

## Supply Chain Logistics AAS DEGREE

### Program Overview

Logistics management is concerned with the procurement, movement, storage and processing of materials and information across the whole of the supply chain, from acquisition of raw materials and components, through manufacturing, to delivery of finished products to end users.

This program provides students the opportunity to understand modern supply chain management. Supply Chain management demands a multidisciplinary and cross-functional approach to business that transcends the traditional functional boundaries and management disciplines that characterize many organizations.

### Career Opportunities

Supply Chain Logistics offers a wide variety of employment opportunities. Some of these are purchasing and supplier management, manufacturing logistics, inventory management, transport management, distribution, warehousing management, customer service management, information management and logistics and supply chain strategy. Because of the wide range of jobs open to graduates, prospective students are asked to consult with the program instructor for specific job forecasts.

### Program Outcomes

1. Apply logistics and purchasing concepts to improve supply chain operations.
2. Analyze and improve supply chain processes.
3. Align the management of a supply chain with corporate goals and strategies.
4. Apply logistics to transportation and warehousing processes.
5. Apply fundamental supply chain management concepts to evaluate an effective supply chain.

The mission of the Business Department at Saint Paul College is to sustain the College mission by providing quality, lifelong business education supported by technology for a diverse, metropolitan student population.
