams and in some cases interviews are required.

To enroll in a program without a program completion requirement, students must contact that apprenticeship coordinator. Students may obtain their name or number by calling the Trade Division, 651.846.1320.

Saint Paul Joint Apprenticeship Committees

(Includes both day and evening programs)

- Floorcoverers
- Ironworkers
- Pipefitters
- Plasterers
- Plumbers

Minnesota Transfer Curriculum

The Saint Paul College mission endorses the centrality of general education in its programming and its commitment to offer breadth as well as depth of study in its curriculum. The Minnesota Transfer Curriculum is a coherent requirement of Saint Paul College programs and is clearly identifiable as an integral part of the curriculum. The College is committed to and strives toward outcomes that impart common knowledge, intellectual concepts and attitudes every person ought to possess.

Minnesota Transfer Curriculum Goals

The Minnesota State Colleges and Universities system has developed a common general education curriculum called the Minnesota Transfer Curriculum (MnTC). Completion of this defined transfer curriculum at one institution enables a student to receive credit for all lower division general education upon admission to any other Minnesota public institution.

The MnTC is intended to achieve the following ten goals:

1. Written and Oral Communication
   To develop writers and speakers who use the English language effectively and who read, write, speak and listen critically. As a base, all students should complete introductory communication requirements early in their collegiate studies. Writing competency is an ongoing process to be reinforced through writing-intensive courses and writing across the curriculum. Speaking and listening skills need reinforcement through multiple opportunities for interpersonal communication, public speaking and discussion.

2. Critical Thinking
   To develop thinkers who are able to unify factual, creative, rational and value-sensitive modes of thought. Critical thinking will be taught and used throughout the general education curriculum in order to develop students’ awareness of their own thinking and problem-solving procedures. To integrate new skills into their customary ways of thinking, students must be actively engaged in practicing thinking skills and applying them to open-ended problems.
3. **Natural Sciences**
   To improve students’ understanding of natural science principles and of the methods of scientific inquiry, i.e., the ways in which scientists investigate natural science phenomena. As a basis for lifelong learning, students need to know the vocabulary of science and to realize that while a set of principles has been developed through the work of previous scientists, ongoing scientific inquiry and new knowledge will bring changes in some of the ways scientists view the world. By studying the problems that engage today’s scientists, students learn to appreciate the importance of science in their lives and to understand the value of a scientific perspective. Students should be encouraged to study both the biological and physical sciences.

4. **Mathematical/Logical Reasoning**
   To increase students’ knowledge about mathematical and logical modes of thinking. This will enable students to appreciate the breadth of applications of mathematics, evaluate arguments and detect fallacious reasoning. Students will learn to apply mathematics, logic and/or statistics to help them make decisions in their lives and careers. Minnesota’s public higher education systems have agreed that developmental mathematics includes the first three years of a high school mathematics sequence through intermediate algebra.

5. **History, Social and Behavioral Sciences**
   To increase students’ knowledge of how historians and social and behavioral scientists discover, describe and explain the behaviors and interactions among individuals, groups, institutions, events and ideas. Such knowledge will better equip students to understand themselves and the roles they play in addressing the issues facing humanity.

6. **Humanities and Fine Arts**
   To expand students’ knowledge of the human condition and human cultures, especially in relation to behavior, ideas and values expressed in works of human imagination and thought. Through study in disciplines such as literature, philosophy and the fine arts, students will engage in critical analysis, form aesthetic judgments and develop an appreciation of the arts and humanities as fundamental to the health and survival of any society. Students should have experiences in both the arts and humanities.

7. **Human Diversity**
   To increase students’ understanding of individual and group differences (e.g., race, gender, class) and their knowledge of the traditions and values of various groups in the United States. Students should be able to evaluate the United States’ historical and contemporary responses to group differences.

8. **Global Perspective**
   To increase students’ understanding of the growing interdependence of nations and peoples and develop their ability to apply a comparative perspective to cross-cultural social, economic and political experiences.

9. **Ethical and Civic Responsibility**
   To develop students’ capacity to identify, discuss and reflect upon the ethical dimensions of political, social and personal life and to understand the ways in which they can exercise responsible and productive citizenship. While there are diverse views of social justice or the common good in a pluralistic society, students should learn that responsible citizenship requires them to develop skills to understand their own and others’ positions, be part of the free exchange of ideas and function as public-minded citizens.

10. **People and the Environment**
    To improve students’ understanding of today’s complex environmental challenges. Students will examine the inter-relatedness of human society and the natural environment. Knowledge of both bio-physical principles and socio-cultural systems is the foundation for integrative and critical thinking about environmental issues.

**Minnesota Transfer Curriculum (MnTC) Course List**

To earn the full Minnesota Transfer Curriculum, all ten goal areas listed below must be completed. A total of at least 40 semester credits must be earned. Courses designated with a superscript (e.g., BIOL 171010) satisfy more than one goal area; however, credits are counted only once toward the 40-credit minimum requirement. A (p) indicates a prerequisite is required for that course. Completion of the MnTC meets the lower division general education requirements at Minnesota State Colleges and Universities and the University of Minnesota. Contact the Transfer Center staff for more information.

To follow the Associate in Science or Associate in Applied Science requirements for general education courses, choose from the MnTC courses in the goals below according to the distribution requirements for your degree. The Associate in Science degree requires 30 MnTC credits; the Associate in Applied Science degree requires 20 MnTC credits.

For any additions or changes in the MnTC Course List, contact the College Transfer Specialist located in the Transfer Center.

Transfer to Other Institutions

To ensure a smooth transfer from Saint Paul College to a four-year college or university, it is important to understand the types of degrees offered at the College:

The Associate in Arts (AA) degree is designed for transfer and offers flexibility in terms of the variety of colleges to which a student can transfer and in the variety of majors that can be chosen. The AA degree requires mostly general education courses (40 credits), which is what gives it more transferability. The AA degree consists of the Minnesota Transfer Curriculum (MnTC). Completion of the MnTC with a 2.0 GPA meets the general education requirements at any of the public Minnesota State Colleges and Universities institutions and the University of Minnesota. Several private colleges also honor the AA degree. Some four-year majors require specific general education courses referred to as premajor requirements. Note: Course requirements may vary depending on the major and transfer college, so it is important to talk to a Transfer Specialist at Saint Paul College and to the appropriate person at the transfer college. Refer to the General Transfer Table.

For students who are undecided about their major and who are interested in a four-year degree, the AA is a good program to follow until deciding.

The Associate in Science (AS) degree is intended to prepare students for immediate employment; however, students can transfer to complete a Bachelor’s degree when they transfer to colleges with which Saint Paul College has articulation agreements. The AS degree requires 30 credits of general education (MnTC) courses. Additional general education courses may be required to complete a Bachelor’s degree, particularly if students transfer to a college where an articulation agreement does not exist. Refer to the Transfer Articulation Agreements Table.

The Associate in Applied Science (AAS) degree is intended mainly to prepare students for direct employment. Students who are following an AAS degree and who are interested in transfer are strongly advised to talk to a Saint Paul College Transfer Specialist in the Transfer Center as transfer options are more limited. The AAS degree requires 20 credits of general education (MnTC) courses. Additional general education courses may be required to complete a Bachelor’s degree, typically would be required to complete a Bachelor’s degree for students who transfer, particularly to colleges with which articulation agreements do not exist. Refer to the Transfer Articulation Agreements Table.

Understanding Transfer of Credits

The receiving college or university decides which credits transfer and if those credits meet its degree requirements; however, a course that meets a Minnesota Transfer Curriculum (MnTC) goal at Saint Paul College will meet the same goal at a Minnesota State Colleges and Universities institution. Note: A course can meet a Minnesota Transfer Goal at the sending institution and yet may or may not be considered equivalent to a course at the receiving institution. The accreditation of both the
sending and receiving institution can affect the transfer of credits earned, but it is not the only factor in determining transfer of credits.

Institutions accept credits from courses and programs like those they offer. They look for similarity in course goals, content and level: “like” transfers to “like.” The name of a course is not sufficient to determine equivalency. Not everything that transfers counts toward graduation. Bachelor’s degree programs usually count credits in three categories: general education, major/minor courses and prerequisites/electives. The key question is, “Will your credits fulfill requirements of the degree or program you choose?”

A change in career goal or major might make it difficult to complete all degree requirements within the usual number of graduation credits.

Colleges and universities differ in how they accept courses and other types of college credits (CLEP, AP, IB international credits, etc.).

Since requirements and acceptance of Saint Paul College credits differ from one college to another, it is important to talk to a Saint Paul College Transfer Specialist, consult college catalogs and Web sites and talk to advisors at the four-year institution. Transfer Specialists and other transfer resources are available in the Transfer Center. Transfer guides to four-year institutions may be available to provide guidance in selecting the courses intended to transfer from Saint Paul College. Also access the Saint Paul College Web site (www.saintpaul.edu) or the Minnesota Transfer Web site (www.mntransfer.org) for more information.

Obtain the following materials and information from the four-year institution:

- College catalog
- Transfer brochure, if available
- Information about admissions criteria and materials required for admission (e.g., transcripts, test scores, portfolio, etc.). Note that some majors have limited enrollments and/or special admission requirements such as higher grade point averages.
- Information on financial aid (how to apply and by what date).

**Note:** Minnesota State Colleges and Universities and the University of Minnesota have high school preparation requirements for admission. Consult an advisor at your intended transfer school for more information.

After reviewing this information, contact the Transfer Center or someone in the division or program of interest. Be sure to ask about course transfer and admissions criteria.

**Applying for Transfer Admission (at other Institutions)**

Application for admission is the first step in transferring. Fill out the application early, prior to the deadline and enclose the required application fee.

Request official transcripts be sent from all previously attended institutions. The student is also required to provide a high school transcript or GED test scores.

Make certain the college or university has been supplied with all the necessary paperwork. Most colleges make no decisions until all required documents are filed.

If nothing has been heard from the intended college of transfer after one month, call to check on application status.

After receiving notification of acceptance, transcripted credits will be evaluated for transfer. A written evaluation should explain which courses transfer and which do not. How courses specifically meet degree requirements may not be decided until orientation or selection of a major.

Call the credit evaluator in the Office of Enrollment Services with questions or to find out why judgments were made about specific courses. Each student has the right to an appeal. See Your Rights as a Transfer Student.

**Your Rights as a Transfer Student**

Students are entitled to:

- A clear, understandable statement of an institution’s transfer policy.
- A fair credit review and an explanation of why credits were or were not accepted.
- A copy of the formal appeals process.
- A review of eligibility for financial aid or scholarships.

**Steps in the Appeals Process:**

1. The student fills out an appeals form.
   Supplemental information provided to reviewers can include: a syllabus, course description, or reading list, depending upon the type of appeal.
2. A review by the appropriate department or committee will be conducted.
3. The decision is conveyed in writing to the student.
4. The student may appeal the decision.

**For help with transfer questions or concerns, contact the Transfer Center or your advisor at the transfer college.**

**Transfer Articulation Agreements**

Saint Paul College has formed articulation agreements with a number of public and private institutions to assist students following some AS, AAS, diploma or certificate programs with their transfer goals. Please see a Transfer Specialist for further information or see the Transfer Articulation Agreements Table.
**General Transfer Table 2009-2010**
(for students following the Associate in Arts or other general transfer)

The following table summarizes transfer to many colleges. Students who are planning to transfer to other institutions should work with transfer specialists at Saint Paul College and the college to which they are transferring. Certain majors require specialized coursework, so the following provides a guide for general transfer; it is not intended to cover specific requirements for all majors. Admission requirements may vary depending on the major the student is pursuing. Students should consult with the transfer college and use transfer guides to find out admission deadlines and requirements. Note: Students are free to explore transfer to any college, including colleges not listed in the following table.

Transfer guides are available for many of the colleges listed – go to www.saintpaul.edu, click on “current students,” “Transfer Center,” and “Articulation Agreement” listed in the gray box. Transfer guides are also available in the Transfer Center in Room 1365.

**Transfer Articulation Agreements Table 2009-2010**
(for students following specified AS, AAS, diploma or certificate programs)

Saint Paul College has formed articulation agreements with a number of public and private institutions to assist students with their transfer goals. These agreements facilitate credit transfer and provide a smooth transition from one related program to another. Please see a transfer specialist for additional information. Additional general education credits will likely be required to complete a degree. The number of credits that transfer may vary depending on the program. Note: Students are free to explore transfer to any college, including colleges not listed in the following table; however, the number of credits that transfer may be more limited.

Accounting

Accounting AAS Degree .......................... 72 Credits
Accounting Technician Diploma ............... 39 Credits

Program Overview
An Accountant examines, analyzes and interprets accounting data for the purpose of giving advice and preparing financial statements. Duties may include performing such activities as recording receipts and disbursements and preparing state and federal reports. The accountant may prepare reports and statements on a computer or manually.

The Accounting Technician monitors and controls various types of electronic data processing equipment used to process accounting data. Applications would include automated general ledger and other accounting subsystems, spreadsheet applications, database management and the use of graphics. The Accounting Technician may also assist in the planning and implementation of automated accounting systems.

Students must have a high school diploma or an equivalency certificate. Excellent reading skills and a combination of interest and ability to concentrate on detail, an analytical mind, good judgment and absolute integrity are necessary for success in the field of accounting.

Career Opportunities
With more and more emphasis being placed on computer usage for accounting careers, opportunities for employment in this field are excellent. Rate of advancement may be swift and the rewards generous.

The Accounting profession offers a vast arena of employment potential. Typical places of employment include accounting departments in governmental agencies, financial institutions, private business and industry and public accounting firms. Other job titles may be tax accountant, cost accountant, staff accountant, government accountant, auditor, junior accountant or comptroller. The financial accounting technician positions are found in the areas of public accounting, private accounting, non-profit accounting, auditing, taxation, cost accounting and managerial positions.

Program Outcomes
1. Graduates of the Accounting Program will be prepared for a career in the accounting profession.
2. Graduates will be proficient in computer software and its application to financial accounting, taxation and financial analysis.
3. Graduates will have knowledge of financial accounting theory and financial statement analysis.
4. Graduates will have completed general education requirements for employment and personal roles.
5. Graduates will serve their employers and clients in all phases of accounting, including cost accounting, taxes, estates and trusts and non-profit accounting.

### Business Administration

**Program Overview**

Effective use of people, technology, systems, equipment, and space are the keys to competent office management. Students graduating from this program are prepared to manage functions in the business environment. Business Administration is recommended for experienced staff (those wishing to increase their potential for promotion), as well as entry-level employees. Graduates will have expert skills and in-depth software knowledge.

**Career Opportunities**

The opportunities for employment in the business administration area are unlimited depending on the individual’s strengths and interests. Employment for managers is expected to grow at an average pace despite mergers and takeovers. The jobs that are expected to grow the fastest are with service and professional firms. Earnings vary with size of company, location, industry, function, responsibilities, education, experience, and ability.

**Program Outcomes**

1. Graduates will possess the knowledge and skills for immediate employment in related business support areas.
2. Graduates will be experienced in business protocol via internships and/or capstone courses.
3. Graduates will have successfully mastered the general education program requirements for work and life roles.
4. Graduates will be proficient in the use of business administration skills and software applications.

### Business Information Technology

The mission of the Business Department at Saint Paul College is to sustain the College mission by providing quality, lifelong business education supported by technology for a diverse, metropolitan student population.

Business Information Technology

Program Overview

A graduate of the Business Information Technology AAS Degree will be trained for a business and information support position that may use a wide range of systems and software applications such as database, spreadsheet, presentation graphics, word processing, and integrated software applications, business websites, templates, and desktop publishing. Students graduating with the Business Information Technology degree can provide support for business systems end-users and assist with business training, problem solving, and troubleshooting.

Graduates in this program are equipped with knowledge of cutting-edge technology and software, a professional attitude, enhanced skills in the business environment, the ability to work independently or in workgroups under pressure and within deadlines, and flexibility to cope with interruptions and business system/software problems.

Program graduates are working in small and large companies. Other graduates are continuing their education. Graduates in this program cover content in preparation for the Microsoft Certified Application Specialist certification exams.

The mission of the Business Department at Saint Paul College is to sustain the College mission by providing quality, lifelong business education supported by technology for a diverse, metropolitan student population.

ACBSP
Career Opportunities
Opportunities are excellent for skilled, capable, and dependable graduates. Graduates can be employed in a variety of business administrative and information support positions that require advanced technical training such as: administrative assistant, office coordinator, assistant manager, and executive assistant.

Program Outcomes
1. Graduates will possess the knowledge and skills for immediate employment in related business support areas.
2. Graduates will be experienced in business protocol via course projects and capstone courses.
3. Graduates will have successfully mastered the general education program requirements for work and life roles.
4. Graduates will be proficient in the use of business software applications.

Business Applications Specialist

Program Overview
Business Applications Specialists utilize a wide range of business systems and software applications such as: electronic mail, the Internet, word processing, Excel worksheets, Access database management, PowerPoint presentation graphics, planning and scheduling, desktop publishing, and business website development. Business personnel work with communication technology such as instant messaging, voice mail, cell phones, voice recognition, and various multimedia features.

Graduates in this program will have excellent technical software support skills. Professionals in this field enjoy working with computers and software, show a strong interest in emerging technology, and have a strong desire to work as part of a team.

The Business Applications specialist certificate is a short-term, concentrated format that is recommended.
for experienced business staff who are looking for advancement or enhancement within their current organization, or students wanting to quickly enter the business market with strong computer software skills.

**Career Opportunities**

Employment opportunities will continue to grow in this business software support area. The Business Application Specialist program is designed to provide students with advanced Microsoft Office software skills. Graduates will possess the necessary skills to be employed in a variety of business support positions such as: Administrative Assistants, Executive Assistants, Virtual Coordinators, Software User Support Specialist, Office Systems Specialists, Assistant Managers, Project Assistants, Office Coordinators, and Desktop Publishing Specialists.

**Program Outcomes**

1. Graduates will possess the knowledge and skills for immediate employment in related professional software support areas.
2. Graduates will have successfully mastered the general education program requirements for work and life roles.
3. Graduates will be prepared for the Microsoft Office certification in Word, Excel, Access and PowerPoint.

**Business Logistics Management Advanced Technical Certificate . . . . . . . . 19 Credits**

**Program Overview**

Logistics management is concerned with the movement, storage and processing of materials and information across the whole of the supply chain, from acquisition of raw materials and components, through manufacturing, to delivery of finished products to end users.

This program provides students the opportunity to understand modern supply chain management. Supply Chain management demands a multidisciplinary and cross-functional approach to business which transcends the traditional functional boundaries and management disciplines that characterize many organizations.

The certificate is transferable to the AAS Degree.

**Career Opportunities**

Business Logistics Management offers a wide variety of employment opportunities. Some of these are purchasing and supplier management, manufacturing logistics, inventory management, transport management, distribution, warehousing management, customer service management, information management and logistics and supply chain strategy. Because of the wide range of jobs open to graduates, prospective students are asked to consult with the program instructor for specific job forecasts.

The mission of the Business Department at Saint Paul College is to sustain the College mission by providing quality, lifelong business education supported by technology for a diverse, metropolitan student population.
Program Outcomes
1. Graduates will have knowledge and skills in distribution planning, transportation management and logistics.
2. Graduates will have knowledge and skills in customer service.
3. Graduates will be prepared for positions in transportation, distribution and supply chain management.
4. Graduates will have knowledge and skills to provide foresight of potential opportunities in the business logistics marketplace.

Business Management

Business Management AS Degree                60 Credits
Supervision Certificate                      12 Credits
Project Management: Business & Information Systems Certificate 14 credits

Program Overview
The Business Management AS degree prepares students for general management responsibilities. Students learn about the functions of business, including accounting, management, marketing and human resources. Students study a broad background of business and liberal arts subjects that prepare them for entry-level positions in business. They may also continue their education in business towards a bachelor’s degree at four-year
institutions. Some bachelor’s degree majors include Management, Marketing, Accounting, Human Resources and International Business.

**Career Opportunities**

Employment opportunities are very good for skilled, capable and dependable business professionals. Employers are looking for business professionals with excellent communication skills, organizational skills, human relations skills and enthusiasm for the job and organization. Graduates may choose to continue their education towards a bachelor’s degree or begin work in a variety of settings. Graduates can explore opportunities that match their interests and education in a variety of industries.

**Program Outcomes**

1. Graduates will have skills, knowledge and abilities in core business functions including accounting, marketing and management.
2. Graduates will have a basic understanding of the laws that impact the business environment.
3. Graduates will be prepared for entry-level employment in business.
4. Graduates will have successfully mastered the general education requirements for work and life roles.

**Business Administration Core**

The following professional core is for programs in Marketing and Entrepreneurship, Hospitality, Sports and Entertainment Management, Human Resources, International Trade, Administrative Management (Business Administration), Administrative Assistant (Business Information Technology), Business Logistics Management, and Business Management.

Hospitality and Entertainment Management

**Hospitality and Entertainment Management**

**AAS Degree** 61 Credits

**Restaurant Management Certificate** 13 Credits

**Hotel Marketing and Sales Certificate** 15 Credits

Program Overview

The Hospitality and Entertainment Management curriculum focuses on the management of today’s exciting hospitality and entertainment industries. Students will receive a solid foundation of business practices related to this growing service industry. Courses will examine organizations in lodging, tourism, and entertainment, food and beverage operations.

Program Outcomes

1. Graduates will understand broad hospitality, food and entertainment concepts.
2. Graduates will have knowledge of the hotel, travel and tourism industry.
3. Graduates will develop strong customer service, human relations and communications skills.
4. Graduates will demonstrate problem-solving skills and integrate new ways of thinking and learning.

The mission of the Business Department at Saint Paul College is to sustain the College mission by providing quality, lifelong business education supported by technology for a diverse, metropolitan student population.
Career Opportunities
According to Hospitality Minnesota, a Roseville-based trade association, the industry employs more than 127,000 people and pays $3.3 billion in wages each year, making it the state’s second-largest industry. Nationally, the U.S. Bureau of Labor Statistics estimates have noted that the hospitality industry would generate more than 2 million new jobs between 2002 – 2012. There are a wide variety of employment opportunities including hotel/lodging operations, restaurant and catering management, travel and tourism, sports, recreation and facilities management, gaming and casino operations, meeting, convention and special event management.

Human Resources

Human Resources AAS Degree 62 Credits
Human Resources Specialist Certificate 29 Credits
Human Resources Professional Certificate 15 Credits

Program Overview
The human resource professional, in any organization, plays a strategic role in the success of the organization. A human resource professional needs to be competent in human resource knowledge, able to facilitate change, have personal credibility which includes trust and confidentiality and the understanding of how a business operates. Specific duties may involve facilitating employee communication, managing human resource record keeping, administering employee compensation and benefit plans, recruiting, hiring and orienting new employees, writing policies and applying federal, state and local employment laws and regulations.

Qualifications include excellent communication and human relation skills, computer skills, flexibility and the ability to work under pressure.

Career Opportunities
Employment opportunities are excellent for skilled, capable and dependable Human Resource program graduates.

Human Resource program graduates may be employed in positions such as: Human Resource Representative, Human Resource Coordinator, HR Assistant, Human Resource Specialist, Human Resource Generalist, Compensation or Benefits Specialist, Staffing Coordinator, Employment Specialist, Payroll Specialist, or Training and Development Assistant. Typical salaries for entry-level positions range from $28,000–$32,000 and for mid-level positions from $35,000–$45,000.

Program Outcomes
1. Graduates will have the skills, knowledge and abilities in core human resource functions (i.e., HRIS, Record Keeping, Compensation/Benefits Admin and staffing procedures).
2. Graduates will have the skills, knowledge and abilities to identify and deal with employee relation issues and to communicate effectively in a work environment.
3. Graduates will have the skills, knowledge and abilities in applicable federal, state and local employment regulations and a working knowledge of basic employment laws.
4. Graduates will be prepared for employment in the field of human resources (in a variety of positions).
5. Graduates will have successfully mastered the general education requirements for work and life roles.

Human Resources AAS Degree
The Human Resources Associate in Applied Science Degree is intended for students who desire immediate employment upon graduation, or who plan to transfer to another institution of higher education.

International Trade

International Trade Specialist AAS Degree... 66 Credits
International Trade Professional Certificate ... 16 Credits

Program Advisor approval is needed prior to entrance into the certification program. This certificate is transferable to the AAS program.

Program Overview

Applicants are required to have a high school diploma or equivalent. The international trade area is especially suited for persons who are self reliant, imaginative, adaptable and who possess an interest in working with people from other cultures.

Career Opportunities

More than four million people in the United States work in jobs related to international trade. In Minnesota, many businesses engage in international trade, with a dramatic increase in trade activity expected within five years.

A career in International Trade offers you the opportunity to work in the international marketplace. The International Trade Specialist Program will provide you with knowledge and skills which will prepare you for employment in the export and import departments of businesses. You will be working with people from foreign countries, handling foreign orders, filling overseas orders, handling customer matters and determining tariff rates for the entry of foreign goods through U.S. Customs. Job titles include: International Sales/Marketing Assistant, International Marketing Communication Coordinator, International Documentation Specialist, International Customer Service Coordinator, Export-Import Coordinator, International Banker and International Transportation Coordinator.

This program also provides an excellent foundation for individuals wanting to be entrepreneurs in the import/export business. The import/export field is growing! You can grow with it.

Program Outcomes

1. Graduates will have knowledge and skills in domestic and international transportation management and logistics.
2. Graduates will have knowledge of U.S. Custom regulations and classifications.
3. Graduates will demonstrate the ability to successfully perform as International Trade Specialist via Internships.
4. Graduates will be prepared for employment as International Trade Specialists.
5. Graduates will have knowledge and skills in customer service.

The Human Resource Certification Institute has recognized Saint Paul College as an approved provider of educational courses for re-certification of the PHR or SPHR certification.

Health Information Technology and Medical Office Careers

Health Information Technology AAS Degree*  65 Credits
Medical Office Professional AAS Degree  60 Credits
Medical Coding Certificate  30 Credits
Medical Records Clerk Certificate  17 Credits
Medical Receptionist Certificate  20 Credits
Medical Transcriptionist Certificate  30 Credits

* The Health Information Technology AAS Degree Program is pending accreditation by the Commission on Accreditation of Health Informatics and Information Management Education (www.cahiim.org)

Program Overview

Health Information Technicians play a vital role in the health care industry by participating in the creation, completion, distribution and retention of medical record documentation according to policies and procedures outlined by several regulating bodies such as the Joint Commission on Accreditation of Health Care Facilities and Medicare.

Those individuals enrolled in the program will obtain a broad body of knowledge which will allow them to become employed in many capacities within a health information department. Some of the positions include such tasks as: release of information, various registries, incomplete chart room, processing of medical documentation, coding and abstracting, and may include supervisory or leadership roles based on skill and ability. Students who successfully complete the Health Information Technology degree are allowed to sit for the national examination given by the American Health Information Management Association to become a Registered Health Information Technician upon successful completion of the examination.
Career Opportunities
Graduates of the Health Information Technology degree will find positions in various health care settings such as private physician offices, clinics, specialty clinics, hospitals, long-term care facilities, and rehabilitation facilities. Employment can also be found in government offices, the insurance industry, dental and chiropractic clinics, and information technology suppliers.

Program Outcomes
1. Graduates will apply policies and procedures to assure the accuracy of health information.
2. Graduates will use specialized software in the completion of HIM processes such as record tracking, release of information, coding, grouping, registries, billing, and quality improvement.
3. Graduates will apply procedure codes using ICD-9-CM and CPT/HCPCS.
4. Graduates will apply policies and procedures to comply with the changing regulations among various payment systems for healthcare services.
5. Graduates will possess a knowledge base which will allow them to find employment in the health care industry.
6. Graduates will be prepared to sit for the certification examination given by the American Health Information Management Association to become a Registered Health Information Technician.

Medical Office Careers

Program Overview
Medical Office professionals are critical to the support of clinical staff in the health care industry. Physicians, nurses and other direct patient-contact personnel rely on well-trained medical office professionals to assist them in the creation and retention of quality medical documentation based on patient care. The medical office professional’s job may include transcribing medical documents, creating and processing correspondence, coding of diagnoses and procedures, scheduling patient appointments, pulling and filing of medical records, releasing of information, collecting or abstracting medical data, understanding reimbursement methodologies, meeting physician documentation needs, as well as other related duties.

High school graduation or equivalent is required. Applicants should possess excellent communication skills, meticulous attention to detail, good spelling, finger dexterity and extreme accuracy in their work. Candidates considering this field should be comfortable reading and analyzing data for long periods of time, listening to dictated material for an extended period, assisting the public with concerns and being given a directive to complete.

Career Opportunities
Medical Office Professionals enjoy salaries in the top bracket of office professionals. Some may advance to office supervisors or managers with further education, and some may develop their own business based on their medical office specialty, such as transcription or coding. The Medical Office Professional may work in a clinic, physician’s office, surgery center, specialty clinic, hospital, insurance company, government agency, research foundation, long-term care facility, dental office, consulting firm, rehabilitation center or other health care facility.

Program Outcomes
1. Graduates will possess the knowledge and skills needed for immediate employment as a Medical Office Professional.
2. Graduates will have successfully mastered the general education requirements for work and life roles.
3. Graduates will be proficient in the use of basic computer software applications.
4. Graduates will possess a complete understanding of the language of medicine or medical terminology.

Computer Graphics and Visualization Careers

Program Overview
This program prepares students for jobs in the exciting computer graphics and animation field. Students will learn how to take an idea from concept through production including computer graphics, computer animation, sound and video.

Computer Graphics Specialists can work in a wide variety of creative jobs including web design, film and animation production, CD ROM production and any organization that can benefit from these special talents. With more and more animation moving to the desktop, the computer graphics specialist is becoming a high demand career.

The student should be creative and have excellent communication skills. Students should exhibit qualities of patience and precision and should enjoy working both independently and on team projects.

Career Opportunities
The computer graphics field relates to many jobs in the multimedia area including but not limited to:

- Web Designer
- Computer Animator
- Computer Game Designer and Developer
- Multimedia Developer

Program Outcomes
1. Graduates will have knowledge and skills in computer logic and programming.
2. Graduates will have knowledge and skills in web design.
3. Graduates will have knowledge and skills in computer animation.
4. Graduates will have knowledge and skills in digital sound and video production.
5. Graduates will have knowledge and skills in digital photography.
6. Graduates of this program may choose to continue their education at a four-year institution in Computer Graphics or a related field.

AAS Degree

Program Overview
This program prepares enterprising individuals to become marketing professionals or entrepreneurs. Students will learn how to start and market a business that will add economic and cultural value within a community. Students will develop business and marketing plans that address financial, managerial and operational aspects.

Career Opportunities
Employment opportunities are excellent for skilled and capable marketers and entrepreneurs. Marketing opportunities include Sales Representative, Product Development Specialist, Marketing Specialist, Marketing Representative and Advertising Assistant Account Executive. Opportunities are available for starting a new business, enhancing an existing business or department or partnering with other small business.

Program Outcomes
1. Graduates will have the skills, knowledge and abilities in core business functions including accounting, marketing and management.
2. Graduates will have an understanding of how to start and market an entrepreneurship/small business operation.
3. Graduates will be prepared to manage, market and enhance an entrepreneurship/small business operation.
4. Graduates will have successfully mastered the general education required for work and life roles.

Metaverse Application Design
AAS Degree*

Program Overview
This program prepares students for jobs in the exciting computer graphics and animation field. Students will learn how to take an idea from concept through production including computer graphics, computer animation, sound and video. Computer Graphics Specialists work in a wide variety of creative jobs including web design, film and animation production, metaverse design and any organization that can benefit from these special talents. With more and more animation moving to the desktop, the computer graphics specialist is becoming a high demand career.

Career Opportunities
Career Opportunities exist both for freelance designers as well as full time positions in the areas of web designer, computer animator, computer game designer, metaverse designer and multimedia developer.

Program Outcomes
1. Graduates will have knowledge and skills in the area of multimedia and computer graphic design.
2. Graduates will have knowledge and experience in the latest software applications used in their filed by design professionals.
3. Graduates of the Visualization Programs will be prepared for employment in the rapidly changing areas of digital graphics and multimedia technologies.
4. Graduates will be prepared to demonstrate both traditional and digital portfolios to potential employers.

Visualization Technology Certificate

Program Overview
This certificate program is a series of entry level courses that are part of the Visualization Technology AAS degree at Saint Paul College. The certificate option is available for students who may not choose to complete the entire AAS degree and gain some experience with courses used in computer graphics, particularly courses in the Adobe software suite. This would be a new certificate option for Saint Paul College.

Computer - Management Information Systems

Management Information Systems
AS Degree ................................. 60 Credits

Program Overview
The Associate in Science Degree in Management Information Systems is designed to provide students with opportunities for immediate employment or for transfer to four-year institutions with whom Saint Paul College has articulation agreements. The College has developed articulation agreements with four-year institutions to assist students with their transfer goals. See a Transfer Specialist for further information.

Students planning a career in this area should have above average mathematical reasoning and communication skills. Students should exhibit qualities of patience, perseverance and preciseness and should enjoy working in a team environment.

Career Opportunities
A management information system degree prepares the student for a career that combines business techniques and computer systems capability. Students study how to provide business transactions, reporting and analysis using best practices in information technology.

Graduates will find opportunities in the information systems field in business, manufacturing, government and education. With additional education and experience, students may advance to positions such as Systems Analyst, Software Architect and Business Analyst. Graduates of this program may choose to continue their education at a four-year institution in Management Information Systems or a related field. Others may elect to enter the workforce following graduation.

Program Outcomes
1. Graduates will be able to analyze complex business processes and develop process improvements and comprehensive information system requirements specifications to support them.
2. Graduates will be able to help build and test information systems in an organization.
3. Graduates will be able to utilize accounting and business systems information to develop recommendations for operating cost reduction and improved use of capital investment.
4. Graduates will have a sound understanding of business systems, current technologies, organizational structures, communication tools and critical thinking skills to help guide Management Information Systems success.

Computer Network Careers

Computer Network Engineering Specialist
AS Degree .......................... 60 Credits
Computer Network Engineering
AAS Degree .......................... 60 Credits
Network Administration Certificate 20 Credits

Program Overview
Networking Specialists can work in a wide variety of jobs. The work could include purchasing, installing, configuring, administrating and/or supporting. Some jobs in networking could include help desk support, user training, installing and maintaining local and/or wide area networks.

The student should have excellent communications and math skills. For the certificate programs, the student is expected to have prior microcomputer and/or networking experience. He/she should exhibit qualities of patience, perseverance and preciseness and be a logical thinker. The student should enjoy working in a team environment and be able to work independently.

All networking programs emphasize preparation for either the Microsoft Certified System Administration or Linux Professional Institute (LPI) Certification.

Career Opportunities
With almost every size company connected to some type of network, the jobs in networking have become the fastest growing in the computer field. With companies networking to share resources and reduce expenses, the networking specialist is an invaluable part of the new company structure. There is a wide variety of jobs in networking including installation, maintenance, training, managing and user support.

Graduates find excellent opportunities as Network Administrators, Network Support and Certified Network Engineers in business, manufacturing, government and education. Jobs for Networking Specialists in all types of installations are found throughout the country with opportunities for excellent earnings and rapid advancement. Jobs include the following:

- Networking Engineer
- Network Administrator
- Network Help Desk Support
- LAN Specialist
- Datacommunications Specialist
- Telecommunications Specialist
- PC Network Administrator
- Information Specialist
- Certified Network Engineer
- LAN Manager
- WAN Manager

Program Outcomes
1. Graduates will have knowledge and skills in computer network engineering.
2. Graduates will have knowledge and experience in system design, analysis and maintenance.
3. Graduates of the Computer Network programs will be prepared for employment as computer network engineers.
4. Graduates will be prepared to take industry certification exams.

Web 2.0 Development

Program Overview

The technical underpinnings of Web 2.0 have evolved into a set of related technologies which are changing the use of the Web from an “inquiry-response” paradigm to a “dialog-collaborative” paradigm. This program defines technologies relevant to Web 2.0 and provides instruction in their usage and deployment. This certificate will introduce students to the multimedia and gaming environment and prepare students for “open source” and “digital web” certification. Courses include: Web 2.0 Open Source Software Foundations; Web 2.0 Multimedia Tools; and Web 2.0 Programming Paradigms and Software Tools.

Computer Science

Computer Science AS Degree. . . . . . . . . . . . . . 60 Credits

Program Overview
The Associate in Science Degree in Computer Science is designed to provide students with opportunities for immediate employment or for transfer to four-year institutions with whom Saint Paul College has articulation agreements. The College has developed articulation agreements with four-year institutions to assist students with transfer goals. See a Transfer Specialist for further information.

Students planning a career in this area should have average mathematical reasoning and communication skills. Students should exhibit qualities of patience and preciseness and should enjoy working in a team environment.

Career Opportunities
Graduates of this program may choose to continue their education at a four-year institution in a Computer Science or related field. Others may elect to enter the workforce following graduation. Graduates will find opportunities in the computer science field in the areas of programming or database management in business, manufacturing, government and education. With additional education and experience, students may advance to positions such as Database Analyst, Systems Analyst, Software Developer or Programmer-Analyst.

Program Outcomes
1. Graduates will be able to develop complex algorithms which underlie common programming tasks.
2. Graduates will be able to construct and analyze the performance of complex data structures and use them to develop efficient computer programs.
3. Graduates will have a sound understanding of the mathematics that underlies Computer Science and be able to develop and deploy computer programs which utilize it.
4. Graduates of the program will have mastered the general education requirements for work and life roles.

Child Development Careers AS Degree . . . . . . 64 Credits
Child Development Careers ASL AS Degree . . 64 Credits
Child Development Administration
Advanced Technical Certificate . . . . . . . . . . . . . 10 Credits

Program Overview
This program is designed to prepare individuals for employment in a variety of early childhood settings. Courses were designed in collaboration with the other Minnesota Technical and Community Colleges. This program offers a certificate, diploma, AAS and AS Degree. All coursework meets Minnesota Department of Human Services educational requirements for early childhood teachers and assistant teachers. Throughout the program, students will learn about child development, guidance, professional relationships, nutrition, health and safety, cultural sensitivity and techniques for promoting learning in young children. Each level provides lab, internship, or practicum opportunities which allow students to apply their skills and knowledge in a practical experience.

Students must have a high school diploma or GED and pass a criminal background study. Respect for cultural differences is essential. Good judgment and absolute integrity are also necessary for success in the field of child development.

Career Opportunities
The field of Child Development Careers offers many opportunities for employment as more and more parents seek quality care and educational programs for their children. There is currently such a high demand for trained child development professionals that our job placement rate is well over 95%. The Bureau of Labor Statistics estimates that the employment outlook will grow faster than average through 2010.

Graduates of the Child Development Certificate Program will qualify to work as an assistant teacher in a child care setting or preschool program, a family child care provider, or nanny.

Graduates of the Child Development Diploma Program will qualify to work at any of the previous occupations (at a higher pay rate) as well as a lead teacher in a child care setting or preschool program, an assistant teacher in a Head Start program, or a child care resource and referral counselor.

Graduates of the Child Development AAS or AS Program will qualify to work at any of the previous occupations (at a higher pay rate) as well as a Lead Teacher in a Head Start program, a teacher assistant or education assistant in the public schools, Early Childhood Special Education, Early Childhood Family Education, or a Child Life Assistant (working with children in a hospital setting). The ASL/AS program qualifies the graduate to work in the same programs as listed; however, this program has a focus on using ASL in a child development setting.

The Child Development Administration Advanced Technical Certificate is for current child care center directors and assistant directors who seek advanced certification.

Program Outcomes
1. Graduates will demonstrate knowledge of child safety, health and nutrition.
2. Graduates will demonstrate knowledge in the fundamental principles of child development and developmentally appropriate practices.
3. Graduates will demonstrate knowledge and skills in developing and implementing early childhood curriculum.
4. Graduates will have knowledge and will demonstrate skills in family, community, and staff relations.
5. Graduates will have hands-on training in a variety of Child Development settings.
6. Graduates will possess the knowledge and skills for immediate employment in the Child Development field.
7. Graduates will have successfully mastered the general education program requirements for work and life roles.

### Cosmetology Careers

#### Cosmetology AAS Degree ........................................ 69 Credits

#### Cosmetology Diploma ........................................... 59 Credits

#### Nail Care Technician Certificate .............................. 16 Credits

### Cosmetology

**Program Overview**

Cosmetology services include the cleaning, conditioning, shaping, reinforcing, coloring and enhancing of the
body surface in the areas of head, scalp, face, arms, hands, legs and feet.

Nail Technician services include the cleaning, shaping, conditioning and care for the fingers, hands, toes and feet as well as the preparation and application of artificial nails.

Students must have a high school diploma or equivalent (GED). Science courses provide a good background for the skills taught in hair analysis and treatment. Physical requirements include finger dexterity, negative allergic reaction to cosmetic preparations and artistic flair for creative design. The professional cosmetologist and nail technician should enjoy working with the public and in a team atmosphere. People skills and time management skills are essential.

**Career Opportunities**

The job outlook has never been better for cosmetologists, estheticians and nail technicians. Increasing population, incomes and demand for cosmetology services will stimulate job growth. In addition, numerous job openings will stem from rapid turnover in salons and the large size of the occupation. The rapid growth of nail salons and full-service day spas will generate numerous job openings for cosmetologists skilled in hair, skin and nails.

After cosmetology students complete 1550 hours of skills and theory training and pass the written exam given through the State designated testing service and skills certification, they are eligible for licensure through the Minnesota Board of Barber and Cosmetology. Cosmetologists work in a variety of settings including beauty salons and full-service day spas.

After Nail Technician students complete 350 hours of skills and theory training and pass the written exam given through the State designated testing service and skills certification, they are eligible for licensure from the Minnesota Board of Barbers and Cosmetology. Nail technicians work in beauty salons, nail salons and spas.

**Program Outcomes (Cosmetology)**

1. Graduates will pass the skills certification.
2. Graduates will pass the Minnesota State Cosmetology written exam and state law test administered through the State designated testing service (access through [www.bceboard.state.mn.us](http://www.bceboard.state.mn.us)).
3. Graduates will have knowledge and skills in cosmetology services (hair, nails and skin).
4. Graduates will have knowledge and skills in salon operations.
5. Graduates will be prepared for immediate employment as Cosmetologists.
6. Graduates will have successfully mastered the general education program requirements for work and life roles.

**Program Outcomes (Nail Technician)**

1. Graduates will pass the skills certification.
2. Graduates will pass the Minnesota State written exam and state law test administered through the State designated testing service (access through [www.bceboard.state.mn.us](http://www.bceboard.state.mn.us)).
3. Graduates will possess knowledge and skills for manicures, pedicures and application of artificial nails.

Culinary Arts

Culinary Arts AAS Degree . . . . . . . . . . . . . . . . . 72 Credits
Culinary Arts Diploma . . . . . . . . . . . . . . . . . . . . 55 Credits
Baking and Decorating Certificate . . . . . . . . . . . . 9 Credits
Restaurant Management Certificate . . . . . . . . . . . 13 Credits
Short Order Cooking Certificate . . . . . . . . . . . . 25 Credits
Wine Professional Certificate . . . . . . . . . . . . . . . 9 Credits

Program Overview

Chefs and cooks prepare a variety of foods in many different environments, from preparation of a la carte (prepared to order) to banquets for hundreds of people. Responsibilities include sanitation, maintaining an accounting and inventory control system, estimating the amount of food needed, purchasing food supplies and planning menus. Nutritional aspects of healthy cooking are increasingly incorporated into the chef’s menu.

A good general education, good reading ability and a working knowledge of mathematics is important so that students can interpret weights and measures, calculate recipes and understand cost control, inventory control and forecasting.

Career Opportunities

According to the U.S. Bureau of Labor Statistics and National Restaurant Association, meal preparation continues to shift out of the home, providing plentiful opportunities for chefs, cooks and other food service workers. Americans spend more than $300 billion each year on meals eaten outside the home. The restaurant industry employs 11.6 million people, almost 9% of the total U.S. workforce. The number is expected to reach 13 million by 2010.
Opportunities are available in hotels, restaurants, resorts, clubs, catering and corporate dining, government and school kitchens. Institutional opportunities include health care, schools, corporations and government facilities. Culinary Arts careers can lead in many different directions such as hospitality management, sales, product development, or owning your own business. Articulation agreements exist with 4-year degree granting institutions to pursue advanced degrees in the culinary arts field.

These programs are accredited by the American Culinary Federation Foundation Accrediting Commission (ACFFAC).

Program Outcomes
1. Graduates will have knowledge and skills in culinary arts.
2. Graduates will demonstrate knowledge and skills in restaurant operations.
3. Graduates will be experienced in food preparation and presentation for business and industry.
4. Graduates will be prepared for immediate employment in the food service industry.
5. Graduates will have mastered the general education program requirements for work and life roles.
6. Graduates will be eligible for Minnesota Food Manager Certification.
7. Graduates will be eligible for certification by ACF as a “Certified Culinarian.”

**Wine Professional Certificate**

Must be 21 years of age. All credits must be completed in one semester.

**Program Overview**

The Wine Professional certificate provides the graduate with a strong knowledge of wine, wine service skills and wine marketing strategies.

**Career Opportunities**

The wine industry is rapidly expanding within the United States, with wine sales almost tripling from $10.9 billion in 1991 to $30 billion in 2007, representing 314 million cases. Wine sales have now surpassed beer sales with millennials rapidly adapting to wine over beer. Wine sales are an important profit center for the restaurant/hospitality industry and thus a comprehensive knowledge of wine is critical for maximizing outcomes.
Opportunities are available in hotels, restaurants, resorts, clubs, catering and corporate dining. Graduates of the Wine Professional Certificate will be prepared for careers in the restaurant/hospitality industry, wine distribution and wholesale/retail wine trade.

**Program Outcomes (Wine Professional)**
1. Graduates will have knowledge and skills in professional tasting techniques for assessment and evaluation of wine.
2. Graduates will have knowledge and skills in wine service techniques.
3. Graduates will have knowledge and skills in wine business considerations.
4. Graduates will have knowledge and skills in wine merchandising, marketing and public relations.

**Career Opportunities**

After esthetician students complete 600 hours of skills and theory training and pass the written exam through the State designated testing service and skills certification, they are eligible for licensure through the Minnesota Board of Barber and Cosmetology. Estheticians work in a variety of settings including salons, spas, fitness centers, as well as dermatologic and plastic surgeon’s offices and hospitals. CIDESCO examinees are able to license as an esthetician and nail technician, and certify as a massage therapist. Cross trained therapists are able to work in Spas, Medical Offices, Cruise Ships and 5 Star Resorts.

**Program Outcomes (Esthetician)**
1. Graduates will pass the esthetician skills certification.
2. Graduates will pass the Minnesota State Esthetician written exam and state law test administered through the state designated testing service (access through [www.bceboard.state.mn.us](http://www.bceboard.state.mn.us)).
3. Graduates will have knowledge and skills in esthetician (skin) services.
4. Graduates will have knowledge and skills in salon operations focusing on skin services.
5. Graduates will possess knowledge and skills for personal care of the skin.
6. Graduates will be prepared for immediate employment as an esthetician.
7. Graduates will have the knowledge and skills for work and life roles.
8. Graduates will have knowledge in cosmetic care product ingredients.

**Program Outcomes (Esthetician AAS - Spa Technician emphasis and Esthetician Diploma)**

(in addition to certificate outcomes above)
1. Graduates will pass the CIDESCO exam.
2. Graduates will have knowledge and skills in spa operations focusing on therapeutic skin and body services.
3. Graduates will be prepared for immediate employment as a CIDESCO diploma holder.

---

Esthetician services include specialized work with skin care products, analysis of skin, skin exfoliation, massage techniques, aromatherapy and facials. Students learn to apply makeup, provide temporary hair removal, and use machines designed to administer skin treatments.

Esthetician AAS Spa Technician Emphasis or Esthetician Diploma graduates will meet the criteria for the CIDESCO exam requirement of 1200 hours of training in skin, massage and nail services. Therefore, graduates of these 2 program options are trained in therapeutic skin and body services.

Career Opportunities

Health Unit Coordinators are employed in front desk positions at various metropolitan private and public hospitals, long term care facilities and clinics. The approximate starting pay is $13.00 or more per hour. The National Association of Health Unit Coordinators conducts an optional certification exam for Health Unit Coordinators.

Program Outcomes

1. Graduates will possess the knowledge necessary to process physicians’ orders.
2. Graduates will have the ability to manage the clerical aspects of the nursing unit.
3. Graduates will have the ability to function in the receptionist role on the nursing unit.
4. Graduates will demonstrate their knowledge and skills by performing as a HUC via Internship.
5. Graduates will be prepared for immediate employment as a HUC.
6. Graduates will be prepared for the National HUC certification exam.

This program meets National Association of HUC Standards and prepares students for the National HUC certification exam. NAHUC Web site: www.NAHUC.org

Health Unit Coordinator 

Health Unit Coordinator Certificate . . . . . . . . . 17 Credits

Program Overview

Health Unit Coordinators work at the nursing station in health care facilities. As the center of communications on the nursing unit, they are responsible for reading doctor’s orders for patient treatments, medications and tests and accurately relaying those orders to the appropriate department. The Health Unit Coordinator is responsible for performing clerical tasks for the nursing stations such as answering the telephone, operating the computer, assisting visitors, filing, managing station records and maintaining patient’s charts. Recent changes in healthcare with electronic medical records and computerized physician order entry will be introduced.

Health Unit Coordinators must be able to complete detailed tasks with a high degree of accuracy, while working in a busy environment. They must be self-motivated and conscientious to complete work independently and be able to solve problems logically.
 Massage Therapy Careers

Clinical Massage Therapy AAS Degree. 68 Credits
Massage Therapy Certificate. 30 Credits
Reflexology Certificate. 24 Credits
Yoga Instructor Training Certificate. 16 Credits

Massage Therapy

Program Overview
Massage Therapists manipulate soft tissue structures of the body to prevent and alleviate pain, using techniques such as Swedish Massage, Reflexology, Sports Massage, Neuromuscular Therapy, Myofascial Release, Lymphatic Drainage, PNF and AIS stretching techniques and Travel Trigger Point Therapy. Graduates of the certificate program integrate manual massage techniques to positively contribute to the well-being of the client in a safe and skillful manner. Graduates of the Clinical Massage Therapy Program perform all of the skills in the certificate program and learn to perform thorough patient assessments and develop care plans based on assessments. Students implement care plans utilizing carefully selected techniques for the given disorders, including recommended exercises for the client.

Career Opportunities
The employment outlook for massage therapists is projected to be better than average in the upcoming years. The increasing population, increasing personal incomes, longer life spans and an increasing recognition that massage is beneficial to reduce stress, relieve pain and improve overall health all contribute to an increased demand for these workers. Factors affecting long term growth include economic well-being and the degree to which insurance companies and HMOs will reimburse for this service. Graduates perform massage therapy in health spas, resorts, health clubs, retirement residences, country clubs, hospitals, chiropractic offices, long-term care facilities and clinics, or may be self-employed.

The Massage Therapy Certificate program meets the minimum requirement of 600 technical hours of study required for accreditation by the American Massage Therapy Association Commission on Massage Therapy Accreditation and 600 hours of study for state licensure required in surrounding states. The AAS in Clinical Massage Therapy builds upon the existing Certificate Program. Students are trained in specific Medical Massage Therapy techniques and pathologies as recommended by the American Medical Massage Association. Upon completion of the 1500 hour program, students will be eligible to apply for National Certification in Medical Massage Therapy. This is the only program in Minnesota addressing Medical Massage.

Program Outcomes
(Massage Therapy Certificate)
1. Graduates will provide application of manual techniques to positively contribute to the wellbeing of the client in a safe and skillful manner.
2. Graduates will be prepared to take the national certification exam in massage therapy.
3. Graduates will be prepared for employment in an entry-level capacity.

Program Outcomes
(Clinical Massage Therapy AAS)
(in addition to certificate outcomes above)
1. Graduates will be prepared to take the national certification exam in medical massage therapy.
2. Graduates will be prepared for employment in a medical environment.

Reflexology

Program Overview

Reflexology is a complementary therapy that works on the feet or hands enabling the body to heal itself. Reflexology can be used to restore and maintain the body’s natural equilibrium and encourage healing by causing a relaxation response in the corresponding body part.

A Reflexologist uses hands only to apply pressure to the feet and/or hands. For each person the application and the effect of the therapy is unique. Reflexology is suitable for acute and chronic conditions, stress related conditions and as preventative therapy.

Graduates will perform skills in reflexology and clearly understand the difference between consultative and prescriptive healing practices.

Career Opportunities

Reflexology can be a stand alone modality or easily incorporated into a massage, esthetics and/or nail service.

Legal requirements for reflexologists vary from state to state. The American Reflexology Certification Board was established in 1991 and administered the first exam in 1992. The current version of the exam has been in use since 1998 and requires a minimum of 110 hours of training and 90 post graduate sessions. The College’s Reflexology Certificate provides over 300 hours of training in the required content areas of the exam. Currently, Minnesota has a full and fair disclosure requirement. There are municipality by municipality regulations. A majority of reflexologists are self employed. With increased interest in complementary and alternative therapy and more demand for personal investment services, opportunities will be available to those skilled in various modalities such as reflexology.

Program Outcomes

1. Graduates will provide application of reflexology techniques to contribute to restoring balance in the body.
2. Graduates will recognize indications and contraindications to reflexology services.
3. Graduates will be prepared to deliver reflexology services in the employment setting.

Yoga Instructor Training

Program Overview
Yoga instructors teach the principles of yoga, including how it strengthens and tones the body as well as calms the mind and spirit. Yoga instructors teach students in specific methods of yoga.

The 200 hour yoga teacher training required for certification includes information about possible health benefits from yoga practice such as building one’s core strength, improving overall flexibility and developing overall muscle tone. This program also provides training in identifying potential contraindications to yoga for individuals with certain health conditions.

Career Opportunities
Yoga instructors are listed under the main category of fitness workers with Department of Labor. Training for yoga instructors is ever changing. According to the US Department of Labor Statistics, demand for teachers of yoga has grown faster than the ability to train them properly, as the interest in yoga exercise has exploded in recent years. Saint Paul College’s program is designed to meet Yoga Alliance 200 hour standards.

As health clubs strive to provide more personalized service to keep their members motivated, they continue to offer a wide variety of group exercise classes. The aging population, in particular, demand low-impact forms of exercise which yoga provides.

Yoga instructors work in: HMOs in the areas of heart health and pregnancy, wellness centers, studios with massage therapists, fitness centers, educational institutions, conference centers, chiropractic offices, spas, community education, yoga studios and cruise ships.

Program Outcomes
1. Graduates will be prepared to instruct students in the principles of yoga.
2. Graduates will recognize indications and contraindications to yoga practice.
3. Graduates will meet the Yoga Alliance Standards of Yoga Teacher Training.

Medical Laboratory Technician

Medical Laboratory Technician AAS Degree . . 72 Credits

Program Overview
Medical/Clinical Laboratory Technicians collect blood, examine and analyze body fluids, tissues and cells. They look for bacteria, parasites, or other microorganisms; analyze the chemical content of fluids; match blood for transfusions and test for drug levels in the blood to show how a patient is responding to treatment. They also prepare specimens for examination, or count cells and look for abnormal cells. They use automated equipment and instruments that perform a number of tests simultaneously, as well as microscopes, cell counters and other kinds of sophisticated laboratory equipment to perform tests. Then they analyze the results and relay them to physicians.

Qualifications include an interest in science and mathematics, accuracy, moral and intellectual integrity, self-discipline and desire to contribute to quality health care. Laboratory workers must have the skill to perform and master a variety of tasks.

Upon completion of the program, the student is eligible to take an examination administered by the Board of Registry under the direction of ASCP and/or National Credentialing Agency (NCA).

Career Opportunities
Laboratory tests are of vital importance to modern medical practice. Increased job opportunities relate to both the volume of tests and the number of new tests developed. Labs are hiring increasing numbers of Medical/Clinical Laboratory Technicians as their core staff. Technicians are employed in hospital laboratories, clinics, doctor’s offices, public health agencies and pharmaceutical, industrial, and medical research laboratories.
Program Outcomes

1. The graduate will demonstrate proper use, calibration, adjustment, and operation of most laboratory precision instrumentation including clinical microscopes, spectrophotometers, centrifuges, automated counters, computers, and chemistry analyzers.

2. The graduate will demonstrate standard safety practices in the medical laboratory designed to prevent injury, illness, or loss of life to those working in and/or around the medical laboratory equipment with particular emphasis on the skills required for collection and testing of numerous body fluids and specimens using Standard Precautions (including the use of personal protective equipment).

3. The graduate will correlate pathological conditions of the human body, including cause and symptoms, to the laboratory’s role in diagnosis and treatment.

4. The graduate will demonstrate organized work skills as reflected in efficient time and material utilization while performing proficiently and safely in the clinical environment.

5. The graduate will perform a wide variety of testing procedures employed in a medical laboratory and relate the principles of quality assurance and the importance of these procedures to the diagnosis and treatment of disease processes in the following areas: clinical chemistry, hematology and hemostasis, urinalysis, microbiology, immunohematology and immunology.

6. The graduate will pass the examination administered by the Board of Registry under the direction of ASCP and ASCLST/or National Credentialing Agency (NCA).

7. The graduate will demonstrate preparedness for entry level employment as a Medical Laboratory Technician, including both technical expertise and effective communication skills.

Personal Trainer

Personal Trainer AAS Degree . . . . . . . . . . . . . . 60 Credits
Personal Trainer Diploma . . . . . . . . . . . . . . . . . . . . . . . . . 45 Credits

Program Overview

Personal Trainers instruct clientele in the betterment of their health through an integrated approach using sound knowledge of appropriate exercises. Functional training techniques, aerobic exercises and advanced stretching modalities (such as PNF and AIS) are implemented appropriately based on initial fitness testing. Graduates from the program perform patient assessments and build customized fitness plans for individuals including clients with special needs. Methods of teaching various group fitness classes and nutritional consulting are also utilized.

Career Opportunities

According to IHRSA research, "the US Health Club Industry provides services to over 36.3 million health club members and employed 205,000 full-time employees in 2004. Fifty percent of these Clubs identified Personal Training as their number one most profitable service."

The US Bureau of Labor and Statistics listed the Personal Fitness Trainer as one of the top overall job openings. They also cited it as the "third fastest growing occupation requiring Post Secondary Vocational School training and is expecting 44% growth by year 2012."

Graduates perform personal training duties at fitness centers, health clubs, private clubs, sports rehabilitation facilities, or may work in a private practice.
Program Outcomes

1. Graduates will provide application of personal training techniques to positively contribute to the well-being of the client in a safe and skillful manner.

2. Graduates will be prepared to take the National Academy of Sports Medicine (NASM) exam for Personal Training Certification.

3. Graduates will be prepared for employment as a Personal Trainer.

Practical Nursing

Practical Nursing AAS Degree................. 63 Credits
Practical Nursing Diploma........................55 Credits

COMING SOON: LPN to BSN Program through Metropolitan State University and Saint Paul College

Program Overview

Under the supervision of registered nurses and physicians, licensed practical nurses may care for infants and mothers; children and adolescents; and young, middle-aged and older adults. Using learned technical skills, practical nurses assist clients in meeting their physical and psychosocial needs. Licensed practical nurses administer medications and perform treatments.

The Practical Nursing AAS degree includes many of the general education courses required to enter an accelerated RN program or the upcoming LPN to BSN program in collaboration with Metropolitan State University.

Career Opportunities

Employment of LPNs is expected to increase faster than the average for all occupations in response to the long-term care needs of a rapidly growing population of elderly people, the general growth of the health care field and the nursing shortage.

Graduates may be employed in hospitals, long-term care agencies, clinics, home care agencies and other ambulatory care settings. Upon completion of the program, students are qualified to take the National licensure examination for practical nursing (NCLEX-PN).
Program Outcomes

1. The graduate will participate in the nursing process of assessment, planning, implementation and evaluation to provide basic therapeutic and preventive nursing care to clients.

2. The graduate will communicate effectively with clients, families, significant others and health care personnel.

3. The graduate will meet and exceed the Minnesota Board of Nursing abilities plan.

4. The graduate will pass the NCLEX-PN licensure exam.

5. The graduate will obtain job placement in nursing care.

Practical Nursing AAS Degree

Program Requirements

These 4 courses must be taken prior to applying to the program major. Applicants must attend a Practical Nursing Seminar, take the TEAS (Test of Essential Academic Skills) and complete application to the Practical Nursing Major.

BIOL 2721 Human Anatomy & Physiology 1 (Fulfills Gen. Ed. Requirement - Goal 3) 4
ENGL 1711 Composition 1 (Fulfills Gen. Ed. Requirement - Goal 1) 4
HLTH 1410 Medical Terminology 1
HLTH 1460 Nutrition for the Health Professions 2

These courses must be completed before starting the program PRNS courses.

BIOL 2722 Human Anatomy & Physiology 2 (Fulfills Gen. Ed. elective) 4

Saint Paul College recognizes Practical Nursing graduates often continue their studies in an RN program. Although the Practical Nursing specific courses designated with the prefix PRNS transfer as a nursing package; there are General Education course recommendations to consider prior to pursuing the RN program. The Practical Nursing AAS requires the student to complete 25 General Education requirements and is designed to provide the student with a significant portion of the Gen Eds required for RN programs. RN programs have specific General Education (chemistry and biology) course requirements. Note: The receiving college determines which courses are accepted in transfer. Please refer questions to the Transfer Specialist at 651.846.1352 or call 651.846.1739 for an appointment.

Respiratory Therapist/Respiratory Care Polysomnography Practitioner

Respiratory Therapist/Respiratory Care Practitioner AAS Degree . . . . . . . . . . . . . 79 Credits
Polysomnographic Technology Certificate . . . . 16 Credits

Program Overview
Respiratory Care Practitioners administer gas therapy, aerosol medications, various breathing treatments and chest physiotherapy. They provide mechanical ventilation, special diagnostic and therapeutic procedures and cardiopulmonary resuscitation. Laboratory procedures including pulmonary function testing and arterial blood-gas analysis are also performed.

Students must have a high school diploma or equivalency certificate. Preparation best suited for this program includes excellent reading skills, biology, chemistry and physics. High school algebra is required for this program. Further, one should have good manual dexterity and an ability to lift fifty pounds.

Career Opportunities
Employment of respiratory therapists is expected to increase much faster than the average for all occupations because of substantial growth of the middle-aged and elderly population, a development that will heighten the incidence of cardiopulmonary disease.

Respiratory Care Practitioners are employed by hospitals, clinics or laboratories and home care agencies. Graduates may find employment through contacts made during the clinical training experiences and employment requests received by the instructional staff.

Program Outcomes
1. Graduates will have demonstrated knowledge and skills in Respiratory Therapist/Respiratory Care Practitioner clinical experiences.
2. Graduates will have demonstrated knowledge and skills in Respiratory Therapist/Respiratory Care Practitioner clinical simulations.
3. Graduates will pass the National Certification Exam.
4. Graduates will be prepared for employment as Respiratory Therapists/Respiratory Care Practitioners.
5. Graduates will have successfully mastered the general education program requirements for work and life roles.

General Education Requirements 22
(Select at least 22 credits of General Education according to the Requirements below)

Total Program Credits 79

This program is accredited by the Committee on Accreditation for Respiratory Care (CoArc) and the Commission on Accreditation of Allied Health Education Programs (CAAHEP)

1701 W. Euless Blvd., Suite 300
Euless, TX 76040-6823
Phone: 817.283.2835 or 800.874.5615
AAS Degree General Education Requirements* 22 Credits

Students are required to complete ENGL 1711 and a Speech course from Goal 1

Goal 1: Communication
ENGL 1711 Composition 1 – 4 cr
SPCH XXXX – 3 cr (Goal 1 only)

Students are required to complete the following from Goals 3 & 4

Goal 3: CHEM 1711 Principles of Chemistry 1 – 4 cr
Goal 4: BIOL 1740 General Biology – 5 cr

Select a minimum of 3 credits from Goal 5

Goal 5: History, Social Science and Behavioral Sciences

Select a minimum of 3 credits from Goal 6

Goal 6: Humanities and Fine Arts
PHIL 1722 Health Care Ethics – 3 cr

* Refer to the Minnesota Transfer Curriculum Course List for specific course options.

Polysomnographic Technology

Program Overview
The Polysomnographic Technology (Sleep) Program is designed to prepare active Respiratory Care Practitioners/Respiratory Therapists as Polysomnographic Technologists. Polysomnography is a highly competitive industry that specializes in sleep disorders with cross correlations of physiologic lung and cardiac abnormalities. These highly trained specialists spend countless hours obtaining and evaluating high quality sleep recordings.

This certificate option provides theory, lab and clinical rotations in terminology, instrumentation setup, calibration recording, monitoring techniques and hands-on skills required of an entry level Polysomnographic Technologist. Graduates of this program are eligible to take the Comprehensive Registry Exam in Polysomnography Technology (RPSGT) after only six months of work-related experience.

Career Opportunities
Polysomnography is a rapidly growing specialty with the number of sleep labs increasing both statewide and nationally. The job outlook continues to be excellent for qualified sleep technologists.

Program Outcomes
1. Graduates will demonstrate knowledge and skills in Polysomnographic (Sleep) Technology lab experiences.
2. Graduates will demonstrate knowledge and skills in Polysomnographic (Sleep) Technology clinical experiences.
3. Graduates will be prepared for employment in a sleep lab.
4. Graduates will be prepared to take and pass the (RPSGT) Comprehensive Registry Exam in Polysomnography Technology.

Watchmaking

Micro Mechanical Technology Diploma . . . . . 72 Credits
Watchmaking Certificate . . . . . . . . . . . . . . . 30 Credits

Micro Mechanical Technology

The Micro Mechanical Technology Diploma at Saint Paul College is designed to prepare students for employment in industries that require a high degree of dexterity and precision such as: watch repair, medical device manufacturing and aerospace. New students can start in the Micro Mechanical Technology Program only in the spring semester of each year.

Students in this program will learn to design, fabricate and manipulate precise mechanical components and mechanisms using precision hand tools, microscope, watchmakers' loupe, watchmakers' lathe and turns. Tolerances will be held to as little as 5 microns. Mastery of these skills will be continually assessed by Saint Paul College faculty and Swiss industry professionals to insure that the highest standards are achieved and maintained.

This is a full-time 40 hour/week program and cannot be taken on a part-time basis. All courses in this program must be taken sequentially due to the scheduling of the international collaboration and assessment by the Watchmakers of Switzerland Training and Education Program (WOSTEP).

Career Opportunities

Graduates from this program are in high demand. Companies that seek employees with the skills and knowledge taught in this program include Honeywell, Lockheed Martin and Medtronic. The salary range for graduates is $30,000 to $40,000.

This program is also the prerequisite for the Watchmaking Certificate Program. Students who pass all of the intermediate assessments, successfully complete all of the requirements of this program and have a GPA of 3.0 “B” or better will be accepted into the Watchmaking Certificate Program, which must begin at the start of the summer semester immediately following the completion of this prerequisite program.

Program Outcomes

1. Graduates will demonstrate knowledge of the fundamentals of the micro mechanical processes through the use of hand tools such as hand files, jeweler’s saw and various vices and clamps to manufacture defined projects to precision tolerances.

2. Graduates will demonstrate the proper use and function of a watchmaker’s lathe and turns to make cylindrical shapes to precise measurements.

3. Graduates will set jeweled bearings and perform precision oiling.

Watchmaking

Program Overview
Watch repair is a rewarding and challenging career that requires patience, excellent eyesight and steady hands. Well-qualified watchmakers are in great demand to repair the complex, high-end watches that are being sold today. The Rolex Foundation has joined with Saint Paul College to create a technologically current facility for our long-established Micro Mechanical Technology/Watchmaking Program. The Watchmaking Certificate Program at Saint Paul College is an advanced certificate and a continuation of the skills and knowledge taught in the Micro Mechanical Technology Diploma Program. This program also serves as preparation for certification by the Watchmakers of Switzerland Training and Education Program (WOSTEP).

Students in this program will be taught the fine art of watchmaking. Vintage, modern, simple and complicated watches will be cleaned, oiled and adjusted with strong emphasis on troubleshooting and problem solving. Students will be required to perform “real world” repairs in addition to the class watches. Electronic portfolios will be used to document the individual’s work. Communication skills, both written and oral, and workshop organization will be emphasized to better prepare the student for employment.

This is a full-time 40 hour/week program and cannot be taken on a part-time basis. All courses in this program must be taken sequentially due to the scheduling of the international collaboration and assessment by the Watchmakers of Switzerland Training and Education Program (WOSTEP). Enrollment in this program is only open to those students who have passed all of the intermediate assessments and successfully completed all of the requirements for the Micro Mechanical Technology Diploma Program with a GPA of 3.0 “B” or better. Participation in this program must begin at the start of the summer semester immediately following the completion of this prerequisite program due to the same scheduling constraints stated above.

Career Opportunities
Graduates of the program are qualified to apply for a variety of positions:

- Watch repairer in a workshop or repair center for mechanical and electronic watches
- Owner, manager or employee of a watch repair center or jewelry store
- Person in charge of after-sales service network for a watch distributor or brand on a regional or national basis
- Manager of a jewelry store that specializes in sales and repair.

Starting salaries in these positions range from $40,000 to $45,000.

Program Outcomes
1. Graduates will demonstrate effective repair techniques for historical and modern watch calendar mechanisms.
2. Graduates will demonstrate effective repair techniques for historical and modern automatic winding watch mechanisms.
3. Graduates will demonstrate the diagnoses, disassembly, reassembly and adjusting of chronograph movements.

American Sign Language Studies

American Sign Language Studies Certificate . . 30 Credits

Program Overview
The American Sign Language Studies Certificate Program provides students with the knowledge and skills of American Sign Language (ASL), focusing on the uniqueness of ASL as a language, Deaf Culture and Deaf History. The program encourages students to become involved in the social and cultural activities of the Deaf Community. The curriculum provides a solid and basic foundation for entry into a career in a deafness-related field and prepares students for continued educational studies in a variety of disciplines. It is a pathway to entering the Sign Language Interpreter/Transliterator Program at Saint Paul College or similar programs at other institutions. Individuals who intend to or currently work with Deaf and/or Hard-of-Hearing individuals in fields such as education, human/social services, community service agencies, and vocational rehabilitation benefit from the opportunity to learn and develop stronger skills in American Sign Language.

Career Opportunities
Completion of the American Sign Language Studies Certificate:

- Enhances the ability to work and communicate more effectively with Deaf and Hard-of-Hearing people in academic, agency, and business settings.
- Provides opportunities to enhance ASL fluency and acquire Deaf Culture knowledge which is applicable to a variety of educational disciplines.
- Prepares students to meet the ASL prerequisites for the Sign Language Interpreter/Transliterator Program.
- Enhances American Sign Language fluency for potential or current teachers of Deaf and Hard-of-Hearing students.
- Meets general education requirements in some state colleges and universities.

Program Outcomes
1. Graduates will be prepared to meet the ASL prerequisites for the Sign Language Interpreter/Transliterator Program.
2. Graduates will develop ASL skills and Deaf Culture awareness to more effectively communicate with Deaf and Hard-of-Hearing people in a variety of settings.
3. Graduates will meet world language requirements at the high school and college/university level.
4. Graduates will be prepared to take an American Sign Language Proficiency Interview and to meet K-12 Skill Levels.
5. Graduates will meet entrance requirements for undergraduate or graduate programs in ASL Studies, Linguistics, and Deaf Education.

### Program-Specific Admission Process

The Sign Language Interpreter/Transliterator has a program-specific admission process. Please view Admission Requirements on the Sign Language Interpreter/Transliterator program Web page on the College Web site at [www.saintpaul.edu](http://www.saintpaul.edu). Admission requirements include completing the following course work before full acceptance into the Sign Language Interpreter/Transliterator AAS program:

- American Sign Language 1 with a “C” or better
- American Sign Language 2 with a “C” or better
- American Sign Language 3 with GPA of 3.0 in ASL 3 & ASL 4
- American Sign Language 4 with GPA of 3.0 in ASL 3 & ASL 4
- English Composition 1 (ENGL 1711 or comparable course) with a “C” or better
- General Psychology (PSYC 1710 or comparable course) with a “C” or better

Above average skills on college assessment tests for reading and writing English are used to determine entry into the program. Refer to the College Web site for program admission requirements.

Students who have not had recent ASL courses (within the past 18 months) at date of application will need to refresh their skills by repeating the last ASL course or complete a Credit by Examination/Test-Out. Note: Credit by Examination/Test-Out are not transferable from another educational institution.

### Career Opportunities

Graduates will be qualified for careers as entry-level sign language interpreters with social service agencies, educational programs, community-based settings, or recreational situations. The employment outlook, due to accessibility legislation, has dramatically increased the need for interpreters. This need is expected to continue. Graduates will have opportunities to further their education and to specialize in their work through professional affiliations or by obtaining national certification. Graduates who plan to work in K-12 educational settings must obtain a Provisional Certificate which allows them to become a practitioner for a maximum of two years or until they obtain national certification.

### Bachelor of Arts Degree

The Sign Language Interpreter/Transliterator program has a formal articulation agreement with Metropolitan State University leading to a bachelors degree in Psychology with an emphasis in Sign Language Interpreting or an individualized Bachelor of Arts degree through First College.
Program Outcomes

1. Graduates will have an understanding and knowledge about the theoretical, ethical and practical foundations of the interpreting field needed to pass the NAD-RID National Interpreter Certification (NIC) exam.

2. Graduates will have knowledge and skills to interpret between American Sign Language and English.

3. Graduates will have the knowledge and skills to transliterate between spoken English and a signed form of English.

4. Graduates will have the knowledge and skills needed to function as cross-cultural mediators in order to transmit and transfer culturally based linguistic and non-linguistic information.

5. Graduates will demonstrate the necessary employment knowledge, skills and professional behaviors that are requisite for immediate employment as Sign Language Interpreters/Transliterators.

6. Graduates will sit for national certification within two years of graduation.

Sign Language Interpreter/Transliterator AAS Degree

Prerequisite Courses:

- American Sign Language 1 with a “C” or better
- American Sign Language 2 with a “C” or better
- American Sign Language 3 with GPA of 3.0 in ASL 3 & ASL 4

Prospective students interested in enrolling in Intensive English Program classes must take the English language proficiency exams. Call 651.846.1555 for a testing schedule. The exams assess understanding of English grammar structures, reading and listening comprehension and in some cases a writing sample may be required. Students accepted into the Intensive English Program classes must have a high school diploma, a GED, or pass “Ability to Benefit” tests.

Program Outcomes
1. Enter a major program or transfer curriculum.
2. Apply writing and critical thinking skills.
3. Demonstrate fluency in a variety of contexts.
4. Demonstrate active listening.
5. Speak clearly using correct pronunciation.
6. Demonstrate organization and study skills.
7. Understand concepts of grammar to facilitate other skills.
8. Understand American culture and work ethic.

Intensive English Program
English as a Second Language (ESOL)

Program Overview
The English as a Second Language courses are designed to assist limited English speakers from different ethnic and cultural backgrounds to succeed in the community and technical system as well as in the transfer curriculum. Applicants interested in information may contact 651.846.1555.

Intensive English Program courses at various levels prepare students to enroll in major programs or the transfer curriculum. It is an intensive program allowing students to be in class up to five hours per day. Courses include listening, speaking, reading and writing, as well as grammar and pronunciation. Advanced ESL students may take developmental courses related to their major field.

Saint Paul College reserves the right to change without notice any of the materials (information, requirements, regulations) published in this document. This publication is not a contract.
Liberal Arts and Sciences

The Liberal Arts and Sciences division of Saint Paul College encompasses English and Speech, Fine Arts and Humanities, Social and Behavioral Sciences, Natural Sciences and Mathematics. These areas provide the foundation of academic study for students enrolled in AA, AS, and AAS degree programs. Carrying out the Minnesota Transfer Curriculum's ten goal requirements and outcomes, the broad-based general education courses in liberal arts and sciences prepare students to think critically and use logic and scientific inquiry to question and solve problems, understand and appreciate diverse cultures, express thoughts, and communicate knowledge effectively. The faculty are committed to excellence in teaching with a student-centered focus in traditional and online course offerings.

Educational Degree Programs

- Associate in Arts Degree in Liberal Arts and Sciences
- Associate in Science Degree
- Associate in Applied Science Degree

Associate in Arts Degree (AA) Preparation for a Bachelor’s Degree. The Associate in Arts degree (AA) is awarded for successful completion of a program of 64 semester credits in the Liberal Arts and Sciences and is designed to constitute the first two years of a four-year degree. The AA degree is intended primarily for students who plan to transfer to another college to complete a bachelor's degree. No specific major is listed in conjunction with the degree; however, many students choose to concentrate in a particular field of study as preparation to their chosen transfer college or university. Students may choose to follow one of the AA Pre-Major Tracks or develop an individual plan within the general AA degree. Both options are designed to identify the appropriate core of courses for transfer in a student’s major to their chosen four-year college or university. At least 40 of the 64 credits must be taken within the Minnesota Transfer Curriculum (MnTC). Students are strongly encouraged to develop an educational plan in consultation with a Saint Paul College Transfer Specialist to assure that degree requirements are fulfilled.

Objectives

Upon completion of the AA curriculum, the student will have acquired the following competencies:

- Knowledge of important concepts and principles of the natural sciences, mathematics, history, social sciences and behavioral sciences, arts, and humanities.
- Skills necessary for work and life roles, including skills in thinking, communication and methods of inquiry and application of knowledge.

- Critical examination of and appreciation for diverse peoples, cultures, and life roles.
- Pre-major competencies for selected emphasis.

Distribution Requirements – Associate in Arts Degree (64 credits total)

All courses must be numbered 1700 or higher.

Required Minnesota Transfer Curriculum Distribution * (40 credits)

- MnTC Goal 1 Communication, 3 courses
- MnTC Goal 2 Critical Thinking, Fulfilled when 10 goal areas are completed
- MnTC Goal 3 Natural Science, 2 courses
- MnTC Goal 4 Mathematical/Logical Reasoning, 1 course
- MnTC Goal 5 History/Social Sciences/Behavioral Sciences, 3 courses
- MnTC Goal 6 Humanities/Fine Arts/Literature, 3 courses
- MnTC Goal 7 Human Diversity, 1 course
- MnTC Goal 8 Global Perspective, 1 course
- MnTC Goal 9 Ethic and Civic Responsibility, 1 course
- MnTC Goal 10 People and the Environment, 1 course

More information can be found on the Minnesota Transfer Curriculum (MnTC) page.

* Some courses may be applied to more than one goal area to complete the 10 goals with fewer than 40 credits. If this occurs, additional credits from the 10 goals listed must be taken to complete a minimum of 40 credits.

Electives, Liberal Arts and Sciences, Pre-Major (24 credits)

Courses generally numbered 1700 and above from any department may be used to fulfill these electives. These electives may be freely chosen or selectively used for transfer requirements. The Pre-Major Tracks in the AA degree or individual educational plans developed with a transfer specialist are used to focus these electives to meet transfer coursework for specific majors. Consult with a transfer specialist about course options for the pre-major electives.

Preparation for a Bachelor's Degree

An Associate in Arts degree allows students to complete both general education requirements and pre-major requirements for a wide range of majors and programs at four-year colleges and universities. Students may choose to follow one of the Pre-Major Tracks within the AA degree or develop an individual educational plan to focus their course selection on their transfer plans. Students are to consult with a Saint Paul College Transfer Specialist to assure that courses taken at Saint Paul College fulfill the requirements of a particular field of study.
Listed below are examples of the bachelor degree or pre-professional programs a student may begin at Saint Paul College.

Accounting  
Human Resources Management  
Agriculture  
Anthropology  
Architecture  
Art  
Art History  
Biology  
Business Management and Administration  
Chemistry  
Communications & Speech  
Computer and Information Technology  
Computer Science  
Construction Management  
Criminal Justice  
Economics  
Elementary Education  
Engineering – Biomedical  
English  
Geography  
Geology  
History  
Humanities  
Hospitality Management  

and global perspectives. Students are encouraged to critically assess as well as celebrate the cultural diversity of our world. Anthropology courses fulfill Minnesota Transfer Curriculum requirements and graduation requirements.

Art

Overview

Art courses are designed to provide the highest quality coursework for students majoring in art as well as students who are interested in exploring their creative expression through the creation of artwork in a studio class or the study of art in a historical context. Our art coursework provides students with a richer understanding of the world and themselves. The instructors are committed to excellence in teaching and scholarship. The fine arts and humanities department offers a large variety of studio and art history coursework that transfers towards a major in art or art history at a four-year institution.

Students who plan on majoring in art at a four-year institution should include art history, studio art and humanities coursework in order to be prepared for upper division work in whatever area of art they may choose for their area of concentration.

Art and art history classes also fulfill requirements for the Minnesota Transfer Curriculum, as well as graduation requirements.

Biology

Overview
The Biology department provides high quality educational experiences in the biological sciences including: environmental science, general biology for majors and non-majors, microbiology, nutrition, medical terminology, introduction to forensic science, biology of women and human anatomy and physiology for majors and non-majors.

The faculty believe biology occupies a central position in the physical sciences and that an understanding of fundamental biological principles enables students to make better-informed decisions for work and life roles. The Biology faculty promote active learning in lecture and lab activities, interacting closely with students at various levels of academic development.

Biology courses serve the College and students by providing offerings that satisfy requirements for general education, allied health and pre-professional transfer programs. Biology faculty are committed to excellence in teaching and scholarship providing a variety of lab/field experiences and online applications.

Biomedical Engineering Technology

AS Degree . . . . . . . . . . . . . . . . . . . . . . . . 60 Credits

Program Overview
The new Biomedical Engineering Technology AS Degree provides students with functional skills in the growing field of biomedical engineering technology, which involves the design, construction, and use of electronic and mechanical devices to solve medically-relevant needs. Examples of work in this field include medical device design, fabrication and testing, physiological function monitoring, and biomedical informatics, among numerous other career paths. Math, biology, physics, and chemistry are required program components as well as the engineering technology course requirements. The Biomedical Engineering Technology AS Degree is offered in partnership with the Saint Paul Public Schools and the University of Minnesota. Students meeting graduation requirements for the AS degree are eligible for transfer to the University of Minnesota to attain a BS degree in Biomedical Engineering, or a degree in Applied Engineering from the Manufacturing and Applied Engineering Center for Excellence at Bemidji State.

Chemistry

Overview
The Chemistry Department offers courses that provide an understanding of chemical principles across the discipline. The chemistry faculty believe that an understanding of fundamental chemical principles enables students to make better-informed decisions on a wide variety of issues related to work and life roles. The faculty interact closely with students, a diverse population at various levels of academic development, to help them develop capabilities in science and become lifelong learners.

Chemistry courses serve the College and students by providing offerings that satisfy requirements for general education, allied health and pre-professional transfer programs.

Total Program Credits 60

Chemical Technology Certificate

Program Overview
The new Chemical Technology Certificate prepares students to assist scientists in laboratories on the research and development of chemical processes and materials to meet society’s changing needs. Working in experimental laboratories or in manufacturing and industrial plants, technicians perform a number of important duties such as the operation of laboratory equipment, evaluating product quality and consistency, and testing for environmental acceptability.

Employment is available in a number of settings including Agriculture and Food Science, Forensics, Pharmaceutical, Industrial, and environmental laboratories.

Program Requirements
Course Cr
CHEM 1701 Chemical Technology Seminar 1
CHEM 1711 Principles of Chemistry 1 4
CHEM 1712 Principles of Chemistry 2 4
CHEM 1760 Chemical Technology Laboratory Skills and Instrumentation 3

CHEM 1770 Chemical Technology Laboratory Internship and Advanced Seminar 3
CHEM 2711 Organic Chemistry 1 4
CHEM 2712 Organic Chemistry 2 4

Total Program Credits 26

Economics

Overview
The Economics Department offers courses to help students learn and apply the economic principles necessary to become better informed citizens. The coursework provides preparation for degrees in Business, Accounting and other Pre-professional and Liberal Arts areas.

Course Cr
ECON 1710 Introduction to the American Economy 3
ECON 1720 Macroeconomics 3
ECON 1730 Microeconomics 3
English

Overview
The English and Communications faculty are dedicated to helping students apply the knowledge and skills gained through the study of writing and literature to successfully communicate in work and life roles. Two levels of developmental writing courses are available. The department offers a wide selection of transferable general education courses including Composition 1 and 2 and literature courses including the Survey of American Literature, The English Novel, Native American and African American Literature, an Introduction to Poetry and others. Students planning to transfer to a four-year degree generally enroll in Composition courses and one or two related electives as they fulfill requirements for the Associate in Arts, Associate in Science and Associate in Applied Science degrees.

Course
COMM 1460  Applied Interpersonal Communications 3
COMM 1485  Employment Portfolio Development 2
COMM 1510  Customer & Occupational Relations 3
ENGL 1410  Fundamentals of Writing 1 4
ENGL 1415  Fundamentals of Writing 2 4
ENGL 1711* Composition 1 4
ENGL 1712* Composition 2 2
ENGL 1730* Introduction to Technical Writing 3
ENGL 1780* Recently—Arrived Contemporary Immigrant Literature 3
ENGL 1790* Contemporary Writers of Color 3
ENGL 2721  Survey of American Literature 1 3
ENGL 2722  Survey of American Literature 2 3
ENGL 2730* Post-Civil War American Novel 3
ENGL 2732  Exploring the Short Story 3
ENGL 2740  Native American Literature 3
ENGL 2750  African American Literature 3
ENGL 2760* English Novel 3
ENGL 2770* Introduction to Poetry 3
ENGL 2775* Science Fiction and Fantasy 3
ENGL 2778* Urban Literature–Lost in the City 3

* Traditional, Web enhanced and online sections available.

History

Overview
The History Department promotes the study, teaching and analysis of historical developments which have created our present world. The historical past is studied so that students can better fulfill their work and life roles. The department offers basic survey courses in American history and the history of world civilizations, although students are not required to take these courses in chronological order. In addition to survey courses, a course in Minnesota history is offered emphasizing the social, political, cultural and economic history of the state as well as a course on immigration and the ethnic history of the United States. The department also offers a course on the history of women in the United States and recently introduced a Special Topics in History course.

Students who plan on majoring in History at a four-year institution are encouraged to take both the American and world history survey courses in order to be well-prepared for upper division coursework. History courses fulfill a number of requirements for the Minnesota Transfer Curriculum, as well as graduation requirements.

Course
HIST 1730* Contemporary World History 3
HIST 1745* U.S. History to 1865 4
HIST 1746* U.S. History since 1865 4
HIST 1750* Minnesota History 3
HIST 1760 History of World Civilizations to 1500 3
HIST 1761 History of World Civilizations since 1500 3
HIST 1770 History of Women in the United States 3
HIST 2740 Immigration and Ethnic History of the United States 3
HIST 2780 Special Topics in History 1-3

* Traditional, Web enhanced and online sections available.

Geography

Overview
The College offers Geography courses to fulfill the Minnesota Transfer Curriculum requirements and graduation requirements. The department will be expanding and adding new courses to the curriculum. Currently the department offers courses in Physical Geography Human Cultural Geography, Global Economic Geography, Minnesota Geography and World Geography.

Course
GEOG 1700* Physical Geography 3
GEOG 1720 Human/Cultural Geography 3
GEOG 1730 Global Economic Geography 3
GEOG 1740 World Geography 3
GEOG 1750 Minnesota Geography 3

* Traditional, Web enhanced and online sections available.
Humanities

Overview
Humanities courses promote the study of cultural developments. Students gain an increased understanding of the world they live in, how it came to be as it is, and what their place is in it. Students will be asked to consider how they can apply what they have learned about what has come before to what might occur in the future. Humanities is an interdisciplinary subject in that it is an exploration of the influence particular fields have on each other; for example, the influence of political movements on visual art, or the influence of religion on poetry of the same period. The fields included in the Humanities are: art, history, literature, philosophy, religion, politics, law, music, drama and language. Students are encouraged to make comparisons between different fields and different time periods and to consider the significance of similarities and differences.

Humanities courses fulfill Minnesota Transfer Curriculum requirements and graduation requirements.

Interdisciplinary: Women’s and Gender Studies

Overview
The Interdisciplinary Women’s and Gender Studies course and related coursework provide students with the opportunity for interdisciplinary study in the Liberal Arts and Sciences. The coursework emphasizes collaborative learning across academic disciplines with a focus on women and gender relationships. Several courses in the Liberal Arts and Sciences include an emphasis on gender analysis that links the content. Students are encouraged to contact the Transfer Center Specialists for information on four-year colleges and universities that offer a major or minor in Women and Gender Studies.

Mathematics

Overview
The study of mathematics provides foundational knowledge for understanding other disciplines, as well as logical reasoning and problem solving skills for work and life roles. The department offers a full curriculum to meet the educational needs of our students such as developmental offerings, mathematics courses specific to majors and a range of general education courses including Statistics, Liberal Arts Math, College Algebra, Pre-Calculus, Calculus 1 and 2. Courses fulfill Minnesota Transfer Curriculum requirements and graduation requirements.

NSCI 1780* | Contemporary Issues in Science 3
NSCI 1782 | Minnesota Geology 3

* Traditional, Web enhanced and online sections available.

Philosophy

Overview
Philosophy, literally, is the love of wisdom. It is the search for truth and the asking of fundamental questions about our existence and relationship with the world and interaction with others. Philosophy includes the study of arguments, and the providing of evidence and reasons for making particular claims. The practice of philosophy teaches critical thinking and careful reflection; all courses encourage students to formulate pertinent questions and examine and create arguments. It is hoped that students will continue to use careful reasoning skills honed in philosophy classes as they continue in their education and in life. Areas of concentration within philosophy include logic, ethics, religion and the theory of knowledge.

Philosophy is helpful for careers in law, teaching, business, medicine and many other fields. Philosophy courses fulfill a number of requirements for the Minnesota Transfer Curriculum and graduation requirements.

Course | Cr
--- | ---
PHIL 1700 | Introduction to Philosophy 3
PHIL 1710* | Logic 3
PHIL 1715 | Philosophy of Scientific Reasoning 3
PHIL 1720* | Ethics 3
PHIL 1722* | Health Care Ethics 3
PHIL 1750 | Eastern Philosophy 3
PHIL 1760 | World Religions 3

* Traditional, Web enhanced and online sections available.

Physics

Overview
The department offers an introductory level physics course as well as General Physics 1 and 2 with a calculus base. Students enroll in physics courses to fulfill Minnesota Transfer Curriculum requirements and graduation requirements.

Course | Cr
--- | ---
PHYS 1720 | Introductory Physics 4
PHYS 2700 | General Physics 1 (with Calculus) 5
PHYS 2710 | General Physics 2 (with Calculus) 5

Political Science

Overview
The Political Science faculty prepare students for involved citizenship and an understanding of the fundamentals of political systems. Students enroll in political science courses to fulfill Minnesota Transfer Curriculum requirements and graduation requirements.

Course | Cr
--- | ---
POLS 1720* | Introduction to American Government 3
POLS 1740 | Introduction to World Politics 3
POLS 1750 | Introduction to Political Science 3

* Traditional, Web enhanced and online sections available.

Psychology

Overview
Psychology is the scientific inquiry into human behavior and mental processes explaining the complexity of issues from both an environmental and biological perspective. Courses are offered that provide a foundation in core psychological areas. Students enroll in psychology to obtain a better understanding of human behavior in a variety of settings as well as for relevant preparation for nursing, business and other fields. Psychology courses fulfill the Minnesota Transfer Curriculum requirements and graduation requirements.

Course | Cr
--- | ---
PSYC 1710* | General Psychology 4

PSYC 1750* | Introduction to Health Psychology 3
PSYC 1760 | Social Psychology 4

* Traditional, Web enhanced and online sections available.
Sociology

Overview
The Sociology faculty strive to promote social awareness, active citizenship and critical thinking within and beyond our own culture. Courses are designed to emphasize the importance of the sociological perspective in work and life roles in a global world. Many students take Sociology courses to develop personal skills and to learn about other cultures and societies.

Students enroll in Sociology courses to fulfill Minnesota Transfer Curriculum requirements and graduation requirements.

Spanish

Overview
The main objective of the Spanish Department is two fold: to effectively build up crucial speaking, listening, reading and writing skills to achieve proficiency in Spanish and to gain the indispensable cultural knowledge and perspective for successful interactions. Applying a communicative approach to classroom situations and virtual trips, students acquire in a holistic way the grammatical and cultural tools they need to thrive with confidence in a multicultural environment.

The Spanish Department offers beginning and intermediate courses. Students with two years of high school Spanish are generally prepared for beginning courses while students with three or four years usually are ready to enter intermediate courses.

SPAN 1710 and SPAN 1720 (Beginning Spanish 1 & 2) may count as part of the 24 credit Pre-major electives for an AA degree. SPAN 1730 and SPAN 1740 (Intermediate Spanish 1 & 2) may be counted towards the 40 Minnesota Transfer Curriculum credits. Each program at Saint Paul College has different requirements. Talk to your advisor or a Transfer specialist in order to know if Spanish could be a possible general education elective option for you.

Spanish credits are also transferable to most two-and four-year institutions. Consult a Transfer Specialist for transfer information and Transfer Agreements to decide which Spanish courses to take at Saint Paul College.

Speech

Overview
Rhetoric is where the study of Speech Communication began. By definition, rhetoric refers to oratory or persuasive speaking. The Speech faculty promotes the study and application of human communication and mass communication concepts and skills for work and life roles. Students enroll in Speech courses to fulfill Minnesota Transfer Curriculum requirements and graduation requirements.

Chemical Technology Certificate .............. 26 Credits

Chemical Technology AS Degree

Program Overview
The new Chemical Technology AS Degree is designed for students to complete chemistry courses and general education requirements for transfer to a four-year program and/or for employment as a chemical laboratory assistant.

Chemical Technology Certificate

Program Overview
The new Chemical Technology Certificate prepares students to assist scientists in laboratories to research and develop chemical processes and materials to meet society’s changing needs. Working in experimental laboratories or in manufacturing and industrial plants, technicians perform a number of important duties such as the operation of laboratory equipment, evaluating product quality and consistency, and testing for environmental acceptability. Employment is available in a number of settings including Agriculture and Food Science, Forensics, Pharmaceutical, Industrial, and environmental laboratories.

Electronic Technology

Electronic Technology Certificate .............. 30 Credits

Program Overview
The jobs performed by an Electronic Technician cover a wide spectrum of challenging analog and digital tasks. The work consists of preventative maintenance, servicing, troubleshooting and repairing computers, electronic office equipment, communications equipment and consumer electronics equipment as well as manufacturing and automated processing equipment. Technicians will also be expected to write repair reports, manage parts inventory, and develop a good business relationship with customers. Students must be highly motivated and have the desire to solve problems. Normal color vision, manual dexterity and the ability to relate printed diagrams to physical components are helpful.
Career Opportunities

Technical careers have been identified as the fastest growing segment of the job market and electronic technicians will be in demand. The number of job opportunities in Electronic Technology will continue to expand well into the 21st century. Current electronic equipment and the introduction of state-of-the-art equipment in the areas of business, industry and consumer electronics will ensure an increasing demand for qualified Electronic Technicians.

Technicians will be hired by companies to repair the company's own equipment or hired by companies as field service technicians. Companies that employ Electronic Technicians typically offer good salaries and benefits as well as opportunities to advance.

Program Outcomes

1. Graduates will have a thorough understanding of DC & AC theory and operating concepts.
2. Graduates will have knowledge and skills in Solid State circuitry.
3. Graduates will have understanding of digital components and their applications.
4. Graduates will have understanding of and the skills for microprocessor operation and applications.
5. Graduates will have an understanding of and the skills in linear devices and associated circuitry.
6. Graduates will have an understanding of and the skills in interface circuitry and systems.

Energy Process Technology

Energy Process Technology AAS Degree . . . . . . 65 Credits
Energy Process Technology Certificate . . . . . . 19 Credits

Program Overview

The Energy Process Technology Program is designed to develop the student's knowledge and skills in the energy process and power industry. The program identifies the processes, equipment, systems and information needed to obtain employment in a power generating facility.

Career Opportunities

Graduates may be employed as General Plant Helpers, Plant Technicians, Plant Specialists and Boiler Operators in electric generating plants, large manufacturing companies and other plants or institutions that operate large boilers. Minnesota industries, such as Xcel Energy, Great River Energy, District Energy and other power generating companies anticipate a severe shortage of qualified technicians, as current technicians retire.

Program Outcomes

1. Describe the operation of pumps, compressors, turbines, piping and tubing in terms of fluid flow principles, design, construction and prime movers.
2. Demonstrate the use of measuring tools associated with mechanical repair, including personal computers and instrumentation.
3. Describe the principles of fluid power, pump inlet factors, hydraulic fluid and ANSI/ISO symbols.
4. Demonstrate the safe use of a variety of hand tools commonly associated with mechanical repair, metallurgy, shop machines and system diagrams.
5. Recognize the basic purpose, structure and operation of a plant system, including boiler and auxiliary equipment, combustion, condensers and circulating water.
6. Demonstrate knowledge of the systems that make up a power plant through hands-on experience at a fossil simulator.
7. Demonstrate knowledge of what OSHA, EPA and other regulations are and how they impact the industry.
8. Identify various types of valves, gaskets, lubrications, bearings, couplings, gears, chains, v-belts and riggings and explain their functions.

Articulation Agreements:

University of Wisconsin, Stout
BS in Industrial Management
Metropolitan State University,
BAS in Industrial Management
Minnesota State University, Mankato,
BS in Electronic Engineering Technology
9. Apply mathematics, including basic math, geometry and elementary algebra, to solve real-life problems.
10. Understand the theories and concepts necessary for basic oxy-acetylene welding, cutting and brazing processes.
11. Understand how automatic systems control plant processes.
12. Demonstrate basic knowledge of the operation and use of Gas Turbines and Diesels and how voltage is produced, used and manipulated to do work in the refining industry.
13. Understand natural gas processing, chemistry and distillation principles and applications as related to the process industry.

Land Surveying Technology

Land Surveying Technology AS Degree . . . . . . . . 60 Credits
Land Surveying Technology
Advanced Technical Certificate . . . . . . . . . . . . . . . . . . 30 Credits
Remote Sensing
Advanced Technical Certificate . . . . . . . . . . . . . . . . . . 10 Credits

Program Overview
Land Surveying is the science, art and technology of locating relative positions on, above or below the surface of the earth.

First year students use surveying instruments such as levels, total stations and Global Positioning Systems (GPS) in the field and transfer data to CAD systems. Students work as technicians with engineers, geologists, land surveyors, geographer-cartographers and geographical information professionals on a variety of projects.

The Land Surveying Technology Associate Degree program is fully articulated with the Bachelor of Science Degree in Land Surveying and Mapping Sciences at St. Cloud State University (SCSU). All the credits transfer to SCSU. Graduates from the BS degree may be qualified to take the Fundamentals of Land Surveying Examination after a minimum of three years in the field. Graduates of the AS degree program who have a bachelors degree also may qualify.

Career Opportunities
After the first year of study students can expect summer employment with city, county, state or federal government or with consulting engineering and surveying firms, contractors or cartographers. Often the summer experience continues as part-time employment during the second year of study and may result in permanent employment upon graduation. Others can expect a part-time career position while pursuing the Bachelor’s Degree.

Historically, demand for graduates from this program far exceeds the number of graduates available.

Program Outcomes
1. Graduates will work with engineers, geologists, land surveyors, cartographers and geographic information systems professionals.
2. Graduates will have the skills and knowledge to work with civil engineers on design and construction projects.
3. Graduates will have knowledge and skills in Mapping (Cartography) and Geographical Information Systems (GIS).
4. Graduates may transfer all credits to the Land Surveying and Mapping Sciences Bachelor of Science Degree at St. Cloud State University.

5. Graduates from the BS degree, with additional experience, may qualify to take the Minnesota Licensed Land Surveyors examination.

General Education Requirements  16
(Select at least 16 credits of General Education according to the requirements listed below)
Total Program Credits  61

Program Outcomes
1. Graduates will have the knowledge and skills to make precision machined parts and tooling.
2. Graduates will have the knowledge and skills to program and operate CNC equipment using CAD/CAM.
3. Graduates will have the knowledge and skills to operate and set-up inspection and gauging equipment.
4. Graduates will have the knowledge and skills to meet national entry-level skills standards.
5. Graduates will have acquired shop communication skills such as blueprint reading, practical geometric dimensioning and shop CAD/CAM skills.
6. Graduates will have successfully mastered the general education program requirements for work and life skills.
7. Graduates will use solidworks, design parts and collaborate with engineers.

Program Overview
This area produces skilled craftspeople who make precision metal parts that are highly specialized and not mass produced. Machinists produce parts from metal castings, forgings, stampings or from solid metal stock. They make parts to exact specifications by removing excess metal with the aid of machine tools, numerically controlled machines, computer assisted machinery and precise measuring and gauging equipment.

Career Opportunities
As the economy expands, so will the demand for manufactured goods that need machined metal parts. Engineering Technology and Machine Tool Technology graduates are hired by industries that manufacture automobiles, industrial machinery, military equipment and other metal products. At many places of employment, graduates can apply training received at the College towards the completion of apprenticeship requirements.

Auto Body Repair

Auto Body Repair Diploma .................. 49 Credits
Auto Body Repair AAS Degree ............. 66 Credits

Program Overview
Auto body workers repair or replace automotive body and frame components. The job involves many skills including frame repair, welding and cutting, metal straightening, application of up-to-date body materials, metal finishings and painting and alignment of body components. Auto body repair workers also estimate damage and compute labor and material costs.

Students must read well enough to follow written instructions and comprehend technical information. They should know basic arithmetic in order to prepare paint and body material estimates and paint formulas. Physical requirements include good mechanical coordination, good eyesight (including color vision), average strength, good sense of feel and an ability to withstand dust, paint fumes and noise.

Career Opportunities
As the population increases so does the use of automobiles and the number of automobile accidents. The U.S. Department of Labor predicts that employment of auto body repair workers will continue to increase.

Employment is steady throughout the year. Graduates often enter an apprenticeship training program and work under an experienced journeyperson for a period of at least three years. The usual four-year apprenticeship term is shortened by vocational school experience. There are opportunities for advancement to estimator, adjuster, service manager, parts manager, or shop owner.

Program Outcomes
1. Graduates will have knowledge and skills in operating hand and power tools necessary in Auto Body Repair.
2. Graduates will have knowledge and skills in welding, cutting, straightening and replacement of parts on an automobile.
3. Graduates will have knowledge and skills in correct use and application of up-to-date materials used in auto body repairs.
4. Graduates will have knowledge and skills in assessing damage, writing a repair plan and ordering parts and materials.
5. Graduates will have supervised hands-on experience working on customer vehicles and doing real-world repairs.
6. Graduates will be prepared for entry-level employment in the auto body industry.

Automotive Service

Automotive Service Technician Diploma . . . . . . 64 Credits
Automotive Service Technician AAS . . . . . . . . . . . 60 Credits

Program Overview
Automotive repair requires trained technicians skilled in the use of testing equipment, special tools and the latest information and specifications to service the many types of automobiles. Technicians diagnose trouble in any one of thousands of automotive components. They work with many new systems each year that require new service techniques and training. Some of these include air conditioning units, emission control devices, alternators, electronic ignition and electronic fuel injection.

Students are prepared to take the ASE certification tests when they have completed the program. ASE certifies technicians nation wide.

This program is NATEF (National Automotive Technical Education Foundation) certified.

Students should have good mechanical aptitude, be in good physical condition and have the ability to get along with others. To profit from the training offered, the students must read well enough to understand the technical information presented.

Career Opportunities
Opportunities are expected to be plentiful for automotive technicians with technical training according to the U.S. Department of Labor. The department also states that the growing complexity of automotive technology, such as the use of electronic and emissions control equipment, increasingly necessitates that cars be serviced by professionals.

Many graduates are employed as indentured apprentices upon the satisfactory completion of the 18 month pre-apprenticeship course. The auto technician may work in a dealership garage, an independent garage, or as a specialist. Opportunities exist for a technician to become shop service sales person, new car dealership service manager, or shop owner.

Program Outcomes
1. Graduates will have knowledge and skills in use of testing equipment, special tools, and specifications for servicing automobiles.
2. Graduates will have the knowledge and skills to diagnose problems in automotive systems.
3. Graduates will have knowledge and skills to service automobile brakes, alignment, and suspension, manual transmission, four wheel drive and differentials, heating and air conditioning, starting and charging systems, electrical accessories, fuel systems and automatic transmissions.
4. Graduates will have acquired supervised hands-on experience working on customer vehicles.
5. Graduates will be prepared for employment as Automotive Service Technicians.

Automotive Service Technician Diploma

Program Overview
This program prepares technicians to perform automotive repairs on complex automobiles at the Master Technician level. Upon completion of the program students should qualify for the Master Technician designation by passing all 8 of the Automotive Service Excellence (ASE) tests. Program admission requirement is passage of 4 ASE tests. The program includes courses that ensure individuals have the necessary oral, written, and critical thinking skills to help them with supervisory and management responsibilities.
Program Outcomes

1. Graduates will be prepared to pass all 8 ASE tests (successful passage of 4 tests required for admission).
2. Graduates will have the skills to perform repairs on automobiles at a Master Technician level.
3. Graduates will have proficient communication skills for customer service.
4. Graduates will have business and management skills.

Cabinetmaking

Program Overview
Cabinetmakers are skilled in the phases of cabinet construction, from the initial drafting and layout to the material cutting, assembly, finishing and installation. The principles used in building kitchen cabinets are also used in building store fixtures, furniture and all other types of woodworking. The program prepares students to work for cabinet manufacturers and custom cabinet shops.

Mathematics and drawing skills are helpful. Students need to be alert, physically fit and have good vision. Students are expected to attend all classes and be prompt. It is necessary to have good hand and eye coordination. Safety will be a major factor in operating all equipment. Safety is taught and students must pass all safety tests before operating equipment.

Career Opportunities
New construction in housing and industry and the renovation and modernization of existing structures are expected to increase the demand for cabinetmakers.

Cabinetmaking graduates find positions in kitchen cabinet shops, lumber companies, sash and door factories, store fixture manufacturers, display shops, wood specialty shops and furniture repair shops. Some graduates operate their own businesses.

Program Outcomes
1. Graduates will have acquired supervised hands-on experience building framed and manufactured cabinetry.
2. Graduates will have knowledge, skill and hands-on experience in the use of CAD/CAM software and CNC equipment.
3. Graduates will have knowledge, skill and hands-on experience with wood stains, finishes and finishing equipment.
4. Graduates will have knowledge, skill and hands-on experience in plastic laminate technology and fabrication.
5. Graduates will have acquired supervised hands-on experience in raised panel door layout, machinery set up and production.
6. Graduates will have the knowledge, skills and hands-on experience in the safe operation of woodworking equipment.

Carpentry

Program Overview
Construction is the largest industry in terms of investment and manpower expended. Carpenters make up the largest trade group in the construction industry. They erect the wood framework in buildings; they install wood paneling, cabinets, door and window frames and hardware; and they build stairs and frame roofs. Carpenters work under a wide variety of conditions, indoors and out, in all types of weather. They use many different hand and power tools working with wood, concrete, metals, plastics and other construction materials.

Good work habits, mechanical aptitude and strong communication and math skills are necessary to become a successful carpenter. Carpenters must be able to climb, lift, carry, measure, calculate and plan their work. They often work at considerable heights.

Career Opportunities
Construction activity continues to be strong. Demand for quality carpenters exists in residential, commercial and heavy construction. Increased activity in infrastructure and building renovation has provided additional opportunities for carpenters.

Carpenters can be involved in the many different phases of a building project or choose to specialize in areas such as framing, drywall, acoustic ceilings, concrete form building, hardware and millwork. Many graduates continue their training by entering a formal apprentice program. Carpenter apprentices advance to journeyperson by working on the job and attending classes related to their work. Advancement can continue...
to lead carpenter, carpenter foreman and job superintendent. Carpenters are employed by a wide variety of construction contractors, or they may choose to become self-employed in their own business.

Program Outcomes

1. Graduates will have the knowledge and skills to safely use hand and portable power tools used by carpenters in the construction industry.
2. Graduates will be able to work with wood, plastics, concrete, metals, gypsum and various fiber composite products used by carpenters in the construction industry.
3. Graduates will have practiced procedures used by carpenters in framing layout, stair construction, wood and steel framing and installation of doors, windows and cabinets.
4. Graduates will be familiar with forming systems and types of scaffold used in concrete construction.
5. Graduates will be familiar with and have practiced job site safety requirements.
6. Graduates will be able to operate instruments and demonstrate procedures used in building layout.
7. Graduates will display effective work habits deemed necessary by employers.
8. Graduates will be prepared for entry level employment as carpenters and admission to the Carpenters Apprentice Training Program.

Construction Supervisor

Construction Supervisor AAS Degree . . . . . . 72 Credits

Program Overview

This program is designed to provide educational opportunity for Building Trades Apprentices and Journeymen to become construction supervisors. The program will accept up to 20 credits from a Department of Labor approved Building Trades apprenticeship program. Core courses will cover knowledge and experience in key areas for supervisors. An internship is required of all students to experience the demands and complexities of the construction supervisor. There are capstone options to integrate the learning through simulations of supervisory work responsibilities, communication challenges and decision-making skills. One capstone is focused on the responsibilities of a supervisor working for a subcontractor and the other for a supervisor for a General Contractor.

Graduates from this program will have the opportunity to move from journey-level craft person to a construction supervisor. Saint Paul Building and Construction Trades Council estimates that there will be 3,000 new supervisor positions over the next 5 years. These would be either sub contractors or general contractors.

Program Outcomes

1. Graduates will have knowledge and hands-on experience with components of the construction industry: methods, materials and sequences of the construction process.
2. Graduates will be able to examine building codes and standards applicable to the building construction and inspection to process and implement OSHA regulations and recognize hazards.
3. Graduates will understand building specifications, the range of contract documents and specifications of change process and interpret contracts and legal documents the relationships between documents that apply to the construction project.
4. Graduates will be able to schedule a construction project by quantifying work, take-off plans and specifications using conventional scheduling methods--critical path methods, Gantt charts, monthly reports and crashing time schedules and the option to perform advanced scheduling using computer applications and resource leveling.
5. Graduates will be familiar with how to estimate a construction project and implement cost controls using blueprints and building specifications.
6. Graduates will have performed a capstone course in the role of a construction supervisor, either of a subcontractor or a general contractor, integrating the skills and knowledge learned and experienced in the program.

Construction Electricity

Construction Electricity Diploma.............. 66 Credits

Program Overview

A construction electrician is employed to install electrical wiring and equipment for lighting, heating, cooling and other power requirements in residential, commercial and industrial buildings. Using blueprints, diagrams and specifications, students perform installations in accordance with national, state and local safety codes. Considerable physical exertion is often required and the work may be performed outdoors or under such hazardous conditions as heights, unfinished construction or high voltages.

Construction Electricity requires high school graduation or equivalent. Students should have an interest and aptitude in applied higher algebra, trigonometry, drawing and science. Good eyesight and color vision are important.

Career Opportunities

According to the U.S. Department of Labor, “As the population and the economy grow...more electricians will be needed to maintain the electrical systems used by industry and to install electrical devices and wiring in new homes, factories, offices and other structures.”

Graduates are employed as apprentices by electrical construction firms. Upon completion of apprenticeship and the obtaining of a journeyman’s license, students are open to opportunities as master electricians, inspectors, contractors, estimators and repair persons.

Program Outcomes

1. Graduates will have the ability to communicate and conduct themselves in a professional manner with the customers and co-workers.

2. Graduates will have the skills for performing entry level tasks required of an apprentice electrician in residential, commercial and industrial construction.

3. Graduates will have knowledge of the National Electric Code, enabling them to legally and safely install electrical services with supervision.

4. Graduates will have the ability to apply electrical theory to practical applications.

## Certified Pipe Welding Certificate

### Program Overview

The Certified Pipe Welding Certificate prepares apprentice pipefitters to enter the pipefitting industry as a certified pipe welder.

### Program Outcomes

1. Graduates will have the knowledge and skills to prepare pipe joints for welding.
2. Graduates will have the knowledge and skills to use the shielded metal arc welding and gas tungsten arc welding processes to weld carbon steel and stainless steel pipe.
3. Upon graduation, graduates will be certified in welding of carbon steel and stainless steel pipe.

## Plumbing

### Program Overview

The Plumbing program trains apprentices in commercial, residential and industrial plumbing.

### Program Outcomes

1. Graduates will demonstrate safe and proper use of tools used in the plumbing field.
2. Graduates will have knowledge and skills to install piping in commercial, residential and industrial buildings.
3. Graduates will demonstrate knowledge in blueprint reading.
4. Graduates will demonstrate knowledge in code and proper installation practices.
5. Graduates will demonstrate science and math skills needed in the plumbing field.

## Sheet Metal

### Program Overview

The sheet metal worker reads blueprints, prepares layouts and operates fabricating devices such as special hand tools, power shears, nibbler, brake, bar folder, turning machines, spot and arc welders, soldering equipment and plasma cutting systems. The skilled sheet metal worker gathers general information and
specifications from blueprints for the fabrication and installation of ducts for heating, cooling, filtering and humidifying air. Also, sheet metal workers fabricate and install metal roofing and siding, stainless steel equipment for homes and industry, chutes for material transfer, signs and rain dispersal equipment.

Satisfactory preparation for the sheet metal program may include high school courses in algebra and geometry. Other helpful courses are mechanical drafting and metal shop. Much of the sheet metal work starts with two-dimensional objects and ends with a three-dimensional product. Sheet metal work requires good spatial perception.

Career Opportunities

According to the U.S. Department of Labor, employment of sheet metal workers in construction is expected to increase about as fast as the average for all occupations. Graduates may go to work for firms that fabricate sheet metal products and become skilled production, precision, or construction sheet metal workers.

Program Outcomes

1. Graduates will have the knowledge and skills to layout, fabricate and assemble all types of sheet metal products.
2. Graduates will have the ability to safely operate all types of sheet metal fabricating equipment.
3. Graduates will have the knowledge and skills to complete sheet metal welding and soldering processes.
4. Graduates will have the knowledge and skills to use computer aided drafting for the design and fabrication of sheet metal products.
5. Graduates will have the knowledge and skills to use Drafting and Blueprint Reading to design HVAC duct systems.

Truck Technician

Program Overview

Technicians diagnose trouble accurately with the use of modern testing equipment. They repair and service the entire truck and trailer including gas and diesel engines. They also work on air brakes, multi-speed transmissions, differentials, electrical systems, chassis and engine electronics, cooling systems, air conditioning and refrigeration, the chassis and many more components of today’s modern truck.

The student should be capable of passing a rigorous physical examination with emphasis on eyesight, color vision, hearing, back condition and motor coordination. Applicants should be high school graduates or equivalent with good reading ability and an understanding of basic mathematics in order to understand and apply technical information.

Career Opportunities

Maintenance departments, which have the responsibility for the repair and the maintenance of the entire truck, need skilled graduates to fill truck technician positions. Many technicians find employment with companies that own a fleet of vehicles such as truck lines, bus lines and construction companies. Other technicians work for small repair shops, truck dealerships, heavy equipment dealers and the government.

Employment of truck technicians is expected to increase faster than average according to the U.S. Department of Labor.

Program Outcomes

1. Graduates will have the knowledge and skills to service and repair medium and heavy duty trucks and trailers.
2. Graduates will have acquired supervised work experience servicing and repairing medium and heavy duty trucks and trailers.
3. Graduates will be prepared for employment as truck technicians and truck preventative maintenance technicians.
4. Graduates will have mastered the general education program requirements for work and life roles.

General Education Requirement

- Welding Fabrication Diploma: 62 Credits
- Welding Metal Fabrication Certificate: 30 Credits
- Welding Certificate: 30 Credits

Program Overview

Welding, brazing, cutting and fabrication operations require skilled workers who are well-trained in the use of oxyacetylene, arc, wirefeed, heliarc, flux core, submerged arc welding process, layout, turret punch, CNC/NC plasma cutting, press break and robotics. Skilled welding fabricators are thoroughly familiar with breakdown and setup procedures, test standards and all types of metals.

Physical requirements include good eyesight, good hand and eye coordination and the ability to perform heavy, physical work.

Career Opportunities

According to the U.S. Department of Labor, 7 out of 10 welding-related jobs were held by skilled welders. Skilled welders who are familiar with up-to-date techniques should have good job prospects.

Welders and fabricators work in manufacturing plants as production welders, maintenance welders, specialist welders, layout, press brake operators, turret punch operators, NC/CNC plasma cutting operators and robotic welding operators in structural and nonstructural settings. Welding/fabricating is widely used in the aircraft, automobile, trucking, shipbuilding, pipefitting, plumbing, sheetmetal, ironworking and other trades that use metals. With experience and additional education through day or evening classes, they can become layout specialists, technicians, supervisors or private shop owners.

Program Outcomes

1. Graduates will have the knowledge and skills in set-up and break-down procedures, test standards and different types of metals.
2. Graduates will have knowledge and skills in OAW (oxyacetylene welding), OAC (oxyacetylene cutting), SMAW (shielded metal arc welding), GMAW (gas metal arc welding), GTAW (gas tungsten arc welding), PAW (plasma arc welding), PAC (plasma arc cutting), FCAW (flux core arc welding) and SAW (submerged arc welding).
3. Graduates will have acquired supervised hands-on experience in using welding processes.
4. Graduates will have the knowledge and skills in plasma cutting, turret punch, pressbreak and CNC/NC operations.
5. Graduates will have the knowledge and skills in set-up and break-down procedures in the fabrication and welding industry.
6. Graduates will be prepared for employment in the welding industry and related fields.
7. Graduates will have successfully mastered the general education program requirements for work and life roles.

Course Descriptions

The following Course Descriptions are alphabetized by program area. Each course description includes a course number and title, description of the course, a listing of any required prerequisites and the number of credits. The credit listing includes the lecture, lab and/or on-the-job breakdown. For example, 4C/3/1/0 shows that the course is 4 credits with 3 credits of lecture, 1 credit of lab and 0 credits of on-the-job training.

Accounting

ACCT 1411 Principles of Accounting 1
Introduces students to the fundamental accounting concepts and principles used to analyze and record business transactions. 4C/4/0/0

ACCT 1412 Principles of Accounting 2
An introduction to principles of accounting for the partnership entity, the corporate entity and additional topics in financial accounting. (Prerequisite(s): ACCT 1411) 4C/4/0/0

ACCT 1511 Federal Taxation 1
Introduces students to the basic issues and concepts of taxation principles. Students observe federal tax laws as applied to the preparation of the Form 1040 and related schedules. Tax preparation software is utilized for case projects. (Prerequisite(s): ACCT 1411) 4C/4/0/0

ACCT 1512 Federal Taxation 2
Introduces students to the fundamentals of tax law regarding business federal income taxation. Planning issues of estates and gift taxation are part of this course. Tax preparation software is utilized for case projects. (Prerequisite(s): ACCT 1511) 4C/4/0/0

ACCT 1521 Accounting Computer Applications
Combines the theory of financial accounting principles and software applications. Two types of software, spreadsheet and general ledger, are included in the course. (Prerequisite(s): ACCT 1411) 4C/4/0/0

ACCT 2411 Intermediate Accounting
Covers financial reporting using generally accepted accounting principles and concepts relating to income determination, revenue recognition and asset valuation. (Prerequisite(s): ACCT 1412) 4C/4/0/0

ACCT 2420 Managerial Accounting
Introduces students to costing concepts and methods of analysis. Students analyze the management decision-making process via problem solving and case analysis. Projects include non-profit and profit entities. (Prerequisite(s): ACCT 1412) 4C/4/0/0

ACCT 2520 Auditing
Covers auditing and assurance services reporting using generally accepted auditing standards and concepts. An integrated computerized audit case is part of the audit course. (Prerequisite(s): ACCT 1412) 4C/4/0/0

ACCT 2530 Fundamentals of Non-Profit Accounting
This course addresses the entity which is not concerned with a profit objective. About one-third of entities in the United States are non-profit. The course covers objectives and principles of reporting for the non-profit entity. (Prerequisite(s): ACCT 1412) 4C/4/0/0

ACCT 2540 Spreadsheet Math Formulas and Functions for Accounting
This course introduces students to the issues of spreadsheet financial mathematics. The course covers the study of Financial Functions, Math and Logic Functions and Statistical Functions as they apply to Financial and Managerial Accounting. 4C/4/0/0

ACCT 2591 Accounting Internship
A cooperative work-student program between Saint Paul College Accounting Program and a business facility to allow the student an employment-like experience. (Prerequisite(s): Instructor approval) Variable 2-8 credits

American Sign Language

ASLS 1411 American Sign Language 1
Introduction to American Sign Language (ASL), a visual/gestural language used by the Deaf Community. Course covers sign vocabulary, sentence structures, dialogue formats through facial expressions and body movements used in signing. 3C/3/0/0

ASLS 1412 American Sign Language 2
A continuation of ASLS 1411, designed to expand students’ conversational range from talking about themselves to talking about other people and activities, giving directions, describing people and making requests. (Prerequisite(s): ASLS 1411 with a grade of “C” or better) 3C/3/0/0

ASLS 1413 American Sign Language 3
A continuation of ASLS 1412, designed to expand students’ comprehension and sign language production skills. Through meaningful communication contexts, students will use communicative functions which include locating things, asking for solutions, discussing life events and describing objects. Using appropriate cultural behaviors and strategies for conversational management is stressed. Receptive and expressive fingerspelling and information about the deaf community will further enhance the learning process. (Prerequisite(s): ASLS 1412 with a grade of “C” or better) (MnTC: Goal 8) 3C/3/0/0

ASLS 1414 American Sign Language 4
A continuation of ASLS 1413 provides more complex ASL grammatical features, communicative functions and receptive fingerspelling and numbers. Cultural features will be stressed to develop competency and fluency in the language. (Prerequisite(s): ASLS 1413 with a grade of “C” or better) (MnTC: Goal 8) 3C/3/0/0
ASLS 1415 American Sign Language 5
This course is an ongoing instruction of American Sign Language covering communicative functions, sign vocabulary, fingerspelling, grammar and cultural aspects of the Deaf Community. At the completion of ASL 5, each student shall be able to use these language functions and conversational behaviors appropriately in ASL. (Prerequisite(s): ASLS 1414 with a grade of “C” or better) 3C/3/0/0

ASLS 1420 ASL Linguistics
Introduces students to the linguistics of American Sign Language (ASL). Students study the major features of language structures and the underlying knowledge for the social uses of American Sign Language. Content includes an examination of the structure of the physical signals of ASL, the customary patterns for combining them and the influence of signs on one another in connected discourse. (Prerequisite(s): ASLS 1420 with a grade of “C” or better) 2C/2/0/0

ASLS 1430 Classifiers
Introduces students to the fundamentals of American Sign Language (ASL) classifiers. Students will enhance and expand the use of classifiers in their expressive skills and in the recognition of classifiers in their receptive skills. (Prerequisite(s): ASLS 1420 with a grade of “C” or better) 3C/3/0/0

ASLS 1435 Deaf Studies/Culture
This course is designed to help students understand and appreciate Deaf Culture and the Deaf Community. Deaf history, historical and modern-day perspectives, deafness and its impact, Deaf Culture/Community characteristics, education, communication modes/languages used by D/deaf people and the ramifications and impact of American Sign Language and Deaf Culture upon the lives of D/deaf people and other populations will be introduced. (MnTC: Goal 7) 3C/3/0/0

ASLS 1443 ASL Fingerspelling and Numbers
This course introduces the students to the fundamentals of fingerspelling/lexicalized fingerspelling and the complex rules & patterns of ASL numbers systems. This course develops expressive and receptive fingerspelling and number skills. Receptive skills focus on whole-word recognition, distinction among different number systems, phrase recognition, and identifying fingerspelled words and numbers in context. Expressive skills focus on the development of speed, clarity, and fluency. (Prerequisite(s): ASLS 1414 American Sign Language 4 with a grade of “C” or better). 3C/3/0/0

ASLS 1444 ASL Sign Reading
This course is designed to improve receptive communication skills. Students acquire strategies to enhance their understanding of deaf signers. (Prerequisite(s): ASLS 1420 with a grade of “C” or better) 2C/2/0/0

ASLS 1446 ASL Non-Manual Markers
This course covers the non-manual aspect of the language. The use of the face, eyes and head to convey grammatical information will be covered. Students will analyze specific features. Other topics include ASL ‘mouthing’, showing emotion and inappropriate facial behaviors. (Prerequisite(s): ASLS 1420 with grade of “C” or better) 2C/2/0/0

ASLS 1448 American Sign Language Semantics
This course is designed to expand students’ sign vocabulary by analyzing multiple-meaning words and various sign equivalents. Language learning activities will focus on nouns-verbs, sentence types, classifiers, inflection of verbs with temporal aspect and distributional aspect. (Prerequisite(s): ASLS 1414 with grade of “C” or better) 2C/2/0/0

ASLS 1455 Contrastive Text Analysis
This course introduces the definition of a language, its components that apply to any language and comparison among the languages. The various elements of both languages, American Sign Language and English are compared, contrasted and applied. (Prerequisite(s): ASLS 1420 with a grade of “C” or better) 2C/2/0/0

ASLS 1469 Deaf Heritage of Minnesota
Covers the history of deaf people in Minnesota and its impact upon deaf and non-deaf Minnesotans. (Prerequisite(s): ASLS 1420 with a grade of “C” or better or instructor approval) 2C/2/0/0

ASLS 1470 ASL Discourse
Introduces students to the discourse level of American Sign Language (ASL). Students will research and analyze ASL discourse and discover the variety of devices or techniques to convey information in visually clear and effective ways. (Prerequisite(s): ASLS 1420 with grade of “C” or better) 2C/2/0/0

ASLS 1497 Special Topics in ASL
A variable credit granting course that focuses on special topics in the area of American Sign Language and Deaf Culture. Courses are designed to accommodate the learning needs and interests of students. Each course syllabus focuses on specific content areas which may not be presented or presented in-depth in other ASLS courses. Variable 1-5 credits

### Anthropology

ANTH 1710 Introduction to Cultural Anthropology
This course introduces students to the concept of culture, the human past and present and the unity and diversity that characterizes the human species. The course covers the history and development of theories of functionalism, structuralism, cultural ecology, cultural evolution and related topics. There is a focus on current issues and problems and the relationship to societal and global matters. (Recommendation(s): READ 0721 with a grade of “C” or better or appropriate assessment score.) (MnTC: Goals 5 & 7) 4C/4/0/0

ANTH 1720 Introduction to Physical Anthropology
This course presents the bio-cultural evolution of people over time including major ecological revolutions in human history, theories of cultural evolution, methods of excavation and artifact discovery and analysis. (Recommendation(s): READ 0721 with a grade of “C” or better or appropriate assessment score.) (MnTC: Goals 5 & 10) 4C/4/0/0

ANTH 1790 Special Topics in Anthropology
This course provides learning experiences that meet the needs of students and pre-major course requirements in anthropology. (Recommendation(s): READ 0721 with a grade of “C” or better or appropriate assessment score.) (MnTC: Goal 5) 3C/3/0/0
ARTS 1710 Fundamentals of Photography 1
This course is an introduction to the basic tools and techniques used in black and white photography, as well as the development of conceptual and aesthetic issues in the field. Technical areas include camera use, metering, aperture, shutter speed controls, film and optics. In addition, the course will address creative uses of photography in its depiction of light and shadow, elements of time, motion, space, portraiture, and personal exploration and metaphor. Students will develop a vocabulary for personal expression by combining the technical and conceptual issues into a final photographic portfolio of their own design. (MnTC: Goal 6) 3C/2/1/0

ARTS 1711 Fundamentals of Photography 2
Fundamentals of Photography 2 builds on the foundational skills developed in ARTS 1710, Fundamentals of Photography 1. We continue to explore composition, lighting, visual design, exposure and camera fundamentals. Students are introduced to digital photography to further enhance the capability of personal expression available in the photographic medium. The class explores scanning, digital SLR cameras, creating contact sheets, managing digital workflow and printing professional quality photographs. Students develop the skills necessary to produce a high-quality photographic portfolio. (Prerequisite(s): ARTS 1710 with a grade of “C” or better) (MnTC: Goal 6) 3C/2/1/0

ARTS 1712 Advanced Photography
Students in Advanced Photography participate in a service learning project and will continue to explore composition, exposure, camera work and advanced digital techniques to further enhance the capability of personal expression available in the medium. Ultimately, the student will recognize their own creative style and be able to set goals to achieve their photographic aspirations. We will discuss professional presentation of artwork, explore professional practices in photography, experiment with photographic techniques, and produce a portfolio of high-quality black and white or color photographs. (Prerequisite(s): ARTS 1710 and ARTS 1711 with a grade of “C” or better) (MnTC: Goal 6) 3C/2/1/0

ARTS 1720 Art Appreciation
This is an introductory “learning to look” course with the objective of developing students’ ability to see, understand and enjoy the visual arts. Examples of painting, sculpture and architecture from around the world, many of which will already be familiar to students, will be viewed, discussed and analyzed in class. Students will also learn about the materials and processes of art making. We will then go out and take a look at the real thing by visiting the Minneapolis Institute of Arts and the Walker Art Center. (MnTC: Goal 6 & 8) 3C/3/0/0

ARTS 1722 American Animation
This course looks at animation as an art form and cultural product. We will consider animation within the contexts of American popular culture, media history, and socio-political history. We will explore technical and aesthetic advancements from the early animation devices of the nineteenth century to the current and emerging digital technologies of today. Our studies will take us through the classic cartoons of Winsor McCay, Max Fleischer, The Walt Disney Company, and Warner Bros. to the latest creations of Pixar Studios and DreamWorks. (MnTC: Goals 6 & 7) 3C/3/0/0

ARTS 1724 The Design of Everyday Life
Design is a powerful cultural force that surrounds us wherever we go. This course provides students with the basic historical and analytical tools to understand the impact of design on our day-to-day lives as objects, communications materials, and environments. Lessons will cover the main movements, trends and issues in design from the end of the nineteenth century through today with particular emphasis on consumer cultures and the interconnections between design and technology. Visual examples will range from furniture to advertisements, industrial design to digital media. (MnTC: Goals 6 & 7) 3C/3/0/0

ARTS 1726 Art in the Cities
This course takes an experiential approach to learning about the visual arts. Through visits to museums, galleries, studios, and historic sites, students will become familiar with some of the cultural resources available in Minneapolis and Saint Paul. We will study art representing various media, artistic philosophies, historical contexts, and the multiculturalism of the Twin Cities. Weekly readings, papers, and a final project emphasize the development of critical thinking, visual analysis, and writing skills. Students will be responsible for their own transportation. (MnTC: Goals 6 & 7) 3C/3/0/0

ARTS 1730 Drawing 1
This course will focus on techniques and strategies for improving observational drawing abilities. Through hands-on drawing exercises, students will learn to depict the world around them and the human form with greater accuracy. Specifically, we will focus on the five basic skills of drawing: perception of edges, perception of spaces, perception of relationships, perception of lights and shadows, and perception of the whole, or gestalt. (MnTC: Goal 6) 3C/2/1/0

ARTS 1731 Drawing 2
This course continues the development of skills and techniques learned in Drawing 1. This course emphasizes observing relationships, line and value to enhance experimental and personal expression; introduces techniques for drawing in color, incorporates figure drawing, and includes the study of influential artists throughout the history of art, concentrating on contemporary means of expression. Students design art projects and complete a portfolio. (Prerequisite(s): ARTS 1730 Drawing 1 with a grade of “C” or better) (MnTC: Goal 6) 3C/2/1/0

ARTS 1740 Introduction to Painting
This course will introduce students to the materials and techniques of oil painting. Assignments will be geared towards improving one’s ability to paint from direct observation and depicting the natural world and the human form with greater accuracy. The course will have strong emphasis on the development of color in a painting and a fair amount of time will be spent discussing “color theory” as it pertains to art. The instructor will introduce all techniques with hands-on demonstrations. (MnTC: Goal 6) 3C/3/0/0

ARTS 1742 Intermediate Painting
This course will incorporate and further develop skills and techniques learned in Introduction to Painting, but will be more independent in nature. Each student will write a proposal for a cohesive body of work to be completed over the course of the semester, and will work towards developing a personal “style” of painting. Through a series of in-class group critiques, students will learn to analyze and critique works of art. (Prerequisite(s): ARTS 1740 Introduction to Painting with a grade of “C” or better.) (MnTC: Goal 6) 3C/3/0/0
ARTS 1744 Introduction to Watercolor Painting
This course will introduce students to the practice of watercolor painting. Students will become familiar with the materials and terminology of the medium. They will learn to synthesize a variety of painting techniques into watercolor paintings of varying genres and styles. Students will develop an understanding of color theory, as it applies to watercolor painting, and will come to understand historical and contemporary issues pertaining to the medium. (MnTC: Goal 6) 3C/3/0/0

ARTS 1760 World Art
What would you see if you suddenly found yourself in China, Nigeria, India or Mexico? How would the world look to you? For many of us, it would probably look very strange. One of the many ways to make our world familiar to us, whether we travel or not, is to try to understand a culture’s visual expression in architecture, sculpture, painting and other media. This class will view slides of artwork in a lecture/discussion format. We will then visit the Minneapolis Institute of Arts, twice, where we will be able to immerse ourselves in the cultures studied by examining the original artworks produced by these cultures. (MnTC: Goals 6 & 8) 3C/3/0/0

ARTS 1770 Art in the Americas
This course is an introduction to the artistic productions of the United States, Central America, and South America. Art in the Americas is united by common historical events. We will explore patterns of cultural interchange from the Pre-Columbian period to the present with particular emphasis on colonialism, revolution, and the search for national identities. We will also examine the impact of current hemispheric politics on American art. (MnTC: Goal 6) 3C/3/0/0

ARTS 1790 History of Photography
This survey course will focus on the art of still photography from the 19th century to the present. There is an emphasis on the work of artists, their processes, and the accompanying aesthetic movements occurring between the announcement of the Daguerreotype in 1839 and the beginning of the twenty-first century. As witnesses of popular culture, students will examine the interaction of photography among other visual art forms. The photographic print, as a means of artistic expression, will be discussed including historic, social, and artistic movements. (MnTC: Goal 6) 3C/3/0/0

ARTS 2710 Advanced Studio Arts
In the Advanced Studio Arts course students will build upon what they learned in Drawing 1, Introduction to Painting, or Fundamentals of Photography courses. The course will be independent in nature with students focused on developing their own personal artistic “style” in either drawing, painting or photography. Students will propose an idea for a body of work and will spend the semester creating a cohesive portfolio of images and writing an artist’s statement. Class time will be devoted to independent work, individual and group critiques, and a field trip. The semester will culminate with a public exhibition of student work. (MnTC: Goal 6) Variable 3-4 credits

### Auto Body

**ARTS 1740 Introduction to Auto Body Repair**
Personal safety, tool use and maintenance as well as basic body shop procedures are covered. (Prerequisite(s): Enrollment in Auto Body Program) 3C/1/2/0

**ARTS 1410 Auto Body Sheet Metal Repair**
Covers basic sheet metal repair on automobiles, as well as tools and equipment used in the repair process. (Prerequisite(s): Enrollment in Auto Body Program) 3C/1/2/0

**ARTS 1420 Auto Body Repair Techniques**
Covers the use of basic hand and power tools and preparation of an auto before painting. (Prerequisite(s): Enrollment in Auto Body Program) 3C/1/2/0

**ARTS 1430 Introduction to Paint Prep**
Focuses on refinishing safety, preparation, tools and equipment used in the application of materials. (Prerequisite(s): Enrollment in Auto Body Program) 4C/0/4/0

**ARTS 1440 Advanced Auto Body & Frame Repair Theory**
Topics include advanced body and frame theory, use of frame rack and safe use of power equipment as it applies to major collision damage. (Prerequisite(s): Enrollment in Auto Body Program) 2C/1/1/0

**ARTS 1450 Collision Repair, Estimating & Shop Management**
The focus of this course will be identification and calculation of vehicle damage from a collision. (Prerequisite(s): Enrollment in Auto Body Program) 2C/1/1/0

**ARTS 1460 Auto Body Open Lab**
Flexible lab hours are available for various auto body repair projects. One to four credits as elective for AUTO 2440 Auto Body Detailing. (Prerequisite(s): Enrollment in Auto Body Program) 4C/0/4/0

**ARTS 1510 Advanced Body & Frame Repair**
Covers the repair of major collision damage. The course will focus on using measuring and strengthening equipment. (Prerequisite(s): Enrollment in Auto Body Program) 3C/1/2/0

**ARTS 1520 Paint & Color Matching Techniques**
Emphasizes overall refinishing, including color matching and all types of paint problems. (Prerequisite(s): Enrollment in Auto Body Program) 4C/2/2/0

**ARTS 1530 Paint Finish & Detailing**
Covers automotive finishes and how to detail them. (Prerequisite(s): Enrollment in Auto Body Program) 4C/2/2/0

**ARTS 1540 Auto Body Specialization Finishes**
Application of special automotive finishes used on today’s automobile is emphasized in this course. (Prerequisite(s): Enrollment in Auto Body Program) 4C/2/2/0

**ARTS 1550 General Auto Body Detailing**
Detailing of automobiles after they leave the paint shop is the focus of this course. (Prerequisite(s): Enrollment in Auto Body Program) 4C/2/2/0
ABDY 1560 Alignment & Brakes for Auto Body
Covers alignment and brakes, how that applies to auto body collision damage and how repairs are made. (Prerequisite(s): Enrollment in Auto Body Program) 2C/1/1/0

ABDY 1570 Air Conditioning & Auto Electric for Auto Body
Covers the repair of air conditioning and electrical components as it applies to auto collision damage. (Prerequisite(s): Enrollment in Auto Body Program) 3C/1/2/0

ABDY 1581 Welding—Auto Body 1
Covers welding equipment used in auto body repair and its safe and correct use. (Prerequisite(s): Enrollment in Auto Body Program) 2C/1/1/0

ABDY 1582 Welding—Auto Body 2
Emphasizes the types of welding used on automobiles and the type of basic welding joints. (Prerequisite(s): Enrollment in Auto Body Program) 3C/1/2/0

Auto Service

AUTO 1410 Trade Knowledge
Covers the examination and use of safety equipment in an automotive shop. Communication skills and general knowledge of the trade and procedures used in operating an automotive shop are also covered. (Prerequisite(s): Admission to the Auto Service Program) 3C/0/3/0

AUTO 1420 General Auto Service
Covers correct procedures for servicing vehicles, shop safety and the use of service manuals and bulletins. Automotive tools and equipment and minor service will be emphasized. (Prerequisite(s): AUTO 1410) 3C/0/3/0

AUTO 1430 Brakes
Covers the basic principles of the brake system. Emphasis will be placed on operation, diagnosis and repair of common types of braking systems. (Prerequisite(s): AUTO 1420) 4C/0/4/0

AUTO 1440 Alignment & Suspension
Covers the study of suspension and steering systems. The student will inspect, repair and adjust the suspension and steering systems on today's cars and light trucks. (Prerequisite(s): AUTO 1430) 5C/0/5/0

AUTO 1510 Clutch/Driveline Manual Transmission
Standard automotive and light truck clutches are covered. Content includes design, adjustment, overhaul, diagnosis and repair on mechanical and hydraulic clutch systems. This course also covers operation and proper repair procedures of current manual transmissions used in late model vehicles. (Prerequisite(s): AUTO 1430) 3C/0/3/0

AUTO 1520 Four Wheel Drive Differential
Emphasizes the operation and proper repair procedures of current transfer cases, hubs and differentials in four wheel drive vehicles. (Prerequisite(s): AUTO 1510) 2C/0/2/0

AUTO 1530 Basic Electrical & Battery
Covers basic fundamentals of electricity and electronics, circuits, magnetism, resistance, coils, instruments, diodes and solid-state devices. Battery charging and testing is included. 3C/0/3/0

AUTO 1540 Basic Tune-Up
Covers instruction on operation of the ignition system and maintenance of the ignition and fuel systems. This course focuses on the replacement of maintenance items such as spark plugs, distributor cap and ignition wire and air, fuel and emission filters. (Prerequisite(s): AUTO 1530) 3C/0/3/0

AUTO 1550 Heating & Air Conditioning
Focuses on the principles of heating and air conditioning. Topics including various A/C types, the diagnoses of malfunctions and tests/repairs are studied. Lab work is on actual systems. During the lab, the student will test and repair: vacuum and electrical controls, air flow distribution and heater system controls. (Prerequisite(s): AUTO 1530) 4C/0/4/0

AUTO 2410 Starting & Charging Systems
Covers overhaul of components such as starters and alternators. Complete system diagnoses and repair are also included. (Prerequisite(s): AUTO 1530) 3C/0/3/0

AUTO 2420 Electrical Accessories
Covers the operation and servicing techniques of chassis wiring, lights, instruments and headlight aiming. How to read and interpret wiring diagrams will also be included. (Prerequisite(s): AUTO 1530) 3C/0/3/0

AUTO 2430 Engine Theory & Repair
Covers disassembly, inspection, repair and reassembly of the internal combustion engine. Repair procedures such as the replacement of piston ring, engine bearings and valve grinding are covered. (Prerequisite(s): AUTO 1540) 4C/0/4/0

AUTO 2440 Engine Installation
Covers the removal and installation of complete engine assemblies, transfer of parts and removal and installation of accessories. 2C/0/2/0

AUTO 2450 Introduction to Auto Computers
Covers the operation of computer systems of engines using feedback carburetors and fuel injection. Sensors and actuators that operate in the system will be studied and tested. (Prerequisite(s): AUTO 1530) 2C/0/2/0

AUTO 2510 Fuel Systems
This course covers the fundamentals of carburetor and intake systems, maintenance and repair of the fuel system and emission controls. It also covers the use of 4 gas and 5 gas analyzers, scanners and other test equipment to troubleshoot and repair problems in computerized fuel systems. (Prerequisite(s): AUTO 1540) 5C/0/5/0

AUTO 2520 Engine Driveability
Covers application of knowledge and skills gained when studying engine, fuel, ignition and computer systems. (Prerequisite(s): AUTO 1540, AUTO 2511 and AUTO 2512) 3C/0/3/0

AUTO 2530 Automatic Transmission Theory
Covers the basics of torque converters, planetary gear sets, clutches, bands and hydraulics. 2C/0/2/0

AUTO 2540 Automatic Transmission Diagnosis & Repair
Covers automatic transmission and transaxle diagnoses and service. Trouble shooting and repair procedures will also be covered. (Prerequisite(s): AUTO 2530) 3C/0/3/0
AUTO 2550 Specialized Lab 1
Covers the content goals listed or any other goals that the student and the instructor agree upon. The purpose of the course is for students to specialize in an area they prefer. (Prerequisite(s): Completion of all other listed courses) 2C/0/2/0

Biology

BIOL 1725 Environmental Science
This course covers basic scientific and ecological principles, including an understanding of how the earth functions, how humans are affecting the earth, and proposed solutions to many of the environmental problems we face. Specific topics include: basic ecological principles, human population growth, biotechnology, and human impacts on climate, energy resources, and waste management. Students will be required to take positions on environmental issues and alternative future scenarios. In-class activities will include group discussions, presentations by guest speakers, and video and internet-based resources. Two hours of lab per week are required and include group experiments, computer simulations, outdoor lab activities, and field trips. Traditional and online sections are available. (MnTC: Goals 3 & 10) 4C/3/1/0

BIOL 1730 Human Body Systems
This course covers body organization and the basic anatomy and physiology of cells, tissues, special senses, and the 11 organ systems of the body. Although rigorous, the course is not as in-depth as Human Anatomy and Physiology 1 and 2 (BIOL 2721 and BIOL 2722). Laboratory activities, including the dissection of a preserved animal and animal organs, are part of the course. This course is required for the MLT Program, but does not fulfill requirements for the LPN or RN Programs. Traditional and web-enhanced sections are available. (MnTC: Goal 3) 3C/2/1/0

BIOL 1735 Exploring Biology
This course examines basic principles of chemistry, organizations of cells, and properties and functions of biological macromolecules. The production and utilization of biological energy is explored at the cellular level and the similarity found in all organisms is emphasized. Principles of inheritance and cellular reproduction are explored at the molecular and cellular levels. This course also examines plant and animal kingdoms and general principles of ecology. It is intended for non-science majors and fulfills the lab science requirement. Two hours of lab per week are required. (MnTC: Goal 3) 4C/3/1/0

BIOL 1740 General Biology: The Living Cell
This course is a study of biological processes including cell chemistry, metabolism, reproduction, genetics, and complex cell physiology. Two hours of lab per week are required and the lab component covers the application of concepts through observation, experimentation, and problem analysis. This course is intended for biology majors and students requiring a strong biological background for selected majors, including nursing and other allied health fields, and interested non-majors. BIOL 1740 is a prerequisite for BIOL 2721 Human Anatomy and Physiology 1, BIOL 1750 General Microbiology, and recommended for BIOL 1745 General Biology: The Living World. Traditional and web-enhanced sections are available. (Prerequisite(s): COMM 0722 with a grade of “C” or better, or concurrent enrollment, or appropriate assessment score.) (MnTC: Goal 3) 5C/4/1/0

BIOL 1745 General Biology: The Living World
This course covers biological processes, including a survey of life forms (viruses, bacteria, protists, fungi, plants, and animals), their evolution, and ecology. The laboratory focuses on organism taxonomy, classification, and mammalian systems, including comparative anatomy, organism dissections, ecological interrelationships of organisms and their environment, and independent biome research projects. Two hours of lab per week are required and some activities include the dissection of preserved animals, including a rat. The course is offered during Spring Semester only. (Prerequisite(s): BIOL 1740 General Biology: The Living Cell with a grade of “C” or better, or Instructor permission) (MnTC: Goal 3) 5C/4/1/0

BIOL 1750 General Microbiology
General Microbiology is an introductory course covering bacteria, fungi, protozoa, algae, and viruses. Structure, metabolism, growth requirements, genetics, and replication of these microbes will be compared. Emphasis will be placed on the role of microbes in human disease and the function of the immune system in microbial control and balance. Environment and industrial microbiology will also be discussed. Two hours of lab per week are required and sessions will be structured to provide a hands-on introduction to common laboratory techniques related to topics covered in lecture. Safety and infection control will also be stressed. Traditional and web-enhanced sections are available. (Prerequisite(s): BIOL 1740 General Biology: The Living Cell with a grade of “C” or better) Traditional and web-enhanced sections are available. (MnTC: Goal 3) 4C/3/1/0

BIOL 1760 Nutrition
This course explores the ever-changing topic of nutritional science beginning with the fundamentals of a healthy diet and the role that carbohydrates, proteins, fats, and minerals play in maintaining health and fitness. Students will explore topics such as media quackery, digestive demands of the daily food choices for compliance with dietary guidelines as well as determining risk factors for diabetes, cardiovascular disease and osteoporosis. The course will also cover the issue of hunger and the global environment including the impact of personal choice, organic farming, and bioengineering on sustaining the planet and its people. Traditional and online sections are available. (MnTC: Goal 3) 3C/3/0/0

BIOL 1771 Medical Terminology
This online course covers how bio/medical words are constructed from Greek and Latin word elements (roots, combining forms, prefixes and suffixes). Definitions, spelling, pronunciation, and applications of these terms will be stressed. Diseases and treatments specific to the body’s organ systems will also be covered. This course is ideal for students interested in a health career. (MnTC: Goal 3) 2C/2/0/0

BIOL 1782 Introduction to Forensic Science
This course provides an introduction to Forensic Science. General biological concepts and their applications to various scientific principles and techniques used in Forensic Biology will be covered. It is intended for students interested in Forensic Science and can be used to fulfill the lab science requirement. Two hours of lab per week are required. (MnTC: Goal 3) 4C/3/1/0
**BIOL 1785 Biology of Women**
This course explores the biology of women and is designed to provide a critical review of perspectives that pertain to both men and women. Topics include the study of reproductive anatomy and physiology, pregnancy and fetal development, and issues related to women’s physical health such as contraception, cancer, and menopause. In addition, the course will examine the role of women as both consumers and providers of healthcare as well as promote an understanding of women’s achievements, contributions, and experiences in medical professions. Traditional and online sections are available. (MnTC: Goals 3 & 9) 3C/3/0/0

**BIOL 2721 Human Anatomy and Physiology 1**
This course covers body organization, tissues and some of the human body systems (integumentary, skeletal, muscular and nervous), plus the special senses, integrating both the anatomy and physiology of each organ system. Dysfunctions may be included, but the body in homeostasis is stressed. Two hours of lab per week are required. Some lab activities involve the dissection of preserved animal organs. Traditional and web-enhanced sections are available. (Prerequisite(s): BIOL 1740 General Biology: The Living Cell with a grade of “C” or better) Traditional and web-enhanced sections are available. (MnTC: Goal 3) 4C/3/1/0

**BIOL 2722 Human Anatomy and Physiology 2**
This course covers those body systems not included in Human Anatomy & Physiology 1: cardiovascular, respiratory, endocrine, lymphatic/immune, digestive, urinary & reproductive systems. The anatomy and physiology of each organ system is integrated. Dysfunctions may be included, but the body in homeostasis is stressed. Two hours of lab per week are required. Many lab activities involve dissection of a preserved animal and animal organs. (Prerequisite(s): BIOL 2721 Human Anatomy and Physiology 1 with a grade of “C” or better) Traditional and web-enhanced sections are available. (MnTC: Goal 3) 4C/3/1/0

---

**Business**

**BUSN 1410 Introduction to Business**
Offers an introduction to the United States business system. Students will explore economic principles, international business, business ethics, marketing and financial principles. 3C/3/0/0

**BUSN 1440 Marketing Principles**
Students will develop an understanding of the basic principles of marketing. Students will examine core marketing concepts (needs, wants and demands) and the elements used in developing a marketing plan, including consumer behavior principles, product development, pricing strategies, advertising, sales promotion, public relations, personal selling and product distribution. Current marketing trends will be discussed. 3C/3/0/0

**BUSN 1442 Marketing Research and Analysis**
Marketing Research can be defined as the process of gathering, analyzing and reporting information in order to make marketing decisions. This class will cover various qualitative and quantitative techniques and methods of research. Other topics include statistic analysis, software programs and preparing results and findings reports. 3C/3/0/0

**BUSN 1444 Advertising and Promotional Strategies**
This course explores the world of advertising and other mass communications practices. It will examine advertising theory, functions and principles. All types of media will be explored including television, radio, magazine, newspaper, outdoor and the internet. Various careers in advertising will be examined. 3C/3/0/0

**BUSN 1446 Sales and Sales Management**
In this course we will examine the personal selling process. We will explore the practical and tactical process of how to sell products and services in a complex market. We will also examine sales force training, compensation, territory assignment and quotas. 3C/3/0/0

**BUSN 1448 Retailing Principles**
An introduction to retailing and retailing practices. Topics include store location, merchandise buying and display, store layout, image and design. 3C/3/0/0

**BUSN 1480 Career Resources**
This course provides information and guidance in the development of professional job seeking skills. Topics will include: the application, the resume, the cover letter, using the Internet in a job search, locating job opportunities, marketing yourself and company research. 1C/1/0/0

**BUSN 1482 Business Career Resources**
This course provides information and guidance in the development of professional job seeking skills. Topics will include: the application, the resume, the cover letter, using the internet in a job search, locating job opportunities, marketing yourself, and company research. This course may include work on portfolios, electronic portfolios, and interviewing skills. 2C/2/0/0

**BUSN 2450 Management Fundamentals**
The course includes the history of management theory with emphasis on forces of change that have resulted in a changing view of the business world for managers. Principal management functions covered are planning, organizing, leading and the process of control as an information feedback function for increasing productivity. Emphasis is on the integration of all management functions into one effort for visionary, effective and efficient operations. 3C/3/0/0

**BUSN 2455 Essentials of Entrepreneurship and Small Business Management**
In this course the student will learn the essential skills needed to start and manage a successful new business venture. Topics include: the challenge of entrepreneurship, building a business plan, marketing and financial issues with a start up company and how to gain the competitive advantage. 3C/3/0/0

**BUSN 2460 Entrepreneurship Resources**
In this course the student will learn the essential resources needed to start and manage a successful new business venture. Topics include: how to work with the small business administration; free federal and state resources and how to choose which resources are most valuable when starting a new business. 2C/2/0/0

**BUSN 2465 Business Ethics**
This course introduces students to ethical issues and concepts as they relate to business and as they impact society, the economy and the environment. Students will analyze various approaches to making ethical decisions through case studies. Topics range from the role of the government to corporate global businesses. Both national and international ethics will be discussed. 3C/3/0/0
BUSN 2470 Legal Environment of Business
This course covers basic information about the various classifications of the law and the rights and responsibilities imposed on the business community by our legal system. The course introduces students to the legal system and its impact on the individual, the business environment and upon society as a whole. Areas of study include basic laws, contracts, negligence, product liability, employment law, alternative dispute resolution and business entities. 3C/3/0/0

BUSN 2472 Business Negotiation Skills
Covers the techniques and unique circumstances needed for the negotiation of prices for the business environment. The course will guide students through the areas of risk negotiations, bargaining concepts, strategy and tactics for successful contract negotiations. 3C/3/0/0

BUSN 2475 Business Decisions and Project Management
This course builds upon the foundations of project management and analyzes project management business decisions. Students evaluate the strategic role of projects in organizations and how project portfolio management can be used to guide an organization’s project success. The course is designed to allow the student to use tools and techniques to study business processes, financial analysis and risk models in developing and executing projects in a business. The purpose of the course is to understand the underlying principles of project management from a business perspective. 4C/4/0/0

BUSN 2480 Business Management Internship
A cooperative work-study program between Saint Paul College- A Community & Technical College Business Management degree program and a business facility. This elective course allows the student to experience a closely supervised job situation that is related to the program. (Prerequisite(s): Instructor approval) Variable 1–3 credits

Business Logistics Management

BSLM 1410 Transportation Management
Introduction to basic transportation concepts and the relevance of transportation in our economy. Characteristics of each mode of transportation including rail, highway, carrier pricing, pipelines, air and water will be discussed and evaluated. 3C/3/0/0

BSLM 1510 Distribution Management
Designed to clarify and define the primary role of warehousing and logistics in today’s economy. This course includes inventory control, materials handling equipment, just-in-time productivity and quality control. 3C/3/0/0

BSLM 2420 Supply Chain Management
Supply chain management provides training in the areas of efficient administration and control of logistical components: transportation, inventory, packaging, warehousing and materials handling as well as customer service and their eventual integration into a logistics system. 4C/4/0/0

BSLM 2450 Purchasing Principles and Applications
The course covers the broad overview of the objectives of purchasing, its authority, responsibility, management function and its expectations. Students learn how and why the purchasing function has far reaching effects on a company’s profit or loss. Purchasing is a dynamic business function and is important in controlling costs in large dollar expenditures. The purchasing department deals with Production, Engineering, Marketing, Sales, Logistics, Stores, Inventory Control, Transportation, Quality Assurance and Finance. The primary objective of purchasing is to buy the right materials, of the right quality, in the right quantity, at the right time, at the right price, from the right source. 3C/3/0/0

BSLM 2491 Business Logistics Management Internship
Students who participate in an internship gain first-hand knowledge in the industry under the guidance of a faculty member and a worksite supervisor. Students must state their goals and planned outcomes to participate in an internship. (Prerequisite(s): Instructor approval) Variable 1–3 credits

BSLM 2497 Business Logistics Management Special Topics
The intent of this course is to allow flexibility in providing learning experiences to meet a special need of the student, the major program and the College. (Prerequisite(s): Instructor approval) Variable 1–3 credits

Business Technology

BTEC 1400 Keyboarding
Covers “Touch Keyboarding” skill development on a computer keyboard. A variety of drills will be used to develop speed and accuracy of keyboarding skills. 2C/1/1/0

BTEC 1401 Skillbuilding for Keyboarding
Designed to increase keyboarding speed and improve keyboarding accuracy through personal goal setting, error analysis and intensive corrective practice work. Students must know how to key using the “touch” method. 2C/1/1/0

BTEC 1410 Advanced Keyboarding Applications
Covers continued development of keyboarding speed and accuracy and proofreading skills. Students will develop skill in formatting and production of the following documents, memos, letters, envelopes, tables, and reports. Students will be tested on the first day of class to determine two requirements: 1. Accurate keyboarding speed of 30 wpm, and 2. Using the touch method. 3C/3/0/0

BTEC 1418 Computer Fundamentals
This course covers introductory information about computer hardware and software, disk maintenance that includes working with folders and files and the use of the microcomputer as a productivity tool. Students will be given introductory training in Microsoft Windows, Microsoft Office (word processing, spreadsheets, graphs, database and presentation applications) and Internet usage. 3C/3/0/0

BTEC 1421 Business Information Applications 1
This is the first course in a series that teaches students how to use Microsoft Office software applications. Software covered includes Word, Excel, Access, and PowerPoint. By the end of this course, students will be skilled in the basic features of Microsoft Office. Students will create common business documents including letters, reports, tables, newsletters, Excel worksheets, Access databases, and PowerPoint graphic presentations. This course, BTEC 1423 Business Information Applications 2 and BTEC 2506 Business Information Applications 3, prepare the student for the Microsoft Certified Application Specialist certification exams. (Prerequisite(s): BTEC 1418 or knowledge of computers) 3C/0/3/0
BTEC 1423 Business Information Applications 2
This is the second course in a series that teaches students how to use Microsoft Office software applications. Software used includes Word, Excel, Access, and PowerPoint. By the end of this course, students will be skilled in the advanced features of Microsoft Office. Students will create advanced business documents including Word form letters, merged documents, and newsletters; Excel financial worksheets, amortization schedules, and data tables; advanced Access queries, multi-table forms, customized reports and switchboards; and advanced PowerPoint presentations. This course, BTEC 1421 Business Information Applications 1 and BTEC 2506 Business Information Applications 3, prepare the student for the Microsoft Certified Application Specialist certification exams. (Prerequisite(s): BTEC 1421) 4C/0/4/0

BTEC 1445 Business Communications
This course takes a practical and analytical approach to developing written and oral business communication skills. Students learn to analyze the audience and purpose of the communication, research and organize ideas, format and design written documents, and create oral presentations based on the subject matter and content. Students will learn to work cooperatively in groups and meetings. Applying the rules for proper grammar and punctuation will be incorporated throughout all projects. 3C/3/0/0

BTEC 1530 Communication Technology
This course covers current Microsoft software used in business communication. Topics in this class cover the fundamentals of Microsoft Outlook, Microsoft Expression Web, and Microsoft Publisher. Students will create messages, contact lists, manage calendars, create a simple Web site, create and design a newsletter, and produce a tri-fold brochure. Students entering this course are expected to have knowledge of Windows and mouse skills. 4C/0/4/0

BTEC 2410 Business Procedures
Covers topics that develop skill in performing typical office tasks: telephoning, mailing, filing, calendaring, meeting arrangements, travel arrangements, office equipment care, time management, document production, reprographics and creating reports and financial records. Through the use of interactive software and projects, the student will experience daily routines, make decisions, set priorities, deal with work pressures, develop interpersonal relationships and become aware of work quality and quantity requirements. 4C/4/0/0

BTEC 2506 Business Information Applications 3
This is the third course in a sequence that will explore expert level applications using Microsoft Office 2007 software. This course assumes students are familiar with the fundamental and advanced features of Microsoft Word, Excel, Access, and PowerPoint. Students demonstrate proficiency in Microsoft Office 2007 in preparation for the Microsoft Certified Applications Specialist certification. Students create expert level documents, worksheets, databases, and presentations suitable for the business environment; coursework, and personal use. (Prerequisites(s): BTEC 1421 and BTEC 1423) 4C/0/4/0

BTEC 2550 Emerging Business Technologies
This course explores emerging business technologies and their connection to business processes. The course includes discussions of social, legal, and ethical issues, in the business environment. Students will explore their role and responsibilities to the environment, and society, to ensure that productivity and technology are appropriately managed. 4C/0/4/0

BTEC 2590 Business Technology Internship
A cooperative work-study program between Saint Paul College Business Technology programs and a business facility. This course allows the student to experience a closely supervised job situation that is related to the program. (Prerequisite(s): Instructor approval) Variable 2-8 credits

Cabinetmaking

CABT 1410 Blueprint Reading for Cabinetmaking
Introduces the student to: blueprint reading, building trade drawings, architectural graphics, and symbols used in the trade, as well as an understanding of what a drafting person does. 3C/2/1/0

CABT 1415 Wood Technology
This course will introduce students to the materials and finishes used in cabinetmaking. Students will learn to identify hardwoods and softwoods along with manufactured panel products, and the grading of these products. Students will also learn about abrasives, adhesives, fasteners, and clamping devices. The second half of this course will cover the types of finishes used in cabinetmaking and how they are applied. 3C/1/2/0

CABT 1420 Cabinet Shop Safety
This course will introduce the students to shop safety, identification, care and use of hand tool, and portable power tools. The course offers safety demonstrations on all power equipment and safety tests are performed on each machine. Basic knowledge of power tools and hand tools is required. 3C/1/2/0

CABT 1430 Framed Cabinetry
This course introduces the student to faceframe base and upper cabinetry. Students will learn the design, planning, and construction processes of building faceframe cabinets. The student will then apply these techniques by building a project. 4C/1/3/0

CABT 1511 Shaper Technology
This course will instruct the student how to safely set up and operate a shaper. Different operations, techniques, and types of cutters are covered. Students will learn to calculate and machine parts for raised panel doors, and also how to make moldings on the shaper. Projects will include making raised panel doors and moldings. 3C/1/2/0

CABT 2410 Laminates and Countertops
This course introduces students to laminates/veneers and the tools used for laminating, then covers laminate countertops. Students will learn to measure, order material, layout, and fabricate laminate countertops. Solid surface, stone products, and other types of countertops are also covered. Various projects will give the students hands-on experience. 4C/1/3/0

CABT 2430 Edgebanding and Boring Machines
This course covers the theory and operations of edgebanders and boring machines. The student will learn how to safely set up and operate the machines for various applications. Machine maintenance and tooling is covered. A series of projects will give the students hands-on experience. 4C/1/3/0
CABT 2440 Frameless Cabinetry
This course introduces the students to frameless cabinetry which is also known as European cabinetry, or 32mm cabinetry. Hardware used in frameless cabinets will be covered and then students will learn design, layout, and build frameless cabinets using the boring machines and edgebanders. Commercial fixtures used in retail will also be covered in this course. The students will build both a base and an upper utility cabinet using the techniques learned. 4C/1/3/0

CABT 2510 CAD/CAM/CNC
This course will introduce the students to computer operated machinery. The student will learn to layout and draw projects using the computers, apply tool paths for various operations, and set up a CNC router to perform operations. 4C/2/2/0

CABT 2550 AutoCad 1 for Cabinetmaking
This course introduces students to the basic tools of AutoCad. Students will create scaled drawings, modify existing drawings, learn print layouts, apply text, and dimension drawings using AutoCad 2007 in a computer lab setting. 3C/2/1/0

CABT 2700 Cabinetmaking - Open Lab
This course is for students with prior experience with woodworking terminology and shop safety; students wanting to upgrade their skills and knowledge to help them in the Cabinetmaking industry. The student must be able to demonstrate the use of hand tools and portable power equipment. The student must meet with the instructor to see whether the student has the correct criteria to be in the Cabinetmaking area. New students must meet with the instructor prior to registering for the class. Variable 1-2 Credits

Carpentry

CARP 1410 Project Estimating
Review basic arithmetic, algebra and geometry as it relates to carpentry. Students will learn construction terminology and estimate building costs. 3C/3/0/0

CARP 1420 Construction Blueprint Reading
Covers reading and interpreting blueprints used in the construction industry. Lines, abbreviations, symbols, parts of the blueprints, specifications and isometric drawings will be included in this class. 2C/2/0/0

CARP 1430 Introduction to Carpenter & Hand Tools
Learn to make drawings and sketches used in construction and learn to use basic carpentry hand tools. (Prerequisite(s): Concurrent enrollment in CARP 1420) 3C/1/2/0

CARP 1510 Intermediate Carpentry
Safety, job site working conditions and trade requirements, construction materials, building codes and residential construction concepts are included in this class. (Prerequisite(s): CARP 1410, CARP 1420, & CARP 1430) 5C/4/1/0

CARP 1521 Building Technology
Covers practice on the safe use of portable power tools and stationary shop equipment. Students gain familiarity with materials used in the construction industry and procedures used in the erection of residential and light commercial buildings. (Prerequisite(s): Concurrent enrollment in CARP 1510) 5C/2/0/5/0

CARP 1522 Power Tool & Shop Procedures
Continuation of CARP 1521. Includes practice on the safe use of portable power tools and stationary shop equipment. Students gain familiarity with materials used in the construction industry and procedures used in the erection of residential and light commercial buildings. (Prerequisite(s): Concurrent enrollment in CARP 1510) 5C/3/2/0

CARP 2410 Advanced Carpentry
Covers the methods and features of the instruments used by carpenters in laying out buildings. Cabinet installation, job seeking, soil types and excavations, properties of concrete and equipment and procedures used in the erection of commercial construction projects are included in this class. (Prerequisite(s): CARP 1510, CARP 1521, CARP 1522) 6C/4/2/0

CARP 2421 Fieldwork and Carpentry Procedures
Provides hands-on experience with the optic and electronic instruments used in laying out buildings. Erect scaffold systems and concrete forming systems used on commercial building projects. (Prerequisite(s): Concurrent enrollment in CARP 2410) 5C/1/4/0

CARP 2422 Carpenter Concrete Technology and Installation
Continuation of CARP 2421. Get hands-on experience with the optic and electronic instruments used in laying out buildings. Erect scaffold systems and concrete forming systems used on commercial building projects. (Prerequisite(s): Concurrent enrollment in CARP 2421) 5C/1/4/0

Chemistry

CHEM 1700 Chemistry Concepts
This laboratory science course covers the basic concepts of chemistry. Topics include measurements and calculations used in chemistry; the general properties of chemicals; physical characteristics of matter, atoms and elements; basics of chemical bonding; chemical equations and their uses; gases, liquids and solids, solutions and acids and bases. The course relates chemistry concepts to applications in everyday life. The course is intended for students who have not had a high school chemistry course. (Prerequisite(s): MATH 1510 Introductory Algebra with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 3) 4C/3/1/0

CHEM 1701 Chemical Technology Seminar
This course introduces students to the field of Chemical Technology and the role of the Chemical Laboratory Technicians. The course includes a description of the program of study, expectations, and responsibilities. As part of the course, students explore Chemistry Technology job opportunities and visit chemical laboratories. Students will also evaluate their own aptitudes and interests relevant to career opportunities and outline the career pathway to becoming a Chemical Laboratory Technician. 1C/1/0/0
CHEM 1711 Principles of Chemistry 1
This course uses the scientific method to study matter, what matter is comprised of and how matter changes. Basic chemical theory and applications are covered with an emphasis on the principles and theories of atomic and molecular structure, periodic properties of elements; thermochemistry, reaction stoichiometry; behavior of gases, liquids and solids; molecular and ionic structure and bonding; organic chemistry and polymers; energy sources and environmental issues related to energy use. The lab component includes the application of chemical concepts through observation, data collection, quantitative measurement and problem analysis. Approved safety goggles are required. (Prerequisite(s): MATH 1520 Intermediate Algebra with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 3) 4C/3/1/0

CHEM 1712 Principles of Chemistry 2
This course is a continuation of CHEM 1711 Principles of Chemistry 1 with an emphasis on chemical kinetics; radioactive decay; chemical equilibrium; solutions; acids and bases; solubility; second law of thermodynamics; electrochemistry and corrosion; descriptive chemistry of the elements; coordination chemistry; biochemistry; and applications of chemical principles to environmental problems. The lab component of this course provides students with the opportunity to apply chemical concepts through observation, data collection, quantitative measurement and problem analysis. Approved safety goggles are required. (Prerequisite(s): CHEM 1711 with a grade of “C” or better) (MnTC: Goal 3) 4C/3/1/0

CHEM 1760 Chemical Technology Laboratory Skills and Instrumentation
This course covers basic operating principles of laboratory instrumentation and the techniques and documentation required for troubleshooting analytical instrumentation in an industrial setting. It covers the systematic approach to the diagnosis of instrument failure, repair, maintenance procedures, hands-on practice servicing instruments, and documentation of maintenance and repair of laboratory equipment. (Prerequisite(s): CHEM 1711 with a grade of “C” or better) 3C/3/0/0

CHEM 1761 Chemical Technology Lab Safety, Environmental Rules and Regulations
This course covers policies, procedures, laboratory equipment, personal protective equipment and work practices that protect laboratory personnel in chemical laboratories. Emergency procedures, use of material safety data sheets, chemical hazards, chemical handling, and safe personal work practices are also reviewed. The course presents an overview of federal and state environmental regulations and agency rules that regulate chemical laboratory operations and the storage and disposal of chemicals according to the Environmental Protection Agency. (Prerequisite(s): CHEM 1711 with a grade of “C” or better) 3C/3/0/0

CHEM 1770 Chemical Technology Laboratory Internship and Advanced Seminar
This course provides students with an opportunity to design and carry out a science research project under the supervision of a faculty advisor. The research project will be prepared using literature review, problem identification, procedural documentation, data collection, data analysis, findings, conclusions, and recommendations. Evaluation will be carried out by faculty teams and experts in the field. The course will also provide an opportunity for field study in an approved internship setting. (Prerequisite(s): CHEM 1711 with a grade of “C” or better) 3C/3/0/0

CHEM 2711 Organic Chemistry 1
This course is an introduction to organic chemistry. Topics include an overview of covalent bonding, acid-base chemistry, and reaction energetics. The course also covers an introduction to organic functional groups, stereochemistry, and substitution reactions. The laboratory activities include an introduction to laboratory techniques used in organic chemistry synthesis, and the use of chromatography and spectroscopy in the analysis of organic compounds. Three hours of lab per week are required. (Prerequisite(s): CHEM 1712 with a grade of “C” or better) (MnTC: Goal 3) 4C/3/1/0

CHEM 2712 Organic Chemistry 2
This course is a continuation of CHEM 2711 Organic Chemistry 1, and while the focus of CHEM 2711 was in structure, the focus of CHEM 2712 is reactivity. Topics include the reactivity of alkenes, alkynes, alcohols, amines, ketones, aldehydes, carboxylic acids, and their derivatives based on their structures. Reaction types studied include electrophilic aromatic substitution, nucleophilic aromatic substitution, nucleophilic addition and substitution at carbonyl groups, and reactions at the alpha carbon of carbonyl compounds. The course also includes application of organic chemistry related to polymers, natural products, and photochemistry. The laboratory activities cover reactions and the chemical and instructional identification of organic compounds. Three hours of lab per week are required. (Prerequisite(s): CHEM 2711 with a grade of “C” or better) (MnTC: Goal 3) 4C/3/1/0

Child Development

CHDV 1200 Professional Relations in Early Childhood Careers
Explores career opportunities for working with children and investigates a variety of child development programs. This course also examines job requirements, duties, regulations and issues, skills and personal characteristics for becoming successful professionals in early childhood settings. 3C/3/0/0

CHDV 1210 Foundations of Child Development
Provides an overview of typical and atypical child development across cultures, from prenatal through school age including physical, social, emotional, language, cognitive, aesthetic and identity/individual development. It integrates developmental theory with appropriate practices in a variety of early childhood care and education settings. 3C/2/1/0

CHDV 1220 Child Safety, Health & Nutrition
Guides the student in obtaining skills needed to establish and maintain a physically and psychologically safe and healthy learning environment for young children. Topics include preventing illness and accidents, handling emergencies, providing health, safety and nutritional educational experiences, meeting children’s basic nutritional needs, child abuse and current health-related issues. THIS COURSE DOES NOT INCLUDE CPR OR FIRST AID CERTIFICATION. 4C/3/1/0

CHDV 1230 Guidance in the Early Childhood Environment
Provides an exploration of the physical and social environments that promote learning and development for young children. It includes an introduction to basic child guidance techniques for individual and group situations. Emphasis is on problem
prevention and positive guidance strategies: recognition, communication, limit setting, problem solving and behavior modification. Students apply their knowledge of the environment’s role in an actual work setting. 4C/3/1/0

CHDV 1310 Infant & Toddler Development & Learning
Provides an overview of infant and toddler theory and development in home or center-based settings. Students will integrate knowledge of developmental needs, developmentally appropriate environments, effective caregiving, teaching strategies and observation methods. (Prerequisite(s): CHDV 1210 and must be accepted as CHDV major.) 4C/3/1/0

CHDV 1312 Preschool Development & Learning
Provides an overview of pre-school theory and development in home or center-based settings. Students will integrate knowledge of developmental needs, developmentally appropriate environments, effective caregiving, teaching strategies and observation methods. (Prerequisite(s): CHDV 1210 and must be accepted as CHDV major.) 4C/3/1/0

CHDV 1314 School Age Development & Learning
Provides an overview of school-age theory and development in home or center-based settings. Students will integrate knowledge of developmental needs, developmentally appropriate environments, effective caregiving, teaching strategies and observation methods. (Prerequisite(s): CHDV 1210 and must be accepted as CHDV major.) 4C/3/1/0

CHDV 1316 Mixed Age Development & Learning
Provides an overview of mixed-age theory and development in home or center-based settings. Students will integrate knowledge of developmental needs, developmentally appropriate environments, effective caregiving, teaching strategies and observation methods. (Prerequisite(s): CHDV 1210 and must be accepted as CHDV major.) 4C/3/1/0

CHDV 1340 Planning & Implementing Curriculum
Examines the role of the teacher in early childhood settings. It applies the knowledge of child development as it relates to individual children, communities, curriculum and communication activities. (Prerequisite(s): CHDV 1210, CHDV 1230 and must be accepted as CHDV major.) 3C/3/0/0

CHDV 1910 Internship 1
Provides an opportunity to apply knowledge and skill in an actual child development setting. Students will observe and assess children’s behavior; facilitate free play; implement adult-directed learning experiences; and maintain professional relationships. (Prerequisite(s): CHDV 1340, instructor approval and must be accepted as CHDV major) 4C/1/0/3

CHDV 1940 Internship 2
Provides an opportunity to review and demonstrate competence in skills required in Internship 1. Students may choose to apply knowledge and skill in a special child development setting. Students work with an instructor to identify specific course goals and to select an internship site. (Prerequisite(s): Instructor approval and must be accepted as CHDV major) Variable 1-3 credits

CHDV 2320 Profiles of the Exceptional Child
Provides an overview of development and learning experiences for children with special needs in integrated child development settings. Students integrate knowledge of developmental needs, developmentally appropriate environments and effective teaching methods. (Prerequisite(s): CHDV 1210) 3C/2/1/0

CHDV 2500 Shadow Study
Provides an opportunity to shadow a master teacher in a child development setting. Course goals are based on individual need. Emphasis may include observation of various child development settings, adult-child interaction, or the role of a caregiver. (Prerequisite(s): Instructor approval) 1C/0/0/1

CHDV 2520 Peaceful Classroom
Provides an overview of the effects of violence on the development and the behavior of young children. Students explore elements to be incorporated into a Peaceful Classroom. Students identify behavioral intervention strategies to address challenging behaviors and create activities to foster peacemaking skills in children. 3C/3/0/0

CHDV 2530 Challenging Children: Behavior Management Strategies
Helps students understand children’s behavior problems and identify intervention strategies to prevent and resolve problem behavior, use behavior modification techniques effectively and design behavior plans. (Prerequisite(s): CHDV 1230) 3C/3/0/0

CHDV 2540 Sensory/Motor Learning Experiences
Provides an overview of sensory and motor learning experiences. Students integrate knowledge of child development, learning environments and teaching methods to promote perception, sensory development, gross motor, fine motor and self care development. 3C/3/0/0

CHDV 2550 Cognitive/Multimedia Learning Experiences
Provides an overview of cognitive and multimedia learning experiences in either home or center-based settings. Students integrate knowledge of child development, learning environments and teaching methods to promote curiosity, attention, perception, memory, problem solving, logical thinking and media literacy. 3C/3/0/0

CHDV 2560 Language & Literature Learning Experiences
Provides an overview of language learning experiences in early childhood settings and a detailed study of literature experiences. Students will integrate knowledge of children’s language development, learning environments and teaching strategies to select, plan, present and evaluate literature experiences to children of different abilities and diverse backgrounds. 3C/3/0/0

CHDV 2570 Multi-Cultural Learning Experiences
Provides a general overview of multi-cultural education in child development settings. Students will examine the major approaches to multi-cultural early childhood education, steps to implement multi-cultural curriculum, developmentally appropriate learning experiences, curriculum themes, holidays and celebrations and communication strategies. 3C/3/0/0

CHDV 2577 Early Childhood Education – Special Settings/ASL
This course provides exposure to Deaf Studies/Culture and common signs for the Early Childhood Educator. 2C/2/0/0

CHDV 2580 Creative Development Learning Experiences
Provides an overview of creative/aesthetic learning experiences in either home or center-based settings. Students integrate knowledge of child development, learning environments and teaching methods to promote children's artistic, musical, movement and dramatic abilities. 3C/3/0/0
CHDV 2590 Social-Emotional Learning Experiences
Provides an overview of social and emotional learning experiences. Students integrate knowledge of child development, learning environments and teaching methods to promote emotional development, self-concept, self esteem, social skills, diversity awareness and social studies. 3C/3/0/0

CHDV 2597 Special Topics
Intent of this course is to allow flexibility in providing learning experiences to meet a special need of the student, the major program and the College. (Prerequisite(s): Instructor approval) Variable 1–4 credits

CHDV 2599 Internship (in a special setting)
Provides an opportunity to apply knowledge and skill in an actual child development setting. Students will observe and assess children’s behavior; facilitate free play; implement adult-directed learning experiences; and maintain professional relationships. (Prerequisite(s): Completion of all CHDV ASL courses and Instructor approval.) 4C/1/0/3

CHDV 2600 Professional Leadership
Prepares students to take an active/advocate role in the child development profession by examining the history, current trends and future of child care and early childhood education. (Prerequisite(s): CHDV 1200 and must be accepted as CHDV major.) 3C/3/0/0

CHDV 2610 Practicum
Provides an opportunity to apply knowledge and skill in an early childhood setting. Students implement a variety of learning experiences that are developmentally appropriate for and culturally sensitive to a specific age and group of children. (Prerequisite(s): CHDV 2640, CHDV 1910, instructor approval and must be accepted as CHDV major) 3C/0/0/3

CHDV 2640 Program Planning
Provides an advanced level of exploration of program management skills for teachers of young children. Emphasis is on organizing, implementing, and evaluating a quality, comprehensive early childhood program plan. (Prerequisite(s): CHDV 1340 and must be accepted as CHDV major.) 3C/3/0/0

CHDV 2800 Child Development Administration
A course for directors, coordinators, or lead teachers in child development programs that provides an overview of managing a child development organization with emphasis on facilities, health and safety, risk management, record keeping, marketing and administrative styles. (Prerequisite(s): Child Development Careers Diploma and instructor approval) 3C/3/0/0

CHDV 2820 Child Development Financial Management
Provides students interested in child development administration with an introduction to budgeting, financial management and financial record keeping in child development programs. Specific topics include: start-up costs, determining utilization rates, setting/collaborating parent fees, identifying break-even points, preparing financial statements and fundraising. (Prerequisite(s): Child Development Careers Diploma and instructor approval) 3C/2/1/0

CHDV 2840 Child Development Staffing & Supervision
Offers students an opportunity to develop advanced level skills in hiring, training, evaluating, coordinating and supervising staff in child development settings. (Prerequisite(s): Child Development Careers Diploma and instructor approval) 3C/2/1/0

CHDV 2860 Advanced Internship-Administration of Child Development Setting
Provides an opportunity for advanced-level child-development professionals to apply knowledge and skill in the administration of a child development setting. (Prerequisite(s): Child Development Careers Diploma and instructor approval) 1C/0/0/1

College & Career Planning Success Strategies

CSCR 0750 Career Planning-Looking Beyond High School
This course provides the participant with information about technical training, 2-year colleges, 4-year colleges, financial aid, admissions and considerations to be made when choosing post-secondary training and education. The participant will become aware of program and training requirements through the use of career search systems, career resource materials, Internet use and informational interviewing. Participants will get to know themselves better through the use of aptitude and interest assessments. This course is offered through Saint Paul Connections. 1C/1/0/0

CSCR 1401 College Success Strategies-First Year Experience
This course focuses on skills needed to survive and thrive in the collegiate environment and beyond. Students will develop skills in academic planning; accessing college resources; maintaining physical, mental, and emotional health; personal financial planning; building relationships; and participating in community and college activities via service learning. 1C/1/0/0

CSCR 1402 Study Skills for Success Strategies
This course focuses on the development of effective learning strategies for college success. Students will develop skills on strategies such as time management and organization, note-taking, textbook reading, test taking, critical thinking. Students will also gain an understanding of their personal learning styles and utilize effective study strategies based on their styles. 1C/1/0/0

CSCR 1403 Choosing Your Career Path
This course focuses on the career planning and decision-making process. Students will acquire skills in identifying potential career areas based on personal assessments and in utilizing career decision-making and goal setting strategies to determine a career choice. Students will utilize various career resources, such as online sites, to assist in the decision-making planning process. 1C/1/0/0

CSCR 1404 College and Information Literacy
This course focuses on developing information and college literacy skills. Students will develop knowledge and skills in accessing, retrieving, appropriately citing, and critically evaluating information in various formats. Students will build skills in basic computer usage, efolio, and online learning. Students will prepare a preliminary research project and presentation. (Prerequisite(s): Grade of “C” or better in READ 0720 or appropriate assessment score) 1C/1/0/0

CSCR 1405 College Success Strategies and Career Resources
This course is designed to help students succeed in college and develop career planning skills. Students will learn to study more effectively. Focused topics will include time management, study strategies, note-taking, test-taking, mnemonic devices and college resources. Also, students will gain knowledge of career resources and the career planning process. 2C/2/0/0
COMM 1460 Applied Interpersonal Communications
This course provides an opportunity to improve communication with people at work or at home. The emphasis is placed on the practical and theoretical. Students develop an understanding of human needs, self-concept, perception and emotions. With respect for diversity, students study verbal and non-verbal messages, language, listening, dimensions of interpersonal relationships, relationship building and conflict resolution. 3C/3/0/0

COMM 1485 Employment Portfolio Development and Presentation
In this course, students will produce an employment portfolio demonstrating their skills, knowledge and abilities. Students will compile representative documents and materials that illustrate the quality and quantity of their accomplishments and the development of global and technical skills. They will also learn how to present the portfolio and practice interview situations. 2C/1/1/0

COMM 1510 Customer & Occupational Relations
The student is introduced to and given practical human relations skills. Skills in listening, improving self concept, assertiveness, sensitivity to cultural diversity and climate setting are included. The course emphasizes positive interpersonal communication strategies and styles involved in healthy interactions with customers and co-workers. 3C/3/0/0

CSCI 1400 Introduction to Microcomputers
This course is an introductory course intended to give beginning students an understanding of microcomputers. Microcomputer concepts and applications will be covered. The concepts presented will help a student learn how the microcomputer works. Students will learn current hardware configurations and software such as business applications through hands-on use of the computer. The course is designed to bring students up to speed quickly in the use of information technology while providing an in-depth understanding of how the technology is implemented. The course is not intended for CSCI majors. 3C/3/0/0

CSCI 1403 Operating System Development Platforms
This course provides students with an overview of the Operating System. It provides a hands-on experience installing and configuring the operating system using a removable hard drive. It introduces and reviews the major functionality and tools within the operating system. 2C/2/0/0

CSCI 1405 Fundamentals of Computer Programming in Java
This course is designed for the student with no formal background in computer programming. The course is taught using the Java programming language and students are coached through a series of elementary programming problems. Various computer algorithms are taught at the introductory level and no advanced preparation in mathematics is required. The course is ideal for the student who is not a computer professional and is interested in a gradual introduction to programming. 4C/4/0/0

CSCI 1410 Computer Science and Information Systems
Designed to introduce Computer Information Systems to students in the fields of computer science and information science. The course will cover the basic architecture and design of digital computers and the software that runs on them. Special emphasis will be placed on the technical aspects of the field of computer science and a significant amount of time will be spent developing a sound analytical understanding of the field. Topics such as machine architecture, binary arithmetic, algorithm development, data structures, file organization, database design, systems analysis, data communication and systems software will be covered. Students must have a sound preparation in mathematics through basic algebra. 4C/4/0/0

CSCI 1423 Computer Networking 1 - Client
This course provides an in-depth review of installing, configuring, administrating, optimizing and troubleshooting the Windows XP Operating System. The class material encompasses the body of knowledge as outlined for the Microsoft Certified System Administrator (MCSA) client operating system exam. 4C/4/0/0

CSCI 1440 Networking Fundamentals
The course provides an introduction to networking technologies. This course covers a wide range of material about networking, from local area networks, wide area networks, protocols, topologies, transmission media and security. It not only introduces a variety of concepts, but also discusses in-depth the most significant aspects of networking, such as the TCP/IP protocol suite. In addition to explaining concepts, the course uses a multitude of real world examples of networking issues from a professional’s standpoint, making it a practical preparation for the real world. 4C/4/0/0

CSCI 1450 Web Fundamentals/HTML
This course provides students with a thorough grounding in the World Wide Web, a fundamental knowledge of HTML and a basic understanding of Internet technical architectures. Students learn about search engines, Web servers, scripting, protocols, ISPs and other Internet technologies. Technical architecture topics include the study of networks, Internet protocols, Internet servers, firewalls, security and general issues in conducting commerce. Students will design and program HTML Web pages, tutorials and publish a Web site project. 4C/4/0/0

CSCI 1470 Web Design
This course explores the principles of Web design theory and practice. Concepts related to the look and feel of the client-side of the World Wide Web are emphasized. Topics include the design of a graphical user interface, site content, organization and navigation, with emphasis on the human interface. Also included are Web “usability” issues. Color palettes, font selection and use of animation are discussed. The use of HTML layout concepts and software such as Photoshop and Dreamweaver are introduced. (Prerequisite(s): Students enrolling in this course will benefit from prior experience with HTML and a thorough exposure to the Internet.) 4C/4/0/0

CSCI 1521 Structures of Computer Programming 1
This course offers an introduction to the fundamental principles of programming and to different programming paradigms. Programming students will develop reasoning and abstraction skills needed for designing algorithms and programs. The course is taught using Java so some previous exposure to programming would be beneficial to students. 4C/4/0/0
CSCI 1522 Structures of Computer Programming 2
This course offers an introduction to object-oriented programming and data structures using the Java programming language. Special emphasis will be placed on object-oriented programming and design using UML. Programming students will develop reasoning and abstraction skills to support object-oriented development. (Prerequisite(s): CSCI 1521) 4C/4/0/0

CSCI 1531 C/C++ Programming 1
This is a rigorous first course in C++. The course first covers some basic material like input and output in C++, the Boolean data type, default arguments, reference variables, function overloading, namespaces, type safe linkage and new and delete. The course then covers, in great detail, classes, derived classes and virtual functions. Students should expect to spend at least 8 hours per week per class session on review and homework. (Prerequisite(s): The student is assumed to have a working knowledge of C, including pointers, structures and dynamic memory allocation) 4C/4/0/0

CSCI 1532 C/C++ Programming 2
This is a rigorous second course in C++. The course covers exception handling in C++, templates, the Standard Template Library (STL) and I/OStreams. Students should expect to spend at least 8 hours per week per class session on review and homework. (Prerequisite(s): The student is assumed to have a knowledge of C++, including classes, derived classes and virtual functions) 4C/4/0/0

CSCI 1541 Java Programming 1
This course covers the syntax of the Java programming language; object-oriented programming with the Java programming language; creating graphical user interfaces (GUIs), exceptions, file input/output (I/O), threads and networking. Programmers familiar with object-oriented concepts can learn how to develop Java applications. This course is based on the Sun Certified Programmer for the Java 2 Platform 1.4. 4C/4/0/0

CSCI 1542 Java Programming 2
This course provides students with first-hand experience using object-oriented analysis and design and Java to create a distributed, multi-tier application. Students use graphical user interface (GUI) design principles and network-communications capabilities to code a functional Java application that interacts with a networked database server. This course is based on the Sun Certified Developer for the Java 2 platform examination. Students should have had a previous course in Java programming prior to this course. 4C/4/0/0

CSCI 1550 Database Management Fundamentals
This course serves as a general introduction to the field of Database Management. The course emphasizes database management fundamentals. It is organized around the database development life cycle and the subject matter of the course is presented in life cycle order. Conceptual design, logical design, physical design and the final implementation are covered in detail. The relational database model is studied in depth and other models such as the network and object models are introduced. Oracle is used as the implementation database management system. Students enrolling in this course must have knowledge of computer software and hardware. 4C/4/0/0

CSCI 1551 Introduction to Oracle
This course is an introductory course in Oracle Database Server. The Oracle Database Server architecture is introduced along with basic administration tasks such as starting and stopping an instance, creating and managing an instance and installing Oracle. Oracle SQL syntax is also introduced including basic statements, subqueries and controlling user access. Oracle educational materials are used and both Oracle SQL and basic Oracle administration topics are covered in the course. This course is the preparation course for students wishing to pursue further classes on Oracle Database Server Administration or Oracle Database Server Development. This course is a prerequisite for the follow-on courses. Database management fundamentals or equivalent experience is strongly recommended as a prerequisite for this course. 4C/4/0/0

CSCI 1552 Oracle Database Development
This course offers students an extensive introduction to Oracle development using SQL and PL/SQL programming language. Topics discussed include PL/SQL variables and data types, PL/SQL block syntax and guidelines, control structures, PL/SQL cursors, exception handling, Oracle stored procedures and functions, Oracle triggers and Oracle packages. Oracle educational materials are used and both Introduction to Oracle SQL & PL/SQL and Develop PL/SQL Program Units certification exam topics are covered in the class. It is recommended that students taking this course have taken CSCI 1551 or its equivalent. 4C/4/0/0

CSCI 1554 Oracle Database Administration
This course is designed to prepare the student to administer the Oracle database management system. Operation and maintenance of the Oracle database management system is stressed in this course. The course is based on extensive Oracle-based exercises emphasizing a hands-on approach. The course is organized around the Oracle Corporation requirements for certification as an Oracle Certified administrator. Oracle educational materials are used and students should plan to prepare to take the first two administration examinations in the Oracle Certified Professional Track. It is recommended that students taking this course have taken CSCI 1551 or its equivalent. 4C/4/0/0

CSCI 1555 Oracle Database Development—UML
This course presents key concepts and methodologies required to perform object-oriented software engineering. The class focuses on the high-level front-end conceptual processes of analysis and design that lower development costs and reduce time-to-market. Students use several methods for analyzing software systems, finding and refining useful classes and relationships between objects. The Unified Modeling Language (UML) is presented in detail and is used in the exercises and case studies. Practical aspects of project management and implementation are presented from the perspective of experienced object system designers. Students will be introduced to several analysis and design tools. It is recommended that students taking this course have taken CSCI 1552 or its equivalent. 4C/4/0/0

CSCI 1562 C#.Net Programming
This is a course in building Windows applications for the desktop using C#.Net. Students will learn how to write, compile, debug, and deploy Windows programs using Microsoft Visual Studio-C# for the .Net Framework. Wizard techniques will be explained. Students will learn to write C# programs that respond to events with .Net event handling. This course will cover topics included on several Microsoft certification exams, such as building Windows Applications using C#. Students entering this course are expected to have taken Introduction to .Net or have equivalent exposure to the .Net Framework. 4C/4/0/0
CSCI 1568 PHP and MySQL Programming
This course explores the PHP server-side scripting language and the MySQL DBMS. These technologies are used in a niche Web Development market because they are open-source and license free. Students will learn why both of these free products are supported by enthusiastic communities of architects, programmers and designers. (Prerequisite(s): Students should be proficient with HTML and have experience with other Web technologies) 4C/4/0/0

CSCI 2410 Management Information Systems
This course provides elementary concepts to the management of information systems. The course is designed to allow the student of management information systems to evaluate, design and implement information processing systems that support the business enterprise. The purpose of the course is to understand the underlying principles of information systems from the business perspective for different management functions. 3C/3/0/0

CSCI 2420 Computer Security
This course is an introduction to computer security. The course covers the breadth of the field of cyber crime and security. Topics include workstation, network and Internet level security strategies, security assessment and audit, securing a system, encryption, malware, etc. The course is conducted in a lecture format with reinforcing “hands-on” laboratory experiences. It is recommended that students taking this course have taken CIST 2451 Microsoft Server 1 or have equivalent knowledge/experience. 4C/4/0/0

CSCI 2430 Information Systems Project Management
This course is an introduction to information systems project management. The course emphasizes the relationship of project management techniques to the software development lifecycle model. Project management processes for initiating, planning, executing and closing down information technology projects are covered. Specific techniques covered include work breakdown schedules, network diagrams, PERT estimating, resource scheduling, resource leveling, risk identification, contingency planning and other skills. Each student will conduct a series of case studies using Microsoft Project as project management tools. 4C/4/0/0

CSCI 2438 JavaScript
This course teaches in-depth JavaScript language syntax, programming concepts and object framework. Emphasis includes “hands-on” learning through several in-class examples and student assignments. The course covers advanced Web page and Web application development, dynamic HTML, form validation and processing, cookies and servlet communication. (Prerequisite(s): Students enrolling in this course should have a knowledge of HTML 4.01 and prior experience developing Web pages) 2C/2/0/0

CSCI 2440 Internet Programming 1 – Client Side
This course covers the skills needed to create dynamic, client-side web pages. Beginning with a refresher of HTML 4.01 and web page design, the course examines XHTML 1.0 and the separation of style and structure, supported by CSS (Cascading Style Sheets). Students work with client-side JavaScript, Dynamic HTML (DHTML), the DOM (Document Object Model) and selected advanced topics. Class sessions include hands-on work and lectures, highlighted by the completion of a capstone project in which student teams develop a Web site for a “real-life” client. (Prerequisite(s): Students should be able to demonstrate a working knowledge of HTML 4.01 with some prior Web Development experience.) 4C/4/0/0

CSCI 2442 Internet Programming 2 – Server Side
This course is designed for students interested in developing the server-side skills needed to create dynamic, data-driven Internet and e-commerce sites. The course begins by examining forms and events used to collect and retain data. It then moves into writing functions to validate user-input in response to events. The focus is on server-side issues, with emphasis on using Active Server Page (ASP) technology, VBScript and ADO (ActiveX Data Objects) to render dynamic, data-driven pages. In particular, students learn how to use the ASP object model, including the Application, Session, Response and Request objects. (Prerequisite(s): Students should know HTML and have experience building Web sites prior to taking this class.) 4C/4/0/0

CSCI 2450 Advanced OOAD with UML and Rational Unified Process
This course is an advanced course in object oriented design and development with UML. This course assumes the student has prior exposure to UML modeling either by prior coursework or experience. The course focuses on the use of the Rational tool set with particular emphasis being given to the use of the Rational Rose product and its relation to the Rational Unified process. Both are reviewed in detail. It is recommended that students taking this course have taken CSCI 1560 or its equivalent. 4C/4/0/0

CSCI 2451 Computer Networking 2 – Server
The course provides students with an introduction to planning, installing, managing and troubleshooting a server in a domain network environment. This class encompasses the body of knowledge as outlined for the first core server exam required for the Microsoft Certified System Administrator (MCSA) certification. 4C/4/0/0

CSCI 2460 Discrete Structures of Computer Science
This course gives an introduction to computer implementation of standard techniques to represent and analyze computational objects. Emphasis of the course is on the application of common data structures such as bags, tuples, lists, strings, relations, graphs, tree traversal, searching and sorting. 4C/4/0/0

CSCI 2461 Computer Networking 3 – Linux/Unix
The course provides an in-depth first course in Linux and Linux Systems Administration. The course assumes the student has some knowledge of using the Linux GUI, the Linux command line and understands the fundamentals of networking. The material includes the body of knowledge outlined by LPI for their Level 1, Exam 101 certification. 4C/4/0/0
CSCI 2463 XML Programming
This course is designed to give the student both the theoretical foundation and hands-on skills required to begin using XML (eXtensible Markup Language). It begins by examining what XML is and what it can be used for. Early topics include elements and attributes, the use of namespaces, defining valid XML documents and the use of DTDs and Schemata to constrain XML, particularly as used in B2B (business-to-business) applications. Students learn about the DOM (Document Object Model), an object-oriented API for working with XML. XSLT (eXtensible Stylesheet Language for Transformations), Templates and Xpath are also covered. Advanced topics include XML and databases, SOAP (the Simple Object Access Protocol), the SAX (Simple API for XML) interface and others. (Prerequisite(s): Students should know HTML 4.01 and have prior experience building Web sites.) 4C/4/0/0

CSCI 2464 PEARL/CGI Programming
This course covers CGI and Perl programming. Topics include CGI fundamentals and resources, HTML and CGI form generator, installing and testing forms and scripts, DNS administration, CGI-based fax viewer, Web-based calendaring and scheduling and creation of a customer quote generator. 4C/4/0/0

CSCI 2465 Computer Networking 4 – Infrastructure
The material in this course includes the body of knowledge outlined for LPI for their Level 1, Exam 102 certification. Course material includes Linux kernel configuration, printing, documentation, scripting and networking services. The course assumes that the student has the background provided by CSCI 2461. 4C/4/0/0

CSCI 2466 J2EE-JSP and Servlets
This course introduces the Java programmer to servlets and JSP. It covers cookies, session tracking, JSP scripting elements, JavaBeans in JSP and custom tag libraries. The course attempts to teach the material in a very “hands-on” manner and there are significant programming assignments throughout. The course will include a review session for the Sun Java Web Component certification exam, time permitting. 4C/4/0/0

CSCI 2467 J2EE Application Development
This course provides an overview of the latest J2EE version architecture and an in-depth examination of some of the key technologies that make up J2EE. Students will develop an understanding of the purpose and significance of J2EE architecture and its advantages for building enterprise applications. The course will begin with a discussion of limitations and challenges of current enterprise computing. This will be followed by an examination of the features and necessary characteristics of large-scale enterprise computing such as scalability, fail over, deployment tools and session management. A review of the J2EE 1.3 specifications will be followed by an in-depth examination of Java Servlets, Java Server Pages and Enterprise JavaBeans. Java code will be examined to illustrate the techniques used to develop servlets, JSPs and EJBS. 4C/4/0/0

CSCI 2475 A+ Hardware/Operating System Preparation
The course provides an in-depth review of PC hardware, Operating Systems and the application software that they run. The material encompasses the body of knowledge outlined by CompTIA for their certification as an A+ computer technician. 4C/4/0/0

CSCI 2490 Introduction to Mac OS X
The course provides practical, hands-on experience in navigating the Mac OS X operating system, introduces many of the tools available within Mac OS X and explores basic LAN and Internet networking concepts using a Macintosh. Discussion and examples of how Macintosh applications are used in a business environment will be covered with particular emphasis on new features of Mac OS X and how it differs from previous Macintosh Operating Systems. 2C/2/0/0

CSCI 2560 Introduction to Computer Games
This course deals in an elementary and introductory manner with the design and creation of computer games. The course uses the Java language as a tool for developing relatively simple two dimensional computer games. Students will be expected to develop computer games from conception through implementation in this course. Game programming in this course will focus on “interactive” gaming rather than strategic gaming. Students are expected to have a familiarity with either C++ or Java programming or the ability to quickly master them before entering this course. The work for this course will include a variety of projects. Each project will be accompanied with an oral presentation. 4C/4/0/0

CSCI 2561 Computer Games Design and Implementation 1
This course deals with an introductory level study of the technology involved in the creation of computer games. Students will survey a variety of software technologies relevant to computer game design, including: programming languages, scripting languages, operating systems, file systems and multimedia design systems. The work for this course will include a variety of projects. All projects will require design activities and students will be expected to make use of existing programming tools. There will be 4 graded projects. Each project will be accompanied with an oral presentation. The final project will count for 40% of your grade. All projects will be done in teams. Students are expected to have proficiency with a higher level programming language such as C++ (preferred) or Java. 4C/4/0/0

CSCI 2562 Metaverse Based Computer Games
This course introduces the basic concepts of developing interactive computer games in a multi-user environment. Students will study the basic concepts of computer game architecture, design and programming. Using introductory concepts and simple programming languages, students will initially develop simple two-dimensional computer games and extend them to simple three-dimensional interactive games which utilize the basic algorithms and data structures used in creating two dimensional games. Students in this course should have a background in college mathematics and trigonometry. 4C/4/0/0

CSCI 2570 Machine Architecture and Organization
This is an introductory course on computer organization and computer systems. The course covers the detailed aspects of system software such as compilers, linkers and operating systems. The course also covers material on the basic components in modern computers such as processors, hierarchical memory systems and I/O peripherals. Students will develop proficiency in language C and assembly language in order to study the behavior of programs at this level. Students are expected to have a mathematical background which includes College Algebra and preferably Calculus. (Prerequisite(s): CSCI 1410 and experience with a high-level computer language) 4C/4/0/0
CSCI 2580 Introduction to Numerical Computing
This is an introduction to numerical algorithms for computer scientists. It covers topics which review the computer programming implementation of basic numerical analysis techniques such as the effect of finite precision arithmetic and the basic numerical methods, such as root finding, the solution of linear systems of equations and the solution of ordinary differential equations. (Prerequisite(s): MATH 2752 and experience with a high-level computer language) 4C/4/0/0

CSCI 2605 Web 2.0 Technologies
This course is an overview of the phenomena of Web 2.0. It reviews many of the technologies which make up Web 2.0. The course covers blogs and blogging, vlogs and vlogging, podcasting, video podcasting, internet broadcasting, wiki technology and enhanced web based multimedia are covered. The course is designed to bring those comfortable with Web 1.0 technology into participatory media rich Web 2.0 platform. 4C/4/0/0

CSCI 2610 Web 2.0 Multimedia Tools
This course familiarizes students with the tools to craft media rich web sites. The major open source and proprietary software products are reviewed and students are expected to complete a series of exercises involving the creation of animations, digital video and digital audio. (Prerequisite(s): Introductory HTML skills and knowledge of the organization of the World Wide Web) 4C/4/0/0

CSCI 2615 Web 2.0 Open Source Software Foundations
This course explores the open source underpinnings of the migration of the World Wide Web to Web 2.0 infrastructure. This course first explains open source licenses, such as GPL. The major open source projects which are currently leading Web 2.0 evolution such as Linux, Apache, PHP are then reviewed. Their application and general organization are thoroughly covered. (Prerequisite(s): Understanding of the organization and structure of the World Wide Web and beginning programming skills) 4C/4/0/0

CSCI 2620 Web 2.0 Programming Paradigms and Software Tools
This course introduces students to new approaches to programming for Web 2.0 applications. A significant amount of time will be devoted to AJAX (Asynchronous JavaScript and XML), RUBY on Rails, PHP and other development tools which have been associated with Web 2.0. The course makes extensive use of relational databases management systems such as MySQL. (Prerequisite(s): Introductory HTML skills and a working knowledge of a programming language such as C, C++ or Java.) 4C/4/0/0

CSCI 2621 Web 2.0 - RUBY on Rails
This course is an introductory course in programming RUBY on RAILS framework for Internet applications. RUBY is considered the next generation language for developing applications for the World-Wide Web. The combination of the power of the RUBY language and the flexibility and extensibility of the RAILS framework are examined. The course assumes a familiarity with development for the World-Wide Web, specifically, applications utilizing the model-view-controller model from the presentation layer to the enterprise rear end. This is a technology which addresses database-driven websites and students enrolling in the course should have a knowledge of relational databases. This is a hands-on course designed for students to develop functioning database driven websites. 4C/4/0/0

CSCI 2622 Web 2.0 - AJAX
This course is an introductory course in AJAX programming for internet applications. A key Web 2.0 technology AJAX utilizes (X)HTML, JavaScript, XML and CSS technologies to enable the developer to circumvent the HTTP client-server process to produce highly interactive and intuitive web applications. The course assumes an elementary knowledge of JavaScript, XML and relational database technologies prior to enrollment on the part of incoming students. The course begins with the elementary aspects of AJAX programming and then focuses on popular AJAX toolkits and frameworks such as DOJO, Google Web Toolkit, JSF and ECHO2. The key elements of the course are hands-on exercises which utilize AJAX tools and techniques to develop interactive web sites. This course utilizes Java server side technologies and MySQL as the server side database management system. 4C/4/0/0

CSCI 2630 Metaverse Applications Development
This course covers the conceptualization, design, development and deployment of a programming application which will execute as part of a Metaverse environment. The focus of the course is to add behavior to the virtual world we term a Metaverse. The Java programming languages are used in the course and programming applications will be developed in this language. The term project, which will be a large part of the course, will be designed conceptually, programming in Java and deployed in a metaverse. Students are expected to have background in Java programming and strong interest in multi-user game programming. 4C/4/0/0

CSCI 2632 Metaverse Graphics Programming
This course is a three-dimensional graphics application programming course which uses the OpenGL library as a graphics programming library standard. Students in this course will be expected to program three-dimensional objects both active and passive which will be placed in a three-dimensional Metaverse. Students are expected to develop advanced graphics applications which utilize knowledge of algebra, geometry and physics. Programs will be deployed into a Metaverse environment and a significant part of the course is the development and successful deployment of such applications. 4C/4/0/0

CSCI 2690 Computer Science Internship
A cooperative work student program between Saint Paul College Computer Science Program and a business facility to allow the student an employment-like experience. (Prerequisite(s): Instructor approval) Variable 1-8 credits

CSCI 2710 Metaverse Application Development Capstone
This course synthesizes previous programming and design course content into an effort to create an integrated application for deployment to a Metaverse. Students in this course are expected to work in teams and develop an application in a manner which simulates the development path which would be followed in real world application development. Students are expected to utilize prior learning to develop and demonstrate their work through the use of movies created from the computer screen. 4C/4/0/0
Construction Electricity (Electrical Maintenance)

CNEL 1111 Electrical Maintenance 1
This is the first in a series of four courses. This course presents basic DC electrical concepts which provide the foundation needed to gain a solid knowledge base from which to maintain electrical distribution systems, operate and maintain electrical equipment, troubleshoot and repair electrical problems in a commercial, industrial or residential environment. 4C/4/0/0

CNEL 1112 Electrical Maintenance 2
This is the second of four courses. This course presents AC electrical concepts which provide the foundation needed to gain a solid knowledge base from which to maintain electrical distribution systems, operate and maintain electrical equipment, troubleshoot and repair electrical problems in a commercial, industrial or residential environment. (Prerequisite(s): CNEL 1111) 4C/4/0/0

CNEL 1113 Electrical Maintenance 3
This is the third of four courses. This course presents three phase AC electrical concepts which provide the foundation needed to gain a solid knowledge base from which to maintain electrical distribution systems, operate and maintain electrical equipment, troubleshoot and repair electrical problems in a commercial, industrial or residential environment. Topics include: electromagnetic starters and contactors, basic control circuits, ladder or ‘one line’ diagrams, harmonics and power quality, relay logic, blueprint reading, national electrical code and troubleshooting techniques. (Prerequisite(s): CNEL 1112) 4C/4/0/0

CNEL 1114 Electrical Maintenance 4
This is the last of four semester courses in Electrical Maintenance. The last semester presents advanced electrical concepts which provide the foundation needed to gain a solid knowledge base from which to maintain electrical distribution systems, operate and maintain electrical equipment, troubleshoot and repair electrical problems in a commercial, industrial or residential environment. Topics include: electromagnetic starters and contactors, basic control circuits, ladder or ‘one line’ diagrams, harmonics and power quality, relay logic, blueprint reading, national electrical code and troubleshooting techniques. (Prerequisite(s): CNEL 1113) 4C/4/0/0

Construction Supervisor

CNSP 2410 Construction Methods, Materials and Their Applications
This is a hands-on survey course of components of the construction industry: methods, materials and sequences of construction process; emphasis on design, specifications, purchase and use of concrete, masonry and wood. 3C/2/1/0

CNSP 2412 Construction Codes and Inspection
An examination of building codes and standards applicable to building construction and inspection process. 3C/3/0/0

CNSP 2413 Construction Safety and Loss Control
OSHA regulations, hazard recognition, control procedures and systems for measuring and evaluating loss control performance. 3C/3/0/0

CNSP 2414 Building Specifications, Contract Documents and Specification Change Process
Understanding of building specifications, knowledge of range of contract documents and specification of change process will be covered. 3C/3/0/0

CNSP 2420 Project Scheduling
This course covers construction project planning with emphasis on subdivision and quantification of work; quantity take-off using plans and specifications. Use of conventional scheduling methods such as critical path methods, Gantt charts, monthly reports and crashing time schedule will also be covered. 3C/2/1/0

CNSP 2450 Construction Estimating and Cost Control
Fundamentals of estimating materials and labor costs in construction will be covered. Student will use blueprints, building specifications to verify dimensions of building components and determine total costs of those components. Verification of construction procedures described in building specifications; and calculate costs for materials, labor and contractor services will also be covered. 3C/2/1/0

CNSP 2460 Contracts and Legal Aspects of Construction Industry
This course covers types of contracts used in construction industry; emphasis is on understanding functions and interrelationships of documents. It includes a review of laws applied to industry; application of contracts and law to case studies. 3C/3/0/0

CNSP 2481 Advanced Scheduling
Project scheduling procedures to include computer applications and resource leveling; project types, office and field planning required to initiate work; equipment and construction methods selection process and an examination of contractual mandates specified. 3C/3/0/0

CNSP 2490 Internship in Supervising
Students will be required to arrange an internship experience that exposes and/or gives them experience as a supervisor with the range of responsibilities of a supervisor. Students will not be expected to have performed all duties but to have experienced the role of supervisor. Work habits, ability to perform duties, communicate in the complex environment of a supervisor and take responsibility as appropriate will be components of the internship. 2C/0/0/2

CNSP 2491 Advanced Estimating
Student will be able to bid projects with work quantifications, pricing submittal for lump sum and unit price bids and for preparation of design/build proposals. 3C/2/1/0

CNSP 2500 Construction Superintendent I: Project Management for Subcontractors
Students will be required to demonstrate the integration of their knowledge and experience by supervising a simulated project that includes but is not limited to contract documents, safety, planning, scheduling, production, control, relevant laws and codes, cost and work analysis and labor. The focus will be from the perspective of supervisor for a subcontractor. Presentations, preparation of relevant materials, problem solving and negotiations will be part of the simulated experience. 3C/0/0/3

CNSP 2501 Capstone II: Project Management for General Contractors
Students will be required to demonstrate the integration of their knowledge and experience by supervising a simulated project that includes but is not limited to responsibility for construction safety and inspection. Focus will be on the responsibilities of a supervisor working for a General Contractor. 3C/0/0/3
Course Descriptions

Construction Electricity

CNEL 1410 Direct Current Circuit Analysis
Covers basic concepts of electricity and DC circuits. Included are current and voltage, power, conductors and insulators, resistance, Ohm’s Law, power sources, series, parallel and complex circuits. Experiments with Ohm’s Law, power sources, wiring of series, parallel and complex circuitry and instrument applications will be conducted. 3C/0/3/0

CNEL 1420 Alternating Current Circuit Analysis
Covers the basic concepts of AC circuits and includes a study of electromagnetic principles, sine wave principles and relationships, series and parallel circuits, power, circuit analysis and resonance. Hands-on application of components in AC circuits will include the wiring of circuits showing the operation of electromagnets, sine waves, series and parallel resistance combinations and reactive combinations. (Prerequisite(s): CNEL 1410) 4C/0/4/0

CNEL 1435 Introduction to the National Electric Code
Introduction to the National Electric Code. Students will study the history of the code and how changes are adopted into the code. Students will become familiar with common definitions. 1C/0/1/0

CNEL 1440 Alternating Current Motors (Single Phase)
Gives students the background to identify, connect, operate, troubleshoot and maintain most common types of single phase motors. Meters and specialized test equipment are used extensively. (Prerequisite(s): CNEL 1420) 3C/0/3/0

CNEL 1450 Electrical Trade Calculations
Concentrates on the mathematical skills required to perform electrical circuit analysis and National Electrical Code calculations. 3C/0/3/0

CNEL 1460 Blueprint Reading for Electricians
Covers an introduction to drawing and blueprint reading. Architectural, mechanical, structural and electrical print will be covered. Emphasis will be placed on the electrical print regarding lighting and receptacle layout. Branch circuit and feeder layout will also be covered. 1C/0/1/0

CNEL 1510 Test Equipment & Power Supplies
Covers the use of electrical and electronic test equipment. Students study different types of diodes and connect them in typical circuits. Complete power supply circuits are connected, analyzed and tested. (Prerequisite(s): CNEL 1410, CNEL 1420, CNEL 1430, CNEL 1440 and CNEL 1450) 2C/0/2/0

CNEL 1520 Transistors & Amplifiers
This course covers transistor amplifiers, transistor theory and operation, connection, testing and troubleshooting practices. (Prerequisite(s): CNEL 1410, CNEL 1420, CNEL 1430, CNEL 1440 and CNEL 1450) 2C/0/2/0

CNEL 1530 Thyristors & Optical Devices
Covers the information necessary to gain a working knowledge of thyristors, light and heat sensing devices and electrical transducers. Installation and troubleshooting techniques are stressed. (Prerequisite(s): CNEL 1410, CNEL 1420, CNEL 1430, CNEL 1440 and CNEL 1450) 2C/0/2/0 CNEL 1560 Three Phase Systems Covers 3-phase power systems. Areas of study include 3-phase theory, power factor, 3-phase calculations and 3-phase test instruments. (Prerequisite(s): CNEL 1410, CNEL 1420, CNEL 1430, CNEL 1440 and CNEL 1450) 2C/0/2/0

CNEL 1570 Three Phase Motors
Provides students with the background to identify, connect, operate, troubleshoot and maintain three phase motors. Meters and specialized motor test equipment are used extensively. (Prerequisite(s): CNEL 1410, CNEL 1420, CNEL 1430, CNEL 1440 and CNEL 1450) 3C/0/3/0

CNEL 1585 Energy Management Systems
Introduces programmable controllers and explains how they can be used to control machines and building equipment. (Prerequisite(s): CNEL 1530 and MATH 1420) 2C/0/2/0

CNEL 1590 Direct Current Motors/Generators
Covers the theory, types, construction, operation, installation and maintenance of DC generators, motors and controls. Detail is afforded the student as to accepted troubleshooting procedures. Introductory level information and procedures as to rewinding motors is available to capable students. (Prerequisite(s): CNEL 1410) 2C/0/2/0

CNEL 2410 Transformers
Single and three phase transformer operations including transformer losses, efficiency, phase relationships and special transformers are covered. (Prerequisite(s): CNEL 1511, CNEL 1520, CNEL 1530, CNEL 1541, CNEL 1560, CNEL 1570 and MATH 1420) 3C/0/3/0

CNEL 2420 Motor Controls
Covers the design, wiring and troubleshooting of control and load circuits for single phase and three phase motors. Also covered is the design and sizing of the protection for these motors. (Prerequisite(s): Second semester CNEL courses) 4C/0/4/0

CNEL 2430 Heating & Cooling Systems
Covers the control of heating and cooling systems in residential and commercial situations. Gas, oil and electric systems are covered. (Prerequisite(s): CNEL 1511, CNEL 1520, CNEL 1530, CNEL 1541, CNEL 1560, CNEL 1570 and MATH 1420) 2C/0/2/0

CNEL 2445 Residential Wiring Methods
Covers the material and design aspect of residential wiring. Topics include branch circuit requirements, wiring methods and the use of blueprints. 2C/0/2/0

CNEL 2450 National Electrical Code 1
Covers the rules of the National Electrical Code that pertain to heating equipment, motors and controllers, refrigeration and air conditioning equipment (Articles 424, 426, 427, 430, 440, 445, 450). (Prerequisite(s): CNEL 1511, CNEL 1520, CNEL 1530, CNEL 1541, CNEL 1560, CNEL 1570 and MATH 1420) 3C/0/3/0

CNEL 2460 Electromechanics
Covers the ratios and relationships of mechanical energy as it is used to move and support electrical equipment. The course also deals with electrical controls and sensors used in the operation of heating and air conditioning units. (Prerequisite(s): CNEL 1511, CNEL 1520, CNEL 1530, CNEL 1541, CNEL 1560, CNEL 1570 and MATH 1420) 1C/0/1/0
CNEL 2510 Wiring Systems
Covers conductor properties, single and three phase voltage drop and three wire circuits. (Prerequisite(s): CNEL 2410, CNEL 2420, CNEL 2430, CNEL 2440, CNEL 2450 and CNEL 2460) 2C/0/2/0

CNEL 2520 Wiring Methods
Basic wiring methods, pipebending, anchors, knockout methods and material identification are covered. (Prerequisite(s): CNEL 2410, CNEL 2420, CNEL 2430, CNEL 2440, CNEL 2450 and CNEL 2460) 2C/0/2/0

CNEL 2540 Commercial Wiring Methods
Material and design aspects of commercial wiring are covered. Topics include commercial power tools, metering, equipment and commercial wiring methods. (Prerequisite(s): CNEL 2410, CNEL 2420, CNEL 2430, CNEL 2440, CNEL 2450 and CNEL 2460) 3C/0/3/0

CNEL 2550 Industrial Wiring Methods & Service Entrances
Covers both the requirements and installation of service entrance equipment and the installation methods and material used in industrial wiring. (Prerequisite(s): CNEL 2410, CNEL 2420, CNEL 2430, CNEL 2440, CNEL 2450 and CNEL 2460) 2C/0/2/0

CNEL 2560 National Electric Code 2
Requirements of the National Electrical Code Chap. 1-5 are covered. (Prerequisite(s): CNEL 2410, CNEL 2420, CNEL 2430, CNEL 2440, CNEL 2450 and CNEL 2460) 3C/0/3/0

CNEL 2575 Alarm Data and Communication Systems
This course includes hands-on applications of components in fire alarm systems, alarm systems, data communication and cabling systems. (Prerequisite(s): CNEL 1420) 2C/0/2/0

CNEL 2580 Job Site Safety
Covers general safety situations found on construction job sites. Students are introduced to topics ranging from inspections for hazardous conditions to personal protective equipment. Students will become familiar with OSHA regulations. (Prerequisite(s): CNEL 1410, CNEL 1420, CNEL 1430, CNEL 1440, and CNEL 1450) 2C/2/0/0

Cosmetology

COSM 1405 Preclinic Hair Care 1
Provides students with the opportunity to develop basic hair skills with a focus on trichology, shampoo, conditioning, cutting and finishing hair techniques. (Prerequisite(s): Completion of or concurrent enrollment in CHSN 1410 and CHSN 1420) 3C/0/3/0

COSM 1406 Preclinic Hair Care 2
Provides students with the opportunity to continue to develop hair service skills with a focus on shampooing, conditioning, styling, long hair, wigs and extensions. (Prerequisite(s): Completion of or concurrent enrollment in COSM 1405) 3C/1/1/2/0

COSM 1407 Preclinic Nail Care
Provides an introduction to nail care including manicuring, pedicuring and artificial nails. (Prerequisite(s): Completion of or concurrent enrollment in CHSN 1410 and CHSN 1420) 3C/1/1/2/0

COSM 1409 Preclinic Chemical Control
Provides an introduction to cosmetology chemicals and their applications. This includes curl reformation—permanent waving, soft curl perming and chemical relaxing. (Prerequisite(s): Completion of or concurrent enrollment in COSM 1405 and COSM 1407) 3C/1/2/0

COSM 1413 Preclinic Hair Color
Provides an introduction to temporary, semi-permanent, permanent and de-colorization hair color services. (Prerequisite(s): Completion of or concurrent enrollment in COSM 1409) 3C/1/2/0

COSM 1418 Advanced Hair Care
Provides advanced skill training, color and chemical reformation in hair cutting and styling. (Prerequisite(s): Completion of or concurrent enrollment in COSM 1413) 4C/0/4/0

COSM 1451 Salon Operations 1
Provides students with additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in CHSN 1463 (Cosmetology) or CHSN 1461 (Nail Technician)) 1C/0/1/0

COSM 1452 Salon Operations 2
Provides students with additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in CHSN 1463 (Cosmetology), or CHSN 1461 (Nail Technician)) 2C/0/2/0

COSM 1453 Salon Operations 3
Provides students with additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in CHSN 1463 (Cosmetology), or CHSN 1461 (Nail Technician)) 3C/0/3/0

COSM 1454 Salon Operations 4
Provides students with additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in CHSN 1463 (Cosmetology), or CHSN 1461 (Nail Technician)) 4C/0/4/0

COSM 1455 Salon Operations 5
Provides students with additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in CHSN 1463 (Cosmetology), or CHSN 1461 (Nail Technician)) 5C/0/5/0

COSM 1456 Salon Operations 6
Provides students with additional time to complete required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in CHSN 1463 (Cosmetology), or CHSN 1461 (Nail Technician)) 6C/0/6/0

COSM 1520 40 Hour Refresher
This 40 hour refresher course is for individuals who do not have enough hours of experience in the past 3-year licensing period and wish to renew their individual cosmetology license. Must present MN Cosmetology license to the instructor. 2C/2/0/0

COSM 1522 Nail Technician Refresher Course
This 35 hour refresher course is for individuals who do not have enough hours of work experience in the past 3-year license period and would like to renew their individual manicuring license. Must present nail technician license to the instructor. 2C/1/1/0
**Cosmetology, Nail Care and Esthetician Core Courses**

**CHSN 1410 Preclinic Introduction**  
Provides an introduction to cosmetology, nail technology and skin care, including professional image, Minnesota laws and rules, safety and sanitation. (Prerequisite(s): High School Diploma or a GED) 4C/3/1/0

**CHSN 1420 Body Systems and Diseases**  
This course presents cells, tissue and organs to aid in understanding histology and physiology of the skin, hair and nails and how they work together to form body systems. Major body systems will be explained along with their impact on the skin, hair and nails. Students will study skin, hair and nail diseases and disorders in order to differentiate treatable disorders from those that require referral to a physician. (Prerequisite(s): Enrollment in Cosmetology, Nail Technician or Esthetician Program and concurrent enrollment in CHSN 1410) 4C/3/1/0

**CHSN 1461 Clinic 1 – Nails**  
This course provides students with an opportunity to develop the practical skills necessary in basic nail care and to complete required services and hours for licensure related to basic nail care. (Prerequisite(s): COSM 1407) 3C/0/3/0

**CHSN 1462 Clinic 2 – Skin**  
This course of the skin care program is designed to provide clinical practice of previously learned skin care skills.  
(Prerequisite(s): CHSN 1420, ESTH 1445 and ESTH 1455 or concurrent enrollment) 4C/0/4/0

**CHSN 1463 Clinic 3 – Advanced Skin**  
This course is designed to provide clinical practice of previously learned skin care skills. This course provides the necessary hours to complete skin care quotas as mandated by the State of Minnesota. (Prerequisite(s): Students must have 480 clock hours and have completed all preceding courses in the Esthetics program, CHSN 1462) 4C/0/4/0

**CHSN 1464 Clinic 4 – Hair Shaping and Styling**  
Provides students with an opportunity to develop the practical skills in cutting and styling hair necessary for entry-level salon work. (Prerequisite(s): Completion of or concurrent enrollment in COSM 1415) 4C/0/4/0

**CHSN 1465 Clinic 5 – Advanced Hair and License Prep**  
Provides students with an opportunity to develop the practical skills in hair coloring and chemical reformation necessary for entry-level salon work. (Prerequisite(s): Completion of or concurrent enrollment in COSM 1413 and 1415) 3C/0/3/0

**CHSN 1470 Sanitation for Hair Braiders**  
This course presents safety and sanitation principles and issues practiced in the service of hair braiding. 2C/2/0/0

---

**Culinary Arts**

**CULA 1400 Culinary Basics 1**  
This course is made up of two units: "Introduction to Culinary Arts" which is designed to allow the student to become familiar with the hospitality industry, our program and the foundation skills necessary to become a foodservice professional; and "Basic Baking" which is designed to allow the student to develop knowledge and skills necessary to work in a professional baking environment. 3C/1/2/0

**CULA 1420 Culinary Basics 2**  
This course is made up of two units: "Basic Pantry and Cold Food Production" which is designed to allow the student to develop knowledge and skills necessary to work in the Garde Manger and pantry areas in a professional foodservice environment; and "Basic Range and Hot Food Production" which is designed to allow the student to develop knowledge and skills necessary to work in a professional foodservice environment. Foundation stocks, sauces and soups are the major component. Must be taken concurrently with Culinary Basics 1 or have instructor approval. 4C/0/4/0

**CULA 1440 Breakfast**  
Covers the many types of foods usually associated with breakfast/brunch service. Most of these items will be prepared, served in the class and in a restaurant setting. (Prerequisite(s): CULA 1400 and concurrently with CULA 1440 and CULA 1420) 1C/0/1/0

**CULA 1450 Meat Fabrication**  
Covers the fundamentals of meat food preparation. Issues of grading, yield, market forms and standards are discussed. Many types of meat, fish and poultry are processed in the class. (Prerequisite(s): CULA 1400 or concurrently with CULA 1440) 2C/0/2/0

**CULA 1460 Basic Menu Production**  
Covers the production of the entire menu. Individual responsibility and teamwork are the cornerstones of successful foodservice and of this course. A new menu will be prepared each day by each team. (Prerequisite(s): CULA 1400 and concurrently with CULA 1440) 2C/0/2/0

**CULA 1470 Food Service Sanitation**  
Develops an understanding of the basic principles of sanitation and safety in order to maintain a safe and healthy environment for the consumer. Servsafe test included. 2C/2/0/0

**CULA 1480 Nutrition**  
Covers the fundamentals of nutrition theory taught from the point of view of the chef. Healthy cooking techniques and dietary requirements are emphasized. 2C/1/1/0

**CULA 1490 Food Service Math**  
An assessment and review of math skills necessary for foodservice workers. Functions with whole numbers, fractions, decimals and percentages are covered and applied to food service problems. Must be accepted as Culinary Arts major. 2C/2/0/0
CULA 1510 Commercial Bakery Production
Allows students to develop production baking skills to a marketable level. (Prerequisite(s): CULA 1460, CULA 1470, CULA 1480, CULA 1490) 2C/0/2/0

CULA 1520 Commercial Pantry Production
Allows the students to develop marketable production skills in the pantry/cold food area. (Prerequisite(s): CULA 1460, CULA 1470, CULA 1480, CULA 1490) 2C/0/2/0

CULA 1530 Commercial Range Production
Allows students to develop marketable skills in many aspects of hot food preparation in a production kitchen environment. (Prerequisite(s): CULA 1460, CULA 1470, CULA 1480, CULA 1490) 2C/0/2/0

CULA 1535 Catering
This course will allow students to have the opportunity to plan, prepare, serve and clean up a catered function. Another important part of the course will be the opportunity for the students to interface with the customer directly during the service time and the post service evaluation from the students' personal evaluation of the event. (Prerequisite(s): CULA 1460, CULA 1470, CULA 1480, CULA 1490 or instructor approval) 2C/1/1/0

CULA 1540 Food Service Supervisory Management
Allows students to prepare for the transition from employee to supervisor by developing human relations and personnel management skills in a foodservice environment. (Prerequisite(s): CULA 1460, CULA 1470, CULA 1480, CULA 1490) 1C/0/1/0

CULA 1550 Grill/Short Order Cooking
Allows the student to develop marketable production skills in the Grill/Short Order cooking area. (Prerequisite(s): CULA 1460, CULA 1470, CULA 1480, CULA 1490) 2C/0/2/0

CULA 1560 Food/Beverage/Labor Cost Control
Covers the principles of menu pricing and analysis, budgeting and inventory control systems in foodservice operations. (Prerequisite(s): CULA 1490 or instructor approval) 3C/3/0/0

CULA 1570 Basic Cake Decorating
Allows students to develop cake/pastry decorating skills to a marketable level. (Prerequisite(s): CULA 1410 or instructor approval) 2C/0/2/0

CULA 1600 Professional Introduction to Wine
Review the origins and history of the vine, vineyard calendar, soil and climate, natural hazards, growing regions and major grape varietals of the world. Examine considerations for harvest of grapes, techniques for making still wines (red, white and rose), techniques for making sparkling and fortified wines, processing and aging techniques and the blending process. Explore grape varietals, regulations, history, culture and traditions: USA, France, Italy, Spain/Portugal, Germany, Australia, South America and South Africa. (Prerequisite(s): Must be 21 years or older. Must be taken concurrently with CULA 1610-1640.) 2C/0/2/0

CULA 1610 Flavor Dynamics of Wine
Experience professional wine evaluation based on sensory (visual, organoleptic) traits. Comparison and analysis of world wine regions. Includes emphasis on the development of a wine vocabulary and sensory description techniques. (Prerequisite(s): Must be 21 years or older. Must be taken concurrently with CULA 1600-1640.) 2C/1/1/0

CULA 1620 Professional Wine Service
Allows student to develop professional wine service techniques, wine etiquette, glassware/equipment options, building a relationship with the guest and elements of the guests' aesthetic experience. (Prerequisite(s): Must be 21 years or older. Must be taken concurrently with CULA 1600-1640.) 1C/1/0/0

CULA 1630 Strategies for Pairing Wine with Food
Allows student to analyze the rationale behind successful wine and food pairings and the impact of preparation techniques on wine choice. Learn how to enhance wine and food pairing opportunities and improve menu and wine list compatibility. (Prerequisite(s): Must be 21 years old or older. Must be taken concurrently with CULA 1600-1640.) 2C/1/1/0

CULA 1640 Wine Marketing
This course will allow students to review legalities, wine market cycles, wine pricing, developing a wine program, building a wine list and wine storage. An important part of the course is to develop strategies for determining your target market, wine merchandising and promotional opportunities, consumer education and building strong repeat business. (Prerequisite(s): Must be 21 years old or older. Must be taken concurrently with CULA 1600-1640.) 2C/2/0/0

CULA 2410 Restaurant Operations Theory
Requires students to develop marketable skills in the areas of menu planning, menu analysis, production scheduling and recipe interpretation for different menu settings and operations. Must be taken as a block with CULA 2411-2430. (Prerequisite(s): CULA 1550) 2C/2/0/0

CULA 2411 Restaurant Operations Lab 1
Requires students to develop marketable skills in many aspects of hot and cold food preparation in a fine dining environment. Must be taken as a block with CULA 2410-2430. (Prerequisite(s): CULA 1550) 3C/0/3/0

CULA 2412 Restaurant Operations Lab 2
Requires students to develop marketable skills in many aspects of hot and cold food preparation in a fine dining environment. Must be taken as a block with CULA 2410-2430. (Prerequisite(s): CULA 1550) 3C/0/3/0

CULA 2420 Service
Covers serving techniques and dining room operations through classroom and laboratory experience in a dining room. Service styles emphasized will be American, family style and buffet. French and Russian styles will be discussed. Must be taken as a block with CULA 2410-2430. (Prerequisite(s): CULA 1550) 2C/0/2/0

CULA 2430 Advanced Foods and Wine Appreciation
Requires students to participate in the preparation of various items which are somewhat unusual on daily menus due to their complexity, scarcity, cost, or origin. Includes introduction to wines—theory, tasting and pairing with food. Must be taken as a block with CULA 2410-2420. (Prerequisite(s): CULA 1550 and completion of General Education requirements) 2C/0/2/0

CULA 2440 Ice Carving
Allows students to develop marketable skills in the art and craft of ice carving. (Prerequisite(s): CULA 1570 or instructor approval) 1C/0/1/0
CULA 2450 Advanced Cake & Pastry
Allows students to explore and develop skills in a variety of pastry, confectionery and other food sculpture mediums. Requirements also include the production of a tiered cake. (Prerequisite(s): CULA 1570 or instructor approval) 2C/0/2/0

CULA 2460 Classical Buffet
Allows students to explore concepts and practice techniques necessary to prepare a classical haute cuisine buffet. Emphasis will be placed on the design and presentation of food items. Each student will design and produce two display platters consisting of meat, fish and poultry products with all necessary accompanying items. (Prerequisite(s): CULA 1550 and completion of General Education requirements) 3C/0/3/0

CULA 3630 Artisan Breads and Specialty Doughs
This is an in-depth hands-on course designed to build proficiency in the preparation of a number of different types of artisan breads and specialized doughs, focusing on products used in restaurants and specialty bakeries while utilizing organic and local ingredients. Products prepared will include: standard and wild yeast sourdough, Pan au Levain, traditional French baguettes, Brittany rye, different multigrain preparations, focaccia, flavored breads and laminated dough products. Discussions will include technique and consistency issues as well as the role of local & organic ingredients in baking and the baker’s responsibility in promoting sustainability. 3C/1/2/0

CULA 3640 Fundamentals of Charcuterie
This class is a thorough introduction into the art of Charcuterie and condiment making with an emphasis on product utilization. Students will learn various preservation techniques including brining and curing, working with smoked products, marinades, pickled products, relishes, cold sauces, mustards, forcemeats, pates, bacons, hams and cheese making within specific sanitary confines. Discussions will include technique and sanitation issues as well as the role of local & organic procurement of ingredients and the charcuterie’s responsibility in promoting sustainability. 3C/1/2/0

CULA 3650 Organic and Sustainable Foods
This class is designed to illustrate the importance of organic and local ingredients from the harvest at the farm to the final plate presentation in the kitchen. Students will get an introduction to organics, sustainable agriculture and seasonal cooking. The class will participate in trips to local farms and markets as well as a gardening project. Students will get an in-depth look at the roles of local farms and artisan food producers, along with techniques in scratch cooking and product utilization. 3C/3/1/0

Digital Graphics and Interactive Multimedia

DGIM 1443 Dreamweaver 1
This course explores the basics of Dreamweaver MX. Topics include file organization, the Dreamweaver MX interface, site control, images, text, linking pages, ordered, unordered and defined lists, color schemes, tables and basic layouts. The focus of this course is to introduce the student to Dreamweaver MX and develop a simple Web site using the techniques learned. 2C/2/0/0

DGIM 1444 Dreamweaver 2
This course explores the more advanced topics of Dreamweaver including frames, rollovers, cascading style sheets, HTML, forms, DHTML, automation, sounds, templates and libraries and troubleshooting. It is recommended that students taking this course have taken DGIM 1443 or its equivalent. 2C/2/0/0

DGIM 1446 Adobe/Macromedia Fireworks 1
This course introduces the student to Macromedia Fireworks MX. Topics include common Fireworks tasks, the Fireworks interface, setting up, modifying, navigating Fireworks documents, creating simple graphics, working with text, working with bitmaps and building professional graphics. This is a hands-on course where the students will develop a project using the knowledge gained in class. 2C/2/0/0

DGIM 1447 Adobe/Macromedia Fireworks 2
This course is a continuation of DGIM 1446. Topics include Fireworks artistry and special effects, masks, blending layers, using styles, working with libraries, working with URLs, creating animation and interactivity, optimizing and exporting graphics, integrating Fireworks graphics with Flash and Director, exporting Fireworks HTML and automating and extending Fireworks. This is a hands-on course where the students will develop a project using knowledge gained in class. It is recommended that students taking this course have taken DGIM 1446 or its equivalent. 2C/2/0/0

DGIM 1448 Adobe Flash 1
This course introduces the student to Macromedia Flash MX. Topics include common Flash tasks, the Flash interface, setting up, modifying, navigating Flash documents, creating simple graphics, working with text, working with bitmaps and building professional graphics. This is a hands-on course where the students will develop a project using the knowledge gained in class. 2C/2/0/0

DGIM 1449 Adobe Flash 2
This course takes you beyond the basics of DGIM 1448. Topics include adding sounds to Flash MX, publishing movies, layer editing, Action Script, importing Quick Time movies into Flash MX and creating 3-D effects in Flash. This is a hands-on course where the students will develop a project using knowledge gained in class. It is recommended that students taking this course have taken DGIM 1448 or its equivalent. 2C/2/0/0

DGIM 1472 Digital Multimedia for Non-Majors
This course is an introduction to digital multimedia tools for students not majoring in the computer careers area of the college. It is an overview course on the subject of digital media and covers a variety of digital media tools such as Photoshop, Audacity, MovieMaker, and other tools of this type. The course will cover the topics of interest to someone planning to use the software and hardware systems for documentary purposes in other coursework areas. 2C/2/0/0

DGIM 1483 Photoshop 1
This course introduces the student to Adobe Photoshop 7. Topics include the Photoshop interface, hardware and software requirements, file formats, pixels, vectors, resolution, color theory, Photoshop color management, masks, type and typography, painting tools and brushes, layers and layer styles, filters, extract, liquefy and the pattern maker. This is a hands-on course where the students will develop a project using the knowledge gained in class. (Prerequisite(s): CSCI 1420 or equivalent knowledge) 2C/2/0/0
DGIM 1484 Photoshop 2
This course is a continuation of DGIM 1483 Photoshop 1. Topics include image composition, retouching, composting, ImageReady, Web design, print and prepress, actions, and automation. This is a hands-on course where the students will develop a project using knowledge gained in class.
(Prerequisite(s): DGIM 1483 Photoshop 1 or equivalent knowledge) 2C/2/0/0

DGIM 1485 Second Life Basics
This course introduces students to the world of Second Life—a three dimensional virtual environment which is built and maintained by Linden Lab. Virtual environments are predicted to become a primary portal to the Internet after the year 2010. Students will work with a graphical user-interface to alter, develop, build, or submit a customized personal avatar or community, explore in-world design considerations and work with scripted objects. Second Life’s implication on the marketing and branding of businesses and organizations will be explored. Programming and planning for future Second Life world development and interaction will also be studied. Students will learn to use Second Life to develop and market products, develop collaborative work environments, create animations and interact with a global community of Second Life residents. Individuals signing up for this class must be 18 or older. 2C/2/0/0

DGIM 1526 Quark Xpress
This course introduces the student to Quark Xpress software and its use in computer graphics and page design. The student will experiment with various layout techniques using this software tool that can be applied to various digital and analog mediums. Focus on the use of color both in relation to computer displays and printed media will be explored in detail. In addition, students will learn how Quark Xpress integrates with other industry standard tools such as Adobe Acrobat. 2C/2/0/0

DGIM 1600 Computer Graphics 1
Computer Graphics 1 introduces the student to the subject of computer graphics as a technical and creative medium. Topics include basic graphic programming, hardware, software applications, electronic storyboarding, electronic color theory, vector and raster graphics, electronic illustration, file types and formats, digital imaging and digital printing. 4C/4/0/0

DGIM 1601 Computer Graphics 2
Computer Graphics 2 is a continuation of Computer Graphics 1. The student will be introduced to 2D and 3D animation techniques along with an introduction to Maya. The student will be introduced to the project workflow required to create computer animation building on what was learned in Computer Graphics 1. The student will learn project development including writing, staging, movement, timing, key framing, editing and incorporating sound and music into computer animation. 4C/4/0/0

DGIM 2500 Metaverse Graphics Design 1
This course is an introduction to the development of three-dimensional models for the virtual reality areas which we call Metaverses. This first course of the two-course series involves learning how to model physical spaces using three-dimensional modeling tools. The notions of three-dimensional geometry, geometric axes, scale, vectors and three-dimensional shapes are covered in some detail. These concepts are reinforced by actual in-class geometric modeling using the popular three-dimensional modeling tool Sketch-Up provided by Google, Inc. Students will be expected to develop a significant three-dimensional project by the end of the term and prepare a detailed explanation of their work. It is expected these Sketch-Up models be of a quality to be candidates for submission to Google Warehouse. 4C/4/0/0

DGIM 2502 Metaverse Graphics Design 2
This is an application course in the development of three-dimensional models for the virtual reality areas which we call Metaverses. This second course of the two course series involves applying the conceptual knowledge developed in Metaverse Graphic Design 1 to actual modeling problems. Students will develop a competency in the use of three popular three dimensional modeling tools: Maya, 3D Studio Max and Blender. These software tools are used to develop three-dimensional models that replicate physical worlds and purely imaginative worlds. Students will be expected to develop three significant three dimensional projects using each of the tools by the end of the term and prepare a detailed explanation of their work. 4C/4/0/0

DGIM 2510 Metaverse Application Design
This course focuses entirely on developing three-dimensional designs for Metaverses. Students in the course are permitted to choose a three-dimensional modeling tool which they feel comfortable using. Tool sections will include Sketch-Up, Maya, 3D Studio Max or Blender. Students will work in this course under the direction of the instructor to develop metaverse specific applications of three-dimensional models using modeling skill sets developed in early course. This is an advanced course in developing a very specific type of model to be deployed on a defined multi-user gaming platform. Student work in this course will be individual and the course is conducted in a manner similar to studios in art institutions. Students will produce and deploy a small scale metaverse model in the course. Students will also learn deployment toolsets for virtual worlds. 4C/4/0/0

DGIM 2555 Adobe LiveMotion 1
This course introduces the student to LiveMotion 2.0. Topics include the work area, drawing basic shapes, text, styles, working with shapes, animation, keyframes and animating object properties. This is a hands-on course where the students will develop a project using the knowledge gained in class. 2C/2/0/0

DGIM 2556 Adobe LiveMotion 2
This course is a continuation of DGIM 2555. Topics include the rollovers, movie clips, advanced rollovers, player script, sounds, dynamic data, advanced interactivity, writing automation scripts and live tabs and exporting LiveMotion compositions. This is a hands-on course where the students will develop a project using knowledge gained in class. It is recommended that students taking this course have taken DGIM 2555 or its equivalent. 2C/2/0/0

DGIM 2562 Adobe Illustrator
In Illustrator, the student will work with Adobe Illustrator CS3 elements, understand the Adobe Illustrator workspace, customize the workspace, understand how to use the various help facilities provided, use the navigator panel, demonstrate selecting and aligning, use of magic wands, group items, work with shapes, drawings, and demonstrate the use of various drawing tools, demonstrate various transformation techniques including scaling, reflecting, rotating, distorting, shearing, changing perspective, make multiple transformations and how to position objects, demonstrate proficiency using the pen tool,
work with color and painting, work with type, and layers. Upon completion of this course the student will complete a final project using techniques from lessons learned. 3C/3/0/0

**DGIM 2565 Computer Games Studio Workshop**
Aristotle first identified it in his Poetics, giving it the kind of halo that makes ideas unapproachable. But it's really very simple. A story must have a beginning, a middle and an end. This course is about the beginning, the middle and the end of a computer game. In this course we guide the student through the creative storytelling process of developing a framework for a computer game. Game development tools are not used in this course as it is carried out more as a workshop in creating a "technical play" than an exercise in straightforward application of previously developed technologies. In this course the student will complete several computer game projects from the perspective of the creation of the story that the game tells. The work for this course will include a variety of projects. All projects will require design activities. The final project will require students to go through the beginning phases of system life cycle: creation, specification and design of a proposed computer game. 4C/4/0/0

**DGIM 2566 InDesign**
This class introduces the student to InDesign, looks at what's new with Adobe InDesign CS3, takes the student on a tour of the InDesign including best workflow practices. Topics include document setup, working with frames, importing and editing text, typography, color and color management, and working with styles, importing and linking graphics, creating, importing, and formatting tables, working with transparency, working with long documents, output, and PDF exporting, and using XML. Upon completion, the student will demonstrate their mastery of the material by completing a final class project. 3C/3/0/0

**DGIM 2569 Digital Portfolio Development**
This course teaches the student how to create a portfolio. In this course the students will create a digital (web based) and hard copy (paper) portfolio. Topics will include portfolio definitions, design, types, goals, content, organization, and presentation showing their creative talents to an audience of peers, instructors, and industry professionals. 2C/2/0/0

**DGIM 2570 Digital Photography 1**
This course introduces the student to digital photography and relates it to Web design advantages of digital photography, advantages of analog photography, hybrid digital photography, maximizing image definition, utilizing camera features, light, composition, on-location shooting, studio shooting, useful photo accessories, computer requirements, converting analog to digital, cataloging and managing images and choosing an image editing program. This is a hands-on course where the students will develop a project using the knowledge gained in class. 2C/2/0/0

**DGIM 2571 Digital Photography 2**
This course is a continuation of DGIM 2570. Topics include image editing, special effects, advanced image editing, photopainting, prepping images for the Web, “digital magic,” making and using device profiles for predictable output and controlling output options. This is a hands-on course where the students will develop a project using knowledge gained in class. (Recommendation(s): DGIM 2570 or its equivalent) 2C/2/0/0

**DGIM 2572 Computer Animation 1**
This course introduces students to the 3-D Studio Max interface, workflow, coordinating systems, layers, setup, startup files, 2-D primitive shapes, object naming, sub-object levels, vertex tangency, modifiers, lofting, 3-D primitives, editable poly, HSDS modifiers, displacement mapping, camera types, creating and adjusting cameras, camera composition, camera movement, and lighting methods. 2C/2/0/0

**DGIM 2573 Computer Animation 2**
This course builds on Computer Animation 1 discussing photometric lights, material editor, maps, mapping coordinates, key frame animation, controllers, constraints, hierarchical linking, reactor dynamics, practice flow and effects. As a final project, students will demonstrate their ability to use the techniques covered in class. 2C/2/0/0

**DGIM 2586 Digital Sound**
This course teaches students how to create and edit digital sound for use in computer animation. Topics include analog and digital sound techniques and equipment, analog to digital conversion, basic sound editing, formats and sound conversion, digital to analog conversion and basic sound effect techniques for use in computer animation. 2C/2/0/0

**DGIM 2587 Digital Video 1**
This course covers video production techniques. All phases of video production will be covered including pre-production, production and post-production with focus on creating digital video. Topics include screenwriting, photography, drawing, story concept, characters, plots, themes, digital tools, generating original ideas, incorporating plot goals, creating the final story, creating original characters, themes and visual metaphors, developing visual styles, developing digital production styles, creating visually expressive characters, developing set designs, conceptual lighting design, developing color palette, narrative sound design, production story-editing choices, digitally enhanced storytelling techniques, using modern 2D animation to expand our realities and using 3D animation to show anything imaginable. 2C/2/0/0

**DGIM 2588 Digital Video 2**
This course covers advanced video production techniques using various video editing tools in use within the industry. The primary tools to be covered in class will be Premier Pro by Adobe and Final Cut Pro by Apple. Topics to be explored in both tools will include storyboarding, basic editing, advanced editing, video transitions, special effects, multi-track editing and importing/exporting various video formats. In addition, various audio editing and mixing techniques will be explored using both tools. A brief overview comparing the strengths and weaknesses of these two primary tools plus other standard video editing tools used in industry will be explored. (Prerequisite(s): DGIM 2587 Digital Video 1) 2C/2/0/0

**DGIM 2591 Computer Graphics & Digital Multimedia Internship**
A cooperative work-student program between Saint Paul College's Computer Graphics & Digital Multimedia Program and a business facility to allow the student an employment-like experience. (Prerequisite(s): Instructor approval) Variable 2–8 credits

**DGIM 2597 Special Topics in Computer Graphics & Digital Multimedia**
Provides learning experiences that meet the needs of students, major programs and the College. (Prerequisite(s): Instructor approval) Variable 1–6 credits
DGIM 2702 Metaverse Design Capstone
This course is the capstone course in Metaverse Design. The course is meant to integrate the various skills Metaverse Design students have developed in previous coursework in this area. Under the direction of the faculty, students will work on a major complex development of a Metaverse model which will approximate a production model. Students will work in design teams and the course is intended to replicate the real-world design process from conception, to design, to conversion and finally deployment of a Metaverse world. Teams will deploy and demonstrate their work from a server which can be reached anywhere on the Internet. 4C/4/0/0

ECON 1710 Introduction to the American Economy
This introductory course provides students with an overview of the U.S. economic system. (MnTC: Goals 5) 3C/3/0/0

ECON 1720 Macroeconomics
An introductory study of macroeconomics. Emphasis is on the theory of demand and supply, historical and contemporary macroeconomic theories, national income, fiscal and monetary policy, money and banking, the Federal Reserve System, unemployment and inflation, business cycles and price level determinants. The impact of international economics will also be discussed. (MnTC: Goals 5 & 8) 3C/3/0/0

ECON 1730 Microeconomics
An introductory study of microeconomics. Emphasis is on price system, resource allocation, production costs, consumers, firms and market structures and application of theory. Monopoly, oligopoly and antitrust policy will be examined. Public good, income distribution and the economics of taxation and social choice will be discussed in light of current economic issues. The impact of international economics will also be discussed. (MnTC: Goals 5 & 8) 3C/3/0/0

Economics

ELEC 1412 DC Circuits
This course introduces the student to the basics of electronics. Coverage includes analysis of basic electronic properties as well as series and parallel resistive circuits. Concepts will be examined through hands-on laboratories, computer simulations and mathematical analysis. Use of test equipment will be introduced. 5C/2/3/0

ELEC 1420 AC Circuits
This course will introduce the student to Alternating Current and its effects on Resistive (R), Inductive (L), Capacitive (C), and combined RL, RC, RLC components. The course will cover the usage of test equipment associated with Alternating Current circuits in a lab environment. Simulation software will be used to analyze circuit operation. Concepts learned in DC Circuits will be applied. 5C/2/3/0

ELEC 1423 Circuit Theory and Basic Electronics with Lab
This course is designed to provide an overview of circuit theory and basic electronics for students interested in pre-engineering or applied engineering programs. It provides hand-on laboratory experiences for students to give them a head start in pursuing engineering-related programs and careers. 5C/2/3/0

ELEC 1430 Solid State Circuits
This is a lecture course that covers the theory of bipolar semiconductors including diodes and transistors. The analysis of diodes and transistors through the study of their parameters and characteristics will be covered. AC rectification, basic transistor biasing, transistor amplifiers, and DC regulation will be studied. The student will construct and make measurements on circuits that demonstrate the practical application of diodes and transistors including AC rectification, amplification, and DC regulation. Simulation software will be used to analyze circuit operation. Concepts learned in DC and AC Circuits will be applied. 5C/2/3/0

ELEC 1432 Fundamental Linear Circuits
This course introduces the student to basic analog integrated circuits and their uses. Basic operational amplifier and timer integrated circuit configurations will be analyzed. Concepts will be examined through hands-on laboratories, computer simulations and mathematical analysis. Use of test equipment will be emphasized. 5C/2/3/0

ELEC 1440 Electronic Circuit Analysis
Introduces the mathematical analysis of simple and complex electronic circuits. (Prerequisite(s): Enrollment in Electronic Tech Diploma/AAS) 2C/0/2/0

ELEC 1515 Digital Circuits
This course introduces the student to digital circuitry used in computer systems. Topics covered include number systems, basic logic gates, truth tables, boolean algebra, latches, flip-flops, timing diagrams, arithmetic circuits, counters, shift registers, shift counters, encoders, decoders, multiplexing, and demultiplexing. Concepts will be examined through hands-on laboratories, computer simulations and mathematical analysis. Use of test equipment will be emphasized. 5C/2/3/0

ELEC 1529 Microcontroller Fundamentals
This course covers microcontroller architecture, assembly language programming, instruction format, addressing modes, bus architecture, flow charting, counters, basic input/output, and program control. Concepts will be examined through hands-on laboratories, use of Integrated Development Environment (IDE) software and mathematical analysis. Use of test equipment will be emphasized. 5C/2/3/0

ELEC 1531 Advanced Solid State Lab
Covers the application of Field Effect Transistors, four-layer devices (UJTS, SCRS, PUTS, Triacs, Triads, Diacs), light detecting devices (LDSS), operational amplifier integrated circuits and 555 timer integrated circuits. (Prerequisite(s): Enrollment in Electronic Tech Diploma/AAS) 3C/0/3/0

ELEC 2400 Computer Fundamentals & Troubleshooting
This course will provide the technician with practical experience in the use of applications related to diagnosis, service, repair and documentation to support repair of electronic equipment. (Prerequisite(s): Enrollment in Electronic Tech Diploma/AAS) 3C/1/2/0

ELEC 2410 Personal Computer Service & Repair Theory
This course covers personal computer theory, operation, service and repair including peripheral equipment. This course will use IBM and/or IBM type computers in a hands-on approach to
basic computer maintenance. (Prerequisite(s): Enrollment in Electronic Tech Diploma/AAS) 3C/1/2/0

ELEC 2411 Personal Computer Service & Repair Lab
Hands-on course in assembling, maintaining, repairing and servicing IBM type computers, peripherals and associated hardware. (Prerequisite(s): Enrollment in Electronic Tech Diploma/AAS) 4C/0/4/0

ELEC 2430 Computer Operating Systems & Programming
Introduce the operation and use of computer operating systems and a high level language. (Prerequisite(s): Enrollment in Electronic Tech Diploma/AAS) 2C/0/2/0

ELEC 2520 Interfacing Theory
This course covers Interfacing circuitry used in the conditioning and modification of analog signals. This includes circuitry designed to allow computers, sensors and power control devices to communicate with each other. (Prerequisite(s): Enrollment in Electronic Tech Diploma/AAS) 3C/1/2/0

ELEC 2521 Interfacing Lab
This course provides hands-on construction and use of Interfacing circuitry used in the conditioning and modification of analog signals. This includes circuitry designed to allow computers, sensors and power control devices to communicate with each other. (Prerequisite(s): Enrollment in Electronic Tech Diploma/AAS) 4C/0/4/0

■ Energy Process Technology

ENGY 1410 Pumps, Compressors and Turbines
Covers the operation of several pump, compressor and turbine types, including the unique characteristics in terms of fluid flow principles, design, construction and prime movers. 3C/2/1/0

ENGY 1420 Instrumentation & Measurement
Students will use the measuring tools associated with mechanical repair, including the personal computer and instrumentation. 3C/2/1/0

ENGY 1510 Piping, Tubing & Steam Traps
Study of piping, tubing and disassembly, inspection, repair and assembly of gauge glass and steam traps. 3C/2/1/0

ENGY 1520 Hydraulics
Covers the principles of fluid power, pump inlet factors, actuator speed factors, hydraulic fluids and ANSI/ISO symbols. 3C/2/1/0

ENGY 1530 Equipment Repair
Covers the safe use of a variety of hand tools commonly associated with mechanical repair, metallurgy, shop machines and system diagrams. 4C/3/1/0

ENGY 2410 Energy Systems & Components
Students will understand the basic purpose, structure and operation of a power plant system, including boiler and auxiliary equipment, combustion, condensers and circulating water. 3C/3/0/0

ENGY 2420 Energy Production
Students will understand energy production terminology and be able to use a multimeter to measure voltage, current and resistance. Students will also demonstrate an understanding of Ohm's law by solving series, circuit and parallel circuit problems. Electrical safety hazards will also be examined. 3C/2/1/0

■ English

ENGL 1410 Fundamentals of Writing 1
This course is aimed at beginning writers who have had little instruction or experience in writing. It provides sequenced instruction in grammar use, sentence construction, and paragraph construction. Students will study models of effective sentences and paragraphs and then generate their own work. Completion of this course with a grade of "C" or better is required to continue on to ENGL 1415. (Prerequisite(s): READ 0721 or ESOL 0831, department approval or appropriate assessment score.) 4C/4/0/0
ENGL 1415 Fundamentals of Writing 2
This course provides credits for certificate and diploma programs and is preparation for ENGL 1711. In addition to reviewing sentence mechanics, students will study a variety of writing models in both paragraph and essay formats. Students must pass the course with a “C” or better in order to move on to ENGL 1711. (Prerequisite(s): Grade of “C” or better in ENGL 1410 or appropriate assessment score.) 4C/4/0/0

ENGL 1711 Composition 1
This course emphasizes the process of writing expository and persuasive essays using effective writing skills and a variety of research techniques. The course includes an analysis of primary and/or secondary sources with a focus on critical reading, logical reasoning and academic research writing. (Prerequisite(s): Grade of “C” or better in ENGL 1415 Fundamentals of Writing 2 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 1) 4C/4/0/0

ENGL 1712 Composition 2
This course emphasizes critical reading and analytical writing using literature as the basis for composition. The course includes an analysis of primary and/or secondary sources with a focus on academic writing. (Prerequisite(s): Grade of “C” or better in ENGL 1711) (MnTC: Goals 1 & 2) 2C/2/0/0

ENGL 1730 Introduction to Technical Writing
Introduction to Technical Writing is a college-level, introductory course emphasizing workplace writing and communication useful in professional, business, and vocational/technical fields. There will be attention to clear, correct and effective writing necessary for success in the workplace. Assignments include internal and external communication, including e-mail, formal correspondence and memos, researched formal and informal reports, proposals and requests for proposals, instructions, writing for Internet publication, and production of an application packet. Students will be asked to consider audience analysis, usability, workplace writing ethics, and produce work appropriate for Internet publication. (MnTC: Goal 1) 3C/3/0/0

ENGL 1780 Recently—Arrived Contemporary Immigrant Literature
Some of the most compelling contemporary American literature has been written by first and second-generation immigrants to the United States. This course will cover a number of works that explore the difficult process of cultural adjustment for writers of various racial and ethnic groups. The course will cover the larger narrative of coming to America but also focus on particular literary, socio-cultural and historical issues. Students will discover how language and narrative strategies are employed by writers to create the stories of their lives: intergenerational conflicts, difficulties tied to language and the formation and re-formation of racial and ethnic identities as writers confront the demands of a new country and life. Immigration and naturalization laws at various moments in US history and how those laws have influenced contemporary literature will be discussed. (Recommendation(s): READ 0722 Reading 2 with a grade of “C” or better, ENGL 1415 Fundamentals of Writing 2 with a grade of “C” or better, or appropriate assessment score.) (MnTC: Goals 6 & 7) 3C/3/0/0

ENGL 1790 Contemporary Writers of Color
This course examines American literature as a multi-voiced body and considers the contributions to that body by writers of color. Under consideration are writings by Native American, Asian American, African American and Latino authors. Particular attention will be given to issues of race, gender, ethnicity, class and sexuality and how these issues are reflected in the complicated construction of identity. As a means of considering how various racial identities are constructed and expressed in literature, contemporary and recently-published work by writers from these groups will be read. In order to provide appropriate context for readings and discussions, the class will consider relevant cultural and social histories of these writers as well. (Recommendation(s): READ 0722 Reading 2 with a grade of “C” or better, ENGL 1415 Fundamentals of Writing 2 with a grade of “C” or better, or appropriate assessment score.) (MnTC: Goals 6 & 7) 3C/3/0/0

ENGL 2721 Survey of American Literature 1
A survey of American poetry, essays, novels and short stories from colonial times to the end of the Civil War. This course will help the student to discover the definitions of these distinctive genres, their unique boundaries and potential and what distinguishes them from other forms of writing. The historical, political and cultural background of the time will also be covered in this course, so that the student will find the readings to be more interesting and accessible. (Prerequisite(s): Grade of “C” or better in ENGL 1711) (MnTC: Goals 6 & 7) 3C/3/0/0

ENGL 2722 Survey of American Literature 2
A survey of American poetry, essays, novels and short stories from the end of the Civil War to the present. A continuation of Survey of American Literature I. This course will help the student to discover the definitions of these distinctive genres, their unique boundaries and potential and what distinguishes them from other forms of writing. The historical, political and cultural background of the time will also be covered in this course, so that the student will find the readings to be more interesting and accessible. While not a requirement, the student will find this course more enjoyable if he has first taken Survey of American Literature I. (Prerequisite(s): Grade of “C” or better in ENGL 1711) (MnTC: Goals 6 & 7) 3C/3/0/0

ENGL 2730 Post-Civil War American Novel
A study of the American novel after the Civil War. Beginning with Mark Twain’s Huckleberry Finn, this course seeks to discover the unique boundaries and potential of the American novel, what distinguishes it from other forms of literature and how the form changed as the American culture changed. The historical, political and cultural background of the time will also be covered in this course, so that the student will find the readings to be more interesting and accessible. (Prerequisite(s): Grade of “C” or better in ENGL 1711 Composition) (MnTC: Goals 2 & 6) 3C/3/0/0

ENGL 2732 Exploring the Short Story
This course will focus on analysis of short stories in the context of a genre, a theme, or an author. We will consider the short stories’ historical contexts, their critical commentary, and their cultural significance as reflected in the time periods in which they were written. We will discuss the themes and values expressed in these short stories and examine how they impact us as readers. (Prerequisite(s): Grade of “C” or better in ENGL 1711) (MnTC: Goals 2 & 6) 3C/3/0/0

ENGL 2740 Native American Literature
Through an analysis of structural and thematic elements, this course seeks to discover the unique additions that Native American writers have brought to the traditional literary canon. Special attention will be given to the historical and cultural aspects of the text. This course is designed to introduce the
English as a Second Language (ESOL)

ESOL 0806 Speaking/Listening Skills/ESL 3
Focuses on speaking and listening at the low intermediate level. Special emphasis is on listening skills including taking lecture notes and dictations. Students practice speaking by role playing routine situations, participating in structured discussions and making short presentations. (Prerequisite(s): Appropriate assessment score) 3C/2/1/0

ESOL 0807 Reading/Writing Skills/ESL 3
Focuses on reading and writing skills at the low intermediate level. Students will improve reading skills and learn to identify main ideas, make inferences and summarize. Special emphasis is on expanding vocabulary. Students also write paragraphs on a variety of topics. (Prerequisite(s): Appropriate assessment score) 3C/2/1/0

ESOL 0808 Low Intermediate Grammar
Covers basic grammar tenses including simple, progressive and perfect group tenses. Grammar structures will be practiced orally in group and pair work and through completion of exercises. (Prerequisite(s): Appropriate assessment score) 3C/3/0/0

ESOL 0809 Speaking/Listening Skills/ESL 4
Focuses on speaking and listening skills at the low intermediate level. Special emphasis is on improvement of oral/aural skills. Students study in the language lab listening to audio tapes, watching videos and working with a partner. Students will expand vocabulary, learn how to take lecture notes and make oral presentations. (Prerequisite(s): Appropriate assessment score) 3C/2/1/0

ESOL 0810 Reading/Writing Skills/ESL 4
Focuses on reading and writing skills at the low intermediate level. Students practice reading skills such as anticipating, skimming and outlining. They will use the following steps in writing effective paragraphs and short stories: prewriting, composing, editing, proof-reading and evaluating the final draft. Intermediate grammar structures will also be reinforced. (Prerequisite(s): Appropriate assessment score) 3C/2/1/0

ESOL 0811 Speaking/Listening Skills/ESL 5
Focuses on speaking and listening skills at the high intermediate level. Students work in the multimedia language laboratory. They listen to lectures, take notes, make presentations and participate in class discussions. (Prerequisite(s): Appropriate assessment score) 3C/2/1/0

ESOL 0812 Reading/Writing Skills/ESL 5
Focuses on reading and writing skills at the high intermediate level. Students will strengthen reading skills such as making inferences, skimming, paraphrasing, summarizing and identifying main ideas. Focus is on improving students’ ability to write effective paragraphs and essays. The writing process is reviewed. Students will develop or reinforce computer word processing skills. Critical thinking objectives will be integrated. (Prerequisite(s): Appropriate assessment score) 3C/2/1/0

ESOL 0813 High Intermediate Grammar
Covers such topics as comparisons, passive voice, adjective clauses, gerunds/infinities and others. Students do written and oral exercises, work in groups, participate in class discussions on the concept and form of grammar structures. (Prerequisite(s): Appropriate assessment score) 3C/3/0/0
ESOL 0814 Speaking/Listening Skills/ESL 6
Focuses on high intermediate level oral/aural skills. Students continue to practice conversations, give oral presentations and participate in group discussions. (Prerequisite(s): Appropriate assessment score) 3C/2/1/0

ESOL 0815 Reading/Writing Skills/ESL 6
Focuses on reading and writing skills at the high intermediate level. Students will be engaged in text analysis, vocabulary expansion, outlining and improving their reading speed. To improve writing abilities, students will continue to strengthen the skills needed in the essay writing process: prewriting, organizing, revising and editing. The essay writing process is reviewed. (Prerequisite(s): Appropriate assessment score.) 3C/2/1/0

ESOL 0820 Pronunciation and Articulation
This course is designed for ESL students who need to improve their pronunciation, articulation and intonation skills. The emphasis is on the technique of sound production, enunciation, rhythm, volume, pitch through modeling and extensive drilling. Students will reduce their accent and acquire more confidence when they speak. Students at any level are accepted, no prerequisites. 1C/0/1/0

ESOL 0832 Advanced ESL
This course focuses on reading and writing skills at an advanced level. Students will acquire new vocabulary, analyze text, develop critical thinking abilities, and work on reading comprehension. In writing, the focus will be on topic development and essay structure, as well as stylistic and grammatical accuracy. (Prerequisite(s): Appropriate assessment score or a grade of “C” or better in ESOL 0815) 4C/4/0/0

ESOL 0835 Advanced Speaking and Listening
This course focuses on speaking and listening for academic purposes. Students will improve aural comprehension skills by listening to academic lectures and taking notes. In speaking, students will improve fluency by participating in academic discussions, delivering presentations, and giving oral summaries of lectures and a variety of other media sources. Students will learn communicative strategies for the U.S. college classroom. Use of correct grammar, clear pronunciation and higher level vocabulary will be reinforced throughout the semester. (Prerequisite(s): Appropriate assessment score or completion of ESOL 0814 with a grade of “C” or better) 4C/4/0/0

ESOL 0840 ESL for Working Adults
This intermediate level ESL course is designed for working adults interested in improving their English skills. This course integrates all four skills with the emphasis on grammar and reading. Grammar concepts are introduced in context, and accuracy is developed through extensive oral and written exercises. The topics of study include themes of high interest. Students will also write short stories and make brief presentations related to the topics of study. This course is not part of the Intensive English Program. (Prerequisite(s): Appropriate assessment score) 3C/2/1/0

ESOL 1410 Advanced Grammar
This elective course provides advanced ESL learners with an opportunity to reinforce and expand the most complex concepts of English grammar. Grammar structures are introduced in various reading passages of great interest. Students will practice grammar in multiple oral, reading, and writing exercises. The purpose of this course is to improve the practical use of grammar in an academic setting.

ESOL 1445 Cosmetic Chemistry and Makeup Applications
Chemistry is a science that deals with the composition, structure and properties of matter and how matter changes. This course covers the composition of product ingredients, changes produced by cosmetic products, color theory, make up application techniques and temporary hair removal. (Prerequisite(s): CHSN 1410, CHSN 1420 or concurrent enrollment) 4C/2/2/0

ESOL 1455 Skin Analysis and Massage
Students will learn to greet customers and to consult in a professional manner. Students will learn to perform draping, skin analysis and proper massage techniques according to client’s skin type. Students will learn in a supervised setting, care and proper use of esthetic equipment. Emphasis is on maintaining safety. (Prerequisite(s): CHSN 1410 and CHSN 1420 or concurrent enrollment) 4C/2/2/0

ESTH 1465 Aromatherapy
Aromatherapy for the spa technician. This class will prepare the esthetician or massage therapist to use aromatherapy for wellness in the spa. This course also prepares those students interested in taking the CIDESCO Aromatherapy exam. 2C/1/1/0

ESTH 1551 Salon Operations for Estheticians 1
This course gives students additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in CHSN 1463) 1C/0/1/0

ESTH 1552 Salon Operations for Estheticians 2
This course gives students additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in CHSN 1463) 2C/0/2/0

ESTH 1553 Salon Operations for Estheticians 3
This course gives students additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in CHSN 1463) 3C/0/3/0

ESTH 1554 Salon Operations for Estheticians 4
This course gives students additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in CHSN 1463) 4C/0/4/0

ESTH 1555 Salon Operations for Estheticians 5
This course gives students additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in CHSN 1463) 5C/0/5/0

ESTH 1556 Salon Operations for Estheticians 6
This course gives students additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in CHSN 1463) 6C/0/6/0

ESTH 1585 Esthetics Refresher
This course offers the Minnesota Board of Barber and Cosmetology mandated refresher course for licensure requirements or to expand the cosmetologist's knowledge of the Esthetics field. Refresher students must complete 40 clock hours. Must present cosmetology or esthetician license to instructor. 2C/1/1/0
ESTH 1590 Esthetics Reactivation
This course offers the Minnesota Board of Barber and Cosmetology mandated reactivation course for licensure requirements or to expand the cosmetologist’s knowledge of the Esthetics field. This course includes preparation for the written law examination. Reactivation students must complete 60 clock hours. Must have a MN esthetician license that is inactive or expired by more than 3 years and must present it to the instructor. 3C/2/1/0

ESTH 2410 CIDESCO Exam Student Preparation
The CIDESCO Pre exam class will prepare the CIDESCO student candidate for all aspects of the CIDESCO exam including the facial exam, the body exam, additional subjects and the written exam. (Prerequisite(s): Completion of CIDESCO curriculum) 4C/0/4/0

ESTH 2430 Minnesota Cosmetology Instructor Renewal
This course will meet the licensing renewal requirement of the Minnesota Board of Barber and Cosmetology for Instructor license renewal. It consists of 15 hours of hands-on learning in program clinic, 15 hours of teaching methods in theory classrooms and 15 hours analysis and product knowledge in ESTH 1455 Skin Analysis and Massage and ESTH 1445 Cosmetic Chemistry. 2C/0/2/0

ESTH 2540 Introduction to Skin Histology and Professional Esthetics Skin Peels
Introduction to the histology of the skin and the effects of Chemical Peeling. 2C/1/1/0

ESTH 2542 Chemical Peels and Skin Histology
Advanced skin analysis based on genetic skin types and environmental factors and the effects of peeling the skin. 2C/1/1/0

Floor Covering

FLRC 1400 Introduction to Floor Covering
Provides a general overview of the floor covering trade and is intended only for Twin City Floor Coverers JATC. It is to be used as an entry-level course to acquaint the apprentice with all facets of the trade. 2C/1/1/0

FLRC 1410 Floor Covering Trade Math
A basic math course for the beginning floor covering apprentice. The emphasis and focus of this course will be measuring, estimating and layout of floors. It will be taught in conjunction with FLRC 1421. (Prerequisite(s): Apprentice in the floor covering trade) 1C/1/0/0

FLRC 1421 Carpet Installation & Safety 1
Covers beginning installation of carpeting. (Prerequisite(s): Apprentice in the floor covering trade) 2C/1/1/0

FLRC 1431 Vinyl Installation & Safety 1
Covers beginning installation and techniques for vinyl floor covering. The emphasis will be on substrate identification, product identification, reasons, needs and techniques of floor prep and Roto product installation systems. Roto vinyl will be installed in the practice facilities. (Prerequisite(s): Apprentice in the floor covering trade) 2C/1/1/0

FLRC 1440 Floor Covering Blueprint Reading
Provides an understanding of job description prints for the floor covering field. This course is taught in conjunction with FLRC 1431. (Prerequisite(s): Apprentice in the floor covering trade and all first year FLRC courses or the equivalent) 1C/0/1/0

FLRC 1510 Floor Covering Customer Relations
Covers basic relationships between floor covering professional installers and customers. Expression of job knowledge, appearance, courtesy and self-selling will be emphasized. This course will be taught in conjunction with FLRC 1522. 1C/0/1/0

FLRC 1522 Carpet Installation & Safety 2
Covers advanced carpet installation techniques. Upholstery, capping, hand sewing and insert work will be performed. (Prerequisite(s): FLRC 1421) 3C/1/2/0

FLRC 1532 Vinyl Installation & Safety 2
Covers intermediate vinyl installation techniques. Sub-floor preparation will be performed. Emphasis will be placed on product identification and product installation systems. Vinyl will be installed in the practice facility with emphasis on basic safety procedures. (Prerequisite(s): FLRC 1431) 3C/1/2/0

FLRC 2410 Introduction to Laminates & Hardwood Floors
Covers basic laminate installation of countertops and back splashes plus flat floor installation of pre-finished wood parquet and various types of pre-finished wood plank and laminate floors. (Prerequisite(s): FLRC 1400-1532 or equivalent) 3C/1/2/0

FLRC 2420 Introduction to Power Tool Safety
Covers application of assorted power tools common to the Floor covering trade and their safe application and use. (Prerequisite(s): FLRC 1422-2410 or equivalent) 2C/1/1/0

FLRC 2430 Installation Specialties & Safety
Focuses on inlaid vinyl and carpet inlaid design installation. Job site tool production and special installation methods will be covered. (Prerequisite(s): FLRC 1421, FLRC 1431, FLRC 1522, FLRC 1532) 3C/1/2/0

FLRC 2510 Advanced Floor Covering
General overview of the floor covering trade and the course is used as a testing tool of apprentice trade knowledge. 3C/1/2/0

Geography

GEOG 1700 Physical Geography
This course introduces students to the physical systems and features of the earth. It covers the distribution of and the processes influencing world patterns of climate, vegetation, and land forms. The class also focuses on the influence of human activities on environmental systems. (MnTC: Goals 5 & 10) 3C/3/0/0

GEOG 1720 Human/Cultural Geography
This course covers the geographic study of the world cultural areas. Topics include: world population growth, distributions, migrations, characteristics, cultural geography (patterns of language and religion, folk customs, globalization of popular culture), global economic activity and development, and political organization of the world (evolution of states, territorial conflicts). Case studies from many parts of the world will be analyzed and key geographic concepts will be reviewed. (MnTC: Goals 5 & 8) 3C/3/0/0
GEOG 1730 Global Economic Geography
Combining lecture and hands-on experience, this course studies how humans earn their living in different locations throughout the world and then investigates the patterns and processes reflected in this geographic variation. Through theoretical location models and empirical spatial analysis, economic geography attempts to explain the variations in economic phenomena from place to place by focusing on the production, distribution, exchange and consumption activities. (MnTC: Goals 5 & 8) 3C/3/0/0

GEOG 1740 World Geography
This course covers the geographic study of the world including physical systems, features, and world cultural areas. Topics include physical systems, features, world populations, cultural geography, global economic activity and development, and the political organization of the world. (MnTC: Goals 5 & 8) 3C/3/0/0

GEOG 1750 Minnesota Geography
In this course, students will explore Minnesota’s regions. Topics covered include: people (culture, settlement patterns, and migrations), the physical landscapes (glacial landforms, soils, and waterways), land use (agriculture, manufacturing, urbanization, etc.) geopolitical issues, as well as economics. (MnTC: Goals 5 & 10) 3C/3/0/0

Health

HLTH 1410 Medical Terminology
Students recognize and build medical terms after learning the meaning of word parts. A computer lab may be utilized to review terminology and provide practice in word building. (Prerequisite(s): READ 0722 with a grade of “C” or better or appropriate assessment score) 1C/0/1/0

HLTH 1415 Success Strategies for Health Care Providers
This course assists the health program student in meeting basic skills in critical thinking, problem solving, test taking and comprehension as they apply to health care. This course is designed to help the student who is seeking to improve critical thinking skills in health care or who must complete required remediation within a health program. 2C/2/0/0

HLTH 1417 Somatic Practitioner: Business and Ethics
In this course, students will be introduced to different types of business and ethical standards in the somatic industries of massage therapy, personal training, esthetics and wellness in the massage therapy industry and basic aspects of a business plan. Topics include scope of practice, certifications, legal requirements, equipment options, charting, time management skills and payment tracking methods. Principles of professional ethics and interactions with clients are integrated throughout the course. (Prerequisite(s): Declared major in Massage Therapy, Reflexology or Personal Trainer major) 3C/2/1/0

HLTH 1420 Anatomy & Physiology
Assists the student to acquire basic knowledge of body structure and function. Emphasis is on the healthy body. The content in this course prepares the student to understand common diseases. (Prerequisite(s): HLTH 1410 concurrent enrollment recommended) 4C/4/0/0

HLTH 1425 Clinical Applications in Kinesiology
This is a course in the applied study of human movement. Students will study muscles of the body, origin and insertion sites, nerve innervation, associated bones and bony landmarks and action. Students will investigate planes of movement, types of joints, discuss directions and positions of the human body and perform basic structural assessment. Adhesions and Trigger Points will be discussed and palpated. This course will also look at the theory and practice of functional muscle testing. (Recommended: HLTH 1420 Anatomy & Physiology. Also, physical ability to palpate the human body and willingness to view selected Human Cadaver videos are recommended.) 3C/3/0/0

HLTH 1430 CPR/First Aid
Includes training in administration of cardiopulmonary resuscitation and basic first aid skills. Lecture material will include anatomy and physiology of the heart and lungs, universal blood and body fluid precautions, AIDS and common medical emergencies. Course certificates for CPR and first aid will be issued upon successful completion. 1C/1/0/0

HLTH 1432 CPR for the Professional
This is course “C” American Heart Association or American Red Cross CPR for the Professional. Skills are demonstrated for basic life support including 2 rescuer techniques. AED training provided. Theory is presented related to heart disease prevention. Course certificate will be issued upon successful completion. 1C/1/0/0

HLTH 1435 Yoga Postures/Asanas
Creating a yoga practice increases mental clarity, energy and vitality in daily life. This course presents yoga principles and postures called asanas which provide a workout that enhances strength, flexibility and balance. The student will create a series of poses that massages the internal organs, improves circulation, digestive functions and other body processes. Students will study an overview of the many health benefits through yoga practice. (Prerequisite(s): Discuss health limitations with the instructor. Details provided during the first class session.) 2C/1/1/0

HLTH 1456 Yoga Relaxation Techniques
This course is designed as an interdisciplinary course of study to support and encourage professional collaboration within Health careers. The focus of the course is on the application of relaxation techniques and theoretical frameworks to assess and manage the impact of stress on everyday life. In this respect, this course presents new knowledge that will be applicable to the students in health studies, and massage. Inclusion of specific relaxation techniques that address stress and pain management strategies will be included in this curriculum. 2C/1/1/0

HLTH 1457 Yoga Postures 2
This course continues the study of yoga principles and postures. The student will refine the poses that massage the internal organs, improve circulation, digestive functions and other body processes. (Prerequisite(s): HLTH 1455 Yoga Postures/Asanas) 2C/1/1/0

HLTH 1460 Nutrition for the Health Professions
Helps the student develop an understanding of the fundamental principles of nutrition necessary to improve and maintain health, to prevent illness and to provide support and therapy during illness. (Grade of “C” or better in HLTH 1410 and HLTH 1420 is recommended) 2C/2/0/0

HLTH 1465 Functional Holistic Nutrition
This course focuses on developing knowledge of healthy nutrition for the individual, suggesting healthy nutrition for
clientele, and optimizing the body’s health and performance via supplementation and a whole foods diet. This class includes an evaluation of one’s personal nutrition status and the various therapeutic properties of whole foods and supplements. Exploration of appropriate supplementation and sources of supplements will be performed. Actual preparation of fast and simple meals that are of whole food origin will conclude this course. (Prerequisite(s): BIOL 1760 or HLTH 1460.) 4C/2/2/0

HLTH 1470 Wellness through the Lifespan
Provides the student with concepts of wellness and the mind/body connection throughout the human lifespan. This course focuses on the promotion of wellness, stress reduction, and integrative healthcare services involved in the progressive stages of physical, emotional, intellectual and social development throughout the lifespan. 4C/3/1/0

HLTH 1485 Therapeutic Exercise
The focus of this course is the management of common soft tissue injuries through inhibitory techniques, bracing, taping, advanced stretching and corrective exercise techniques. Adaptive exercise for special populations such as geriatrics and pregnancy will also be discussed. (Prerequisite(s): HLTH 1425, PTRN 1410 recommended. Must be enrolled in the Massage Therapy or Personal Trainer program.) 3C/0/5/0

HLTH 1540 Introduction to Techniques for the Yoga Instructor
Practice of proper techniques of asanas, parayamas, kriyas, chanting, mantra, meditation and other traditional yoga techniques. These hours must be a mix between analytical training, how to teach and practice techniques and guided practice of the techniques themselves. 3C/1/2/0

HLTH 1542 Teaching Methodology for the Yoga Instructor
Includes principles of demonstration, observation, assisting/correcting instruction, teaching styles, learning styles, qualities of a teacher and the business aspect of teaching yoga. Will include practicum of practice teaching, receiving feedback, observation of others and assisting while others teach. 3C/2/1/0

HLTH 1560 Internship for the Yoga Instructor Course
These hours are to be distributed on an individual basis among the categories as determined by the Instructor. 3C/0/0/3

HLTH 1900 Pathology for the Somatic Practitioner
This course is designed to teach the study of deviations from normal anatomy and physiology as well as basic pharmacology. Students will examine injury and disease related conditions most likely to be encountered in a somatic practice. Special attention is given to signs and symptoms, indications and contraindications of treatment methods, as well as instruction related to skin, neuromuscular and soft tissue conditions. Basic pharmacology will be examined along with drug/supplement interactions. (Recommendation(s): HLTH 1420) 4C/3/1/0

■ Health Unit Coordinator

HLUC 1410 Diagnostic & Therapeutic Procedures
Designed to acquaint the student with the patient’s chart and doctor’s orders for treatments, medications, diagnostic tests and medical procedures. The information presented provides knowledge essential for the processing of physician orders. 4C/4/0/0

HLUC 1420 Health Unit Coordinator Fundamentals
Introduces the student to the health care facility environment and procedures. Students will become acquainted with their role in the health care setting, including ethical and legal standards, customer relations, telephone and communication techniques, problem solving, medical terminology, basic human structure, diseases and disorders. 4C/4/0/0

HLUC 1510 Processing Physicians’ Orders 1
Designed to develop student skills in reading and processing physicians’ orders. Students will be given hands-on applications in the processing of physicians’ orders. It will include procedures for processing of orders related to patient diets, supplies, treatments, activities, nursing observations and medications. Computer use in the processing of physicians’ orders will be introduced. (This course must be taken in the semester immediately preceding internship.) (Prerequisite(s) or Co-Requisite(s): HLUC 1410, HLUC 1420) 3C/2/1/0

HLUC 1511 Processing Physicians’ Orders 2
Designed to give the students hands-on applications in the processing of physicians’ orders. Students will be given sets of handwritten and routine orders which they will read, interpret and process. The student will be introduced to more difficult orders than were introduced in HLUC 1510. (This course must be taken in the same semester as HLUC 1510 and the semester immediately preceding internship.) (Prerequisite(s) or Co-Requisite(s): HLUC 1410 and HLUC 1420; Prerequisite(s): HLUC 1510) 3C/1/2/0

HLUC 2491 Health Unit Coordinator Internship
This is a cooperative training program with a community health care facility. The student will complete 120 hours of experience at the internship facility. Students will be required to fill out a background study and submit a current immunization record. (Prerequisite(s): Completion of all HLUC courses with a “C” or better and instructor approval) 3C/0/0/3

■ History

HIST 1730 Contemporary World History
This course surveys Contemporary World History, from the end of World War II to the present with a focus on Europe, Asia, Africa, Latin America and the Middle East. Significant forces, ideas, events and people that have influenced the world since 1945 are studied while course themes highlight how and why events transpired and created change in people’s lives. Historical events are studied to provide an appreciation for their influence on contemporary society and the implications they may hold for the future. (Recommendation(s): READ 0721 with a grade of “C” or better or concurrent enrollment or appropriate assessment score.) (MnTC: Goals 5 & 8) 3C/3/0/0

HIST 1745 U.S. History to 1865
This course surveys the political and social history of America from the seventeenth century to the end of the Civil War. The interaction of Europeans, Native Americans, and Africans through the Colonial Era, the American Revolution, and the Early Republic will be discussed. Topics covered also include Jacksonian Democracy, westward expansion, the role of women in the nineteenth century, nineteenth century immigration, and the controversy over slavery. (Recommendation(s): READ 0721 with a grade of “C” or better or concurrent enrollment or appropriate assessment score.) (MnTC: Goals 5 & 7) 4C/4/0/0
HIST 1746 U.S. History Since 1865
This course surveys the political and social history of America from the end of the Civil War to the present. Topics covered include Reconstruction and racial segregation in the South, the Gilded Age and Progressive Era, the Great Depression of the 1930s, World Wars I and II, the war in Vietnam, the Civil Rights Movement, and social movements of the 1960s. Throughout the course the roles of women, immigrants, and people of color will be discussed. (Recommendation(s): READ 0721 with a grade of “C” or better or concurrent enrollment or appropriate assessment score.) (MnTC: Goals 5 & 7) 3C/3/0/0

HIST 1750 Minnesota History
This course surveys Minnesota’s historical development from the pre-Columbian period to the present. It focuses on the historic importance of Minnesota’s geography and natural resources, American Indian-white relations, the development of Minnesota’s unique political tradition and the emergence of Minnesota’s diverse society and economy. Course readings, videos and class discussions are supplemented by visits to metro-area historic sites and the Minnesota Historical Society’s History Center. In addition, students are exposed to the tools and techniques historians use to study the past as a part of completing research projects. (Recommendation(s): READ 0721 with a grade of “C” or better or concurrent enrollment or appropriate assessment score.) (MnTC: Goals 5 & 10) 3C/3/0/0

HIST 1760 History of World Civilizations to 1500
This course surveys world history from the first civilizations to 1500 C.E. Course themes focus on political, ideological, economic, social, cultural, religious, technological and environmental developments in Africa, Eurasia and the Americas. (Recommendation(s): READ 0721 with a grade of “C” or better or concurrent enrollment or appropriate assessment score.) (MnTC: Goals 5 & 8) 3C/3/0/0

HIST 1761 History of World Civilizations since 1500
This course surveys world history from 1500 C.E. to the present. Course themes focus on political, ideological, economic, social, cultural, religious, technological and environmental developments in Africa, Eurasia and the Americas. Special focus is given to global factors that allowed the West to exercise significant influence over the development of Africa, Asia and the Americas. (Recommendation(s): READ 0721 with a grade of “C” or better or concurrent enrollment or appropriate assessment score.) (MnTC: Goals 5 & 8) 3C/3/0/0

HIST 1770 History of Women in the United States
This course explores the history of women in the United States from the colonial period to the present. Within this chronological framework, the course examines how women understood their lives as individuals and as members of families and communities. The course also explores strategies through which women of diverse races, classes, and ethnicities struggled to control their own lives and identities. Special focus is given to how ideologies of gender, race, class and sexuality framed American society and culture. (Recommendation(s): READ 0721 with a grade of “C” or better or concurrent enrollment or appropriate assessment score.) (MnTC: Goals 5 & 9) 3C/3/0/0

HIST 1774 Immigration and Ethnic History of the United States
This course surveys the experiences of immigrant groups and ethnic minorities within the United States from the colonial period to the present. The experiences of American Indians and immigrant groups from Europe, Africa, Asia and Latin America are explored and their contributions to a multi-cultural America are discussed. Additional course themes include: slavery and its legacies, US government American Indian policy and US government immigration policy. (Recommendation(s): READ 0721 with a grade of “C” or better or concurrent enrollment or appropriate assessment score.) (MnTC: Goals 5 & 9) 3C/3/0/0

HIST 2780 Special Topics in History
This course explores special topics in history not offered in other standard history courses. Topics will vary and provide learning experiences that meet the needs of students and pre-major course requirements in history. Credits will vary by semester between 1 and 3. (Prerequisite(s): READ 0721 with a grade of “C” or better or concurrent enrollment or appropriate assessment score.) (MnTC: Goals 5 & 7) Variable 1-3 credits

Hospitality and Entertainment Management

HSPM 1410 Introduction to Hospitality Management
This course provides an orientation to the hospitality industry. This includes an introduction to the structure of lodging, food service and tourism organizations, the role of lodging departments, the future of the industry and career opportunities. Course structure includes lecture, projects, discussion and guest speakers to learn about opportunities and trends. 3C/3/0/0

HSPM 1420 Introduction to Tourism
This course explores the travel and tourism industry. Students will examine growth trends that include best travel options and working with foreign cultures and currencies. 3C/3/0/0

HSPM 1430 Introduction to Sports Management
This introductory course will provide an overview of the business of sports. Topics include sponsorships, game administration, and stadium and arena operations. Emphasis will be placed on the principles of management and marketing and exploration of career opportunities. 3C/3/0/0

HSPM 1440 Event Management and Planning
This course will provide an overview of Event Management. Topics include identifying the purpose of special events, planning timelines, organization, managing volunteers, evaluation, invitations and logistics. Emphasis will be placed on the principles of management and marketing and how they apply in event planning. Career opportunities in event planning will also be explored. 3C/3/0/0

HSPM 2410 Entertainment Management
An introductory course in the management of the entertainment industry. This course will explore the world of entertainment including: music, theater, and all areas of the performing and visual arts. Students will examine how the arts industry uses the principles of management to operate a successful entertainment organization. 3C/3/0/0

HSPM 2420 Hotel and Lodging Operations
This course provides students the key principles in the lodging industry, focusing on strategic planning as the foundation for operation effectiveness. 3C/3/0/0
HSPM 2440 Hospitality Marketing & Sales
This course provides principles and practices of marketing the services of the hospitality industry. Emphasis includes the marketing concept with applications leading to customer satisfaction. Review methods of external and internal stimulation of sales. 3C/3/0/0

HSPM 2472 Management of Youth Sports, Recreation and Fitness
This course utilizes and applies the functions of management (organize, plan, lead and measure) to youth sports, programs, recreation and fitness centers. Topics include youth sports programming, camps, and coaching, scheduling, recreation and fitness center operations. 3C/3/0/0

HSPM 2476 Sports Marketing and Promotions
This course examines the application of the principles of marketing to the sports and entertainment fields. This includes the marketing of sports organizations as well as how corporations and other organizations utilize the sports and entertainment industry to market and build customer relationships. Topics include sponsorship packages, ticket sales, media relations, luxury box and suite sales and special promotions. 3C/3/0/0

HSPM 2478 Sports Facilities Management
This course applies the functions of management to operating sports and recreation facilities. A variety of venues will be explored including arenas, stadiums, fitness centers, playing fields and golf courses. Topics include facility design, maintenance, security, budget and financial management. 3C/3/0/0

HSPM 2591 Hospitality, Sports and Entertainment Management Internship
This course provides students the hands-on opportunity to work in the hospitality industry. Variable 1-3 credits

Human Resources

HMRS 1400 Human Resource Management
Covers an introduction to the basic principles of Human Resource functions and services. It will provide background and understanding for further Human Resources courses in the Human Resource Program. 3C/3/0/0

HMRS 1490 Talent Management
This course provides students with a basic understanding of the employment and staffing functions in an organization. Attention will be devoted to the recruitment process, effective interviewing, applicant evaluation techniques, legal requirements, reference checking, and new employee orientation. This course also covers basic information about the training and development functions in an organization and its role in building an effective workforce. Students study effective training techniques including needs assessments, transfer of training, training evaluation, training methods, technology in training, and employee development issues. Students will be expected to develop and deliver a training session. 3C/3/0/0

HMRS 1510 Human Resources Information Systems and Records
Covers the basic information and understanding of types of Human Resource records, employers’ information needs, and government recordkeeping/reporting needs. It also includes an introduction to various HRIS software programs, with hands-on applications. 3C/2/1/0

HMRS 1520 Compensation and Benefits Administration
Covers basic information about various types of benefits that are typically offered by employers. The course covers mandatory government benefits and voluntary benefits. Also included is information about employee compensation and related federal laws. 3C/3/0/0

HMRS 1550 Strategic Human Resources
This course explores the strategic role that HR professionals have within an organization. Students will explore various HR functions and learn how to turn them into strategic business solutions by using critical thinking and problem solving strategies. Students will also look at how trends in HR outsourcing are used as an HR strategy. 3C/3/0/0

HMRS 2410 Employee/Labor Relations
This course focuses on employee relations techniques such as: coaching, mentoring, performance management, employee discipline, workplace violence prevention, employee crisis management and effective communication including gender and generational communication in the workplace. Also covered are the labor relations issues that supervisors need to deal with on a daily basis when working in a union environment. 3C/3/0/0

HMRS 2420 Employment Law & HR Policies
Provides students with an understanding of EEO legislation and other federal laws relating to employment and the impact of these laws on an organization. Students will also study the emerging legal issues facing today’s Human Resource Departments. The course will also define the needs for HR policies and the development of a variety of policies. 3C/3/0/0

HMRS 2591 Human Resource Internship
Designed to provide the student with a purposeful occupational experience in the Human Resource field. Each internship is an individualized experience. A training plan is created for each student in conjunction with the training site to provide experience related to the skills and knowledge acquired in the program. (Prerequisite(s): Advisor approval) Variable 3–6 credits

Humanities

HUMA 1710 The Art of Being Human: An Introduction to Humanities
This course introduces themes central to human existence, from ancient times to the present. The themes are interpreted through art, music, literature, drama, film and philosophy. This course serves as an introduction to writing, art and ideas conceived throughout history. (MnTC: Goals 6 & 8) 4C/4/0/0

HUMA 1720 The Ancient and Medieval World
This course introduces students to the global humanities and shows the relationship between the culture of the past and life in the present. The course includes an examination of written works, art, architecture and music from Greece, Rome, the Middle Ages and the Renaissance. Texts, materials and interdisciplinary assignments will examine the arts and ideas of the West in relation to those of the other world cultures, including India, East Asia, Africa and Native America. (MnTC: Goals 6 & 8) 4C/4/0/0
HUMA 1730 The Modern World
This course introduces students to the global humanities and shows the relationship between the culture of the past and life in the present. The course includes an examination of written works, art, architecture and music from the Modern World (roughly the 16th Century to the Present). Texts, materials and interdisciplinary assignments will examine the arts and ideas of the West in relation to those of the other world cultures, including India, East Asia, Africa and Native America. (MnTC: Goals 6 & 8) 4C/4/0/0

HUMA 1750 Culture and Civilization: Spanish-Speaking Cultures
Taught in English, this course introduces students to the mosaic of qualities that make up the culture and civilization of Spanish-speaking people of the Americas, Spain and elsewhere across the globe. To provide students with an awareness of the cultural, social, religious and linguistic values of Spanish speaking cultures, multi-media resources (Internet, music, video) will be used to illustrate course topics including the arts, literature and history. This course may include guest speakers and visits to local Latino/Hispanic cultural centers. (MnTC: Goals 6 & 8) 3C/3/0/0

HUMA 1770 The Art of Film
This course is an introduction to film as an art form and as a medium for portraying ideas, myths, human concerns and aesthetic principles. The course includes an examination of film techniques, film theories and artistic styles of films such as formalism, surrealism, expressionism and neorealism. (MnTC: Goals 6 & 7) 3C/3/0/0

HUMA 1780 American Film
Students will be introduced to American film as an art form and as a medium of cultural communication. The course is designed to improve “visual literacy” and to cultivate an ability to deal with film in an intelligent and critical way. The works of Edison, Porter, Griffith, Keaton, Chaplin, Ford, Capra, Welles, and Hitchcock are examples of works to be studied. The course will offer representative examples of the major film genres and styles including comedy, the western, film noir, and others. (MnTC: Goals 6 & 7) 3C/3/0/0

HUMA 1790 International Film
A study of film as an art form and as a means of cultural communication from an international perspective. The course is designed to cultivate an ability to deal with film in a critical way, as well as broaden understanding of film and culture in a global context. Each semester a variety of national cinematic traditions will be examined including film works from Europe, Eastern Europe, Japan, Australia, New Zealand, China, Latin America and Canada. (MnTC: Goals 6 & 8) 3C/3/0/0

Industrial Machine Maintenance

INMM 1510 Lubrication/Bearings/Couplings
Covers basic principles of lubrication, types of bearings, methods of installation, common types of coupling devices found in modern manufacturing and how they should be maintained. 3C/1/2/0

INMM 2520 Gears/Chains/V Belts/Rigging
This course is an introduction to the common types of gearing used in industry, the operation, maintenance and repair of gear reducers. Types of v-belts and drive chains, their maintenance and alignment, as well as safe rigging procedures used in industrial machine repair applications. 3C/1/2/0

■ Interdisciplinary Women and Gender Studies

INTS 1785 Foundations in Women Studies
This course serves as an introduction to the field of women's and gender studies. Using an interdisciplinary approach, the course examines the conditions and circumstances affecting the lives of (primarily) women in the United States. The course explores the roles that women play in society, with careful attention to the ideas and factors that shape those roles. Students will examine how ideas about gender (as well as race, ethnicity, social class, sexual orientation, physical ability and age) are informed by institutions, by cultural beliefs, and by social practices. Throughout the course, emphasis is placed on the diversity of women's experience in the contemporary United States and the connections to women worldwide. (MnTC Goals: 5 & 9) 3C/3/0/0

INTS 1797 Honors Special Topics
In this course a variety of strategies will be used to provide an in-depth study of the Phi Theta Kappa Honors Topic and leadership development for work and life roles. (Prerequisite(s): GPA of 3.5, PTK member, Honors program member or instructor permission.) Variable 1-4 Credits

INTS 1798 Honors Colloquy
Students in this course will study the current Phi Theta Kappa Honors through speakers, discussion sessions, reaction papers and student projects. Students will discuss current issues and related topics. The course may be repeated for credit. (Prerequisite(s): GPA of 3.5, PTK member, Honors program member or instructor permission.) 1C/1/0/0

INTS 1799 Honors Seminar
In this course students will discuss the current Phi Theta Kappa Honors Topic and explore the content using a variety of applications, technology and strategies. Current issues and related topics will be addressed. The course may be repeated for credit. (Prerequisite(s): GPA of 3.5, PTK member, Honors program member or instructor permission.) 1C/1/0/0

■ International Trade

INTL 1400 Introduction to International Business
Introduces the student to the general field of international business. Study will cover foreign investments, cultural differences, impact of trade agreements, international payments, logistics, taxation and personnel issues. This course provides the foundation for other International Trade courses. 3C/3/0/0

INTL 1410 International Communications and Cultural Awareness
Covers potential problems in the international transaction due to language, and cultural differences. Both written and oral issues will be discussed. In addition, the areas of social and business habits that are different from one country to another will be covered. An understanding of these various needs will help ease the international transaction. 3C/3/0/0

INTL 1510 Export Shipping and Documentation
Introduces students to the flow of merchandise in an international trade transaction using various modes of transportation, routing, paperwork, regulations and incoterms. The principle documents that must be prepared for shipments will be analyzed and created. Information will include the
INTP 1420 U.S. Customs and Importing
Provides students with the basic knowledge needed for customs clearance. This includes classification of products using the harmonized system, understanding import regulations, marking rules, preparing entry documentation, learning various types of entries and special provisions. This course will help prepare the student to take the U.S. Customs Broker exam. Import compliance issues will also be discussed. 3C/3/0/0

INTL 2497 International Trade Special Projects
The intent of this course is to allow flexibility in providing learning experiences to meet a special need of the student, the major program and the College. (Prerequisite(s): Instructor approval) Variable 1–3 lab credits

INTL 2520 International Business Law
Designed to be a basic course covering the law and practice of international trade, licensing and investment. The student will be introduced to the risks of international business and examine how those risks differ from doing business domestically. The student will study the function and importance of international public law, the role of international organizations and private dispute settlement procedures. Emphasis will be placed on the legal changes taking place, which affect the European market. Students will examine the constitutional division of authority between the Congress and the President with regard to the regulation of foreign trade. The course also covers the regulation of the international marketplace, including the law of foreign licensing and investment. 3C/3/0/0

INTL 2530 International Marketing
Study marketing from the international point of view. Topics include how and where to find new international customers, evaluating the needs of international customers, and keeping these customers happy while bringing a profit to the company. Also included are the fundamentals of selling, advertising, the effect of cultural differences on selling and advertising procedures, and techniques of closing the sale. 3C/3/0/0

INTP 1440 Orientation to Interpreting
This course introduces students to the profession of sign language interpreting. It covers the history of interpreting as a field of professional practice, the required professional ethical and performance standards, the impact of legislation on the field, the phenomena of cross cultural dynamics, oppression of minority groups and the role of an interpreter as a cultural mediator. (Prerequisite(s): Acceptance into the Sign Language Interpreter/Transliterator Program) 3C/3/0/0

INTP 1465 Special Topics
A variable credit granting course in the area of interpreting/transliterating, American Sign Language, specific sign forms, linguistic skills, Deaf Culture or a related area, which is designed to meet the needs of specific groups of students. Each course is designed and accepted based on a written syllabus outlining the objectives and procedures for delivery. Variable 1–5 credits

INTP 1511 Interpreting Process
This course introduces students to the theory and application of the interpreting process. Application of interpreting process skills occurs through consecutive interpretation. The goal of the course is to develop cognitive processing skills involved in the interpreting process. (Prerequisite(s): Acceptance into the Sign Language Interpreter/Transliterator Program and ASLS 1420 with a grade of “C” or better or taken concurrently with ASLS 1420) 3C/3/0/0

INTP 1512 Consecutive Interpreting 1
This course develops consecutive interpreting skills introduced in INTP 1511 and prepares students for the simultaneous interpreting process. Students compare American Sign Language and English semantic/syntactic structures to the consecutive interpreting process. Focus in this course will be on text translation, vocabulary expansion and interpreting process skill development. (Prerequisite(s): Grade of “C” or better in ASLS 1420 and INTP 1511) 4C/2/0/0

INTP 1513 Consecutive Interpreting 2
This course builds upon Consecutive Interpreting skills to prepare students for the simultaneous interpreting process. Students will analyze and compare more complex American Sign Language and English texts in order to prepare for the simultaneous interpreting task. (Prerequisite(s): Grade of “C” or better in ASLS 1430 and INTP 1512) 2C/2/0/0

INTP 2411 Sign to Voice Interpreting 1
Focuses on the process of interpretation, provides practice of requisite skills and process tasks and applies skills and theory to the translation process. The course of study focuses on lexical development, syntactical language comparisons, voice production techniques, text/discourse/interpreting process analysis, semantic mapping and diagnostic assessment. (Prerequisite(s): INTP 1513 with a “C” or better) 4C/1/3/0

INTP 2412 Sign to Voice Interpreting 2
Provides students with additional practice in specific skill areas related to sign-to-voice interpretation. Text/discourse/process analysis, lexical and syntactic development, voice production techniques for simultaneous sign-to-voice interpretation will be the focus. Course content is at an intermediate to advanced level of speed and complexity. Students will work primarily from videotaped language models. (Prerequisite(s): INTP 2411 with a grade of “C” or better) 2C/1/1/0

INTP 2421 Voice to Sign Interpreting 1
Provides students techniques for translating the source language English to the target language American Sign Language (ASL) in simultaneous manner. (Prerequisite(s): Grade of “C” or better in INTP 1513) 4C/1/3/0

INTP 2422 Voice to Sign Interpreting 2
Provides students with additional practice in specific skill areas related to voice-to-sign interpretation. Text/discourse/process analysis, lexical and syntactic development, voice production techniques for simultaneous voice-to-sign interpretation will be the focus. Course content is at an intermediate to advanced level of speed and complexity. Students will work primarily from videotaped language models. (Prerequisite(s): INTP 2421 with a grade of “C” or better) 2C/1/1/0
INTP 2422 Voice to Sign Interpreting 2
This course allows students to continue practicing rendering the target language (ASL) from the source language (English) simultaneously. It also provides preparation for Internship. Continued emphasis and focus is on appropriate uses of lexical and syntactic principles and non-manual behaviors of ASL. (Prerequisite(s): Completion of INTP 2421 with grade of “C” or better) 2C/1/1/0

INTP 2431 Transliterating 1
This course covers the process of Transliteration (changing a message expressed in spoken English into a coded form of the language). The process moves along a continuum from Contact Language to a signed form of English. Specific subtasks are isolated in order to focus on transliterating skill development, enhancing component skills and incorporating ASL features. These skills are integrated into the performance of beginning to intermediate tasks. (Prerequisite(s): Grade of “C” or better in INTP 1513) 4C/1/3/0

INTP 2432 Transliterating 2
This course expands the process of visually representing English. Students will focus on the expansion and enhancement of transliterating skills at the English end of the ASL-English continuum. Students will incorporate ASL features into intermediate to advanced level texts presented in a simultaneous mode. (Prerequisite(s): Grade of “C” or better in INTP 2431) 2C/1/1/0

INTP 2450 Deaf/Blind Interpreting
Provides students with a working knowledge of the requirements, skills and communication techniques needed to interact and/or interpret with consumers who are Deaf/Blind. (Prerequisite(s): INTP 2411, INTP 2421, INTP 2431) 2C/2/0/0

INTP 2510 Educational Interpreting
This course is an overview of the field of educational interpreting. It covers educational interpreter roles, responsibilities, ethics and techniques. Students will examine language usage, communication processes and case studies. This knowledge will be applied to interpreting for consumers in preschool through post-secondary settings. (Prerequisite(s): Grade of “C” or better in INTP 1513) 4C/2/2/0

INTP 2550 Community Resources Seminar
This course introduces students to the agencies, organizations and institutions that serve and/or are run by Deaf, Hard-of-Hearing and Deaf/Blind people throughout Minnesota and western Wisconsin. Students will familiarize themselves with these resources through research in the community. (Prerequisite(s): INTP 1511 with a grade of “C” or better) 1C/1/0/0

INTP 2585 Internship Seminar
This course introduces students to the requirements, guidelines, professional practices and types of placements for field experience. Students will discuss protocol, skills, ethics and business practices needed for specific site placements. (Prerequisite(s): Grade of “C” or better in INTP 1513) 1C/1/0/0

INTP 2591 Interpreter Internship
This course is a career-related supervised work experience that integrates classroom theory and skills with real-life experiences; further develops skills and abilities initiated in program coursework; develops mentoring relationships and skills; identifies resources; expands application of ethical decision-making and problem-solving; and prepares students for national certification and employment. (Internship Eligibility: Grade of “C” or better in INTP 2411, 2421, and 2431. Internship Placement: Grade of “C” or better in Performance Skills Evaluations in INTP 2412 Sign to Voice 2, INTP 2422 Voice to Sign 2 and INTP 2432 Transliterating 2) 6C/0/0/6

Land Surveying Technology

CTEC 1390 AutoCAD for Land Surveying
This two-credit course is designed to provide Land Surveying students with basic AutoCAD skills. Students receive hands-on computer training using Land Development Desktop and AutoCAD software. Students will become familiar with the basic commands and terminology of both Land Development Desktop and AutoCAD software. Students will be able to create, manage and edit project directories. 2C/1/1/0

CTEC 1391 AutoCAD 2 for Land Surveying
This two-credit course is designed to provide Land Surveying students with continuing AutoCAD skills. Students will receive hands-on computer training using Land Development Desktop and AutoCAD software. Students will become familiar with the advanced commands and terminology of both Land Development Desktop and AutoCAD software. Students will be able to create and manipulate paper space drawings, manage and edit project files and directories. (Prerequisite(s): CTEC 1390 or instructor approval) 2C/1/1/0

CTEC 1415 Surveying Fundamentals
This course covers topics in approximately the first 60% of the text noted below. This integration of field and classroom focus will introduce students to field measurements with automatic level, theodolites and hand written field notebooks, total stations with hand written field notebooks and, if time and weather permit in a fall semester course, total stations with electronic field books or data collectors. Field data will be processed via AutoCAD and Land Development Desktop computer modeling software, studied concurrently in a parallel course. Textbook topics will include probability and statistical analysis of errors, use of instruments, basic mathematics of surveying, angle and curve geometry. 4C/2/2/0

CTEC 1441 Computer Aided Design 1
This course is an introduction to AutoCAD basic computer drafting software and the AutoDesk software specific to land modeling surveying and civil engineering technology. It is the first semester of a two-semester sequence. This course is a companion to the Introductory Surveying course and must be taken concurrently. 3C/2/1/0

CTEC 1442 Computer Aided Design 2
This course is a continuation of the use of AutoDesk software specific to land modeling surveying and civil engineering technology. It is the second semester of a two-semester sequence. This course is a companion to the Intermediate Surveying course and must be taken concurrently. 3C/2/1/0

CTEC 1515 Intermediate Surveying
This course will cover topics on circular, vertical and spiral curves, approximately the last 40% of the textbook. It includes the study of street, storm and sewer plans. Also covered are: highway plans and profiles; cross sections; areas and volumes of earthwork. Field projects include: staking of curves, layout of alignments on the campus, using points in the data collector sent to the total station, from those generated in Land Development Desktop computer modeling and design. (Prerequisite(s): CTEC 1415, CTEC 1441) 4C/2/2/0
CTEC 1535 Coordinate Geometry, Control Surveys, Boundary Surveys
This course covers selected topics from the text noted below, plus supplemental materials. This is largely a lecture and classroom laboratory course on advanced topics not covered in the introductory and intermediate courses. (Prerequisite(s): Completion of first year of program) 3C/3/0/0

CTEC 1590 Civil 3D and Map 3D
This refresher course is designed to update Land Survey students with exposure to the latest software that will be replacing LDT. Students will receive hands-on computer training using Civil 3D and Map 3D. Students will become familiar with the basic commands and terminology of both the Civil 3D and Map 3D software. Students will be able to create, manage and edit projects utilizing the latest software available on the market. (Prerequisite(s): CTEC 1441 and CTEC 1442) 3C/3/0/0

CTEC 1591 Occupational Internship
Student occupational internship in Surveying and Civil Technology usually takes place in the summer between the first and second year of the program. Students receive on-the-job training through full time employment (at standard wages) in one or more of the following areas: surveying, inspection, testing, computer drafting. (Prerequisite(s): Completion of one year in the program and CTEC 1515 with a grade of “C” or better.) 3C/3/0/0

CTEC 2520 Introduction to GPS/GIS
This course introduces basic concepts and methods for GPS (Global Positioning Systems) and GIS (Geographical Information Systems). Students will work with GPS field equipment and computer model data from GPS and other sources while learning the ArcView by ESRI software. (Prerequisite(s): Completion of the first year of this program, specifically CTEC 1415, CTEC 1441, CTEC 1442, CTEC 1515) 4C/3/2/0

CTEC 2530 Hydrology & Hydraulics
Introduces methods of calculating runoff values from watersheds. Identifies culvert, storm sewer, sanitary sewer shapes and material types. Introduces design of culverts and storm sewers. Covers basics of weir, pipe and open channel flow. (Prerequisite(s): Second year status or consent of instructor) 3C/2/1/0

CTEC 2545 Remote Sensing 1
This is a survey course that covers analysis of imagery used in mapping surveys, general mapping and an overview of various systems such as imagery ground control and introduction to photogrametry. The course will include site visits to facilities that use these systems. (Prerequisite(s): Completion of Land Surveying technical courses includingGPS/GIS or comparable program from an accredited institution) 3C/2/1/0

CTEC 2546 Remote Sensing 2
This is a survey course that introduces students to the use of multiple remote sensing equipment and techniques: Radar, Laser, EDM, IFSAR, Photogrametry, Airborne LiDAR, Ground Based LiDAR, Satellite Imagery and 3D Visualization. Lab experience will include site visits to state agencies and other facilities that use these processes and systems. (Prerequisite(s): Completion of Land Surveying technical courses including GPS/GIS or comparable program from an accredited institution.) 3C/2/1/0

CTEC 2550 Site Design
This course is an overview of site engineering and land development from both a surveying/engineering viewpoint, but also from a regulatory and site use view. This course integrates many of the concepts of the previous year of study. The course will be approached as a seminar format presentation, with each student leading a discussion of a chapter per class period. Additional projects outside the classroom may be required. (Prerequisite(s): Second year status, CTEC 2530 recommended) 3C/2/1/0

Machine Tool Technology

MTTP 1411 Introduction to Manufacturing Processes
This course covers a general orientation, an overview of careers, shop safety, measurement, precision tools, band saw theory, lathe theory, drills and vertical milling machines. 4C/4/0/0

MTTP 1413 Interpreting Geometric Dimensioning and Tolerancing
Advanced applications of blueprint reading and geometric dimensioning and tolerancing, including advanced inspection procedures and metallurgy are covered. This course covers the principles, application and interpretation of geometric dimensioning and tolerancing as per ASME-Y14.3M 1994 Standards. (Prerequisite(s): MTTP 1421) 2C/1/1/0

MTTP 1421 Engineering Drawings/CAD
Fundamentals of reading drawings and the use of CAD to produce orthographic, auxiliary and assembly drawings. 5C/5/0/0

MTTP 1424 Shop Calculations and Applications
The subject matter progresses from the arithmetical operations through measurement systems, basic algebra for shop formula solving skills, practical geometry with shop examples and applications and trigonometry, emphasizing its valuable use in the shop and in the trades. 2C/1/1/0

MTTP 1426 CAD
Fundamentals of creating pictorial and orthographic blueprints using computer assisted software (CAD software). SolidWorks software will be used in this class. Knowledge of blueprint reading is necessary. 3C/3/0/0

MTTP 1427 Introduction to SolidWorks
This introductory course will use SolidWorks as the CAD software of instruction and application. Basic construction of solid modeling, engineering draws and assemblies will be covered. Basic knowledge of blueprints is recommended. 3C/3/0/0

MTTP 1428 Introduction to CNC Machining
The focus of this basic level course is CNC processes. Topics include the history of CNC machining, the Cartesian coordinating system, machining basic and CNC mill and programming. Course is web enhanced with assignments and exams online. 3C/3/0/0

MTTP 1431 Materials Processes 1
This introductory lab course covers shop safety, bench work, power saws, drills, drill presses, lathe operations, vertical milling and basic surface grinding. 5C/3/2/0
MTTP 1432 Materials Processes 2
This course covers intermediate lathe, milling machines and surface grinding operations. Work efficiency and inspection of finished work will be stressed. (Prerequisite(s): MTTP 1431 or concurrent) 5C/3/2/0

MTTP 1433 Mechanical Applications
This course covers advanced tool room machining operations using vertical mills, lathes, surface grinders, as well as part inspection. (Prerequisite(s): MTTP 1432 or concurrent) 5C/3/2/0

MTTP 1521 CNC 1
This course covers the basic operation and set up skills using G & M code format. (Prerequisite(s): MTTP 1433) 3C/2/1/0

MTTP 1522 CNC 2
This course covers the set-up and operation of CNC machine tools. Also includes advanced NC/CNC programming and operation on machining and turning centers with an emphasis on Fanuc controls. (Prerequisite(s): MTTP 1521 CNC 1) 3C/2/1/0

MTTP 1523 CNC 3
This course covers the set-up, operation and programming of CNC turning centers. (Prerequisite(s): MTTP 1522 CNC 2 or instructor approval) 3C/2/1/0

MTTP 2410 Computer Aided Manufacturing 1
Covers computer-aided manufacturing using Mastercam software. Students will learn to create geometry, toolpaths and CNC tape files for a series of prints and projects. The use of PC based CAM software to generate numerical control programs is included. The software currently is Mastercam Version 6. (Prerequisite(s): MTTP 1421) 2C/0/2/0

MTTP 2412 Computer Aided Manufacturing 2
This course is a continuation of CAM1. Prints will be handed out and programs created for CNC machine tools. A series of projects will be assigned. 2C/0/2/0

MTTP 2430 Electrical Discharge Machining
This course covers the basic principles of conventional and traveling wire Electrical Discharge Machining in a laboratory setting. Topics include are safety, electrode material, set-up, machine operation, controller operation, amperage, electrode shapes, basic CNC programming, wire information, dielectric applications and work holding methods. (Prerequisite(s): Semester 1,2,3 of the Machine Tool Technology Program) 2C/0/2/0

MTTP 2510 Tool Design
Analysis and design fundamentals required to design and build a mold. Content includes types of molds, plastic molding characteristics, metal alloy castings, design principles and molding methods. (Prerequisite(s): MTTP 1413, MTTP 1511, MTTP 1512, MTTP 1513, MTTP 2410, MTTP 2412, MTTP 2530) 4C/4/0/0

MTTP 2511 Mold/Plastic Technology
Introductory course on the design and construction principles of basic molds. Mills, lathes, surface grinders, jig borers, drill presses and injection molding machines are used in a laboratory setting to produce a plastic injection mold. (Prerequisite(s): MTTP 1413, MTTP 1513, MTTP 2410, MTTP 2530) 5C/3/2/0

MTTP 2512 Manufacturing Applications
Product development fundamentals including design and research, cost estimating and manufacturing of a metal stamped product. This course will include additional theory and online assignments. (Prerequisite(s): MTTP 1413, MTTP 1513, MTTP 2410, MTTP 2530) 5C/3/2/0

MTTP 2513 Mechanical Systems/EDM
Advanced level study that covers the design and machining operations required to build a plastic injection mold. Lathes, mills, surface grinders, EDM, CNC programming and heat treat equipment are used. This course will include additional theory and online assignments. (Prerequisite(s): MTTP 1413, MTTP 1513, MTTP 2410, MTTP 2530) 5C/5/0/0

MTTP 2514 Manufacturing Applications 2
Advanced level course utilizing 2-axis CNC machining and programming in the development of tooling fixtures and precision manufacturing processes. (Prerequisite(s): MTTP 2512) 3C/0/3/0

MTTP 2516 Manufacturing Capstone Project
Course focus on manufacturing design and production. Project includes design proposal, product design and documentation of manufacturing processes necessary to produce and deliver desired product. (Prerequisite(s): MTTP 2514) 3C/0/3/0

MTTP 2530 Fixture Design
Introduces production machining processes and includes calculations and methods for work holding set-ups of various piece parts. (Prerequisite(s): MTTP 1421, MTTP 1450) 2C/1/0/0

MTTP 2591 Machine Tool Technology Internship
Provides an industry on-site opportunity for students to gain skills through experiences and practices in an actual work environment. (Prerequisite(s): Instructor approval) Variable 1–6 credits

 Massage Therapy

MASS 1400 Introduction to Therapeutic Massage
This course will enable the student to track the history and development of massage therapy, understand the scope of practice, body mechanics for the practitioner, contraindications for therapy and professional ethics for practitioners. Students will review massage-specific anatomy and physiology with emphasis on muscle identification, actions and insertions on the skeleton. Students will be introduced to basic massage techniques through demonstration and practice. Students will practice correct table set-up and sanitation. (Prerequisite(s): Concurrent enrollment in or previous completion of HLTH 1410 and HLTH 1420 and declared Massage Therapy major) 4C/2/2/0

MASS 1421 Massage Spa Techniques
This course provides application of massage techniques using knowledge of the musculoskeletal system. Students will refine previously learned techniques and body mechanics. Deep tissue massage will be introduced. Students will demonstrate Swedish and deep-tissue techniques. Students will demonstrate knowledge of contraindications for massage therapy based on client in-take information. (Prerequisite(s): MASS 1400) 2C/0/2/0
MASS 1422 Massage Clinical Techniques
Students will refine previously learned techniques in Swedish massage and deep-tissue massage by demonstrating mastery of massage therapy contraindications, body mechanics, muscle actions and insertions. Students will learn stretches for both client and self-care. Advanced techniques in chair massage, reflexology, myofascial release, lymph drainage and neuromuscular therapy will be introduced. (Prerequisite(s): HLTH 1425, MASS 1421 or concurrent enrollment) 4C/2/2/0

MASS 1423 Massage Advanced Clinical Techniques
Students will refine previously learned techniques. Students will investigate various treatment protocols utilizing scientifically proven, outcome-based techniques including Neuromuscular Therapy, Manual Lymphatic Drainage, Myofascial Release, Travel Trigger Point Therapy, Muscle Energy Technique, Proprioceptive Neuromuscular Facilitated Stretching, Active Isolative Stretching and Positional Release Technique. Students will learn to perform thorough patient assessments utilizing medical histories and objective findings through palpation, functional muscle testing, range of motion testing, postural examination and gait examination. Students will learn to create a care-plan based on evaluations; create treatment plans using carefully selected techniques for the given pathology; and learn to recommend exercises to the patient. Students will learn to give supplementary care as prescribed by a licensed Physician, Chiropractor or Physical Therapist for pathologies including multiple sclerosis, spinal cord injury, traumatic brain injury, stroke, diabetes, AIDS, cancer, burns, post-surgical scarring, chronic pain and fibromyalgia. (Prerequisite(s): Certificate in Massage Therapy or equivalent as evaluated by faculty) 5C/2/3/0

MASS 1471 Reflexology 1
This course will introduce the student to the core abilities of reflexology. The course includes the history and theories of reflexology and the basics of the hands-on application of reflexology as a consultative practice. The course will teach theory and skill sets necessary to build a reflexology service for the hands or feet. Modern Zone theory and the evidence of ancient reflexology practices will be explored. HLTH 1417 prerequisite or concurrent enrollment. HLTH 1410, HLTH 1420, HLTH 1425, HLTH 1900 are recommended. 3C/3/0/0

MASS 1472 Reflexology 2
This course will introduce the skills needed to successfully practice reflexology on the hands and feet of the body. The anatomy and unique attributes of the feet and hands of the body will be explored. The student will learn to accept responsibility for the safe and effective practice of reflexology, appreciate theories and origins of reflexology, compare and contrast applications of reflexology, assess the rules for practice and comprehend the ethical and legal responsibilities of the clinical reflexologist. Reflexology is a consultative practice only and the student will understand the difference between consultative and prescriptive healing practices. Can be taken concurrently with MASS 1471. 3C/1/2/0

MASS 1480 Massage Therapy Practicum
This course meets the requirement of the performance and documentation of the minimum 30 full-body sessions. Students will demonstrate and apply all previously learned techniques including use of client intake information, knowledge of massage therapy contraindications and skills in charting for each client. (Prerequisite(s): MASS 1400 and concurrent enrollment in MASS 1422) 4C/0/4/0

MASS 1490 Clinical Massage Internship
Students will refine all previously learned techniques and put them into practice. Students are placed in a traditional clinical setting at Chiropractic offices, Medical Sport Institutes and Physical Therapy clinics for half of the internship. For the second half students may choose to focus on an area of choice such as oncology, pre and post natal, geriatric, AIDS, infant massage, or orthopedic settings. (Prerequisite(s): MASS 1423, Instructor approval or completion of entire clinical massage curriculum and professional membership with ABMP including liability insurance. Students must have current CPR certificate and liability insurance on file at Saint Paul College before starting internship.) 5C/1/4/0

Mathematics

MATH 0742 Math Fundamentals 2
This course is a continuation of MATH 0741. Topics include whole numbers, fractions, decimals, percents, applications of percent, graphs and simple statistical measures. (Placement into this course will be according to college assessment score.) 3C/2/1/0

MATH 1411 Applied Mathematics
This course is required for students in certain trade programs. This course is designed to help students develop the numerical skills needed to perform tasks in their trade. Topics in this course include whole numbers, fractions, decimals, percents, applications of percents, plane geometry, solid figures, graphs and simple statistical measures. (Placement into this course will be according to college assessment score or completion of MATH 0741 with a grade of “C” or better.) 3C/2/1/0

MATH 1420 Trade Algebra and Trigonometry
This course is intended for the student who needs to master the fundamentals of algebra and right triangle trigonometry as they apply to the construction trades. The content of this course includes a review of basic math, simplifying expressions involving constants and variables, solving algebraic equations, solving literal problems using spreadsheets and graphing calculators and solving construction trade problems with algebra and right triangle trigonometry. (Placement into this course will be according to college assessment score or completion of MATH 0742 with a grade of “C” or better.) 3C/3/0/0

MATH 1510 Introductory Algebra
Intended for the student who needs to master the fundamentals of algebra. The content includes: Review of fractions, decimals and percent properties of the Real Number System; solving equations and inequalities; exponents; polynomial operations; basic factoring; simplifying rational expressions; graphing linear equations; solutions of linear systems; roots and radicals; and solutions of quadratic equations. (Prerequisite(s): Grade of “C” or better in MATH 0742 or appropriate assessment score) 3C/3/0/0
MATH 1520 Intermediate Algebra
Designed for those students who have had one year of high school algebra and need a refresher before taking courses such as College Algebra and/or Pre-Calculus. The topics include: real number properties, first degree equations, graphs and functions, linear systems, polynomials, rational expressions and exponents and radicals. (Prerequisite(s): Grade of “C” or better in MATH 1510, or appropriate assessment score) 3C/3/0/0

MATH 1710 Liberal Arts Mathematics
This class includes selected topics from the mathematics of social choice, growth and symmetry, and probability and statistics. Real-life applications are used to illustrate mathematical concepts. Modern discoveries as well as classic problems are described using straightforward examples. A fundamental objective is to develop an appreciation for the aesthetic elements of mathematics. The development of critical thinking skills through the application of mathematics is also emphasized. This course is designed for students who are not planning to take any further mathematics courses. This course can be used to satisfy the general education requirement for math. (Prerequisite(s): MATH 1520 Intermediate Algebra with a grade of “C” or better or appropriate assessment score) (MnTC: Goal 4) 3C/3/0/0

MATH 1730 College Algebra
This course covers algebraic functions and their applications. Topics include linear and quadratic functions, functions and graphs, polynomial and rational functions, exponential and logarithmic functions, systems of equations and inequalities, matrix algebra, discrete algebra, the binomial theorem and matrices, determinants and analytic geometry. (Prerequisite(s): MATH 1520 Intermediate Algebra with a grade of “C” or better, or appropriate assessment score) 3C/3/0/0

MATH 1740 Introduction to Statistics
This course covers concepts and applications of descriptive and inferential statistics. Measures of central tendency and variance, confidence intervals, normal distributions and central limit theorem are explored. The student learns about probability distributions and random variables. Techniques of estimation, hypothesis testing, z-scores, t-tests, F-tests, Chi-square tests, analysis of variance (ANOVA) and linear regression are covered in this course. This course can be used to fulfill the general education requirement for math, and transfer to 2 and 4 year institutions. (Prerequisite(s): MATH 1520 Intermediate Algebra with a grade of “C” or better or appropriate assessment score) (MnTC: Goals 2 & 4) 3C/3/0/0

MATH 1760 Pre-Calculus
The course introduces algebraic and trigonometric functions and their applications. Topics include polynomial, rational, exponential and logarithmic functions. Systems of equations and inequalities, matrices, determinants and analytic geometry will also be explored. In addition, this course covers trigonometric functions, identities and equations and the laws of sines and cosines. (Prerequisite(s): MATH 1520 Intermediate Algebra with a grade of “C” or better, or MATH 1730 College Algebra with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 4) 4C/4/0/0

MATH 2751 Calculus 1
This course is a beginning calculus course, which introduces the concepts of limits, derivative, differentiation and integration of functions with emphasis on applications. Topics include introduction to the derivatives and limits, tangent to a curve, properties of limits, derivative of a real function, the power rule and the algebra of derivatives, the chain rules, the mean value theorem, applications of differentiation including max-min problems and related rate problems, anti-derivatives and the definite integral. Graphing calculators are used to further the student’s understanding of essential concepts. (Prerequisite(s): MATH 1760 Pre-Calculus with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 4) 5C/5/0/0

MATH 2752 Calculus 2
This course is a continuation of MATH 2751 Calculus 1 and the continued development of the properties and applications of integration. Topics include applications of integral, transcendental functions, techniques of integration, L'Hopital's rule, sequences and series and parametric equations and polar coordinates. A graphing calculator is required. (Prerequisite(s): A grade of “C” or better in MATH 2751) (MnTC: Goal 4) 5C/5/0/0

Medical Laboratory Technician

MDLT 1400 Orientation
This course is designed to introduce students to the field of medical laboratory science and the role of the Medical Laboratory Technician in healthcare. The history of the medical laboratory science profession, and its scope of practice including lab practice areas and personnel will be discussed. In addition, the course will cover educational requirements, employment opportunities, certification, licensure, regulation and professional and patient codes of ethics. 1C/1/0/0

MDLT 1410 Laboratory Techniques
Basic skills and techniques will be explained and performed including basic instrumentation. Major topics covered are: safety and standard precautions, laboratory glassware and pipets, microscopy, balances and weighing, specimen collection and processing, spectrophotometry, metric/chemistry math and solutions, and laboratory information systems. (Prerequisite(s): CHEM 1711 or concurrent enrollment) 3C/2/1/0

MDLT 1421 Hematology 1
This course covers basic hematology procedures involving manual methods of cell counting and hemoglobin analysis. Emphasis is placed on hematopoiesis theory, blood cell structure, identification, cell differentiation and other manual techniques. Students will employ a laboratory information system to order tests and report results. (Prerequisite(s): MDLT 1410) 2C/1/1/0

MDLT 1422 Hematology 2
This course is a continuation of Hematology 1 and includes instrumentation, cell differentiation, correlation of laboratory findings and quality control. Diseases, special hematology procedures, and stains are correlated. Coagulation theory and laboratory procedures are covered in the course. Students will employ a laboratory information system to order tests and report results. (Prerequisite(s): MDLT 1421) 4C/1/3/0

MDLT 1430 Urinalysis/Body Fluids
This course covers basic urinalysis procedures used in clinical laboratories in the examination of a patient's urine. It includes theory in urine formation, renal physiology and the role of the kidney in health and disease. Urinalysis laboratory procedures are discussed, practiced and correlated with clinical conditions. Students will be introduced to the analysis of other body fluids used in clinical laboratory and will utilize an information...
participate in laboratory activities with more direct instructor
hematology, immunology, and phlebotomy. The student will
proficiency in performing medical laboratory techniques in
The course reinforces the basic skills required for gaining
MDLT 1441 Clinical Chemistry 1
This course covers the analysis of various chemical constituents
of plasma, serum, urine and cerebrospinal fluid. The
physiology, methodology and clinical significance of
Carbohydrate metabolism, non-protein nitrogen, bilirubin
metabolism, renal function and liver function is addressed. Lab
techniques, concepts of photometry, pipetting and safety will be
reviewed and emphasized. Quality assurance, quality control
procedures and manual laboratory techniques will be presented
and practiced. Students will employ a laboratory information
system to order tests and report results. POCT procedures will be
discussed and practiced. (Prerequisite(s): CHEM 1711 or
enrollment and MDLT 1410) 1C/0/1/0

MDLT 1442 Clinical Chemistry 2
This course covers the theory and clinical correlations of
proteins, enzymes, electrolytes, lipids, acid/base balance,
therapeutic drug monitoring, endocrinology, and toxicology.
Students learn techniques of procedures, quality control, and
normal values of chemical constituents analyzed. Concepts that
are basic to the operation and maintenance of automated
laboratory instruments will be taught. Students will test samples
using a variety of automated analyzers. Students will employ a
laboratory information system to order tests and report results.
(Prerequisite(s): CHEM 1712 or concurrent enrollment and a
grade of “C” or better in MDLT 1441 and HLTH 1410)

MDLT 1446 Phlebotomy
This course provides beginning instruction in blood specimen
collection skills and procedures. The course addresses safety,
legal issues, customer service, professionalism, the circulatory
system, equipment, venipuncture, skin puncture and specimen
transport/processing. Students will employ a laboratory
information system to document specimen collection.
(Prerequisite(s): MDLT 1410) 1C/0/1/0

MDLT 1451 Learning Lab 1
This course reinforces the basic skills required for gaining
proficiency in performing medical laboratory techniques in
hematology and basic skills. The student will participate in
laboratory activities with more direct instructor contact.
Students will be encouraged and recommended to enroll for
more help during the laboratory sessions and review of current
subject material. No new material will be introduced in
this course. (Optional Elective) (Prerequisite(s): Concurrent
enrollment in MDLT 1441 and MDLT 1421) 1C/0/1/0

MDLT 1452 Learning Lab 2
This course reinforces the basic skills required for gaining
proficiency in performing medical laboratory techniques in
clinical chemistry, urinalysis and blood specimen collection. The
student will be given the opportunity to perform a variety of
laboratory techniques with direct instructor supervision.
(Prerequisite(s): Concurrent enrollment in MDLT 1441, MDLT
1430 and MDLT 1446) 1C/0/1/0

MDLT 1453 Learning Lab 3
The course reinforces the basic skills required for gaining
proficiency in performing medical laboratory techniques in
hematology, immunology, and phlebotomy. The student will
participate in laboratory activities with more direct instructor
contact. Students will be encouraged and recommended to
enroll for more help during the laboratory sessions and review
of current subject material. No new material will be introduced
in this course. (Optional Elective) (Prerequisite(s): Concurrent
enrollment in MDLT 1422 and MDLT 1510) 1C/0/1/0

MDLT 1454 Learning Lab 4
This course reinforces the basic skills required for attaining
proficiency in performing medical laboratory techniques in
phlebotomy and clinical chemistry. The student will be given
the opportunity to perform a variety of laboratory techniques
with direct instructor supervision. (Prerequisite(s): Concurrent
enrollment in MDLT 1442) 1C/0/1/0

MDLT 1510 Immunology
Covers basic theory in immunology, non-specific immunity and
serological procedures. The reactions of antibodies and antigens
are studied and performed in the laboratory. Laboratory
procedures are designed to instruct the student in basic serology
procedures such as serial dilutions, the use of commercial kits
and interpretation of results. Students will employ a laboratory
information system to order tests and report results.
(Prerequisite(s): Grade of “C” or better in MDLT 1410)

MDLT 2400 Mycology/Parasitology
Covers parasites and fungi of medical importance. An emphasis
is placed on identification of diagnostic stages and knowledge
of specimen collection, handling, processing, and identification
techniques. Students will employ a laboratory information
system to order tests and report results. (Prerequisite(s): BIOL
1740 or concurrent enrollment and a grade of “C” or better in
MDLT 1410) 2C/1/1/0

MDLT 2410 Immunohematology
This course covers the introduction to both the theoretical and
practical aspects of Immunohematology. Areas of study include
a review of immunology concepts, blood group genetics, blood
typing, blood group systems, antibody screening and
identification, compatibility testing, donor selection, blood
component preparation and usage and HDN. (Prerequisite(s):
Grade of “C” or better in MDLT 1510) 3C/1/2/0

MDLT 2420 Clinical Microbiology
Covers the isolation and identification of clinically significant
microorganisms. Emphasis is placed on specimen sources,
growth characteristics and techniques for identification, safety
and quality assurance. (Prerequisite(s): BIOL 1740 and a grade
of “C” or better in MDLT 1410) 4C/1/3/0

MDLT 2430 Clinical Practice Orientation
This course explains the clinical laboratory structure and the
role of the MDLT student during the practicum phase of the
program. Students review theoretical concepts and procedures
of testing performed in various clinical laboratory departments.
Clinical practice policies and expectations are addressed.
(Prerequisite(s): Grade of “C” or better in all coursework
required through the first year including summer term)
1C/1/0/0

MDLT 2455 Learning Lab 5
This course reinforces the basic skills required for attaining
proficiency in performing medical laboratory procedures in
phlebotomy and immunohematology. The student will be given
the opportunity to perform a variety of laboratory techniques
with direct instructor supervision. (Prerequisite(s): MDLT 1446
and MDLT 2410) 1C/0/1/0
MDLT 2456 Learning Lab 6
The course reinforces the basic skills for gaining proficiency in performing medical laboratory techniques in phlebotomy, microbiology, mycology and parasitology. The student is encouraged and recommended to enroll for more help during the laboratory sessions and review of current subject material. No new material will be introduced in this course. (Prerequisite(s): MDLT 2420 and MDLT 2400 or concurrent enrollment) 1C/0/1/0

MDLT 2591 Clinical Practice
In this clinical laboratory course, the student works under supervision in a hospital/clinic laboratory. The experience allows the students to refine lab techniques and apply knowledge learned in the didactic phase in an employment-like setting that offers realistic experiences unavailable in student laboratory sessions. Additionally, students acquire non-technical attributes including, but not limited to, communication, critical thinking, multitasking and independent work skills. Students rotate through hematology, chemistry, urinalysis, microbiology, immunohematology, and coagulation departments. In addition, students perform routine specimen collection and processing procedures. (Prerequisite(s): Grade of “C” or better in all MDLT program requirements) Variable 1-9 credits. 0/0/1-9

MDLT 2593 Comprehensive Examinations
Students will be evaluated by comprehensive examinations on their knowledge of theory and practical applications to assist them in their preparation for national certification examinations. Evaluation is exercised in all department areas of the clinical laboratory. (Prerequisite(s): Grade of “C” or better in all required courses in the Medical Laboratory AAS degree including general education courses and clinical practice) 1C/0/1/0

Medical Office Careers

MEDS 1420 Health Information Foundations
This course introduces the student to the health information management profession by covering topics fundamental to the field such as content, function, structure, and uses of health information, along with the health information profession itself. It covers prominent healthcare data sets, their purpose and use, as well as typical departmental functions associated with managing health information. An introduction of clinical vocabularies and classification systems is covered as well as secondary data sources such as registries and indexes. Finally, students will learn the history, organization, financing, and delivery of health care services in the United States. 3C/3/0/0

MEDS 1470 Anatomy & Physiology/Medical Office
This course provides the student with an understanding of anatomy and physiology of all systems of the human body. Common disease conditions of each body system will be highlighted. This course provides the student with a fundamental knowledge base for work in the medical office careers field. 3C/3/0/0

MEDS 1480 Medical Terminology
This course exposes the student to the language of healthcare known as medical terminology. The student will develop an understanding of medical terminology by studying the pronunciation and definition of word parts as well as the proper format in bringing word parts together to form medical terms. Development of this foundation is designed to provide a medical vocabulary for future healthcare staff. 3C/3/0/0

MEDS 1551 Medical Formatting/Transcription 1
Covers formatting and transcription of a variety of medical documents. Emphasis will be on authentic forms and material; formatting; spelling; building speed and accuracy; and proofreading and correcting errors. (Prerequisite(s): MEDS 1480 or concurrent enrollment) 3C/2/1/0

MEDS 1552 Medical Transcription 2
A continuation of MEDS 1551. A variety of dictated medical material will be produced using electronic equipment. Emphasis will be on authentic forms and material, building speed and accuracy, advanced editing, proofreading and correcting errors. (Prerequisite(s): MEDS 1551) 3C/2/1/0

MEDS 1553 Medical Transcription 3
Advanced course that continues the development of medical transcription skills using word processing equipment to produce a variety of usable medical documents. Emphasis will be on authentic material, building speed and accuracy, advanced editing, proofreading and correcting errors. Material will be from physicians from various ethnic backgrounds and will cover various medical specialty areas. (Prerequisite(s): MEDS 1552) 3C/2/1/0

MEDS 1560 Computerized Health Information
An introduction to the concepts of computer technology associated with healthcare and the tools and techniques for collecting, storing and retrieving health care data. This course will explain the difference between data and information as well as discuss networks, data integrity and security, document imaging and automatic identification. Health information systems including administrative, patient registration, ADT, HIM applications, clinical, point of care, lab, radiology, pharmacy and voice recognition, will also be discussed. 3C/3/0/0

MEDS 1562 Billing and Reimbursement
This course provides an introduction to commercial, managed care and federal insurance plans, including medical claim form preparation and processing, as well as the reimbursement systems and prospective payment systems (PPS) used in the healthcare industry. Billing processes and procedures will be discussed and practiced including clean claims and denials and adherence to the National Correct Coding Initiatives. Chargemaster maintenance, regulatory guidelines, and reimbursement monitoring and reporting will be covered, in addition to compliance strategies. 2C/2/0/0

MEDS 1570 Human Disease
This course provides basic information about major disease conditions affecting all the major body systems. Information about diagnostic, treatment, and surgical procedures is also included. Students will do in-depth research on selected disease conditions using Merck Manual and the Internet. They will review and analyze medical reports reflecting the disease conditions that are presented in class. (Prerequisite(s): MEDS 1480) 3C/3/0/0

MEDS 2430 Pharmacology for the Medical Office
This course offers basic information about drug terminology, drug names (generic and brand), drug classes, and the use of drugs. Drugs frequently prescribed for common disease conditions will be reviewed by body system. Students will use electronic resources and text-based references such as the Physician’s Desk Reference (PDR) to look up detailed information about selected drugs that are being reviewed in class. 2C/2/0/0
MEDS 2432 Alternative Health Record Systems
This course focuses on managing health information in health care facilities other than acute care hospitals. An introduction to the basic components of the content, use and structure of health care data and data sets and how these components link to primary and secondary record systems. Topics to be discussed include the content of the health record, documentation requirements, health care data sets, registries and indices, forms and screen design and primary versus secondary records. An explanation of the organization, financing and delivery of healthcare services will be discussed, as well as a discussion of such topics as accreditation standards and licensure and regulatory agencies. 2C/2/0/0

MEDS 2434 Legal and Ethical Aspects of Health Information
An introduction to the legal and ethical issues that are relevant to health information. The court system and legislative process, as well as legal vocabulary will be communicated. Topics to be discussed include confidentiality, release of information, retention guidelines, patient rights and advocacy, advanced directives, and ethics. The new HIPAA guidelines will also be reviewed. 2C/2/0/0

MEDS 2440 Supervision of Health Information
An introduction to the principles of supervision and organization in order to develop effective skills in leadership, motivation and team building approaches. Topics will include basic management principles, human resource supervision, budgeting basics, ergonomics, how to market HIM services and performance or quality improvement. 2C/2/0/0

MEDS 2460 ICD-9-CM Coding
This course teaches the student to accurately code diagnoses and procedures using the ICD-9-CM coding system. This class brings the student through all of the coding conventions in order to develop a basic coding foundation. Coding of diagnoses and procedures from each body system will be covered as well as coding from operative reports and other healthcare documents. Emphasis on Principle Diagnosis and Principle procedure as well as secondary diagnoses and secondary procedures is also covered. Other topics include DRG's, compliance, over-coding and under-coding, complications and co-morbidities. (Prerequisite(s): MEDS 1470 and MEDS 1480) 3C/2/1/0

MEDS 2470 CPT-4 Coding
This course teaches the student to accurately code procedures using the CPT-4 coding system. This class brings the student through all of the coding conventions in order to develop a basic coding foundation. Coding of procedures from each body system will be covered as well as coding from operative reports, emergency room reports, physician office reports and other healthcare documents. Students will also be trained in coding from all sections within the CPT-4 system as well as Evaluation and Management coding and HCPCS Level 2- National coding. (Prerequisite(s): MEDS 1470 and MEDS 1480) 3C/2/1/0

MEDS 2480 Advanced Coding
In this course, students will use their basic ICD-9-CM and CPT-4 coding skills while learning to correctly code Diagnoses and Procedures from a multitude of source documents such as Inpatient Records; Ambulatory Surgery Records; Emergency Room Reports; Physician Office Cases and Ancillary Service Reports. Students will also become familiar with Diagnosis Related Groups and Ambulatory Payment Classifications. Through instruction in coding these cases, the students will become familiar with what will be expected of them in a real coding position in a healthcare organization. (Prerequisite(s): MEDS 2460 and MEDS 2470) 3C/2/1/0

MEDS 2510 Quality Management and Health Statistics
This course is an introduction to the principles of the quality assessment process which encompasses a framework for gaining skills in collecting and analyzing data. This course covers quality assessment and improvement including collection tools, data analysis and reporting techniques. Utilization management, risk management and case management will also be discussed. This course is also a study of the effective use, collection, arrangement, presentation and verification of health care data. Vital statistics, healthcare statistics and descriptive statistics, as well as reliability and validity of data will be discussed. Research techniques and the IRB process will also be covered. 3C/3/0/0

MEDS 2590 HIT Internship
In this course, students apply the coursework, theories, skills and ethics learned during the program to a field-based experience. Under the supervision of a qualified health information professional, the student will gain professional practice experience in a health care facility. Students will meet written goals and objectives and be evaluated by the Health Information Supervisor and the College Internship Coordinator. 3C/0/0/3

Music

MUSC 1740 Music Appreciation
A study of classical music from 1450 to the 20th Century. Developed for students interested in increasing their awareness and understanding of music. (MnTC: Goals 6 & 8) 3C/3/0/0

MUSC 1750 Jazz History
This introductory course is designed to help students become familiar with and appreciate jazz as an important American art form. The course follows the historical development of jazz style and innovations to Post-Modern developments and integration with other musical forms. Attendance at a live performance is required. (MnTC: Goals 6 & 7) 3C/3/0/0

Natural Sciences

NSCI 1710 Earth Science
This course introduces students to topics in geology, oceanography, meteorology and astronomy. The solid earth and earth processes, the liquid hydrosphere and the gaseous atmosphere are studied, as well as the earth as a part of the solar system. It is intended for students interested in the natural sciences and can be used to fulfill the lab science requirement. Two hours of lab per week are required. Lab time will be used to reinforce lecture concepts and will include experiments, hands-on activities, and field trips. (MnTC: Goals 3 & 10) 4C/3/1/0

NSCI 1721 Introduction to Geology
This course introduces students to the fundamentals of Geology, including rock and mineral formation, geologic time, global tectonic processes such as earthquakes and volcanoes, and earth surface processes that change our landscape. Current issues relating to Geology, such as global climate change and energy resources will be addressed as well. Two hours of lab per week are required. Lab time will be used to reinforce lecture concepts and will include experiments, hands-on activities, and field trips. (MnTC: Goals 3 & 10) 4C/3/1/0
NSCI 1730 Introduction to Oceanography
This course introduces students to basic scientific principles of oceanography. Topics covered will include the geological, biological, atmospheric, and chemical processes at work in the oceans, as well as contemporary issues related to marine pollution and resource use. Traditional and online sections are available. (MnTC: Goals 3 & 10) 3C/3/0/0

NSCI 1740 Introduction to Meteorology
This course introduces students to basic scientific principles of meteorology. Topics include basic properties of the atmosphere, weather instruments, weather phenomena, terminology and forecasting. (MnTC: Goals 3 & 10) 3C/3/0/0

NSCI 1750 Natural Disasters
This course introduces students to the investigation of the physical processes, origins of natural disasters as well as the human and economic impacts caused by natural disasters. Content covered will include earthquakes, volcanoes, severe weather, climate change, wildfires, floods and other catastrophic phenomenon. Traditional, online and web-enhanced sections are available. (MnTC: Goals 3 & 10) 3C/3/0/0

NSCI 1760 Descriptive Astronomy
This course introduces students to astronomy. It includes the observation of the planets and stars using reflecting and refracting telescopes. The earth and its motion, sun, moon, solar system, stars and the galaxies will also be studied. (MnTC: Goals 3 & 10) 3C/3/0/0

NSCI 1770 Introduction to Energy and the Environment
This course introduces students to energy production, supply, efficiency and the projections of future needs. The potential of solar, biomass, photovoltaics, wind and other continuous flow sources are covered. Crude oil, natural gas, coal and nuclear sources of energy are studied. Environmental, political, economic and ethical considerations are reviewed. (MnTC: Goals 3 & 10) 3C/3/0/0

NSCI 1780 Contemporary Issues in Science
With the completion of the human genome project and the rapid pace of advances in modern biology and medicine, there are many important ethical and scientific issues that touch our daily lives. In this course we will focus on contemporary issues such as: stem cell research, gene therapy and genetic testing, environmental toxins, climate change and energy resources, and emerging diseases. Students will learn the basic scientific concepts that are necessary to understand each issue, and will explore many ethical dilemmas surrounding each issue. Online and traditional sections are available. (MnTC: Goals 3 & 9) 3C/3/0/0

NSCI 1782 Minnesota Geology
This course surveys Minnesota’s geological history, exploring the formation of the bedrock more than 2 billion years ago, to the current processes that shape the land usage in this State today. Students will learn about the many ways the state’s geology contributed to the economic, environmental and political development. Topics include: geologic time, plate tectonics, rock and mineral identification, topographic and geologic maps, superficial processes, and environmental concerns. Through numerous field trips, we will look to the Twin Cities metro area to provide examples of many different earth and environmental processes, and to give us hands-on experience understanding how these processes work (glacial history, rock formations, caves and ancient ocean floor, rivers, and other geologic sites). (MnTC: Goals 3 & 10) 3C/3/0/0

Nursing Assistant/Home Health Aide
NAST 1111 Nursing Assistant & Home Health Aide
This course introduces concepts of basic human needs, health illness continuum, and basic nursing assistant and home health aide skills. Skills are demonstrated in a supervised laboratory setting. (Prerequisite(s): Nursing Assistant Seminar and appropriate assessment score or grade of “C” or better in READ 0721) 4C/3/1/0

NAST 1112 Nursing Assistant-Clinical
This course will give the student clinical experience in a long-term care facility. Completion of NAST 1111 and NAST 1112 will meet the state and federal criteria for employment in long-term care. The student must attend all hours of clinical. (Prerequisite(s): NAST 1111) 1C/0/1/0

Personal Trainer
PTRN 1410 Personal Training 1
This course introduces the student to the major components of fitness analysis, basic exercise program design, and the skills necessary for teaching individual activities. Components of exercise physiology are included throughout. (Prerequisite(s): Must be enrolled in Personal Trainer program.) 5C/3/2/0

PTRN 1420 Personal Training 2
This course explores advanced components of fitness analysis, functional training program design, and the skills necessary for teaching group activities. Components of exercise physiology are included throughout. (Prerequisite(s): PTRN 1410 and HLTH 1420) 5C/3/2/0

PTRN 1490 Personal Training Internship
This course is the final component of the personal trainer curriculum that serves to integrate all materials learned in a practical setting. Students will be placed at various training facilities providing direct application of personal training techniques and methodologies. (Prerequisite(s): Instructor approval or completion of entire personal trainer curriculum and current CPR certificate) 5C/0/5/0

Philosophy
PHIL 1700 Introduction to Philosophy
The purpose of this course is to engage the student in a number of central topics in philosophy through the examination and analysis of the writings of contemporary and major Western philosophers as well as through the close study of several fundamental issues which have arisen in the course of the development of the Western philosophical tradition. Topics of study include the nature of human knowledge; perception and illusion; the nature of consciousness; personal identity; minds, brains and machines; freedom and determinism; and the meaning of life. The course will be conducted in a seminar/symposium format supplemented by lectures and student participation. (MnTC: Goal 6) 3C/3/0/0
PHIL 1710 Logic
Logic is the study of arguments. In this course the student will be introduced to the principles of logic and will be able to use these principles in evaluating verbal and written communication. Students will learn both about formal logic, which includes syllogisms and truth-functional logic, as well as informal logic, which includes fallacies and looking at arguments in context. Although this course falls within the goal of mathematics, it may not apply to certain technical programs or meet certain transfer requirements for mathematics. (MnTC: Goal 4) 3C/3/0/0

PHIL 1715 Philosophy of Scientific Reasoning
This course focuses on developing the skills necessary to critically assess the significance of new information. The course also provides a basic level of scientific literacy for college students. We will discuss the differences between what is considered legitimate science and "pseudoscience," the distinction between deductive and inductive logic as used in scientific reasoning, and methods used to justify scientific hypotheses. We will examine and analyze contemporary as well as historical case studies in the physical, life, and social sciences; compare statistical, causal and correlational studies; study the differences between randomized, prospective, retrospective, and blind studies; and become familiar with types of decision making strategies involving degrees of certainty and uncertainty. Resources will be used to highlight the historical context of scientific discoveries. (MnTC: Goals 6 & 8) 3C/3/0/0

PHIL 1720 Ethics
The purpose of this course is to acquaint the student with the rich and varied tradition of ethical thought found in Western Civilization. Its historical focus will provide a background for perennial ethical themes. Students will examine a variety of theoretical frameworks through which to approach moral issues and will practice using the principles of each to make judgments about issues. The course will be conducted in a seminar/symposium format supplemented by lectures and student participation. Students are expected to develop a philosophical perspective on moral questions as evidenced in the ability to relate the positions of various ethical philosophers to contemporary issues both in written work and in classroom discussion. (MnTC: Goals 6 & 9) 3C/3/0/0

PHIL 1722 Health Care Ethics
This course introduces basic ethical theories, principles, and decision-making guidelines used in health care ethics. It examines moral issues confronting health care practitioners, patients, and others involved in medicine. The course includes philosophical analysis of contemporary moral decision-making on topics such as disclosure, confidentiality, human cloning, medical research, abortion, transplantation, allocation of limited resources, cultural differences regarding medical practices, and euthanasia. The course is open to all students interested in health care ethics and is required for PN AAS majors. (MnTC Goals: 6 & 9) 3C/3/0/0

PHIL 1750 Eastern Philosophy
The purpose of this course is to acquaint the student with the major Asian philosophies. Students will engage in study of the history and ideas of the following schools of thought: Hinduism, Taoism, Confucianism and Buddhism. This will include examination and analysis of selections from works such as the Upanishads, the Tao te Ching, the Analects of Confucius and the writings of the Dalai Lama. Topics of study will include the nature of reality and being, social philosophy and ways of attaining knowledge. We will compare the ideas of Eastern philosophers on certain fundamental issues with the conclusions of various Western philosophies. The course will be conducted in a seminar/symposium format supplemented by instructor lectures and student participation. (MnTC: Goals 6 & 8) 3C/3/0/0

PHIL 1760 World Religions
An introduction to major world religions in India, China, Japan, the Middle East and indigenous religions from around the world. The course will focus on the main practices and beliefs, scriptures, formative periods and historical development of these great religions. It will also include ways fundamental religious questions are answered and critique of religion from a secular perspective. (MnTC: Goals 6 & 8) 3C/3/0/0

Physics

PHYS 1720 Introductory Physics
This course introduces students to fundamental principles of physics and their application to familiar phenomena. Topics include motion, fluids, heat, electricity, magnetism, light and optics, waves and sound, quantum phenomena and relativity. The topics will be related to modern technology and everyday phenomena. The course is intended for students who have not had a high school physics course. Lecture and Laboratory. (Prerequisite(s): PHYS 1720 Introductory Physics) (MnTC: Goal 3) 4C/3/1/0

PHYS 2700 General Physics 1 (with Calculus)
Calculus based course with a study of Kinematics, Dynamics, Laws of Motion, Gravitation, Kinetic and Potential Energy; Conservation of Energy; Linear and Angular momentum; Equilibrium and Thermodynamics. Designed to fulfill physics requirements for students pursuing the study of physics, chemistry, pre-engineering, mathematics or computer science. (Prerequisite(s): MATH 2751 Calculus 1 with a grade of “C” or better) (MnTC: Goal 3) 5C/3/2/0

PHYS 2710 General Physics 2 (with Calculus)
Continuation of General Physics 1 (with Calculus). Topics include: Wave Phenomenon, Fluids, Electricity and Magnetism; electrical circuits, light and optics and modern physics. Designed to fulfill physics requirements for students pursuing the study of physics, chemistry, pre-engineering, mathematics or computer science. (Prerequisite(s): PHYS 2700 General Physics 1 with a grade of “C” or better) (MnTC: Goal 3) 5C/3/2/0

Pipefitting

PIPE 1410 Pipe Science/Math
Study of selected branches of physics and math applied to pipefitting. Areas covered include properties of matter, heat, math and mechanics. (Prerequisite(s): Must be enrolled in Pipefitting pre-apprenticeship program) 5C/2/3/0

PIPE 1420 Pipe Blueprint Reading
Study of basic drafting principles as they relate to piping drawing and blueprints. (Prerequisite(s): Must be enrolled in Pipefitting pre-apprenticeship program) 3C/1/2/0

PIPE 1430 Pipe Welding 1
Basic course in oxyacetylene welding and cutting of pipe. (Prerequisite(s): Must be enrolled in Pipefitting pre-apprenticeship program) 5C/1/4/0
PIE 1441 Basic Heating 1
Introductory course on low pressure steam. Areas include boiler, piping and heat transfer units. (Prerequisite(s): Must be enrolled in Pipefitting pre-apprenticeship program) 3C/1/2/0

PIE 1442 Basic Heating 2
This course is a basic study of hydronic heating systems. Areas include systems, piping layout and figuring heat loss. (Prerequisite(s): Must be enrolled in Pipefitting pre-apprenticeship program) 3C/1/2/0

PIE 1445 Apprentice Pipefitting Theory
Introductory course on pipefitting apprentice programs. Areas include heating, cooling and piping procedures. (Prerequisite(s): Must be enrolled in Pipefitting apprenticeship program.) 2C/0/2/0

PIE 1451 Pipe Shop 1
Care and use of tools and equipment and uses of different types of pipe fittings, hangers and the assembly of pipe and fittings are covered. (Prerequisite(s): Must be enrolled in Pipefitting pre-apprenticeship program) 4C/0/4/0

PIE 1452 Pipe Shop 2
Course consists of tube bending, flaring, soldering, brazing and rigging. (Prerequisite(s): Must be enrolled in Pipefitting pre-apprenticeship program) 4C/0/4/0

PIE 1455 Introduction to Apprentice Pipe Welding 1
Basic course in pipe welding and cutting of pipe. (Prerequisite(s): Must be enrolled in Pipefitting pre-apprenticeship program) 2C/0/2/0

PIE 1521 Basic Air Conditioning and Refrigeration
Fundamental concepts of air conditioning are presented. Areas include air treatment, moisture content, ventilation and purity. (Prerequisite(s): Must be enrolled in Pipefitting pre-apprenticeship program) 5C/0/5/0

PIE 1531 Pipe Welding 2
Basic course in arc welding on plate and pipe. (Prerequisite(s): Must be enrolled in Pipefitting pre-apprenticeship program) 2C/0/2/0

PIE 1540 Electric Controls
Fundamentals of electricity and electrical circuits are covered. (Prerequisite(s): Must be enrolled in Pipefitting pre-apprenticeship program) 3C/1/2/0

PIE 1550 Basic Gas
This is an introductory course on gas used in gas fired heating systems. Areas covered include natural gas burners, LP gas, burners, pipe sizing, fuel venting, electricity and safety pertaining to gas fired systems. (Prerequisite(s): Must be enrolled in Pipefitting pre-apprenticeship program) 3C/2/1/0

PIE 1715 Certified Pipe Welding Layout
Students will learn pipe math layout for weld fittings. 3C/1/2/0

PIE 1720 Certified Pipe Welding 1
Students will learn welding safety and oxyacetylene welding and cutting. 2C/1/1/0

PIE 1721 Certified Pipe Welding 2
Students will be introduced to carbon steel arc welding on plate and pipe. 5C/1/4/0

PIE 1722 Certified Pipe Welding 3
Students will certify on carbon steel pipe and be introduced to Gas Tungsten Arc Welding on stainless steel plate and pipe. 5C/1/4/0

PIE 1723 Certified Pipe Welding 4
Students will certify on stainless steel pipe. 5C/1/4/0

PIE 1730 Certified Pipe Welding Open Lab
Provides an opportunity for additional certification tests practice as needed. 5C/1/4/0

PIE 2615 Pipe Layout and Installation
This course covers the care and use of tools and equipment used by the pipefitter, the identification and uses of different types of pipe, pipe fittings, hangers and pipe supports. Assigned pipe projects will include calculating, measuring, cutting and assembling pipe and fittings in both straight runs and offsets. (Prerequisite(s): Must be enrolled in the Pipefitter apprenticeship program) 2C/0/2/0

PIE 2622 Rigging, Industrial Safety and OSHA
This course is designed to cover a broad range of OSHA safety standards in the construction industry. The second half of the course will concentrate on industrial rigging of pipe and equipment. (Prerequisite(s): Must be enrolled in the Pipefitter apprenticeship program) 2C/0/2/0

PIE 2642 Piping Design
This course will introduce the fundamentals in the design of ASNE B31.1 Power Piping, material selection, and supports. The course will provide examples ASNE B31.1 Power Piping, material selection, and supports. The course will provide examples of applications of power piping and equipment. (Prerequisite(s): Must be enrolled in the Pipefitter apprenticeship program) 2C/0/2/0

### Plumbing

**PLMB 2610 PreApprentice Plumbing**
This is an introductory course on the use of tools, materials and fittings used in the plumbing field. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program.) 1C/0/1/0

**PLMB 2612 Job Safety & Health**
The purpose of this course is to help the student be aware of the hazards on a jobsite and to help them work safely. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program.) 1C/0/1/0

**PLMB 2614 Applied Math for Plumbing**
This course covers basic mathematics and practical application related to plumbing. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program.) 4C/0/4/0

**PLMB 2616 Plumbing Welding**
This is an introductory course into welding and the principles used in welding. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program.) 4C/0/4/0
PLMB 2617 Plumbing Welding 2
This course is for apprentice and journeyman plumbers with prior welding experience in welding and the plumbing field who wish to upgrade their welding skills and knowledge in the plumbing field. The student must demonstrate safe use of cutting and welding equipment. The student must meet with the Coordinator prior to registration for this class. 1C/0/1/0

PLMB 2618 Basic Drawing
This course introduces the student to basic concepts of drafting, blueprints and plan specifications used in the construction field. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program.) 4C/0/4/0

PLMB 2621 Plumbing 1
This course introduces the student to basic scientific principles applied in plumbing. It will introduce the student to drainage and vent systems and the Minnesota State Plumbing Code. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program.) 4C/0/4/0

PLMB 2622 Plumbing 2
This course covers proper pipe sizing and installation of piping systems, the installation of plumbing fixtures, appliances and methods used in the installation and repair of these systems. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program.) 4C/0/4/0

PLMB 2623 Plumbing 3 Gas Installations & Gas Controls
This course introduces the student to fundamental principles of gas burning appliances and the service and repair of these appliances and systems. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program.) 4C/0/4/0

PLMB 2624 Plumbing 4 Commercial & Residential Service.
This course introduces students to tools and methods used in servicing and repair of plumbing systems in residential and commercial buildings. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program.) 4C/0/4/0

PLMB 2631 Plumbing Code 1
This course covers the Minnesota State Plumbing code and looks at each section in detail. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program.) 2C/0/2/0

PLMB 2632 Plumbing Code 2
This course covers the Minnesota State Plumbing code and is a continuation of Plumbing Code 1. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program.) 2C/0/2/0

PLMB 2633 Plumbing Code 3
This course covers the Minnesota State Plumbing code and is a continuation of Plumbing Code 2. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program.) 2C/0/2/0

PLMB 2634 Plumbing Code 4
This course covers the Minnesota State Plumbing code and is a continuation of Plumbing Code 3. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program.) 2C/0/2/0

PLMB 2640 Advanced Blueprint Reading & Heavy Rigging
Study of basic blueprint reading and layout and pipe drawings related to the plumbing field. This course also introduces the student to basic rigging. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program.) 4C/0/4/0

PLMB 2650 Industrial Plumbing
This is an introductory course to industrial plumbing work. It focuses on welding, rigging and materials used in industrial plumbing work. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program.) 4C/1/3/0

Political Science

POLS 1720 Introduction to American Government
This course provides an overview of the American political system. The course theme focuses on the principles of the constitution; the concept and processes of federalism; the interaction between the executive, legislative and judicial branches of government; the emergence of political parties, popular opinion, political campaigns; the evolution of domestic and foreign policy; and the role of the media in US politics. Special attention will be given to current affairs and their historical roots. (Recommendation(s): READ 0721 with a grade of “C” or better or appropriate assessment score.) (MnTC: Goals 5 & 9) 3C/3/0/0

POLS 1740 Introduction to World Politics
This course introduces core themes, concepts, and debates in the study of world politics. Several themes will be explored through reading, discussion, and film. Possible topics include the causes of war, globalization, global ethics, and human rights. This course will stress the development of critical thinking skills necessary for the practice of responsible citizenship in a global world. (Recommendation(s): READ 0721 with a grade of “C” or better or appropriate assessment score.) (MnTC: Goals 5 & 9) 3C/3/0/0

POLS 1750 Introduction to Political Science
This course offers an introduction to political science through an exploration of political ideologies and the nature of democracy. Ideologies to be examined include liberalism, conservatism, socialism, communism, fascism, and environmentalism. We will seek to understand these ideologies through reading, discussion and film. Additional attention will be given to current events. (Recommendation(s): READ 0721 with a grade of “C” or better or appropriate assessment score.) (MnTC: Goals 5 & 8) 3C/3/0/0

POLS 1760 Introduction to Political Thought
This course introduces core themes, concepts, and debates in the study of world politics. Several themes will be explored through reading, discussion, and film. Possible topics include the causes of war, globalization, global ethics, and human rights. This course will stress the development of critical thinking skills necessary for the practice of responsible citizenship in a global world. Special attention will be given to current affairs and their historical roots. (Recommendation(s): READ 0721 with a grade of “C” or better or appropriate assessment score.) (MnTC: Goals 5 & 9) 3C/3/0/0

Saint Paul College—A Community & Technical College • 2009–2010 Catalog www.saintpaul.edu 185
 Practical Nursing

PRNS 1410 Clinical Refresher
In this clinical course, a practical nursing student will need to demonstrate skills and abilities in performing nursing procedures. The student will participate in lab activities with instructor supervision. This course is specifically designed for the student who has had their clinical progression interrupted. (Prerequisite(s): Enrollment as a major in the College's Practical Nursing Program) 2C/0/2/0

PRNS 1420 Essentials of Clinical Pharmacology
This course covers introductory pharmacology information and dosage math including the metric, apothecary and household systems of measurement. Students will study conversions, solving for X, ratio and proportions and IV drip rate problems. Medications are studied according to classifications with emphasis on action, side effects and nursing implications. (Prerequisite(s): MATH 0742 or appropriate assessment score. ENGL 1711, PSYC 1720, ENGL 1711, HLTH 1450 or PHIL 1722, HLTH 1460. Must be accepted as a prenursing Practical Nursing student.) 3C/2/1/0

PRNS 1430 Fundamentals of Nursing
This course introduces concepts of basic human needs, holism and the nursing theories and skills needed to meet the needs of clients. Skills are demonstrated and practiced in a supervised college laboratory setting. (Prerequisite(s): PRNS 1420 or concurrent enrollment, ENGL 1711, PSYC 1720, SPCH 1720 or 1730, HLTH 1450 or PHIL 1722 and HLTH 1460) 5C/1/4/0

PRNS 1491 Clinical 1
In this course, Practical Nursing students will care for selected clients throughout the life span, with particular emphasis on care of the geriatric client. Students will implement cares and skills learned in prior theory and lab courses. Emphasis is on the basic needs of assigned clients, holistic evaluation and beginning application of the nursing process. (Prerequisite(s): Grade of “C” or better in PRNS 1420, PRNS 1430, PRNS 2410 and PRNS 1521) 4C/0/4/0

PRNS 1492 Clinical 2
In this clinical course the Practical Nursing students care for selected clients throughout the life span. Students will implement cares and skills learned in prior Practical Nursing theory and lab courses. Students will use the nursing process and holistic evaluation to meet the basic needs of assigned clients. (Prerequisite(s): Grade of “C” or better in PRNS 1491; and concurrent enrollment in PRNS 1522) 4C/0/4/0

PRNS 1493 Clinical 3
In this clinical course, the Practical Nursing students will care for selected clients throughout the life span. Students will implement cares and skills learned in prior theory and lab courses. Students will continue the use of nursing process and holistic evaluation to meet the basic needs of assigned clients. (Prerequisite(s): Grade of “C” or better in PRNS 1492 and PRNS 1530) 4C/0/4/0

PRNS 1521 Medical Surgical 1
This course assists the student to apply the concept of the health-illness continuum and holism in promoting health and preventing illness. Students will study the physiological aspects of client care, including communicable diseases. Included in this course is study of the disease process, as well as nursing management for the client with musculoskeletal, respiratory, neoplastic, reproductive and skin disorders. (Prerequisite(s): Grade of “C” or better in PRNS 1420 and PRNS 1430 or concurrent enrollment) 4C/4/0/0

PRNS 1522 Medical Surgical 2
This course identifies illness as it affects the neurological, sensory, urinary, cardiovascular, gastrointestinal and endocrine systems. It includes commonly used preventive and therapeutic measures, as well as nursing management. Also included in this course is the study of the critically ill and dying client. (Prerequisite(s): Grade of “C” or better in PRNS 1491) 4C/4/0/0

PRNS 1530 Maternal Child Health
This course assists the student to meet the basic health needs of the mother, the newborn infant and the family during pregnancy, labor, delivery and post partum period. This course provides the Practical Nursing student with an understanding of common pediatric disorders, recommended plans of care and the concepts of prevention and treatment. (Prerequisite(s): PRNS 1492 and PRNS 1522) 3C/3/0/0

PRNS 2410 Psycho/Social Nursing
This course will build on the student's understanding of human behavior and assist them in developing skills in the care of clients with psychiatric and social problems. It includes the study of mental/emotional illness, substance abuse and social problems emphasizing nursing management in all health care settings. (Prerequisite(s): Grade of “C” or better in ENGL 1711, HLTH 1410, HLTH 1420 or BIOL 2721, SPCH 1720 or 1730, ADMS 1405, HLTH 1450 or PHIL 1722 and PSYC 1720. Must be accepted as a prenursing Practical Nursing student.) 2C/2/0/0

PRNS 2491 Integrated Nursing Practicum
In this course additional topics and skills are taught that relate to the professional scope of practice for the graduate practical nurse as well as professional responsibilities and opportunities. Students will work in a clinical setting demonstrating correlation of theory and skills expected of new Practical Nursing graduates. (Prerequisite(s): Grade of “C” or better in all Nursing Program course requirements) 2C/0/2/0

Psychology

PSYC 1710 General Psychology
This course introduces psychological theory, experimental findings and applications of human behavior. Topics include research methodology, the nervous system, perception, cognition and memory, learning theory, human development, personality, emotions, attitudes, motivation, socialization and psychological disorders and related treatments. The course will explore current research and issues in psychology including the influence of heredity and the environment on behavior. (Prerequisite(s): READ 0721 with a grade of “C” or better, or concurrent enrollment, or appropriate assessment score.) (MnTC: Goals 2 & 5) 4C/4/0/0

PSYC 1720 Psychology throughout the Lifespan
The focus of this course is on human development throughout the lifespan. The course includes research methodology, theoretical perspectives and the physical, cognitive and psychosocial changes that influence people throughout their development. An application of research and theory to current issues will be addressed. (Prerequisite(s): READ 0721 with a
grade of “C” or better, or concurrent enrollment, or appropriate assessment score. (MnTC: Goals 5 & 9) 3C/3/0/0

PSYC 1730 Introduction to Child Psychology
This course covers child development from the prenatal period through middle childhood. The course will emphasize research methods, theories of child development and an exploration of the genetic and environmental factors that influence children’s social and cognitive development. (Prerequisite(s): PSYC 1710 General Psychology) (MnTC: Goal 5) 3C/3/0/0

PSYC 1740 Abnormal Psychology
This course offers an integrated and multidimensional perspective of the study of psychopathology. Students learn about research methods, clinical assessment and diagnosis of psychological disorders using DSM-IV codes as a reference. Students also explore the ways in which mental illness affects peoples’ lives. (Prerequisite(s): PSYC 1710 General Psychology) (MnTC: Goals 5 & 7) 4C/4/0/0

PSYC 1750 Introduction to Health Psychology
This course examines how psychological, social and biological factors interact with and affect individuals’ efforts to promote their own health and prevent or cope with illness. Topics include individual responses by gender, age and ethnicity, variations in health-related behaviors, stress and illness; whether and what kind of treatment individuals seek for health problems and whether they adhere to treatment recommendations; and the theories and methods used by psychologists to understand these issues. (MnTC: Goals 5 & 7) 3C/3/0/0

PSYC 1760 Social Psychology
This course focuses on social psychological theories and research to analyze how an individual’s thoughts, feelings, and actions influence other people, social settings, and institutions. Specific emphasis will be placed on the ways in which an individual’s cognitive processes affect their emotions and behaviors as well as their interpretation of social interactions. Topics include perception, attribution, socialization, attitudes, conflict, altruism, groups, power, conformity, prejudice, collective behaviors, and social movements. (MnTC: Goal 5) 4C/4/0/0

■ Reading

READ 0720 Developmental Reading Skills for College
This course emphasizes the development of vocabulary and reading skills necessary for college texts, readings and assignments. The course focuses on increasing vocabulary, using vocabulary contextually and developing independent learning strategies for reading. (Placement into this course will be according to college assessment scores.) 3C/3/0/0

READ 0721 Reading 1
This course emphasizes comprehension and learning strategies necessary to respond effectively to a variety of college texts, readings and assignments. The course focuses on identifying main ideas, supporting details, organizational patterns typically found in college texts, summarizing and developing college level vocabulary. (Placement into this course will be according to college assessment score or successful completion of READ 0720 with grade of “C” or better.) 3C/3/0/0

READ 0722 Reading 2
This course emphasizes critical reading strategies and college level vocabulary. It presents college reading as information processing and focuses on strategies for improving comprehension, selection, organization and recall. Materials represent a variety of academic disciplines and occupational areas. (Placement into this course will be according to assessment score or successful completion of READ 0721 with a grade of “C” or better.) 3C/3/0/0

■ Related Welding

RWLD 1410 Welding for Carpenters
Carpentry students become acquainted and familiar with basic welding and oxyacetylene cutting processes while learning proper safety techniques associated with welding. 3C/0/3/0.

RWLD 1430 Welding for Construction Electricity
Beginning course that includes a combination of oxyacetylene welding, cutting, arc and GMAW welding conducted in a limited time. Basic shop procedures will be conducted by lecture, demonstration and shop practice. Practice on three basic positions is provided. 2C/0/2/0

RWLD 1440 Introduction to Gas, Arc & Mig Welding
Beginning course includes a combination of oxyacetylene welding, cutting, arc and mig welding in a limited time. Basic shop procedures and safety are emphasized as is proper care of tools and equipment. Instruction will be conducted by lecture, demonstrations and shop practice. Practice on four basic joints in three basic positions is provided. Building an understanding and skill in the use of welding and manual cutting equipment is developed. 2C/0/2/0

RWLD 1441 Bricklayer Welding 1
This course will include basic Oxygen Acetylene Cutting and Shielded Metal Arc Welding (SMAW) using E7018 1/8th inch electrodes in the flat and horizontal positions. (Prerequisite(s): Must be enrolled in the Bricklayers apprenticeship program) 1C/0/1/0

RWLD 1445 Basic Welding for Auto Mechanics
Basic course in welding that includes Oxy-Fuel welding, cutting and brazing, GMAW (wirefeed) in all positions and introduction to SMAW (stick). Instruction will be conducted by lecture, demonstrations and live shop practice. Shop safety will be emphasized at all times. 2C/0/2/0

RWLD 1450 Advanced Mig & Tig Welding
Covers basic welding of light gauge metals in all positions as it relates to the Truck Mechanics field with an emphasis on safety. 2C/0/2/0

RWLD 2624 Apprenticeship Pipe Welding 4
Introduction to heliarc welding. (Prerequisite(s): Must be enrolled in the Pipefitter apprenticeship program) 2C/0/2/0

RWLD 2627 Apprenticeship Pipe Welding 7
Includes Orbital welding for clean room pharmaceutical and food grade and biomedical application. (Prerequisite(s): Must be enrolled in the Pipefitter apprenticeship program) 2C/0/2/0
RESP 1410 Respiratory Care Essentials
This course introduces the basic sciences and concepts required for the study of respiratory care. This includes fundamentals of chemistry, cardiopulmonary anatomy, physiology, mathematics and physics. Also included is an introduction to the equipment used in basic respiratory care. Emphasis will be placed on physical gas laws and metabolic respiration. An introduction to the hospital and the patient’s medical record will be completed. (Prerequisite(s): Acceptance into the program major, high school chemistry, college level math course with a grade of “C” or better, English Comp or equivalent with a grade of “C” or better) 3C/1/1/1

RESP 1510 Cardiopulmonary Pathophysiology 1
This course is an introduction to the assessment and pathophysiology of the patient with cardio-pulmonary disease. Emphasis is on assessment of oxygenation, ventilation and acid/base balance. Students are introduced to pulmonary pathophysiology emphasizing differences in obstructive and restrictive lung disease. (Prerequisite(s): CHEM 1711, HLTH 1410, HLTH 1420) 3C/1/2/0

RESP 1520 Respiratory Care Therapeutics
This course introduces the student to basic respiratory care therapeutics including: oxygen administration, aerosol delivery devices, bronchial hygiene methods and lung hyperinflation techniques. Specific equipment, indications, contraindications, adverse reactions and procedures associated with each therapeutic procedure are covered. (Prerequisite(s): CHEM 1711, RESP 1410, HLTH 1420; Co-Requisite(s): RESP 1540) SC/3/2/0

RESP 1540 Respiratory Care Pharmacology
This is an in-depth course in cardiopulmonary pharmacology emphasizing drug classification, basic chemistry and action on tissue receptors. Describes indications, actions and dosages of drugs used in cardiopulmonary care. (Prerequisite(s): CHEM 1711, RESP 1410, HLTH 1410 & HLTH 1420; Co-Requisite(s): RESP 1520) TC/1/1/0

RESP 1591 Respiratory Care Clinical 1
Student will have direct patient contact and provide basic patient care procedures as directed by the clinical instructor. Emphasis is on data collection, application of oxygen, aerosol/humidification devices, bronchial hygiene and lung hyperinflation techniques. Students will also collect vital signs, practice physical assessment and auscultation techniques. Student will record appropriate information in patient’s chart. (Prerequisite(s): RESP 1410, HLTH 1420; Completion of American Heart Association CPR Course “C.” Co-Requisite(s): RESP 1520, RESP 1540) TC/0/0/2

RESP 1592 Respiratory Care Clinical 2
A continuation of clinical practice procedures for administration of routine patient care therapy. Emphasis is on bedside patient assessment and introduction to the critically ill patient. (Prerequisite(s): RESP 1591, RESP 1520, RESP 1540, RESP 1510, Co-Requisite(s): RESP 2410) SC/0/0/3

RESP 1593 Respiratory Care Clinical 3
A continuation in clinical practice with emphasis given to acute care therapy. Mechanical ventilation and critical care skills are practiced and evaluated. (Prerequisite(s): RESP 1592, RESP 2410, RESP 2420) 4C/0/0/4

RESP 1594 Respiratory Care Clinical 4
Continuation of clinical practice skills with emphasis on critical care monitoring and procedures. Students will rotate through pediatrics, long-term care and adult critical care. A cystic fibrosis rotation will also occur during this semester. (Prerequisite(s): RESP 1593, RESP 2470) 6C/0/0/6

RESP 1595 Respiratory Care Clinical 5
Continuation of clinical practice skills in ICU. Students will rotate through neonatal/pediatric ICU, hemodynamic rotation and adult critical care. Medical Director rounds in the hospital and clinic are completed during this semester. ACLS certification is obtained this session. (Prerequisite(s): RESP 1594) 6C/0/0/6

RESP 2410 Mechanical Ventilation
This is an introductory course in the use of mechanical ventilation. Positive and negative pressure machines are discussed as well as other equipment and procedures related to mechanical ventilation. Methods of monitoring ventilator patient response to therapy are also described. Emphasis is on clinical application and safety. (Prerequisite(s): RESP 1510, RESP 1520, RESP 1540, RESP 1591; Co-Requisite(s): RESP 1592) 4C/1/3/0

RESP 2420 Cardiopulmonary Pathophysiology 2
This course continues the study of cardiopulmonary pathophysiology. Emphasis is placed on specific obstructive, restrictive and hemodynamic abnormalities. (Prerequisite(s): RESP 1510; Co-Requisite(s): RESP 1592) 1C/0/1/0

RESP 2430 Neonatal/Pediatric Respiratory Care
This course introduces the student to principles of neonatal and pediatric respiratory care. (Prerequisite(s): RESP 2420) 2C/1/1/0

RESP 2440 Management of the Critically Ill Patient
This is an advanced course in mechanical ventilation and medical management of the critically ill patient. (Prerequisite(s): RESP 2410, RESP 2420; Co-Requisite(s): RESP 1593) 4C/1/3/0

RESP 2450 Cardiopulmonary Diagnostics
This course will examine cardiopulmonary function studies, the techniques used and the significance of the individual tests with regard to pulmonary disease. (Prerequisite(s): RESP 2420) 1C/0/1/0

RESP 2470 Registry Review
Advanced study in respiratory care procedures and preparation for the required NBRC entry-level examination. Each student must purchase and successfully complete the NBRC self-assessment entry-level examination. (Prerequisite(s): RESP 2410, RESP 1593) 3C/1/2/0

RESP 2510 Survey of Human Disease
This is a course in human pathology in which all body systems will be studied in relation to common diseases. This course is designed to assist the respiratory care student to acquire a basic knowledge of pathology required for the practice of respiratory care. (Prerequisite(s): RESP 2420) 2C/1/1/0
RESP 2520 Respiratory Care in Alternate Sites
This course provides the student with an introduction to the role of the RCP in alternative care sites such as rehabilitation facilities or care of the patient at home. 2C/1/1/0

RESP 2571 Advanced Clinical Life Support Simulation Training
This course is designed to train health program students in advanced life support skills in a simulation lab setting. Students will demonstrate competencies on mock patients in the lab. Students will be videotaped while they perform skills. Training is according to American Heart Association Standards. Upon successful completion of the competencies, students will receive cards documenting their training. 2C/0/2/0

RESP 2590 Polysomnographic Technology 1
This course is designed to provide both theory and laboratory training for entry level personnel in the basics of polysomnographic technology. Students will become familiar with medical terminology, instrumentation setup and calibration, recording and monitoring techniques, documentation, professional issues, and patient-technologist interactions related to polysomnographic technology. Laboratory sessions will provide practical experience in the skills required of an entry-level polysomnographic technologist. (Prerequisite(s): Respiratory Therapist/Respiratory Care Practitioner AAS) 4C/3/1/0

RESP 2591 Polysomnographic Technology 1 - Clinic 1
This course provides the student with patient contact in a sleep lab. The student will have the opportunity to observe, perform under supervision and evaluate sleep studies. (Prerequisite(s): Concurrent with RESP 2590) 3C/0/3/0

RESP 2595 Polysomnographic Technology 2
This course is designed to provide both theory and laboratory training in more advanced aspects of polysomnographic technology. This course expands upon the topics covered in Polysomnographic Technology 1. Students will become familiar with the skills and knowledge needed to obtain and evaluate high quality sleep recordings. It covers all the aspects of sleep scoring and event recognition, instrumentation setup and calibration, recording and monitoring techniques, documentation, professional issues, therapeutic interventions and patient-technologist interactions related to polysomnographic technology. Laboratory sessions will provide practical experience in the skills required to obtain and evaluate high quality sleep recordings. (Prerequisite(s): RESP 2590, RESP 2591) 3C/2/1/0

RESP 2596 Polysomnographic Technology 2 - Clinic 2
This course provides the student with a clinic experience in sleep lab expanding on the skills performed in Polysomnographic Technology Clinic 1. Students will develop proficiency in observing the patient and performing sleep studies under supervision. (Prerequisite(s): RESP 2590, RESP 2591 and concurrent with RESP 2595) 6C/0/6/0

Sheet Metal

SMET 1410 Sheet Metal Fitting Layout & Design
Covers sheet metal layout using parallel line development, radial line development and triangulation. Design and sizing will be included. 4C/1/3/0

SMET 1415 OSHA 30 HR Training
Students will be given information in the fields of fire, ladders, scaffolding, electrical, cranes and many aspects of personal protective equipment. Students will be trained in welding shop, sheet metal shop and field safety practices. 2C/2/0/0

SMET 1420 Sheet Metal Fitting Fabrication
Covers the procedures used to fabricate sheet metal fittings. Common seams and fasteners will be described. 4C/1/1/0

SMET 1430 Sheet Metal Drafting & Blueprint Reading
Covers principles of mechanical drawing. Students will interpret sheet metal blueprints. 2C/1/1/0

SMET 1440 Sheet Metal Welding
Covers the four processes used to weld sheet metal: Oxyacetylene, Shielded Metal Arc Welding, Gas Metal Arc Welding (Wirefeed) and Gas Tungsten Arc Welding (Tig or Heliarc). 5C/1/4/0

SMET 1450 Sheet Metal Practical Problem Solving
This course covers math used in the sheet metal trade. 2C/1/1/0

SMET 1510 Duct System Layout & Design
Covers the layout and design of duct systems used for HVAC and industrial ventilation systems. 4C/1/1/0

SMET 1520 Duct System Fabrication
Covers the fabrication of various types of duct systems. 4C/1/1/0

SMET 1530 Architectural Sheet Metal
Covers the fabrication and assembly of various types of Architectural Sheet Metal systems. Installation techniques will also be described. 4C/2/2/0

SMET 1540 Power Machine Operation
Covers the fabrication of sheet metal items using the power shear, press brake, power rolls, punch press and spot welder. 3C/1/2/0

SMET 1550 Sheet Metal CAD/CAM Systems
Covers the setup and operation of plasma cutting systems and computer aided drafting systems. 3C/1/2/0
Sociology

SOCI 1710 Introduction to Sociology
This course introduces students to sociology: the systematic study of human interaction and society. Major theoretical perspectives and research methods of sociology will be examined. The primary goal is to create an awareness of and appreciation for the range of social and cultural variations throughout the United States and worldwide, stressing characteristics shared by all people. Readings and social science examples will be drawn from cultures around the world, including the pluralistic culture of the United States. Another focus of the class is to dispel common myths and stereotypes surrounding society and human behavior. (Recommendation(s): READ 0721 with a grade of “C” or better or appropriate assessment score.) (MnTC: Goals 5 & 7) 3C/3/0/0

SOCI 1720 Social Problems
This course introduces students to modern issues of societal concern, including social problems that have endured over time and those that have emerged as societies modernize and cultures change. The influence of globalization on cultures around the world will be discussed. Specific topics include: inequalities of race, class, gender, age, and sexual orientation, modern family issues, crime and violence, drugs, war and terrorism, global health, environmental factors affecting society and culture, poverty, and population growth. Critical thinking skills will be developed through class discussions, debates, and course assignments. (Recommendation(s): READ 0721 with a grade of “C” or better or appropriate assessment score.) (MnTC: Goals 5 & 8) 3C/3/0/0

SOCI 1730 Sociology of Families and Relationships
This course introduces students to the central ideas, challenges, theoretical perspectives and the diversity of human relationships, marriages and families. Global perspectives regarding families and the diversity of intimate relationships in contemporary societies will be discussed. Topics in this course could include the origins of marriage and diverse patterns of love, conflict, sexuality, parenting, single-hood, interpersonal violence, divorce, extended families and gender roles. Reading and examples will be drawn from societies around the world. Common myths and challenges related to stereotypes of the “typical” family and “functional” relationships will be explored. Critical thinking skills will be developed through class discussions, debates and course assignments. (Recommendation(s): READ 0721 with a grade of “C” or better or appropriate assessment score.) (MnTC: Goals 5 & 7) 3C/3/0/0

SOCI 1740 Making a Living in a Global Era:
Sociology of Work
Sociology of Work introduces students to theories, issues and perspectives about work and workplaces in a global economy. The course explores occupations and professions in historical and contemporary settings. The interdependence of economic, social and political factors that shape and change the nature of work are covered within a global context. (Recommendation(s): READ 0721 with a grade of “C” or better or appropriate assessment score.) (MnTC: Goals 5 & 8) 3C/3/0/0

SOCI 1760 Mass Media and Society
This course provides students with a general understanding of how mass media operate in society and the influence of media messages in the areas of print media, recordings, radio, cinema, advertising, public relations, digital media and the Web. The course will emphasize basic definitions and the functions of mass media forms and practices; general socio-cultural theories as they apply to human interaction; national and global communications; social theories of the mass media; and the impact of mass media on society. (Recommendation(s): READ 0721 with a grade of “C” or better or appropriate assessment score.) (MnTC: Goal 5) 4C/4/0/0

SOCI 1765 Sociology of Deviance
Sociology of Deviance introduces students to the nature and meaning of deviance in society as well as how individuals become deviant. Materials, lecture and exercises will challenge students to see the diversity in and pervasiveness of deviance in society by discussing a wide variety of deviant acts and examining the construction of deviance in terms of differential social power, whereby some members of society have the power to define other whole groups as “deviant.” A mixture of classic and contemporary readings that cover a wide range of issues in the United States and other parts of the world will be introduced, discussed and openly debated. (Recommendation(s): READ 0721 with a grade of “C” or better or appropriate assessment score.) (MnTC: Goals 5 & 7) 3C/3/0/0

SOCI 1770 Introduction to Criminal Justice
This course will introduce students to the major components of the American Criminal Justice System; specifically the police, corrections, and the courts. Students will discuss the various types of crime and how crime is measured. Additional topics may include; a brief history of crime and punishment, the development of the criminal justice system, causes of crime and victimization, styles of policing, levels of the court system, philosophies of punishment, juvenile justice and prison life. (MnTC: Goals 5 & 9) 4C/4/0/0

SOCI 1780 Social Psychology
This course focuses on social psychological theories and research to analyze how an individual’s thoughts, feelings and actions influence other people, social settings and institutions. Topics include perception, attribution, socialization, attitudes, conflict, altruism, groups, power, conformity, prejudice, collective behaviors and social movements. (Recommendation(s): READ 0721 with a grade of “C” or better or appropriate assessment score.) (MnTC: Goals 5 & 7) 4C/4/0/0

SOCI 1790 Special Topics in Sociology
This course provides learning experiences that meet the needs of students and pre-major course requirements in sociology. (Recommendation(s): READ 0721 with a grade of “C” or better or appropriate assessment score.) (MnTC: Goal 5) Variable credits. 1-3C/1-3/0/0

SOCI 2760 Sociology Through Film and Music
This course will explore the connection between music and film and the social context in which they are created. Students will learn how to view a film and listen to music critically so as to identify the social issues depicted in each format. Topics explored in this course may include racism, sexism, heterosexism, ageism, stereotypes, discrimination, violence, and crime. Major theoretical perspectives and research methods of society will be used in the analysis of films and songs. (Recommendation(s): READ 0721 with a grade of “C” or better or appropriate assessment score.) (MnTC: Goals 5 & 7) 3C/3/0/0
**Spanish**

**SPAN 1710 Beginning Spanish 1**
An introduction to Spanish based on real-life situations, as well as an introduction to various aspects of Hispanic societies. Comprehension and basic speaking skills are emphasized. Some reading and writing is required. The overall goal of this course is to provide students with the linguistic foundation necessary to later achieve proficiency in the Spanish language. No previous knowledge of Spanish is necessary. (MnTC: Goal 8) 5C/4/1/0

**SPAN 1720 Beginning Spanish 2**
A continuation of SPAN 1710. Emphasis is on extending skills in everyday spoken Spanish. (Prerequisite(s): SPAN 1710 with a grade of “C” or better or equivalent) (MnTC: Goal 8) 5C/4/1/0

**SPAN 1730 Intermediate Spanish 1**
This course provides a continued development of communication in reading, writing, listening and speaking. There is an emphasis on communicating ideas in writing and conversation. As a part of the course, students will be exposed to the cultures of Spanish-speaking people through art, literature and history. (Prerequisite(s): SPAN 1720 with a grade of “C” or better or Placement Exam or permission of Instructor) (MnTC: Goal 8) 5C/4/1/0

**SPAN 1740 Intermediate Spanish 2**
This course is a continuation of SPAN 1730. The course provides a continued development of communication in reading, writing, listening and speaking. There is an emphasis on communicating ideas in writing and conversation. As a part of the course, students will be exposed to the cultures of Spanish-speaking people through art, literature and history. (Prerequisite(s): SPAN 1730 with a grade of “C” or better or, or placement exam or permission of Instructor) (MnTC: Goal 8) 5C/4/1/0

**SPAN 1790 Spanish for the Workplace**
An introduction to basic Spanish conversational communication focusing on the specific context and situations of the workplace. The aim of this course is to achieve a basic level of proficiency in conversational Spanish to exchange information and perform basic everyday tasks. (MnTC: Goal 8) 3C/3/0/0

**Speech**

**SPCH 1700 Introduction to Speech Communications**
This course introduces the various principles of spoken human communication. Students will explore and practice the principles of effective oral communication within contexts of 21st Century life. Students will first practice development of the basic skills of this discipline and then demonstrate how to adapt these abilities to practical applications in both personal and business environments within various situations. (MnTC: Goals 1 & 8) 3C/3/0/0

**SPCH 1710 Fundamentals of Public Speaking**
This course covers the basic principles of preparing, researching and delivering informative, persuasive, impromptu and extemporaneous speeches. In addition, this course will include audience analysis and suggestions for overcoming speech anxiety. Students will analyze and evaluate the arguments and rhetorical methods used in public communication. (MnTC: Goals 1 & 8) 3C/3/0/0

**SPCH 1720 Interpersonal Communication**
This course focuses on the practical and theoretical concepts of human communications and the styles used in personal, social and professional environments. Students will also acquire skills in critical thinking, perception, listening, verbal and non-verbal expressions and conflict resolution. Students will evaluate their individual strengths and weaknesses in depth and develop techniques to improve interpersonal relations. (MnTC: Goals 1 & 7) 3C/3/0/0

**SPCH 1730 Intercultural Communication**
This course will study the influence of cultural differences on communication from both the sender and receiver of information. The course views the human communication process as it is influenced by nationality, ethnicity, linguistic development and gender. The course will explore the ways in which culture can shape the view of “reality” held by its members and influence communication patterns and cross-cultural relationships. Specifically the United States cultural orientations will be compared to those in other regions of the world. (MnTC: Goals 1 & 8) 3C/3/0/0

**SPCH 1740 Mass Media and Communications**
The influence of mass media communications on today’s culture is an important issue in the United States and throughout many parts of the world. Students will research the influence of mass media on society. Topics include: advertising, propaganda, ethics, First Amendment issues, the role of government, literacy requirements of a digital world and problems and criticisms of media. (MnTC: Goals 5 & 9) 3C/3/0/0

**SPCH 1745 Podcasting and Vodcasting Production**
This course introduces students to the study and exploration of art, science, techniques and performance within today’s broadcast mass media. Students will view, study, and then place into practical application the production techniques within major media while exploring the methods and styles of creative professionals. (MnTC: Goals 5 & 9) 3C/3/0/0

**SPCH 1750 Small Group Communication**
In this course students will study communication in small groups. Topics include effective group communication theory and skills; group leadership, cohesion and roles; conflict-resolution and decision-making; planning and conducting meetings; and parliamentary procedure. The course explores group functioning in a variety of settings, including the workplace. There is an emphasis on the practical application of the content and the practice of oral communication skills. (MnTC: Goals 1 & 9) 3C/3/0/0

**SPCH 1770 Family Communication**
This course centers upon the human communication process from within the contextual dimensions of diverse family units. Elements of study include family patterns and functions, which drive communication, relationship development and its barriers, and family role definitions and functions. The course is designed to provide a sense of understanding of how a family communicates, and the forces which influence the family unit, from both the inside and outside of various family configurations. (MnTC: Goals 1 & 5) 3C/3/0/0
SPCH 1780 Gender Communication
This course explores the many interconnected aspects of gender communication, enabling students to experience how gender, within communication and culture, creates, maintains, and changes interpersonal relationships. Various communication contexts covered in the course will include family, friendships, education, the media, the workplace, and other markers of identity. (MnTC: Goals 1 & 7) 3C/3/0/0

SPCH 1782 Organizational Communication
This course provides a balance between theory and practical information about communicating for results in the workplace. Students will apply interpersonal communication skills they have learned to the world of work. Topics include: communication process, organizational communication, effective listening, nonverbal communication, overcoming obstacles to organizational communication, employment interview, small group communication and problem-solving, and researching and delivering presentations in the workplace. (MnTC: Goals 1 & 7) 3C/3/0/0

Theatre

THTR 1710 Introduction to Theatre
This course introduces students to the study and exploration of theatre. Students will study the diversity of drama and explore the methods and styles of actors, directors, playwrights and designers. (MnTC; Goal 6) 3C/3/0/0

THTR 1720 Exploring the Theatre Arts
This course provides an introduction to the study of the various forms of theatrical arts and sciences. Students will participate in dramatic readings, acting, improvisation, stagecraft, costuming, stage management, scenic design, dramatic analysis and related practicum of the business of theatre. Students will visit local productions to assist in their understanding of the activities of theatrical professionals. (MnTC; Goal 6) 3C/3/0/0

THTR 1730 Theatre Stagecraft and Production
This course provides an introduction to Theatre Stagecraft and Production with units on acting, stage movement, set construction, painting, lighting, special effects, and scenic design, among other topics. Participation in current theatre production is required. (MnTC: Goal 6) 3C/3/0/0

Truck Technician

TRKM 1400 Introduction and Safety
This course will introduce the student to the trucking industry and the role of the student as a truck technician within this industry. Personal, shop, tool and environmental safety will be emphasized. 1C/0/1/0

TRKM 1521 Electrical 1
This course covers the design, theory of operation, repair procedures and diagnosis of batteries, lighting systems, instruments and accessories used in commercial trucks. 5C/1/4/0

TRKM 1522 Electrical 2
This course covers the design, theory of operation, repair procedures and diagnosis of starting systems, charging systems and an introduction to electronic systems used in commercial trucks. 5C/1/4/0

TRKM 1551 Clutch and Transmission
This course covers the design, theory of operation, repair procedures and diagnosis of clutches and manual transmissions used in commercial trucks. 5C/1/4/0

TRKM 1552 Driveshafts and Differentials
This course covers the design, theory of operation, repair procedures and diagnosis of drive shafts and differentials used in commercial trucks. 4C/1/3/0

TRKM 1553 Automatic and Automated Transmission
This course covers the design, theory of operation, repair procedures and diagnosis of automated manual transmissions and automatic transmissions used in commercial trucks. 4C/1/3/0

TRKM 1560 Truck Brake Systems
This course covers the design, theory of operation, repair procedures and diagnosis of hydraulic and air brake systems used in commercial trucks. 6C/1/5/0

TRKM 2401 Steering and Suspension Systems
This course covers the design, theory of operation, repair procedures and diagnosis of steering, suspension and chassis components used in commercial trucks. 6C/1/5/0

TRKM 2425 Truck Cab Climate Control Systems
This course covers the design, theory of operation, repair procedures and diagnosis of the heating, ventilation and air conditioning systems used in commercial trucks. 3C/1/2/0

TRKM 2440 Gasoline Engines
This course covers the design, theory of operation, repair procedures and diagnosis of gasoline engine fuel and ignition systems used in commercial trucks. Engine overhaul procedures will also be covered. 6C/1/5/0

TRKM 2511 Diesel Engines 1
This course covers the design, theory of operation, repair procedures and diagnosis of diesel engines used in commercial trucks. 6C/1/5/0

TRKM 2512 Diesel Engines 2
This course covers the design, theory of operation, repair procedures and diagnosis of mechanical and electronic fuel systems used on diesel engines in commercial trucks. 6C/1/5/0

TRKM 2540 Preventive Maintenance
This course covers the preventive maintenance practices used to keep commercial trucks and trailers in proper and safe working order. Shop procedures, record keeping, computer usage and job seeking skills will also be covered. 3C/1/2/0
Watchmaking

WMCM 1200 Micro Mechanics - Filing 1
In this course students will learn the fundamentals of the micro mechanical processes by acquiring skills and knowledge through the use of hand tools such as hand files, jewelers’s saw and various vices and clamps. Students will make many tools required in later courses while starting to build the dexterity needed for this field of study. The proper use of measuring instruments, the reading of technical diagrams and metallurgy will be introduced. (Prerequisite(s): Must be accepted into the micromechanical major program.) 5C/2/3/0

WMCM 1201 Micro Mechanics - Filing 2
In this course students will learn to utilize the tools they made in the previous course to hand file precision flats and spheres. Emphasis will be placed on the production of pieces to close tolerance specifications. The use and function of optical magnification for inspection will be taught and used to assess the student’s capabilities. Can be taken concurrently with WMCM 1200. 5C/2/3/0

WMCM 1202 Micro Mechanics - Turning 1
In this course students will learn the proper use and function of a watchmaker’s lathe and turns to make cylindrical shapes to precise measurements. The students will learn to shape, sharpen and use hand gravers to cut brass and steel wire. The cutting of right angles and radii will be introduced. Can be taken concurrently with WMCM 1200. 5C/2/3/0

WMCM 1203 Micro Mechanics - Turning 2
In this course students will build on the skills, knowledge and dexterity acquired in previous courses by turning wire to smaller dimensions and to closer tolerances. The burnishing of metals for appearance and strength will be introduced. An assessment of student learning to date will be given and graded by Swiss industry professionals. Can be taken concurrently with WMCM 1200. 5C/2/3/0

WMCM 1204 Micro Mechanics - Tool Making 1
In this course, students will learn the basics of mechanical interaction through the use of a tap and die to form internal as well as external threads and the hand fitting of components to extremely close tolerances. Students will also learn hardening techniques to make springs of various shapes, sizes and uses. The decorative finishing of metals will be introduced. (Prerequisite(s): WMCM 1203) 5C/2/3/0

WMCM 1205 Micro Mechanics - Tool Making 2
In this course students will put to use all the skills and knowledge acquired in the filing, turning and tool making courses to manufacture precision and complex tools and devices. The student will also learn connection techniques such as soldering and gluing. The polishing and plating of metals will be introduced and an electronic portfolio of work will be created. Can be taken concurrently with WMCM 1204. 5C/2/3/0

WMCM 1206 Micro Mechanics - Mainsprings
In this course students will learn through theory and practical exercises the use of mainsprings as a power source for micro mechanical mechanisms. The students will also learn to fit arbors for proper end-shake and side-shake. Bearing surfaces and lubrication will be introduced. (Prerequisite(s): WMCM 1205) 5C/2/3/0

WMCM 1207 Micro Mechanics - Gear Train
In this course students will learn the theory of wheel and pinion ratios through the use of algebraic calculations as well as the practical application of power transmission through the gear train. Students will also learn to set jeweled bearings and precision oiling. Wheel truing and pivot straightening will be introduced. Can be taken concurrently with WMCM 1206. 5C/2/3/0

WMCM 1208 Micro Mechanics - Escapement
In this course students will learn the theory of escapements developed throughout history and its relationship to precision timekeeping. In practical application students will perform balance staff replacements, truing and poising manipulations to modern and antique balance wheels. Roller jewel replacement will be introduced. Can be taken concurrently with WMCM 1206. 5C/2/3/0

WMCM 1209 Micro Mechanics - Balance Wheel
In this course students will learn the theory of balance wheel development throughout history and its relationship to precision timekeeping. In practical application students will perform balance staff replacements, truing and poising manipulations to modern and antique balance wheels. Can be taken concurrently with WMCM 1206. 5C/2/3/0

WMCM 1210 Micro Mechanics - Hairspring 1
In this course students will learn the fundamentals of hairspring manipulation by straightening hairsprings in the flat and round as well as forming and correcting over-coils. (Prerequisite(s): WMCM 1209) 5C/2/3/0

WMCM 1211 Micro Mechanics - Hairspring 2
In this course students will learn to collect, vibrate and study hairsprings for several modern movements. Students will also learn the formation of terminal curves in relation to the regulating pins. Can be taken concurrently with WMCM 1209. 5C/2/3/0

WMCM 1212 Micro Mechanics - Timing
In this course students will learn to use the timing machine and amplimeter as a diagnostic tool and a means of assessing beat and timing errors. Can be taken concurrently with WMCM 1209. 5C/2/3/0

WMCM 1213 Micro Mechanics - External Parts and Capstone
In this course students will learn to replace dials, hands, crowns, crystals and gaskets. Students will also learn waterproof testing, case refinishing and band sizing. Students will also complete their college watch and electronic portfolio. Can be taken concurrently with WMCM 1209. 4C/0/4/0

WMCM 1480 Horological Lab 1
This horological lab is designed to allow completion of hands-on skill activities and enhance the practical aspects of courses related to WMCM courses. 3C/0/3/0

WMCM 1580 Horological Lab 2
This horological lab is designed to allow completion of hands-on skill activities and enhance the practical aspects of courses related to WMCM courses. 3C/0/3/0
WELD 1110 Gas & Arc Welding
The student will build proficiencies in oxygen/acylene weld, cutting, and brazing in all positions as well as learning the fundamentals of shielded metal arc weld with various weld rods in all positions to meet industry standards. The student may wish to continue taking this course to upgrade their skills. 2C/0/2/0

WELD 1120 GTA(Tig) & GMAW(Mig) Welding
The student will build proficiencies, to meet industry standards, in MIG and TIG welding in all positions on mild steel, stainless, and aluminum. The student may wish to continue taking this course to upgrade their skills. 2C/0/2/0

WELD 1410 Oxy-Acetylene Welding, Cutting & Brazing
Covers the theories and concepts necessary for an understanding of basic oxy-acetylene welding, cutting and brazing processes. Emphasis will be on safe work habits and industry standards. 3C/1/2/0

WELD 1420 SMAW E6013
Covers the theories and concepts necessary for the introduction of the Shielded Metal Arc Welding (SMAW) process using E6013 in the flat and horizontal position, along with the use and care of SMAW equipment. Industry standard and safety practices will be emphasized. 3C/0/3/0

WELD 1431 Blueprint Reading 1
Designed to cover such fundamental principles of drawing interpretation as may be required by the layout welder and setup person. To accomplish this objective, basic lines and the functions are studied and projects are assigned. 2C/2/0/0

WELD 1432 Blueprint Reading 2
This course is part of the study beyond the core of blueprint reading skills in the development of a full knowledge of welding symbols as specified by the American Welding Society. Each type of weld and its related joint preparation is represented by a specific weld symbol. Size, shape, length, type of process and joint configuration are part of the symbols. (Prerequisite(s): WELD 1431 or instructor approval) 2C/2/0/0

WELD 1440 Basic SMAW E6010
Covers basic concepts and theory in the SMAW process using the E6010 electrode in the flat, vertical and overhead positions and the AWS terms used for parts of a weld. Safety and industry standards will be emphasized. 3C/0/3/0

WELD 1450 E7018 Advanced SMAW
Covers the manipulative skills and procedures necessary for the completion of E7018 Shielded Metal Arc welds in all positions. Weld testing procedures will be stressed. 3C/0/3/0

WELD 1465 Metallurgy and Welding Theory
This course introduces the practices and procedures necessary for completion of single and multi-pass welding. The course also covers basic knowledge of metallurgy and testing equipment used in the welding field. Quality control will be emphasized. 2C/1/1/0

WELD 1470 Measuring Devices
Covers the use of different measuring devices used in the metal and welding trades. 1C/1/0/0

WELD 1510 Areas Layout
Covers the calculation of the area of geometric figures for use in layout and cutting operations. This knowledge and hands-on activities are essential for the success in the field for welders and metal fabricators. 2C/1/1/0

WELD 1520 GMAW Short Arc
Provides students with the opportunity to build proficiency in the GMAW (Gas Metal Arc Welding) process using the short arc transfer with mild steel. All positions will be covered. Student will be expected to work to industry standards for apprentice welders in the area of quality and efficiency. 3C/1/2/0

Welding Fabrication

WELDC 2300 Watchmaking - Calendar
In this course students will learn the theory of historical and modern watch calendar mechanisms. Practical skills will be taught on several modern calendar movements. Instantaneous, non-instantaneous and quick-set mechanisms will be covered. Must be accepted into the Watchmaking Certificate Program. 5C/2/3/0

WELDC 2301 Watchmaking - Automatic
In this course students will learn the theory of historical and modern automatic winding watch mechanisms. Practical skills will be taught on several modern automatic movements. Can be taken concurrently with WELDC 2300. 5C/2/3/0

WELDC 2302 Watchmaking - Quartz
In this course students will learn to diagnose and repair quartz watch movements. The proper use of electronic diagnostic equipment to determine resistance, low voltage working limit and consumption will be covered. (Prerequisite(s) : WELDC 2301) 5C/2/3/0

WELDC 2303 Watchmaking - Precision Timing
In this course students will learn the theory of dynamic poising, Isochronism and chronometric standards. The students will apply this knowledge by precisely timing several timepieces of suitable quality. Can be taken concurrently with WELDC 2302. 5C/2/3/0

WELDC 2304 Watchmaking - Chronograph
In this course students will learn to diagnose, disassemble, reassemble and adjust chronograph movements. Cam, pillar wheel and other chronograph movements will be covered in detail. Can be taken concurrently with WELDC 2302. 5C/2/3/0

WELDC 2305 Watchmaking - Capstone/Career Preparation
This course will serve as final preparation for capstone assessment such as the AWI Certified Watchmaker examination, the Saint Paul College Certified Watchmaker examination and the WOSTEP final examination. The students will also receive training in workshop organization, resume writing, interviewing skills and job searching options. Can be taken concurrently with WELDC 2302 through 2304. 5C/2/3/0

WELDC 2480 Horological Lab 3
This horological lab is designed to allow completion of hands-on skill activities and enhance the practical aspects of courses related to WELDC M courses. 3C/0/3/0
WELD 1530 Inspection, Qualification and Carbon Arc
Provides students with the opportunity to build proficiency in E7018 Shielded Metal Arc Welding for MNDOT and AWS standards. The use of carbon arc cutting will also be covered. Students will be expected to work within industry standards for apprentice welders in the areas of quality and efficiency. 3C/1/2/0

WELD 1540 GMAW Spray & Pulse Spray
Provides students with the opportunity to build proficiency in the GMAW process using the spray and pulse spray transfers with mild steel. All positions will be covered. Students will be expected to work to industry standards for apprentice welders in the area of quality and efficiency. 3C/0/3/0

WELD 1550 GMAW Aluminum & Stainless Steel
Provides students with the opportunity to build proficiency in the GMAW process using Aluminum and Stainless Steel. The introduction of the Aluminum and Stainless numbering system will be covered. Students will be expected to work to industry standards for apprentice welders. 3C/0/3/0

WELD 1560 Grinding and Finishing
This course is designed to build proficiency in the grinding, finishing and preparation of welds and other products used in the industry. The student will be expected to work within industry standards for apprentice welders and grinders. Live projects will be supplemented with assigned projects. 2C/1/1/0

WELD 1561 Radan Drafting Solutions
This course introduces the practices and procedures for the use of Radan software in the Fabrication field. Students will be required to work within industry standards for metal layout. 2C/2/0/0

WELD 1562 Introduction to Ornamental Welding
This course introduces the practices and procedures necessary for ornamental iron and the basic layout and designs that are used in this field. Previous Welding and Cutting class recommended. 1C/1/0/0

WELD 2410 GTAW for Mild Steel
Provides students with the opportunity to build proficiency in the GTAW process with mild steel in all positions. The student will be expected to work to industry standards for apprentice welders in the areas of quality and efficiency. 3C/1/2/0

WELD 2420 GTAW Aluminum & Stainless Steel
Provides the student with the opportunity to build proficiency in the GTAW process using Aluminum and Stainless Steel in all positions. The student will be expected to work to industry standards for apprentice welders in the areas of quality and efficiency. 3C/0/3/0

WELD 2430 Volumes Layout
Covers the volumes of geometric figures used in the layout and shearing operations. This knowledge and hands-on application is essential to welding and metal fabrication. (Prerequisite(s): WELD 1510 or instructor approval) 2C/1/1/0

WELD 2440 FCAW & SAW Process
Designed to build proficiency in FCAW and SAW processes. The student will be expected to work within industry standards for apprentice welders. Live projects will be supplemented with assigned projects. 3C/0/3/0

MS, Purdue University  
MS, Ohio University

Krug, Manfred  
Culinary Arts  
Diploma, Saint Paul College—A Community & Technical College  
BS, University of Wisconsin-Stout  
AOS, Culinary Institute of America

Leggs, Michael  
English  
BA, Kansas State University  
MA, Kansas State University

Loewen, Kendal  
Computer Careers  
BS, University of Minnesota  
Master of MIS, Metropolitan State University

Massa, Janet  
Child Development Careers  
BS, University of Wisconsin, Stout  
MA, Concordia College

Maus, Craig  
Hospitality Management  
AA, North Hennepin Community College  
BA, Minnesota State University-Mankato  
MBA, University of St. Thomas

Mbonifor, Patience  
Practical Nursing  
BSN, Bethel University

McClure, Laura  
Practical Nursing  
BS, Winona State College

McDonald, Mary  
Practical Nursing  
RN, Lutheran Deaconess Hospital

McDonald, Perpetua  
Practical Nursing  
BS, South Dakota State University

McGuire, Ron  
Sheet Metal  
Diploma, Saint Paul College—A Community & Technical College  
BA, National Labor College

Mckown, Kelly  
Child Development  
BS, California State University  
MS, University of Wisconsin, Stout

Mehmood, Nasreen  
Biology  
BS, Osmania University  
MS, Osmania University  
PhD, Osmania University, India
Mills, Anita
Health Unit Coordinator
BA, Concordia University

Murray, Terry
Machine Tool Processes
Diploma, Saint Paul College—A Community & Technical College

Nguyen, Francois
Mathematics
BA, University of St. Thomas
MEd, University of LaVerne

Nordstrom, Robert
Pipefitting
Diploma, Saint Paul College—A Community & Technical College

O’Connell, Patricia
Interpreter Training Program
BS, University of Wisconsin, Madison

Olson, Mary
Practical Nursing
AS, Century College
BSN, Bethel University

Olson, Kelly
Human Resource Management
AS, Saint Paul College
BA, St. Mary’s University
MBA, University of Phoenix

Olson-Sartain, Jennie
Reading
BS, University of Minnesota
MA, College of St. Catherine

Paulnock, Daniel
Speech
BS, Emerson College
MS, Emerson College

Pearson, Darren
Computer Careers
BSEE, University of North Dakota
MS, University of Minnesota

Pelton, Jerry
Culinary Arts
Diploma, Madison Area Technical College

Poth, Lynn
Medical Laboratory Technician
BS, University of Texas, El Paso
MS, University of North Dakota

Pyzik, Linda
Business Technology Careers
BS, University of Minnesota
MEd, University of Minnesota

Rafferty, Patrick
Truck Technician
Diploma, Saint Paul College—A Community & Technical College

Rasmussen, Greg
Electronic Technology
Diploma, Saint Paul College—A Community & Technical College

Reasoner, David
Construction Electricity
Diploma, Saint Paul College—A Community & Technical College
AES, Normandale Community College
BS, University of Wisconsin, Stout

Reigstad, Shelby
Speech
BS, St. Cloud State University
MA, Bethel College

Rock, Jayne
English
BA, St. Cloud State University
BA, South Dakota State University
MA, Saint Cloud State University

Roethke, Leigh
Art
BFA, Savannah College of Art & Design

Russell, Judy
Respiratory Care
AAS, Pima College, Arizona

Sartain, Jeremy
Massage Therapy
BA, University of Minnesota, Duluth

Saucedo, Dominic
English
BA, Carleton College
MA, University of St. Thomas

Schmitz, Lisa
Mathematics
Psychology
BS, University of Wisconsin, River Falls
MS, University of Minnesota
MA, University of St. Thomas

Schones, Edward
Construction Electricity
BA, Macalester College
MA, University of Minnesota

Selton, Julie
Construction Electricity
AA, Anoka-Hennepin Technical College

Senger, Susan
International Trade Careers
BA, College of St. Scholastica
MA, College of St. Scholastica
Setley, Keith  
Construction Electricity  
AA, Saint Paul College—A Community & Technical College  
BS, University of Wisconsin-Stout

Shariff, Ayesha  
History  
BA, University of Wisconsin, Madison  
PhD, University of Wisconsin, Madison

Sheaffer, Warren  
Computer Careers  
BS, University of Pittsburgh  
MBA, University of Pittsburgh  
MST, Massachusetts Institute of Technology

Shoemake, Nancy  
Accounting  
BS, Louisiana Tech University  
MBA, Aspen University

Skally, Sharon  
Practical Nursing  
BS, Augustana College

Starkey, Penny  
Chemistry  
BS, University of St. Thomas  
PhD, University of Minnesota

Stewart, Ruben  
Floor Covering

Stillman, Alexandra  
Psychology  
BA, Wellesley College  
MBA, University of Minnesota  
MHA, University of Minnesota  
MPH, University of Minnesota  
MA, St. Mary's University of Minnesota  
PhD, Utah State University

Strand, Timothy  
Carpentry  
Diploma, Saint Paul College—A Community & Technical College  
AAS, Inver Hills Community College

Su, Ba  
Mathematics  
BS, University of Wisconsin, River Falls  
MS, Iowa State University

Sundlie, Jolene  
Sociology  
BA, Moorhead State University  
MS, North Dakota State University

Tarrell-Florey, Amy  
English as a Second Language  
BA, Washington University in St. Louis  
MA, University of Minnesota

Taylor, Susan  
English  
BA, California State University – Los Angeles  
MFA, University of Minnesota

Thompson, Douglas  
Watch, Clock & Jewelry Repair  
Diploma, Saint Paul College—A Community & Technical College

Tri, Ben  
Librarian

Directions & Parking

Easy to Find. Easy to Get To.

Saint Paul College is centrally located and convenient to get to, whether you’re driving or coming by bus. Our campus is located in the heart of Saint Paul’s Cathedral Hill on the corner of John Ireland Boulevard and Kellogg Avenue. We are just blocks from the State Capitol, History Center, downtown Saint Paul and numerous coffee shops, great restaurants and the Xcel Energy Center, home of the Minnesota Wild.

Directions

From the South (35E)
Take the Kellogg Boulevard Exit, turn left. Continue to John Ireland Boulevard, turn left at the traffic light. Continue to Marshall Avenue, turn right.

From the North (35E)
From the East (I-94W)
Take the Marion Street Exit, turn left passing over the freeway. Continue on Kellogg Boulevard to John Ireland Boulevard, turn right at the traffic light. Continue to Marshall Avenue, turn right.

From the West (I-94E)
Take the Marion Street Exit, at the top of the exit ramp take a right onto Kellogg Boulevard. Turn right at traffic light onto John Ireland Boulevard. Continue to Marshall Avenue, turn right.

Bus Information

Saint Paul College is also easy to reach by bus. Routes 12, 21, 65, 94B and 94L service the College directly.

Other routes such as 5, 9, 10, 14, 15 and 31 drop off passengers within walking distance of the College.

Visitor Parking

The short-term/daily lot (pay upon exit) is located in the lot west of the building.
Parking Information

Parking Lots/Designated Parking Areas

Parking Hours:
Monday - Friday, 6:00am - 10:00pm
Saturday, 7:00am - 3:00pm

Visitor Parking / Short Term Parking
- Handicap parking is available in the DAILY/VISITOR LOT and the lot west of the College (Lot B).
- VISITOR PARKING is available in the DAILY/VISITOR PARKING LOT, west of the College (Lot B).

LOTS B, C, D, E:
- Student Parking – Must have current permit.

LOT F:
- Staff Parking – Must have current permit.
- Overflow parking in Lots D & E.

SERVICE & COLLEGE VEHICLE Lot:
- Service Lot is designated for Services Vehicle parking only. All vehicles in this area must be marked (Company Name and Working at the College) or they will be ticketed.

Reserved Motorcycle Parking:
- Located at the east end of Lot B along the guard rail and at the east end of Lot F. No permit required but motorcycle must be registered with the school.

NO PARKING ZONES:
- Any space marked 24 Hour without a special permit.
- Any handicapped space without a legally displayed sticker or license plate.
- Fire lanes. To include leaving room for a minimum of two vehicles to pass at the end of each row.
- Front circle drive.
- Front of any garage doors.
- Any Right of Way areas. This includes the area north of the Truck and Fabrication Shops to allow for oversized vehicle maneuvering.
- Any areas not paved or designated for parking. This includes sidewalks, curbs, and lawns.
- No overnight parking.

If You Receive a Citation for a Parking Violation

If you receive a citation for a parking violation, payment is to be directed to the Tuition Office and requires a copy of the citation. Payment is due fifteen (15) business days from the date the citation was issued. Checks are to be made payable to Saint Paul College. If the citation is not paid within fifteen (15) business days, a $25.00 late fee will be added to the fine. You may appeal your citation within fifteen (15) business days from the date the citation was issued. Appeal forms are available at the SECURITY OFFICE. The form must be filled out completely to be considered. If you fail to pay your parking citation(s), the fine(s) will be placed on your student record and you will be unable to get a copy of your transcript until the fine is paid. The debt will be submitted to Minnesota Collection Enterprise for collection.

It is mandatory that all motor vehicles parked on Saint Paul College campus have a registered parking permit. Registration is considered complete when the permit is properly affixed to the vehicle being registered. A vehicle registration from the State of Minnesota will be obtained on vehicles not registered, that are ticketed and the fine is not paid. A $5.00 service charge will be added to the ticket.
